Mightier than THE SWORD...

The habits of nations may be repressed by the sword....but never can they be broken. In the persuasion of the printed word....not in the brute force of arms.....lies the power to control and direct the will of the public.

Print is the keenest weapon in the armoury of modern salesmanship but it is two-edged. Cheap print destroys the prestige and lowers the sales of its sponsor. Only good print, attracting immediate attention and inspiring full confidence, can overcome competition, cut selling costs and steadily increase sales.

FOR quotations and ideas for catalogues, calendars, booklets, folders, leaflets, letterheads, etc., write to the Business Manager, The Times of India Press, Hornby Road, Bombay.

NEW & REVISED :EDITION

SANITATION IN INDIA

PREFACE

a Oa

THE Editor has to thank many correspondents who during the past year have sent him suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editor by various officials, and more particularly by Departments of the Central and Provincial Governments, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editor at any time, but those which reach him before January have a better chance of being adopted than later suggestions which arrive only after the work of revision has been partly completed.

The Times of India, Bombay.

July, 1939.

An Indian Glossary.

IBKARI .- Excise of liquors and drugs.

ASUddhar. -- Untouchable (Hindi) Asuddhar.

URID, UDID.—A pulse, 'black grain ' (PHA-SEOLUS MUNGO).

URUS.—Mahomedan fete held in connexion with celebration at the tomb of a saint.

USAR.—Soil made barren by saline efforescence, Northern India,

USTAD.—Master, teacher, one skilled in any art or science.

UPERAMEA.— Among Hindus, consolation visit paid on second or third day after the death of a porson. Among Parsis, a religious ceremony held on the third day after the death of a person.

VARIVATDAR.—Officer in charge of a revenue sub-division, with both executive and magisterial functions, Baroda; syn. tahsildar.

VAID or Baidya (is also a caste in Bengal).—A native doctor practising the Hindu system of medicine.

VANIL.—(1) A class of legal practitioners; (2) an agent generally.

VEDA .- Revealed sacred books of Hindus.

VEDANTA.—The philosophy of the Upanishads.

VIHARA .-- A Buddhist monastery.

VILLAGE.—Usually applied to a certain area demarcated by survey, corresponding roughly to the English parish.

VILLAGE UNION.—An area in which local affairs are administered by a small committee.

WAAZ .-- Mahomedan sermon.

WADA or WADI.—(1) An enclosure with houses built round facing a centre yard; (2) private closed land near a village.

WAKE.—A Muhammadan religious or charitable endowment.

WALL.—Like "Sardar." The Governor of Khelat is so termed, whilst the Chiefs of Kabul are both "Wall" and "Mir."

WAO .- A step well.

WATAN.—A word of many senses. In Bombay Presidency used mostly of the land or cash allowance enjoyed by the person who performs some service useful for Government or to the village community.

WAZIR.—The chief minister at a Mahomedan court.

WET BATE.—The rate of revenue for land assured of irrigation.

WRITER. -South Indian equivalent of babu.

YAMA,-Hindu god of death.

YOGA.—A system of Hindu philosophy. Practice of breath control, etc., said to give supernatural powers.

Yogi.—A Hindu ascetic who follows the Yoga system, a cardinal part of which is that it confers complete control over bodily functions.

YUNANI.—Lit. Greek; the system of medicine practised by Mahomedans.

ZABARDAST.—Lit. "Upper hand," hence strong, oppressive.

ZABARDASTI .-- Oppression.

ZAMINDAR .- A landholder.

EAMINDARI.—(1) An estate; (2) the rights of a landholder, samindar; (3) the system of tenure in which land reveaue is imposed on an individual or community occupying the position of a landlord.

ZANANA.—Of women. Women's apartment, harem.

ZIARAT.—Pilgrimage. Ziarat-gah, any shrine or tomb to which people go in pilgrimage.

ZIKE.—Commemorative prayer said at the tomb of the prophet or a Mahomedan saint,

ZILA .- A District.

ZOR-TALABI.—Tribute paid to Junagadh Darbar by numerous Kathiawar States.

ZULE, ZULUE,-Tyranny, Oppression.

Manners and Customs.

Next to the complexion of the people, which varies from fair to black, the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the loins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the precincts of civiliastion and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich. The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress.-The next stage in the evolution of the Hindu dress brings the joincloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to befit the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an is often worn a coat or a shirt. When a mildian appears in his full Indigenous dress, he wears a long robe, reaching at least down to the calves: the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over right. A shawl is tied round the waist over the iong coat, and serves as a belt, in which one may carry money or a weapon, if allowed. The greatest variety is shown in the head-dress. More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombey. In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and cultudars other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles: folded brims, projecting brims: long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions beas of the markets but the base been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he halls from Poons or Dharwar, Ahmedabad or Bhavnagar,

Fashion Variations.—Fashions often vary with elimate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as he must work for long hours in water, he does not cover his legs, but suspends only a coloured kerchist from his water in front. The Pathan

of the cold north-west wears loose baggy trousers, a tail head-dress betitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengai and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes; notably the Indian Christians and Parsis. Most Parsis however have retained their own head-dress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes: those who can afford them wear sandals, slippers and shoes, and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes.—The usual dress of a woman consists of a iong piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head. The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice: on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussainan ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a veil when they appear in public: a few converts from Hindullsm have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussaiman practice of seclusion. In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do. The former generally remove the hair from a part of the head in front, over the tempes, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussaimans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society. Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the waist until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like

the lotus, the rose, and the champaka, are among the most popular object of representation is gold or silver.

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast-days. It may be red, or yellowish as when it is made with ground sandaiwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines, made with sandaiwood paste or ashes. Some Vaishnavas stamp their temples, near the corners of the eyes, with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandaiwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil, and berries of Rudraksha eleocarpus ganitrus, stung together are worn round their necks by Vaishnavas and Shaivas,

respectively. The Lingayats, a Shaiva sect suspend from their necks a metallic cashed containing the Linga or phalius of their ged. Sairagis, ascetics, besides wearing Budraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry pescock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, nor may they deck themselves with flowers or cornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric, so that they may shine like gold. The choice of the same oclour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikii Akail is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a delty. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother, or sister, as the case may be. This practice survives among the higher classes as well. Appa Saheb, Anna Rao, Bahaji, Bapu Lai, Bhai Shankar, Tatacharya, Jijibhal, are names of this description, with honoride titles added. It is possible that in early society the belief in the re-birth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red: gold or silver: gem. dismood, ruby, pearl, or merely a stone: small or tall, weak or strong: a lion, a snake, a parrot, or a dog: and to name a woman after a flower or a creeper. Thus, to take a few names from the epics. Pandu means white, and so does Arjuna; Krishna black; Bhima terrible: Nakula a mongoose; Shunaka a dog : Shuka a parrot : Shringa a horn. Among the names prevalent at the present day Hira is a diamond: Ratna or Ratan a jewel: Sonu or Chinna gold : Velii or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities, they practically enter upon a new stage of civilisation. It is doubtful whether the Animists ever venture to assume the names of the dreaded spirits worshipped by them. To pronounce the name of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings, the reason seems to be that they were originally human.

High-caste practices.—The high caste Hindu, on the other hand, believes that the more often the name of a delty is on his lips, the more merit he earns. Therefore he deliberately names his children after his gods and goddeeses, so that he may have the opportunity of pronouncing the holy names as frequently as possible. These are also sonorous and picturesque. Shiva is happy: Visham is a pervader: Govinda is the cowherd Krishna: Keshava has fine hair: Rama is a delighter: Lakshmana is lucky: Narayana produced the first living being on the primeval waters: Ganesha is the Lord of Shiva's hosts: Dinakara is the luminary that makes the day: Subrahmanya is a brother of Ganesha. Sita is a furrow: Savitri a ray of light: Tara a star: Radha prosperity: Bukmini is she of golden ornaments: Bnama of the growing heart. Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn upon and paraphrased in naming one's children; and the whole Hindu pantheon is as crowded as it is large.

Family names.—When a person rises in importance, he adds to his personal name a family or caste name. It was once the rule, that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Gunta to a Vaishyas, and Desa to a Shadra's This rule is fairly well observed in the case of

the first two titles, but the meaning of the other two has changed. Dasa means a slave or servant, and the proudest Brahman cannot disdain to call himself the servant of some god. Thus, although Kalidas, the famous poet, was a Shudra, Bamadas, the famous guru of Shivall, was a Brahmin. The Vaishnavas have made this fashion of calling oneself a servant of some god exceedingly popular, and in Western India high caste Hindus of this sect very commonly add Das to their sames. The Brahmans of Southern India add Alyer or Aiyaugar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukerji, are among the titles indicative of the Brahmanical profession of studying and teach-Brahmanical profession of studying and teaching the sacred bools. Among warlike classes, like the Rajputa and Sikha, the title Singh (lion) has become more popular than the ancient Varma. The Sindl: Mal, as in Gidumal, means brave and has the same force. Raja changed into Raya, Rao and Rai was a political title, and is not confined to any caste. The Bengali family names, like Bose and Ghose, Bart and Mitter and Juhe anable one Dutt and Mitra, hen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed. Shet, chief of a guild or a town, becomes Chetty, a Vaishya title, in Southern India. Mudaliyar and Nayudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers. Nayar and Menon are the titles of important castes in Malabar. Ram, Lai, Nand, Chand, are among the additions made to personal names in Northern India. Sumines like Ji, as in Ramji or Jamshedji, the Kanarese Appa, the Teiugu Garu, the feminine Bal or Devi, are honorific. Prefixes like Babu, Baba, Lala, Sobhi, Pandit, Raja, and the Burmese Maung are also honorific.

Professional names.—Family names semetimes denote a profession: in some cases there might have been conferred by the old rules. Mehta, Kuikarni, Deshpande, Chitnavis, Mahainavis are the names of offices held in former times. One family name may mean a flour seller, another a cane-seller, and a third a liquor-seller, To insert the father's name between one's personal and the family name is a common practice in Western ladie. It is rare elsewhere. When a family comes from a certain place, the suffix 'kar' or 'wallah' is added to the name of the place and it makes a family surname in Western India. Thus we may have Chiplunkars and Suratwallahs, or may have Chiplumkars and Suratwallaha, or without these affixes we may have Bhavnagris, Malubaris and Bilimorias, as among Parais. Thus Vasudev Pandurang Chiplumkar would be a Hindu, whose personal name is Vasudev, his father's name Pandurang, and family name derived from the village of Chiplum, is Chiplunkar. In Southern India the village name precedes the personal name. The evolution of Musalman names follows the same lines. of Musaiman names follows the same lines as Hindu names. But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as iong and picturesque as Hindu appellations. The agnomens Baksh, Din, Ghulam, Khwaje, Fakir, Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others, as well as honorific additions like Khan have, meanings which three light on Muslim have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the case of Hindus in Western India. Batilwallah, Readymoney, Contractor, Sakiatwallah, Aden-wallah and others like them are tell-tale names.

Indian Art.

In India there has never been so marked a separation between what are now known as the Fine Arts, and those applied to industry as was the case in Europe during the nineteenth century. As, however, Industrial art forms the subject of a special article in this book, the term Indian Art will here be confined to Architecture, Sculpture and Painting.

Historical.—The degree of proficiency attained in art by Indians prior to B.C. 250, can only be conjectured by their advancement in literature; and by the indirect evidences of indebtedness shown by the works of the historic period, to those which preceded them; or direct records of artistic work of an earlier date than B.C. 250 do not exist. The chief historic schools of architecture are as follows:-

Name. Locality of the best Dates. Examples.

Buddhist .. B.C.250-Ellora, Ajanta, Kali, A.D.750. Sanchi.

..A.D.1000-1800. Brahminical., A.D. \$30 to Ellora, Elephanta,

Ellora, Mount Abu, Palitana. the present Orissa, Bhuvanes-

Name. Dates. Locality of the best Examples. Chalukyan ..A.D.1000-Umber. Somnathpur.

1200. Ballur. ..A.D.1350-Dravidian Ellora, Tanjore, Ma-1750. dura, Tinnevelly, Pathan ..A.D.1200-Delhi, Mandu, Jaun-

1550. pore. Indo-Saracenic A.D.1520- Lahore, Delhi, Agra, Amber, Bijapur. 1760.

Buddhist Architecture is mainly exemplified by the rock-cut temples and monasteries found in Western India and in the Topes or sacred mounds. The interior decorations, and exter-nal facades of the former, and the rails and gates surrounding the latter point unmistak-ably to their being derived from wooden struc-tures of an earlier period. The characteristic features of these temples are horse-shoe openings in the facades to admit light, and colle-nades of pillars with richly ornamented caps in the interior halls. Jaina Architecture is found in its most highly developed form in the Dilwara temples at Mount Abu. The ground p consists of a shrine for the god or saint a

oreh, and an areaded courtyard with niches or images. The characteristic of the style s grace and lightness, with decorative carving overing the whole interior, executed with reat elaboration and detail. Constructional nethods suggest that original types in wood lave been couled in marble.

Brahminical, Chalukyan and Dravidian kyles differ little in essential plan, all having a harine for the god, preceded by pillared por-hes. The outer forms vary. The northern Brahminical temples have a curved pyramidal coof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, dereasing in size, is ornamental with a centrol sell and figures in high relief. The Chalukyan ityle is affected by its northern and southern seighbours, taking features from each without osing its own special characteristics of which the star-shaped plan of the shrine, with the five-old bands of external ornament, is the prin-Architecture sipal feature. Pathan Architecture was ntroduced into India by the Mahomedan I nvasion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Minar. nne examples in the Kutub Mosque and Minar. The characteristics of the style are severity of outline, which is sometimes combined with slaborate decoration due, it is stated, to the amployment of Hindu craftsmen. The mosques and tombs at Ahmedabad already show Hindu influence; but purer examples are to be found at Jaunpore and Mandu. Indo-Saracenic Architecture reached the climax of its develop-ment during the reigns of the Moghul Emperors, Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Tsj Mahal at Agra. The buildings erected during the Adli Shahl dynasty at Bliapur at a slightly later date, exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account of their simplicity, grandeur and fine proportions, The era of great civil architecture in India was revived by the Mahomedan powers. Splendid palaces and forcresses were built at Madras, Delhi, Agra, Fattehpore-Sikri and Bijapur, and the example thus set was copied by the Hindu princes at Jaipur, Udsipur and elsewhere in India. The application of great architectural treatment, unequalled in extent elsewhere, is to be seen in the Ghauts or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture.—The use of sculpture and painting in isolated works of art was practicelly non-existent in India until modern times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture. No civil statuary, such as is now understood by the term, was executed; for no contemporary portrait figures, or busts in marble, or bronse, have come down to us from the ruins of angient India, as they have from those of

Egypt, Greece and Rome. Sculpture has been used exclusively as the handmaid of religion, and to this fact may be attributed the stereotyped forms to which it became bound. The lavish use of sculpture on Indian temples often exceeds good taste, and mars the symmetry and dignity of their mass and outline; but for exuberance of imagination, industrious elaboration and vivid expression of movement. Indian sculpture is pernaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhist and Brahminical cave temples of Eliora, Aianta and Elephanta. The great Trimurthi in the last named of these temples ranks for mystery and expressive grandeur with the greatest masterpleces of art.

Painting .- Much of the carved stonework upon ancient Indian buildings was as in ancient Greece decorated with colour, but the only paintings, in the modern accepta-tion of the term, now eristing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta, Bagh, and in Ceylon. These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristic of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. The Ajanta Caves remained hidden in the Deccan ajanta Caves remained hidden in the Decean jungles for nearly twelve hundred years, until accidentally rediscovered by officers of the Madras army in 1929. They are painted in a species of tempora; and when first brought to light were well preserved, but they have greatly deteriorated owing to the well meant, but misguided action of copylsts, and the neglect of the authorities. The Nisam's Government have in recent years done a great deal towards the preservation and study of these mural paintings. The second period of Indian painting owed its origin to the introduction of Persian methods of painting by the Moghul Emperor Akbar; and the establishment of the indigenous Moghul school was due to the encouragement and fostering care of his successors, Jehangir and Shah Jahan. Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque water-colour upon paper or vellum, resembling to some extent the liluminated missals produced by the monks in Europe during the middle ages, some of the finest of the earlier specimens in India are of a religious character; this phase of development being closely silled to the act development being closely allied to the art of the caligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicacy and finish in the painting of detail.
The artists of a Hindu off-shoot of this movement, known as the Bajput school, were less interested in portraiture than in depicting poetical and imaginative subjects. The pictures of both branches of the Moghul school, although highly decorative in character, were not intended for exhibition upon the walls of rooms, according to Western practice, and when not used as illustrations or decorations

to manuscript books, were preserved in portfolios.

Modern Painting.—As the reign of Shah Jahan exhibits the high tide of artistic development in India, so the reign of his successor Aurangzeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor : to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule; and partly to the fact of the school of Moghul painting becoming stereotyped in its practice. Foreign designers, and craftsmen who painters had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment. At the time when the British East India Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the battle of Plassey and the Indian Mutiny, the "Company" was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic Without any practice which had survived. Without any deliberate intention of introducing western art into the country, Greek and its derivative style of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings indigenous pattern. The practical result was the same; for the Indian craftsmen employed upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there they had no knowledge or sympatay. As there were no soulptors in India capable of modelling or carving civil soulpture, the monuments to distinguish public servants were imported from Burope; and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in Europe, Although a considerable amount of research work of a Voluntary nature was done by Archæologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown in 1859.

The Schools of Art then instituted throughout England in the 19th Century were imitated in India; and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to eisewhere; and as several of them have confined their activities almost exclusively to this branch of the subject it is sufficient to mention only the work of a few of the Indian Art Schools in the present article. The Oalcutts

school, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become chiefly a school of painting and drawing. That at Bombay covers a wider field; for in addition to classes for modelling, painting and design it possesses a special school of architecture; and a range of technical workshops, in which instruction is given in the applied arts. It is in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters. Mr. Havell, who several years ago was the Principal of the Calcutta School, (he left India in 1907) banished from within its walls every vestige of European art; and claimed that the traditional art of India, in its old forms, is not dead, but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its printine vigour.

Bombay School of Art.—The attitude to-wards the development of art in modern India taken by its successive Principals Messrs. Lockwood Kipling, Griffiths, Greenwood, and Cecil Burns, was on wider lines than that favoured by Mr. Havell. In general the view this School of Art has taken is that with European literature dominating the system under which the edu-cated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern artists in India to work on purely archaic models; and that to copy these would be as unprofitable as it would be for the artists of Europe to harness themselves to the conventions of the Greek and Roman sculptors or to those of the mediæval painters; that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpleces of European art; and that, with the wide adoption of European styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and reference. There are certain basic principles common to the technique of all great art, such as fine and accurate drawing in its widest sense, composition and design, and the science of colour harmony.

Among the developments during Mr. Burns, administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to inspect and report on the drawing classes in the schools. A Pottery Department was also started and was abolished in 1926. Mr. Burns retired in 1918 and was succeeded in 1919 by Mr. W. E. Gladstone Solomon, K.I.H., E.B.C., who retired in 1937. He was succeeded by the present Director, Mr. C. E. Gerrard, A.E.C.A., R.B.A., R.O.I.

Mr. Solomon entirely reorganised the courses of study. He also, as Chairman of the Government Art Examinations, revised and recons-

tructed the code which governs these tests in new Secretariat buildings. The Bombay School co-operation with the Board of Examiners. undertook the decoration of Committee Room The result is an efficient system of tests of "A" (in the North Block) and the paintings, officiency in Painting, Sculpture, and Architecture; and the latest development in the curriculum has been the introduction in 1935 of a section devoted to the study of Commercial Art. The popularity of the improved curri-Art. The popularity of the improved curriculum is shown by the great influx of students to the School of Art. These now number some six hundred including at least sixty-five ladies. It is noteworthy that whereas no candidates had entered for the Government Diploma of Sculpture prior to 1920 in the year 1937 no fewer than 54 competed in this very advanced test of capacity. The life Classes which were organised at the end of 1919 have been pronounced by competent judges as well up to the level of the Life Classes of the European Schools of Art. But proficiency in technique forms only one side of the present system of training; for even in Europe, too much of the study from Life is quite capable of negativing its own object. In India. where the decorative instinct is inherent, and where the possibilities of freehand drawing are where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more paipable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art on a basis of scholarships under the patronage of the Governor of Bombay (Lord Lloyd). As this class specialises in Mural Painting it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many class has executed the decorations for many

which were executed in oils on canvas, were finished, and successfully placed in position on the dome and walls by the middle of September 1929. These decorations were original compositions of life size figures, symbolising the main periods of Indian Art, and the different branches periods of Indian Art, and the different branches of the Fine and Applied Arts. In April 1929, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr. W. E. Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House, London. The Exhibition was very well patronised by the public and extremely well received by the act critics and the Press. He Majesty the Queen Empress graciously patronised the exhibition and selected several of the nised the exhibition and selected several of the paintings displayed.

Exhibition in London.—The India Society of London organised an Exhibition of Modern Indian Art in London, which was opened by H.H. the Duchess of York at the New Burlington Galleries on December 10, 1934. The most instructive feature of this Exhibition was that the representation of India was secured by means of Regional Committees which collected pictures and sculptures from their own districts. Thus the respective sections of the Exhibition devoted to Bombay and Bengal were compared, and the work from Western India received a most class has executed the decorations for many public and private buildings, and painted the cetting and panes of a specially constructed Indian Room which was exhibited at Wembley Indian Room which was of late years enjoyed the patronage of successive Governors of Bombay and largely due to the efforts of Sir Lealle Wilson, the Government of India inaugurated a competition of India naugurated a competition of India naugurated a loguethe Bombay exhibits in London. Indian Architecture.

these of its own, and its monuments are unique is analysis is a branch of study that the Indian among those of the nations of the world. An has not as yet developed to its full extent. An estat divilisation, a natural bent on the part Hitherto the best authority on the subject of the people towards religious ferrour of the has been Fergusson, whose compendious work contemplative rather than of the fanatical is that which will find most ready acceptance are, combined with the richness of the country by the general reader. But Fergusson attempting the stars of the factors that contributed to reading the record in one volumes of moderate dimensions. contemplative rather than of the manatical is that which will not most ready acceptance aget, combined with the richness of the country by the general reader. But Fergusson attemption the sterner building materials—these are ed the nearly impossible task of covering the a few of the factors that contributed to making ground in one volume of moderate dimensions. It what it was, while a stirring history gave it and it is sometimes held that he was a man both warlety and glamour. Indian architecture of the proposal a culture, albeit wide turns is a subject which at the best has been and electric, to admit of sufficient depth of both variety and glamour. Indian architecture is a subject which at the best has been studied only imperfectly, and a really comprehensive treatise on it has yet to be written. So a classification by races and religious. The subject is a vast and varied one, and it may be such a treatise never will be written in copted hitherto. He asserts that there is no the form of one work at any rate. The spirit of some architecture in India of an earlier date Tadies sat is foreign to the European and few than two and a half centuries before the Christ-

The architecture of India has proceeded on can entirely understand it, while art criticism and

religion, to the great Asoka, who reigned B.C. 272 to 236."

Buddhist Work.

Fergusson's first architectural period is when the Buddhist, of which the great tope at Sanchi with its famous Northern gateway is perhaps the most noted example. Then have the Gandharan topes and monasteries. Perhaps the examples of Buddhist architecture of greatest interest and most ready access to the general student are to be found in the Chaitva halls or rock-cut caves of Karli. Ajanta, Nasik, Ellora, and Kanheri. A point with relation to the Gandhara work may be alluded to in passing. This is the strong European tendency, variously recognized as Roman, Byzantine but most frequently as Greek, to be observed in the details. The foliage seen in the capitals of columns bears strong resemblance to the Greek acanthus, while the sculptures have a distinct trace of Greek influence, particularly in the treatment detail being no longer to be depended on the state of drapery, but also of hair and facial expression. From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-cut temples as at Eliora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior. It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid stone, ar undertaking of vast and, to our modern ideas, unprofitable industry. Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Vellore, Vijayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style:

Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study:—Those at Mukteswara and Bhuvaneswar in Orissa, at Khajuraho, Bin-

tan era, and that "India owes the introduc- cations. The dome, not entirely an unknown tion of the use of stone for architectural purfeature hitherto, became a special object of poses, as she does that of Buddhism as a state development, while the arch, at no time, favourite constructional form of the Hinds builders, was now forced on their attention the predilections of the ruling class. It minaret also became a distinctive feature. The requirements of the new religion, mosque with its wide spaces to meet the n of organized congregational acts of worship gave opportunities for broad and spaces treatments that had hitherto been to see extent denied. The Moslem hatred of idelist set a tabu on the use of sculptured representations of animate objects in the adornment of the buildings, and led to the development of other decorative forms. Great ingeneity came to be displayed in the use of pattern and of geometrical and tollated ornament. This the builders to a greater extent than best to proportion, scale and mass as means of giving to proportion, scale and mass as means or givens beauty, mere richness of sculptured surface and the sethetic and symbolic interests, if

Agra and Delhi may be regarded to the principal centres of the Indo-Saracenic at the the former for the renowned Taj Mahai, too Akbar's deserted capital of Fatehpur Sikri. assumption that is atrenuously combated by Akbar's deserted capital of Fatehpur Sikri, the other as will be pointed out later.

The architecture of the Jains comes next in crder. Of this rich and beautiful style the most noted examples are perhaps the Dilwars the tombs of Humayon, Suidar Jung, &c., temples near Mount Abu, and the unique and the unique Qutb Minar. Two other great centres may be mentioned, because in each there appeared certain strongly marked individualities that differentiated the varieties. of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bijapur on the Dekhan, both in the Rombay Presidency.

At Ahmedabad with its neighbours Sirkhei and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion, The Ahmedabad work is probably most famous for the extraordinary beauty of its stone "jali"— or pierced lattice-work, as in the palm tree windows of the Sidi Sayyid Musjid.

Bijapur.

Bhuvaneswar in Orissa, at Khajuraho, Bindrabun, Udaipur, Benares, Gwallor, &c. The palace of the Hindu Raja Man Singh at Gwallor is among the most beautiful architectural examples in India. So also are the palaces of Amber, Datiya, Urcha, Dig and Udaipur.

Indo-Saracenic.

Among all the periods and styles in India the characteristics of none are more easily recognizable than those of what is generally called the "Indo-Saracenic" which developed after the Mahomedan conquest. Under the new influences now brought to bear on it the the architecture of India took on a fresh lease of activity and underwent remarkable modification. The characteristics of the Bijapur variety

II. MODERN.

The modern architectural work of India the past. They still muster a considerable divides itself sharply into two classes. There is first that of the indigenous Indian "Masteris first that of the indigenous Indian builder" to be found chiefly in the Indian States; particularly those in Rajputana. Second there is that of British India, or of all those parts of the peninsula wherever Western ideas and methods have most strongly research neess and methods have most strongly spread their influence, chiefly, in the case of architecture, through the medium of the Department of Public Works. The work of that department has been much animadverted upon as being all that building should not be, but, considering it has been produced by men of whom it was admittedly not the metier, and who were necessarily contending with lack of expert training on the one hand and with de-partmental methods on the other, it must be conceded that it can shew many notable buildings. Of recent years there has been a tend-ency on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy initiated in Lord Curzon's Viceroyalty.

To the work of the indigenous "masterbuilder" public attention has of recent years been drawn with some insistence, and the suggestion has been pressed that efforts should be directed towards devising means for the pre-servation of what is pointed out—and now universally acknowledged—to be a remarkable survival—almost the only one left in the world— of "living art," but which is threatened with gradual extinction by resson of the spread of Western ideals and fashions. The matter assumed some years ago the form of a mild controversy centring round the question of the then much discussed project of the Government that it should be made a means of fostering "master builders" work in nearly every native European art which needed no such encourageThe advocates of Gwalior State may be cited as peculiarly rich grants of pleturesque mosern Indian ment at India's expense. The advocates of this view appear for the most part to have been adherents of the "indigenous Indian" school

following not only amongst the artistic public of England and India, but even within the Government services. Their opponents, holding what appears to be the more official view both as to archeology and art, have pointed to the "death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy all efforts to resist this law, or to institute what they have termed "another futile revival"! The Britishin India, they contend, should do as did the ancient Romans in every country on which they planted their conquering foot. As those were want to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the task of designing and directing the construction of the principal buildings in the new Capital was accordingly entrusted jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as ladia is concerned. The building of New Delhi is perhaps too recent an event for the passing of a definite wedget. the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many.

The controversy of East and West, however tal to the interests of the country's archivital to the interests of the country tecture, is too purely technical for its merits to be estimated by the general reader or discussed here. Its chief claim on our attention lies in the fact that it affords an added interest this view appear for the most part to have been in instances of picturesque most.rn Indian adherents of the "indigenous Indian" school street architecture, while at Jaipur, Udalpur, of archeologists already mentioned, and to have based their ideas on their own reading of in many different forms both civil and religious.

Industrial Arts.

The ancient industrial arts of India formed The ancient industrial arts or india formed two distinct groups. The first included those allied to, and dependent upon, architecture; the second comprises those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories; and to personal adornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their syje or user design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their dealgn was less constricted and their workmanship was more varied. workmanship was more varied.

Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood. metal and textiles.

Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles

are Hindu and Mahomedan. The former may be termed indigenous, dating as it does from remote antiquity; the latter was a variation of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features essentially Indian in character. The art of both Hindus and Mahomedans is based upon religion and the requirements of religious ritual. The obvious expression of this is shown in the different motifs used for their ornament. In Hindu art all natural forms are accepted and employed for decerative purposes; but in that of the Mahomedans, nearly all natural forms are rejected and orbidden. The basis of Mahomedan decoration is therefore mainly geometrical. In each of them, racial characteristics are strikingly exhibited. The keynote of Hindu work is exuberance, imagination and poetry; that of Mahomedan, retience, intellect and good taste. The Hindus are lavish, and often undiscriminating in their employment of ornament; the Mahomedans use more restraint.

Stone Work.—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and scope it ranges, from the massive figures in the Buddhist and Brahminical Cave Temples, and the detached soutpture of the temples of Southern India, to the delicately incised reliefs and claborately fretted ornament of the Jain temples at Mount Abu. A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Mediswal craftwork, the regular progressive steps from art in its primitive state to its culminating point and its subsequent decay. Styles in India seem to spring into existence fully developed; the earlier examples often exhibiting finer craftsmanship than those of a later date. There can be little doubt that stone carving in India was simply the application of the wood carvers' art to another material.

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples. The fact that geometrical forms were almost exclusively used dictated lower relief and greater refinement in the carving; while the innate good taste of the designers prompted them to concentrate the ornament upon cortain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible; while wonderful decorative use has been made of Arabic and Persian lettering in panels and their fram-ing. To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials; veneering the surfaces of their buildings with polished marble which they decorated with patterns of mosaic composed of jade, agate, onyx and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman; and many wonderful exam-ples of their skill in the form of book rests, tabies, thrones, footstools, vases and sword handles

are extant to show the height of proficiency they attained.

Wood Work .- With a fine range of timbers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings. Unfortunately, much of the ancient woodwork has been destroyed by the action of the climate and the teeming insectivorous life of India; and that which escaped these enemies was wiped out by fire and the sword. It is therefore only possible to conjecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved. Few if any examples of a date earlier than the sixteenth century are to be found. Many of sixteenth century are to be found. Many of these, and specimens of a later date to be seen in towns and cities throughout the country, are masterpieces of design and craftsmanship. The carved timber fronts and inner courtvards of houses in Ahmedabad, Nasik, and other parts of Western India are notable for their picturesqueness and beauty the structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manner which unites richness of effect with in a manner which unites richness of effect with good taste and propriety. Of furniture, as the term is now understood, few examples were in use in Indla before Europeans introduced their own fashions. These were confined to small tables and stools, book rests, clothes chests and screens, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with belays of coloured woods ivers. decorated with inlays of coloured woods, ivory and metal; while in some cases the wooden basis was entirely plated with copper, brass or silver. In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the atten-tion to detail and the finish generally associated with the carving of ivory. Coloured lac was freely used to decorate many articles of fur-niture, especially those turned on the lathe; and rich colour effects were obtained in this perhaps the most distinctive and typically Indian development of decoration as applied to woodwork.

Metal Work.—With the exception of weaving, the metal working industry employed and still employs the greatest number of artistic craftsmen in India. Copper and brass have always been the two metals most widely used for domestic purposes by Mahomedans and Hindus. The shapes of many of these humble vessels are among the most beautiful to be found in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human hand; and the shapes are those which grow naturally from the working of the material with the simplest implements. In the technical treatment of brass and copper Indian craftsmen have shown a taste and skill unsurpassed by those of other nations, except in the department of fine casting. In this, and in the working of sold and silver, a higher standard of technical and constructive exactness has been reached by the standard of the control of the casting the shape of an article is, and this especially applies to metal work, the less meed exists for the decoration of its surface. It is

equally true that the highest test of craftsmanship is the production of a perfect article without any decoration. The reason being that the slightest technical fault is apparent on a plain surface, but can be hidden or disguised of one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of per-fectly plain work from the hands of the gold and silversmiths of India is rarely to be met with. Much of the excessive and often inappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose.

Textiles.-The textile industry is the widest in extent in India and is that in which craftsmen have shown their highest achieve-Other countries, east and west of India have produced work equal at least in stone, wood, and metal; but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken fabrics. Some of the products of the looms of Bengal are marvels of technical skill and perfect taste, while the plum bloom quality

of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repeti-tion, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the mills of Lancashire. But for heauty of surface and Variety of texture no machine-made fabrics have ever equalled the finest handwork of the weavers of India. Many of the most beautiful varieties of Indian textile work have disappeared, killed by the competition of the power loom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving. The printed silks and calicoes of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations. whose craftsmen learnt many valuable lessons from the technical skill, and artistic taste they display. Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was introduced from Persia; but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or designs.

Archæology.

The ancient monuments of India are as varied | plements and vessels, terracotta figurines and as they are numerous. Until a few years ago, the earliest known were the brick and stone erections of the Maurya period, (3rd century B. C.) and some rough stone walls at the ancient city of Rajagriha of about the 6th or 7th century B. C. The absence of structures of an earlier period was then supposed to be due to the fact that all previous architecture had been of wood and had completely perished. The recent excavations, however, at Mohenjo-daro, in Sind and at Harappa in the Punjab, have completely revolutionised ideas on this subject and proved that as far back as the 3rd or 4th millennium B.C. and probably much earlier still, whea india was in possession of a highly developed reservillation with large and populous cities, the well built houses, temples and public buildings food if brick and many other amenities enjoyed at hat period by the peoples of Mesopotamia and igypt. Both at Mohenjo-daro and Harappa here are the remains of some 5 or 6 cities supermposed one upon the ruins of another,

The structures that have so far been exposed t Mohenjo-daro belong to the three latest cities n the site. Those of the third or earliest are he best in style; those of the first the poorest. fost of the structures are dwelling houses or hops, but there are others which appear to ave been temples and one—of particularly assive proportions—is a large bath, surrounded fenestrated galleries and halls. All were uilt of well burnt brick and most of them were ! two or more storeys with staircases giving ocess to the upper rooms. In and around the sins have been found many minor antiquities cluding gold and silver jewellery, engraved

toys, shell ornaments and potteries both painted and plain.

These discoveries establish the existence in Sind and the Punjab during the 4th and 3rd millennia B.C. of a highly developed city life; and the presence, in many of the houses, of wells and bathrooms as well as an elaborate drainage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Baby-lonia and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and it is a point of interest that the specimens of wheat found at Mohenjo-daro and Harappa resemble the common variety grown bread, the Punjab to-day. Besides their beef, appears to have included mutton, and pork, the flesh of tortoises, turtles and gharal, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead; they were familiar with the arts of spinning and weaving and with the cultivation of cotton and had attained a high degree of proficiency in the jeweller's and potter's arts.

That they possessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved with well-executed animal devices and pictographic legends in an unknown script. The method of disposal of the dead at Mohenjo-daro is uncertain but at Marappa two types of burial have been met with. namely, complete burials or fractional along, with als of stone and ivory and paste, copper im- funerary pottery, and "pot burials". Only 27 human bones and are seemingly post exposure fractional burials.

This Indus Valley culture has now been traced in the South-east as far as Rupar in the Ambala District, relatively close to the watershed of the Sutlej and Jumna and it is therefore highly improbable that this civilization was confined to the Indus Valley and there can hardly be any reasonable doubt that future hardly be any reasonance doubt that atome researches will trace to into the valley of the Ganges. On the south-east, this prehistoric culture has been traced upto Limbdi State in Kathiawar. Of the long period of more than 2,000 years that separate the pre-historic monuments referred to above from the historic period of India, little or nothing is yet known but there is every hope that this gap in our knowledge may be filled in by further excava-tions. From the time of the Mauryas, i.e., 4th century B.C., the history of architecture and the formative arts of India is clear and can be traced with relative precision. The financial stringency caused by the world economic de-pression caused almost the susponsion of excavation in these areas but there are welcome signs of a revival of activities in the near fature.

Monumental Pillars .- The monuments which have come down to us from the Maurya period include, besides the caves to be referred to below, the wooden palisade (4th century B.C.) Benares. Altogether thirteen pillars of Asoka are known besides the Elephant capital at Benares. Ten of them bear his inscriptions. Of these the Lauriya-Nandangarh column in viz., a Persepolitan bell, abacus, museum at Sarnath. Of the post-Asokan period one pillar (B.C. 150) stands to the north-east of of the cave of Karli (A.D. 70), and a third at Eran in Central Provinces belonging to the 5th at Delhi, and an inscription on it speaks of its

of the latter were found to contain skulls and | Madras Presidency. No less than twenty exist in the South Kanara District. A particularly elegant example faces a Jaina temple at Mudabidri, not far from Mangalore. An interesting discovery was lately made concerning the Iron Pillar at Dhar, Central India. The Pillar is like that at New Delhi, one of those large sized products of ancient Indian metal workers which have excited the admiration of modern metallurgists. The Pillar is now broken in three pieces, measuring together more than 43 feet in length, and there is reason to believe that a fourth piece 7 feet long has disappeared. The date and purpose of the Pillar were uncertain until a recent discovery which is of an inscription of the time of the Paramara King Bhoia of Dhar. A.D. 998-1053, fragments of which were found in a Dhar mosque which occupies the site of a grammar school established by that King. This is held to fix the period when the pillar was made.

Topes.—Stupas, known as dagabas in Ceylon and commonly called topes in North India, were constructed either for the consecration of relics hidden in a chamber often near the base or to mark the scene of notable events in Buddhist or Jaina legends. Though we know that the ancient Jainas built stupas, no specimen of Jaina stupas is now extant. A notable structure of this kind which existed until recent times, was the Jaina stupa which stood on the Kankali Tila site at Muttra and yielded a large number of Jaina sculptures now deposited in the Provincial Museum at Lucknow. Of those which surrounded the ancient city of Patali- the Provincial Museum at Lucknow. Of those putra (modern Patna), and of which a large belonging to the Buddhists, the great Tope of section has been exposed, the rock and pillar Sanchi in Bhopal State is the most intact and edicts of Asoka (Circa 250 B.C.), the remains entire of its class. It consists of a large pillared hall constructed by the same drum supporting a hemispherical dome of less entire of its class. It consists of a low circular drum supporting a hemispherical dome of less emperor at Pataliputra, a number of brick diameter. Round the drum is an open passage stupas and a monolithic rail which originally for circumambulation, and the whole is enclosed surmounted an Asoka stupa at Sarnath near by a massive stone railing with lofty gates facing the cardinal points. The gates suggest wooden capital prototypes and are carved, inside and out, with of a 14th at Sankisa and a fragment of a 15th elaborate basreliefs depicting the legends current among the Buddhists and the stories of the Master's life and previous existence. The original stupa, which was of brick and not more the Champaran District, Tirhut, is practically original stupa, which was of brick and not more unlajured. The capital of each column, like than half the present dimensions, was apparently the shaft, was monolithic, and comprised three erected by Asoka at the same time as his lioncrowned pillar near the south gate, but as Sir and crowning sculpture in the round. By far John Marshall's explorations have conclusively the best capital of Asoka's time was that exhaust and the gateways were at least 150 and 200 lions standing back to back on the abacus are years later respectively. Other famous Buddhist tions standing back to back on the abacus are years later respectively. Other ramous Buddhist carved with extraordinary precision and actives, and originally supported a wheel symbolizing the law of piety preached by the Buddha. Several pieces of this wheel were found and are now preserved in the Archæological Dharmarajika (Taxila) stupas in the Punjab, Museum at Sarnath. Of the post-Asokan period the Dhamekh at Sarnath and Mirpur Khas in Sind. The tope proper at Bharhut has entirely Besnagar in the Gwalior State, another in front disappeared, having been utilised for building of the cave of Karli (A.D. 70), and a third at villages, and what remained of the rail has been removed to the Indian Museum, Calcutta. The bas-reliefs on this rail which contain short Century A.D. All these are of stone; but there The bas-reliefs on this rail which contain short is one of iron also. It is near the Qutb Minar inscriptions and thus enable one to identify the scenes sculptured with the Jatakas or Birth having been erected by a king called Chandra Stories of the Buddha give its unique value, identified with Chandragupta II. (A.D. 875, 189) of the Gupta dynasty. It is wonderful to find the Hindus at that age forging a bar to find the Hindus at that age forging a bar in point of elaboration and artistic merit, are of iron larger than any that have been forged now in the British and Madras Museums. The even in Europe to a very late date, and not stups at Piprahwa was opened by Mr. W. C. trequently even now." Piliars of later style Peppe in 1898, and a steatite or soap-stone are found all over the country, especially in the

The inscription, now in Calcutta, speaks of the cuted at various periods between 350-650 A.D. relics being of the Buddha himself and enshrined and have elicited high praise as works of art. by his kinsmen, the Sakyas. If this interpretation is correct, we have here one of the stupas that were erected over the ashes of Buddha immediately after his demise. The Sarnath stupus erected at the spot where Buddha delivered his first sermon have recently formed the centre of a Buddhist revival in India, and the Government have presented three Buddhist relics from Nagarjunikonda, Taxila and Mirpur Khas respectively for enshrinement at the Mulagandhakutivihara temple erected by the Mahabodhi Society.

Caves .- Of the rock caves which are one of the wonders of India, nine-tentlis belong to Western India. The most important groups of caves are situated in Bhaja, Bedsa, Karli, Kanheri, Junnar, Nasik and Badami in the Bowbay Presidency, Ellora and Ajanta in Nizam's Dominions, Bagh in Gwalior State, in Gwalior State, Barabar 16 miles north of Gaya, and Khandagiri 20 miles and Nagarjuni 16 miles north and Udayagiri and Khandagiri Cuttack from The in Orissa. caves belong to the three principal sects into which ancient India was divided, viz., the Buddhists, Hindus and Jainas. The earliest caves so far discovered are those of Barabar and Mogarjuni which were excavated by Asoka and his grandson Dasaratha, and dedicated to Ajlvikas, a naked sect founded by Mankhaliputta Gosala. The next earliest caves are those of Bhaja, Pitalkhora and cave No. 9 at Ajanta and No. 19 at Nasik. They have been assigned to 200 B.C. by Fergusson and Dr. Burges. But there is good reason to suppose from Sir John Marshall's researches and from epigraphic considerations that they are considerably more modern. The Buddhist caves are generally of two types-the chartyas or chapel caves and viharas or monasteries for the residence of monks. The first are with vaulted roofs and horse-shoe shaped windows over the entrance and have interiors consisting of a nave and side aisles with a small stupa at the inner circular end. They are thus remarkably similar to Christian basilicas. The second class consist of a hall basilicas. The second class consist of a hall surrounded by a number of cells. In the later viharas there was a sanctum in the centre of the back wall containing a la: ce image of Buddha, Hardly a chaitya is found without one or more an inscription datea in the year 134 of an unples the group at Badami is earliest in date but that at Elephanta near Bombay is perhaps the most frequented. It is dedicated to Siva dating Gandhara sculptures in various parts. and is not earlier than the 7th century A.D. But by far the most renowned cave-temple of the Hindus is that known as Kailasa at Ellora. It is on the model of a complete structural temple but carved out of solid rock. It also is dedicated to Siva and was excavated by the king Krishna 1 (A.D. Rashtrakuta Of the Jaina caves the earliest are at Khanda. girl and Udayagiri; those of the mediaval type, in Indra Sabha at Ellora; and those of the latest

Copies were first made by Major Gill, but most of them perished by fire at the Crystal Palace in 1866. The lost ones were again copied by John Griffiths of the Arts School, Bombay, half of whose work was similarly destroyed by a fire at South Kensington. They were last copied by Lady Herringham during 1909-11. Her pictures, which are in full scale, are at present exhibited at the Indian Section of the Victoria and Albert Museum, South Kensington, and have been reproduced in a volume brought out by the India Society. Another group of caves where equally interesting though less well preserved paintings exist is found at Bagh in Gwalior State. These caves form the subject of a monograph issued by the India Society.

Gandhara Monuments. -- On the north-west frontier of India, anciently known as Gandhara are found a class of remains, ruined monasteries and buried stupas, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The free use of Corinthian capitals, friezes of nude Erotes bearing a long garland, winged Atlantes without number, and a host of individual motifs clearly establish the influence of Hellenistic art. The Museum at Peshawar amply illustrates the wealth of these finds recovered from the ancient sites of the district, particularly Salui-Bahlol, Takhti-Bahl and Janialgarhi, The mound at Peshawar, locally known as Shah-ji-ki-Dheri, which was explored in 1909, brought to light several interesting sculptures of this school together with a relignary casket, the most remarkable bronze object of the Gandhara period The inscription on the casket left no doubt as to the mound being the stupa raised over a portion of the body relies of Buddha by the Indo Scythian king Kanishka. They were presented by Lord Minto's Government to the Buddhists of Burma and are now enshrined at Mandalay. To about the same age belong the stupus at Manikyala in the Punjab opened by Ranjit Singh's French Generals, Ventura and Court, in 1830. Some of them contained coins of Kanishka. There was brought to light at Taxila during the winter of 1932-33 what proved to be the largest monastery so far unearthed in north-west India. In it there was specified era and roughly corresponding with the year 76 A.D. The record is regarded as important because of the assistance it gives in

Structural Temples.—Of this class the earliest examples are the Varaha temple at Deogarh, District Jhansi, another temple at Sanchi, the brick temples at Bhitargaon in the district of Cawnpore, and the temples at Tigowa. Nachna, Eran and Bhumaran all of which belong who may still be seen in the paintings in the to the Gupta period and a later one at Tigowa in ceilings of the upper porch of the main shrine, the Central Provinces. In the Bombay Province we have two more examples viz., Lad Khan and Durga temples at Ajhole in Bijapur, In Indra Sabha at Ellora; and those of the latest the latter of which cannot be later than period, at Ankai in Nasik. The ceilings of many the eighth century A.D. The only common of these caves were once adorned with fresco paintings. The earliest cave paintings are those at Ramgarh in Sirguja State in the Eastern enterly different and already here we mark States agency, but the most famous and the best in the beginning of the two styles, Inco-Aryan preserved are those at Ajanta, which were exe-

more and more pronounced from the 7th cen- | Khilji are typical examples. Of the Sharqi tury onwards. In the Indo-Aryan style, the style we have three mosques in Jaunpur with most prominent ones tend to the perpendicular, several tombs. At Mandu in the Dhar State, a and in the Dravidian to the horizontal. The third form of Saracenic architecture sprang up, salient feature of the former again is the curvilinear steeple, and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Bhubaneswar in Orissa, Khajuraho in Bundelkhand, Osia in Jodhpur, and Dilwara on Mount Abu. One of the best known groups in the Dravidian style is that of the Mamallapuram Raths, or 'Seven Pagodas,' on the seashore to the south of Madras. They are each hewn out of a block of granite, and are rather models of temples than raths. They are the earliest examples of typical Dravidian architecture, and belong to the 7th century. To the same age has to be assigned the temple of Kailasanath at Conjecveram, and to the following century some of the versall, and one concerning control where the bijapur temples at Aihole and Pattadakal of the Bijapur three small domes. "Of the various forms lithic temple of Kallasa at Ellora, referred to which the Saracenic architecture assumed," above. Of the later Dravidian style the great says Fergusson, "that of Ahmedabad may temple at Tanjore and the Srirangam temple probably be considered to be the most elegant. near Trichinopoly are the best examples.

Intermediate between these two main styles comes the architecture of the Deccan, called Chalukyan by Fergusson. In this style the plan becomes polygonal and star-shaped instead of quadrangular; and the high-storeyed spire is converted into a low pyramid in which the horizontal treatment of the Dravidian is combined with the perpendicular of the Indo-Aryan. Some fine examples of this type exist at Dambal, Rattihali, Tilliwalli and Hangal in Dharwar, Bombay Presidency, and at Ittagi and Warangal in Nizam's Dominions. But it is in Mysore among the tempies at Hallebid Belur, and Somnathpur that the style is found in its full perfection.

Another type of architecture, which originating in India, formed the principal type of Burmese, Javanese and Indoncolan architecture has only recently been brought to light by the spade. This consists of monuments raised in several terraces, on a cruciform plan, with projections between each arm of the cross. The earliest example of this class, referable to the early centuries of the Christian era has been unearthed Nandaugarh in North Bihar. The most the great complete and ornate example is Buddhist temple at Paharpur in North Bengal, attributed to the Pala King Dharmapala (C. 800 A.D.), which shows a wealth of terra-cotta decorations and stone images. It is from Bengal that the colonial style must have developed.

Saracenic Architecture.-This begins in India with the 13th century after the per-manent occupation o the Muhammadans Their first mosques were constructed of the materials of Hindu and Jaina temples, and sometimes with comparatively slight alterations. The mosque called Arhai-din-ka-jhompra at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under read from left to right, and from it have been the various dynastics, imperial and local. The evolved all the modern vernacular scripts of early Pathan architecture of Delhi was massive India. The Kharoshthi script was writtenfrom and at the same time was characterised by right to left, and was a modified form of the an-elaborate richness of ornamentation. The Qutb cient Aramaicalphabet introduced into the Pun-

and we have here the Jami Masiid, Hoshang's tomb, Jahaz Mahal and Hindola Mahal as the most notable instances of the secular and ecclesiastical styles of the Malwa Pathans. The Muhammadans of Bengal again developed their own style, and Pandua, Malda, and Gaur teem with the ruins of the buildings of this type, the most important of which are the Adina Masidof Sikandar Shah, the Eklakhi mosque, Baradwari Masjid, and so forth. The Bahmani dynasty of Gulbarga and Bidar were also great builders, and adorned their capitals with important buildings. The most striking of these is the great mosque of Gulbarga, which differs from all mosques in India in having the whole central area covered over so that what in others It is notable for its carved stone work; and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured Mihrabs and domed and panelled roots is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete contrast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jami Masjid, Gagan Mahal, Mintar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features. Noteworthy among the emperor's buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jehangir's time his tomb at Lahore and the tomb of Itimad-ud-daula at Agra are the most typical structures. "The force and originality of the tyle gave way under Shah Jahan to a delicate elegance and refinement of detail." And it was during his reign that the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wife Mumtaz Mahal, was con-structed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time.

Inscriptions.-We now come to inscriptions, of which numbers have been brought to light in India and are particularly numerous in South India. They have been engraved on varieties of materials, but principally on stone and copper. The earliest of these are found incised in two distinct kinds of alphabet, known as Brahmi and Kharoshthi, the latter being confined to the north-west of India. Brahmi was Minar and tombs of Altamish and Ala-ud-din jab during the period of the Persian domination

are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks, and an-other on pillars. They have been found from Shahbazgarhi 40 miles north-east of Peshawar to Nigliva in the Nepal Tarai, from Girnar in Kathiawar to Dhauli in Orissa, from Kalai in the Lower Himalayas to Jonnagiri in Madras showing by the way the vast extent of territory held by him. The reference in his Rock Edicts to The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II. of Syria, Ptolemy Philadelphus, so forth is exceedingly interesting, and fixes B.C. 269 as the date of his coronation. His hummindei pillar inscription, again, discovered in Nepal Tarai, now settles, beyond all doubt. the birth-place of Buddha which was for long disputed. Another noteworthy record is the inscription of the Besnagar pillar. The pillar had been known for a long time, but Sir John Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion, who is described as an envoy of King Antial Heliodoros is berein called kidas of Taxiia. a Bhagavata which shows that Greek he had become a Hindu that though a and Vaishnava. Another inscription worth noticing and especially in this connection is that of Cave No. 10 at Nasik. The donor of this cave, Ushavadata, who calls himself a Saka and was thus an Indo-Scythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gode and Brahmans and as having annually fed one hundred thouforeigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are forlorn and

Archœological Department.—As the archmological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archeological Department. The work of this Department is primarily twofold, con-servation, and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archæological Survey of India and entrusted it to General (afterwards Sir) Alexander Cunningham, who was also the first Director-General of Archæology. The next advance was the initiation of the local Surveys in Bombay and Madras three years after. The work of these Surveys, however, was restricted to antiquarian research and description of monuments, and the task of conserving old buildings was left to the fitful efforts of the local Governments often without expert guid-ance or control. It was only in 1878 that the Government of India under Lord Lytton awoke to this deplorable condition, and sanctioned a sum of 3f lakhs to the repair of monuments in United Provinces, and soon after appointed a conservator, Major Cole, who did useful work for three years. Then a reaction set in, and his post and that of the Director-General were several among the progressive Indian States to

in the 5th century B.C. It was prevalent up to | abolished. The first systematic step towards rethe 4th century A.D., and was supplanted by cognising official responsibility in conservation the Brahmi. The earliest dateable inscriptions matters was taken by Lord Curzon's Government who established most of the Archæological Circles that now obtain, placed them on a permanent footing and united them together under the control of a Director-General, provision being also made for subsidising local Governments out of imperial funds, when necessary. The Ancient Monuments Preservation Act was passed for the protection of historic monuments and relics especially in private possession and also for State control over the excavation of ancient sites and traffic in antiquities. Under the direction of Sir John Marshail, Kt., C.I.E., late Director-General of Archeology, a comprehensive and systematic campaign of repair and excavation was prosecuted and at present the Central Government bears all expenditure in connection with the preservation and maintenance of monuments, as well as with excavation and research. later Directors-General it was continued with equal vigour (the present D. G. is Rao Bahadur K. N. Dikshit) and the result of it is mainifest in the present altered conditions of many oid and historic buildings and in the scientific excavation of buried sites such as Taxila, Pataliputra, Sanchi in the Bhopai State, Sarnath near Benares, Nalanda in Bihar, Paharpur in Bengai and Nagarjunikonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjodaro in Sind. Of all these works those of most general interest are the Mohenjo-daro excavations, for here the Archmological Department have unearthed remains of prehistoric cities dating back to 3000 B.C. and further. The Archæological Survey has devoted considerable attention to the organization and development of museums as centres of research and education. It maintains sand Brahmans. Here is snother instance of a the archæological section of the Indian Museum at Calcutta, small museums at the Forts at Delhi and Lahore, and at the Taj, the Central Asian Antiquities Museum at New Delhi and has erected local museums at the excavated sites of Taxila, Sarnath, Nalanda, Mobenjo-daro and Harappa with the object of keeping the principal movable antiquities recovered at these sites in close association with the structural remains to which they belong, so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some listant place. Duplicates of antiquities from Mohenjo-daro and other places have, however, been distributed among other Museums.

The epigraphical material dealt with by the Archeological Survey has enabled the history and chronology of the various dynasties of India to be established on a firmer basis and in greater detail. The "Epigraphia Indica" is now in the 24th volume, a revised edition of the Asoka inscriptions has been recently published, while the companion volume of post Asokan Brahmi inscriptions is under preparation along with two others devoted to the records of the Gupta and Kalachuri epochs. The volume of work done in South India, which is particularly rich in lithic records, will be apparent from the fact that over 20,000 inscriptions have been copied and noticed in the Annual Reports on South Indian epigraphy and a large number

create their own Archaeological Departments. Prominent among these must be mentioned Hyderabad, Mysore, Gwalior, Baroda and Jaipur. In Hyderabad the systematic and scientific treatment of the frescoes at Ajanta is an outstanding achievement of the Archaeological Department, which was created in the year 1914. Besides this, attention has been devoted to the rock cut temples at Ellora and many other structural temples. Among the Islamic monuments the great mosque of Gulbarga and the Bahamani mosque at Bidar have been fully conserved. The Mysore Archaeological Department has nearly completed half a century of its existence. The first Director, Mr. B. L. Rice, published some 10,000 inscriptions in 12 volumes of the Epigraphia Karnatica. This progress has been well maintained, and the conservation work has rescued many famous temples, such as the Kesava temple at Somanathpur, and the temples at Belur and Halebid. Excavations conducted at Chandravalli have been very fruitful. In Gwalior the Department established in 1913 has done excellent work in exploration of ancient sites, such as Pawaya. Ujjain, Besnagar and Mandasor. The conservation of the Bagh caves and other ancient monu-

ments and the maintenance of a good museum are among the other achievements of the Department. In Jaipur excavations conducted by the late Rai Bahadur Daya Ram Sahni have revealed the existence of a unique Buddhist establishment at Bairat and a city site near the Sambhar lake. The recently started Archaeological Department of the Baroda State has done a valuable work in the listing of monuments and the exploration of several sites including Amrell in Kathiawad and Pattan in Gujarat.

The recently amended Ancient Monuments Preservation Act has established a system of licenses for scientific excavations to non-official bodies. The first Society to take part in this work was the American School of Indic and Iranian Studies which, cooperating with the Boston Museum of Fine Arts, organized anexpedition for work in Chanhudaro in Slnd. Here, several phases of the prehistoric culture of the Indus Valley represented by Mohenjo-daro were unearthed. The University of Calcutta have recently taken licence for excavation at Bangarh in North Bengal and the Punjab Exploration Fund have recently started work at the site of Bhera in the District of Puniab.

Indian Time.

chaotic confusion. What was called Madras or Railway time was kept on all the railways; and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Government, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential point in this letter are indicated below:

"In India we have already a standard time which is very generally, though by no means universally, recognised. It is the Madras local universally, recognised. It is the Madras local time, which is kept on all railway and telegraph lines throughout India and which is 5h. 21m. 10s. in advance of Greenwich. Similarly Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h. 24m. 47s. shead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

"The Government of India have several times been addressed by Scientific Societies, both in india and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes:- 'The Committee think that a change from Madrastime to that corresponding to a longitude exactly 5} hours east of Greenwich would be an improve-

For many years Indiantime was in a state of | for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable.

> "Now If India were connected with Europe by a continuous series of civilised nations with their continuous railway systems all of which had adopted the European hour-zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

"It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the railways; and the substitution for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike; and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of ment upon the existing arrangements; but that India. The one greatadvantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour: whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on all the railway and telegraph clocks in India by 8m. 50s. They would then represent a time 54 hours faster than that of Greenwich, which would be known as Indian Standard Time: and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures represent-ing minutes, and F. and S. meaning that the standard time is in advance of or behind local time respectively:-Dibrugarh 51 S., Shillong 38 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Lahore 33 F., Bombay 39 F., Peshawar 44 F., Karachi 62 F., Quetta 62 F.

"This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon, respectively; and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that in-stead of using Rangoon Standard Time as at present, which is 6h. 24m. 47s. in advance of Greenwich, a Butma Standard Time should be adopted on all the Burmese railways and telegraphs, which would be one hour in advance of Indian Standard Time, or 61 hours ahead of Greenwich time, and would correspond with of some orthodox 97° 30' E. longitude. The change would bring Time is universal.

Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable, is a matter which must be left to the local community in each case.

It is difficult to recall, without a sense or bewilderment, the reception of this proposal by various local bodies. To read now the fears that were entertained if Standard Time was adopted is a study in the possibilities of human error. The Government scheme left local bodies to decide whether or not they would adopt it. Calcutta decided to retain its own local time, and to-day Calcutta time is still twenty-four minutes in advance of Standard Time. In Bombay the first reception of the proposal was hostile; but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality. Subsequently the opposing element in the Municipality brought in a side resolution, by which the Municipal clocks were put at Bombay time which is thirty-pine minutes behind Standard Time. On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time; in Burma the Burma Standard Time became universal. Calcutta retains its former Calcutta time; but in Bombay local time is retained only in the clocks which are maintained by the Municipality and in the establishments of some orthodox Hindus. Elsewhere Standard

Coinage, Weights and Measures.

As the currency of India is based upon the rupes, statements with regard to money are generally expressed in rupess, nor has it been found possible in all cases to add a conversion into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs. 1,000=£100). But after 1873, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and un-foreseen fluctuations in exchange, it was re-solved in 1893 to close the mints to the free coinage of silver, and thus force up the value is one hundred lakhs or ten millions (written

of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupce to 1s. 4d., and then introduce a gold standard at the rate of Rs. 15=£1. From 1899 onwards the value of the rupes was maintained, with insignificant fluctuations, at the proposed rate of is. 4d until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. instead of 1s. 4d. was adopted. This was followed by great fluctuations. (See article on Currency System).

Notation.-Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions, but in lakhs and crores. A lakh is one hundred thousand (written out as 1,00,000), and a crore out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1,00,000) may be read as the equivalent of £10,000 before 1873, and as the equivalent of (about) £6,667 after 1899, while a rore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) £666,667 after 1899. With the rupee at 1s. 6d. a lakh is equivalent to £7,500 and a crore is equivalent to £750,000.

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 1½d., it may now be considered as exactly corresponding to 1d. The anna is again sub-divided into 12 pies.

Weights.—The various systems of weights sed in India combine uniformity of scales with mmense variations in the weights of units. The scales used generally throughout Northern India and less commonly in Madras and staniardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund=40 seers, one seer=80 tolas. The actual weight of seer raries greatly from district to district and even rom village to village in India except in Bombay Presidency. In the standard system the tola sof 180 grains, and seer thus weighs 2.057 lbs. Ind the maund 82.28 lbs. This standard is also used in official reports.

Retail.-For calculating retail prices, the iniversal custom in India is to express them in erms of seers to the rupee. Thus, when prices hange what varies is not the amount of money o be paid for the same quantity, but the quantiy to be obtained for the same amount of money. in other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England, especially at small shops. where pennyworths of many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s. 4d., 1 seer per rupee=(about) 3 lb. for 2s., 2 seers per rupee=(about) 6 lb. for 2s., and so on.

The name of the unit for square measurement in India generally is the buha, which raries greatly in different parts of the country. But areas have been expressed in this work lither in square miles or in acres.

Proposed Reforms.—Indian weights and passed on practical experience. The want branes have never been settled upon an based on practical experience. The want branes characteristic of the modern age. They vary from town to town and village to village to a way that could only work satisfactorily to long as the dealings of towns and villages were self-contained and before roads and ratiways opened up trade between one and the

other. If we take, for instance, the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the maund as between district and district the state of affairs is worse. Thus in the United Provinces alone, the maund of sugar weighs 46½ seers in Cawnpore, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 48½ in Sharanpur, 50 in Bareilly, 46 in Fyzabad, 48½ in Shahjehanpur, 51 in Goshangunge. The maund or railway maund of 82-2/7 lbs. to the Factory maund of 74 lbs. 10 oz. 11 drs., the Bombay maund of 28 lbs., which apparently answers to the Forest Department maund in use at the Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry .- These are merely typical instances which are multiplied indefinitely. There are variations of every detail of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways Government departments adopted a standard tola (180 grains), seer (80 tolas) and would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the whole question in consultation with the pro-vincial Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an ad interim report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over arge areas subject to many diverse condilions of trade and social life would not result tin bringing about the desired reform so success fully as a "lead" supplied by local legislation based on practical experience. The want of coherence, savoir faire, or the means of cooperation among the people at large pointed to this conclusion. The Committee pointed out that a good example of the results that will follow a good lead is apparent in the East Khandesh District of the Presidency, where during the course of three years, induced the people to adopt throughout the district uniform weights and measures, the unit of weight in this case being a tola of 180 grains. But the committee abstained from recommending that the same weights and measures should be adopted over the whole Presidency, preferring that a new system started in any srea should be as nearly as possible similar to the best system already prevailing there.

Committee of 1913.—The whole problem was again brought under special consideration by the Government of India in October, 1918, when the following committee was appointed to inquire into the entire subject anew:—

Mr. C. A. Silberrard (President). Mr. A. Y. G. Campbell.

Mr. Rustomii Fardoonii.

This Committee reported, in August 1915 in favour of a uniform system of weights to be adopted in India based on the 180 grain tola. The report says:—Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Rallway weights. The introduction of the system involves a more or less considerable change of system in parts of the United Provinces (Gorskhpur, Bareilly and neighbouring areas), practically the whole of Madras, parts of the Punjab (rural portions of Amritsar nadeighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province. Burma has at present a separate system of its own which the committee think it should be permitted to retain. The systems recommended are:—

100 tikals	= 1 peikths or

The tola is the tola of 180 grains, equal to the rupee weight. The viss has recently been fixed at 3 60 lbs. or 140 tolas.

Government Action.—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly, they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", near the commencement of this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights, the Government of India will be prepared to undertake such legislation, but at present they consider that any such step would be premature.

Provincial Government Action.—Amongst the various Provincial Governments in India, Bombay Government is the only one which has taken action to standardize the weights and measures, etc., used in trade in the Presidency.

The Peoples of India.

character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India-the Dravidians-differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar Whatever may be their and Madagascar, Whatever may origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled

The people of the Indian Empire are divided by Sir Henry Risley (Caste, Tribe and Race, Indian Census Report, 1901; the Gazetteer of India, Ethnology and Caste, Volume 1, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tlny group of Negritos may be disregarded.

The Turko-Iranian, represented by Baloch, Brahui and Afghans of Baluchistan and the North-West Frontier Province, Probably formed by a fusion of Turki and Persian elements. in which the former predominate. Stature above mean; complexion fair; eyes mostly dark but occasionally grey; hair on face plentiful; head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall; complexion fair; eyes dark; hair on face plentiful, head long; nose narrow, and prominent but not specially long.

The Scytno-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidlan elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lewer orbito-nasal index. All of these characters. except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight; in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Raj-Hindustani, putana, and in Bihar and represented in its up-

it is essential to bear in mind, when dealing lower by the Chamar. Probably the result of the with the people of India, that it is a continent intermixture, in varying proportions, of the Indo-rather than a country. Nowhere is the complex | Aryan and Dravidian types. The head-form is long with a tendency to medium; the complexion varies from lightlsh brown to black; the nose ranges from medium to broad, being always broader than among the Indo-Aryans; the stature is lower than in the latter group and usually below the average according to the scale, The higher representatives of this type approach the Indo-Aryans while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. distinctive feature of the type, the character which gives the real clue to its origin and stamps the Arvo-Dravldian as racially different from the Indo-Aryan is to be found in the proportion of the nose.

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orisea, comprising the Bengal Brahmins and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad; complexion dark; hair on face usually plentiful; stature medium; nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa; the western ilmit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himainyas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu; the Lepchas of Darjeeling and Sikkim; the Limbus, Murmis and Gurungs of Nepal; the Bodo of Assam; and the Burmese. The head is broad : complexion dark, with a yellow tinge; hair on face scanty; stature short or below average; nose fine to broad, face characteristically flat; eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongo-loid elements. In typical specimens the stature is short or below mean; the complexion very dark, approaching black; hair plentiful, with an occasional tendency to curl; eyes dark; head long; nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest clad ranges, terraced plateau, and undulating plains which stretch per strata by the Hindustani Brahman and in its roughly speaking, from the Vindhyas to Cape

Comorlu. On the east and the west of the | deposit which is here treated as Dravidian these peninsular area the domain of the Dravidian is conterminous with the Ghats, while further north it reaches on one side to the Aravailia, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, entting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Raugoon and Singapore, he is recognizable at a glance by his black skin, bis squat figure, and the negro-like proportion of his nose. In the upper strata of the vast social formation had taken place.

typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They met into each other insensibly; and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the trans-

TOWN AND COUNTRY.

The progress of urbanisation in Indla-if there has been any progress at ali-has been very slow during the past thirty years, the whole increase being a little more than one per The percentage of the urban population to the total is only 11, which however shows an increase of 0.8 per cent, since the last census, due partly to the natural increase of the preexisting urban population and partly to migration from rural areas. The percentage of urban population ranges from 3.4 in Assam to 22.6 in Bombay which is the most urbanised of the major provinces. Compared to this, the urban population in France is 49 per cent., in Northern Ireland 50,8 per cent , in Canada 53,7 per cent., in the U.S. A. 56.2 per cent, and in England and Wales 80 per cent.

The greatest degree of growth has been in the number of towns with a population of from 20,000 to 50,000, the total population of which is now nearly double that of towns of 50,000 to 100,000. All classes of towns have increased in population, except those with populations of between 5,000 and 10,000 and those having under 5,000. Thus the large industrial and semi-industrial towns have benefited at the expense of the smaller towns.

migration being against India.

other parts of the British Empire. There are Empire there are about 100,000 Indians In the Union of South Africa, of whom 142,970 are found in Natal. There are 26,759 in Kenya; the other overseas bers in Portuguese East Africa, the U. S. A., Indian communities in order of size are Mauri- Persia, Iraq and other countries.

Migration.—Of the population of the Indian tins 268,870, Trinidad and Tobago 138,667, Empire only 730,546 were enumerated as born in other parts of the world. Of these 595,078 British Gulana 130,540, Fiji 75,117 and much smaller numbers in Tanganyika, Jamaica, are of Aslatic birth, 118,089 of European birth about 11,000 Indians scattered in numbers of is approximately 2.5 million, the balance of inder 2,000 in various other parts of the British Empire and probably about 9,000 in the British Isles. The total number of Indians in the Nearly all of these migrants are resident in Empire outside India is 2,300,000. Outside the

The Chart below gives at a glance the changes in India's population in the decade 1921-31—the total, sex, urban rural and literacy,

RELIGIONS.

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded. As a matter of fact, Dr. Hutton, the Commissioner for the latest census, refers to an excess of zeal on the part of all parties to register as many adherents as possible in view, of the possibility of a communal franchise based on the census returns. "So high did feeling run over the return of religion in the Punjab", he says, "that disputes as to whether a man was Adi Dharmi (Adherent of the original reli-

gion) or Sikh added to a number of affrays and at least to one homicide. Speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhists, 3 follow the religion of their tribes, one is a Christian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain, much less probably a Parsi and just as possibly either a Jew, a Brahmo, or a holder of indefinite beliefs. The enumerated totals of the Indian religious are set out in the following table:—

			Religio	on.				Actual number in 1921. (000's omitted.)	Proportion per 10,000 of population in 1921.	Variation per cent. (Increase + Decrease—). 1911-1921.
Hindu								239,195	6,824	+10.4
		• •	•	• •	••	••	•• [468	15	+92.1
Arya	• •	• •	• •	• •	• •	• •	•••			
Sikh	• •	• •	• •	• •		• •	• • •	4,336	124	+33.8
Jain			• •			• •	•••	1,252	36	+ 6.2
Buddhist								12,787	365	+10.5
Iranian Zo	proast		(Parsi)1		•			110	3	+ 7.8
Musalman			••		• •			77,678	2,216	+ 13
Christian							. ,	6.297	179	+32.5
	• •	• •	• •	• •	• •	• •	•••		179	
Jew			• •	• •	• •	• •	•• }	24	1	+10.9
Primitive (Eribal)						8,280	236	-15.3
Miscellaneo	us (Mi	nor r	eli g ions a	nd rel	igions n	ot ret	urned)	571	16	+3,072 6

A feature of the above table is easily the large increase in the number of those returned as "miscellaneous". This is explained by the fact that the latest cenaus grouped all those who returned their religion as Adl-Hindu, Adl-Dravida, etc., under "miscellaneous".

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 88 per cent. of the population. Hindus are in the majority in Assam, Bihar and Orissa, the United Provinces, the Central India tracts, Rajputane and Bombay, Muhammadans monopolize the North-West Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Punjab and Eastern Bengal and Sind. They form about 32 per cent. of the population of Assam, 15 per cent, in the United Provinces and 10 per cent. in Hyderabad. The Buddhists are almost entirely confined to Burma where they are \$4 per cent of the population. The Sikhs are localized in the Punjab and the Jains in Rajputana, Ajmer-Merwara and the neighbouring States. Those who were classed as following Tribal Religions are chiefly found in Bihar and Orissa, the Central Provinces and Assam, but Bengal,

Burma, Madras, Rajputana, Central India and Hyderabad also returned a considerable number under this head. More than half of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Punjab, the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam. The Parsis and Jews are chiefly residents of the Bombay Presidency.

Christians.—The Christian community now numbers just 6½ millions of persons in India or 1.79 per cent. of the population. This constitutes an increase of 32.5 per cent. over the last census of while 120 per cent. is ascribed to conversions during the decade 1921-31. Nearly 60 per cent. of Christians are returned from the Madras Presidency and its States, and the community can claim 35 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent. in Cochin and 31.5 per cent. in Travancore, Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab and Bihar and Orissa.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census of India was taken on the night of February 24th in Burma and on that of 28th in India. The total population of India as thus ascertained is 352,837,778, viz., British Territory 271,526,933 and Indian States 31,310,845 giving an increase of 24,670,742 in British Territory and 9,224,556 in Indian States.

The following table shows the percentage of variation in the country's population at the

last two censuses and in the last 50 years:-

It is claimed that the city of Calcutta contains 35,000 more inhabitants than Bombay which is the next largest city in India. There are DATE OF THE PARTY OF

nearly twice as many inhabitants in Calcutta proper as there are in Madras and almost three times as many as there are in Rangson. Alone during the decade than Calcutta. The same is true of Delhi and Madras which increased by 47 per cent, and 22 per cent, over their population of 1921. On the other hand, shfoungh the increase of 119.47 of the population of Calcutta during the last decade is greater than has been recorded in any of the other cities the percentage increase amounts to only 11 as compared with 21.5 in Karachi 15.9 in Rangoon 14.6 in Armadabad and 14.2 in Inchrow. Taking the suburban areas into account the population of Calcutta is 1,485,582 of which 1,108,734 are and the standed to more than half as large sgain as it was in 1921 has increased its population by actually a larger numbers large cities of India, Bombay records a decrease in population since the 1921 census.

special causes contribute to the high mortality | infants in India.

)wing to the custom of early marriage, coitation and child-birth commonly take place ore the woman is physically mature and this, ibined with the primitive and insanitary thods of midwifery, seriously affects the 1th and vitality of the mother and through of the child. If the child survives the pre-al and natal chances of congenital debility the risks of child-birth, it is exposed to the gers of death in the early months of life n diarrhœa or dysentery. According to the cutive Health Officer of Bombay city, by the greater number of infantile deaths are to infantile debility and malformation, uding premature birth, respiratory diseases ing next, then convulsions, then diarrhoea enteritis.

ex Ratio.—The figures of the population ndia by sexes, as recorded by the latest in the proportion of females to males that are approximately equal.

has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all-India ratio is 901 females per 1,000 males for Muslims and 951 females per 1,000 males for Hindus. The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded. Where females are in excess, the excess is still most marked in the lower castes and does not always adia by sexes, as recorded by the latest extend to the higher. Among the aboriginal us, show a further continuation of the steady tribes, however, the numbers of the two sexes

been discussed fully in the report of 1911. Both remarriage, and in both these communities Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The custom of polyanury is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

The table below shows the percentage for each sex of married persons who are under the age of 15 years:

Number per 1,000 of total married who are under 15 years

Province	s, etc.	Males.	Females.
India		 65.7 1.8 68.0 73.1 59.4 32.5 49.6 26.9 15.4	157.3 6.7 161.8 164.1 174.3 108.3 93.3 74.6 43.3

Widows and Remarriage.—Infant marriage naturally involves infant widowhood, a feature of no significance where remarriage is allowed. but of serious importance where it is not. Widows among Hindus numbered just under two millions in 1931; but the general ratio of widows has decreased as compared with 1921. In the 1921 census there were 175 widows in every 1,000 females, a figure which had fallen in 1931 to 155. It is, however, Jains and

Marriage.—The subject of polygamy has Hindus who place an effective ban on widow the total ratio of widows has fallen; Jain widows in 1931 were 253 per 1,000 females, but in 1931 only 221, and the 1921 figure of 191 widows in every 1,000 Hindu females has fallen to 169 in 1931. On the other hand, there has already been a very remarkable increase in child widows particularly under the age of 5 years, which can be attributed to the rush of marriages anticipa-tory to the Child Marriage Restraint Act, a rush which it is to be feared will contribute large numbers of young widows to the figures of the 1941 census unless there is before then a very pronounced change of attitude towards widow remarriage in Hindu society generally. In every thousand Hindu women there are still 169 widowed, 22 of whom are under thirty years of age and over a quarter of those under 20. In spite of reformist movements to popularise widow remarriages, they are still uncommon enough to attract attention in Indian papers whenever they take place.

Proportion of widows in the population per 1.000 of all religious

SOCIAL AND ECONOMIC CONDITIONS.

Literate in the sense of being able to write a letter and read the reply.

Literacy, in the sense of ability to write a letter and to read the answer to it, has grown enormously in the past fifty years, although it is at present not very high in comparison with countries in the west. Ninety-five out of every 1,000 of the population are now literate, as against 82 ten years ago and less than 40 half Burma leads the provinces in a century ago. the matter of literacy; for in that provinces in the matter of literacy; for in that province literacy, even if not of a very high order, is a habit, traditional in both sexes and all classes, both boys and girls being taught in the monasteries of which almost every Burman village has at least one. Cochin, Travancore and Baroda follow Burma in the order of literacy. Cochin State in spite of a very rapid growth

Literacy.—The number of persons in India | in population and in spite of having started with a very high ratio, has been able to do more than keep pace with that growth.

> Literacy is much more prevalent in towns than in the country, as both the need for, and the opportunities of, acquiring it are greater. An analysis of the population of the cities shows that 348 out of 1,000 males and 149 out of 1,000 females are literate, while the corresponding figures for literacy in English in towns are 1.473 males and 434 females.

> The country taken as a whole, female literacy is comparatively absent in India proper except in Kerala. Cochin State has more than one literate female to every two literate male and Travanore only a little less, while Malabar has nearly one to every three, Coorg a little less than one to every three, Baroda a little fewer and Mysore one to every five. Besides the

ifficulty, still felt very strongly in most pro-inces, of getting good women teachers, one of ie most serious obstacles to the spread of male education is the early age of marriage, hich causes girls to be taken from school religions and communities, the figures are as fore they have reached even the standard of ie primary school leaving certificate.

Treated in communal or religious groups, the eatest progress has been made by Sikhs, sins. Muslims and Hindus, in that order, but ie leading literate communities are the Parsis, ws, Burmans, Jains and Christians. The llowing table analyses the position of the idian communities in respect of literacy :-

The necessity of a common medium of concentral India. In their pure forms these four versation and intercourse, which has given rise languages may be scientifically distinct; but to bi-lingualism and the consequent displace this not the popular view. There is a common ment of tribal languages, has formed the subject element in the main languages of northern and of a considerable amount of discussion and central India which renders their speakers, withof Eastern and Western Hindi considerably a lingua franca over a large part of India. exceed in number the strength of any other individual language in India, and if we add to Infirmities.—These are classes under four these two languages Bihari and Rajasthani, main heads—insanity, deaf-mutism, blindness which so resemble Hindi as to be frequently reand leprosy. The appended statement shows turned under that name in the census schedules, the number of persons suffering from each we get well over 100 millions of speakers of infirmity at each of the last six censuses and the tongues which have some considerable affinities proportion per hundred thousand of the and cover a very large area of northern and population:

		TOTAL	••		860,099 272	833,644 267	670,817 229	856,252 315	937,063

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901, many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons failing from 315 to 267. The increase in ratio as well as in numbers since then is attributed to increased accuracy of enumeration.

Occupation .- It is a well-known fact that the majority of the people in India live on agriculture. The latest census puts down the number of those engaged in the exploitation of animals and vegetation at 103,300,000, while those engaged in industry number 15,400,000. Thus about 67 per cent. of the country's workers are employed in the former and 10 per cent. in the latter. This does not, however, mean that all the 103 millions are land-owners. Rights in land in India are complicated and involved to a degree, incredible to persons familiar only with the simpler tenures of western Europe.

Between the man who cultivates land and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land. If a com-parison is made between the area of land under crops and the number of agriculturists actually engaged in cultivation in British India, it is that for each agriculturist there are 2.9 acres of cropped land of which 0.65 of an acre is irrigated. The cultivation of special crops occupies under two per cent. of the populations concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea. Forestry employs fewer than special cultivation.

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before. Transport by road has attracted more men, while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea. About five million persons are engaged in organised industry.

It is noteworthy that less than one million people, who man, the army, the navy, the air force, the police, the services, etc., manage the administration of this vast country: in other words, 350 odd millions are ruled by one million servants of the state.

There has of late been increasing unemploy. ment, especially among the educated classes. An attempt to include these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs. 10 per mensem and

are held fortunate in getting even that,

Indian Roads.

as follows :-

There exists four great trunk roads, stretching diagonally across the country, which form the tramework with which most of the important subsidiary roads are linked. These trunk roads have been in existence for an immense period and are rich in historical association. The most famous is the ancient marching route.-known as the Grand Trunk Road,-which stretches right across the northern part of the country from the Khyber to Calcutta; the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 69,000 miles of metalled road in British India. None of these roads however can be considered safe "all weather" trunk roads according to modern standards. Madras-Calcutta road in particular is far from being bridged throughout its entire length, and its improvement even in the Madras Presidency would be likely to absorb a large proportion of their funds for some years to come; whilst further North, where it enters Orissa, it has to cross so many large waterways that it will be quite impossible to make it a complete trunk road in the modern sense within any predictable period. And even the other three roads require a great deal of improvement; on the Grand Trunk Road from Calcutta to the North West Frontier, for example, there is as yet no road bridge over the river Sone in Bihar, and on all of them there are places where floods are liable to cause serious interruption to traffic. As regards the subsidiary roads the best and most numerous are to be found in Southern India. As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its aridity and sparse population and the latter because of the numerous unbridged and mostly unbridgeable waterways which dissect it; in addition of course there are numerous other parts of the country. such as the lower Himalayas, where the difficulties of the ground provide obvious reason for the dearth of communications. Besides surfaced roads, there is a very large mileage of "kutcha" roads in India amounting to approximately 200,000 miles, some of which provide good going for motor traffic during the dry weather. On the whole it is reasonable to say that India's road system, even before the advent of motor transport, was altogether insufficient for her needs; and it is the increasing realisation of this fact that led to the appointment of the special

India's road system may be briefly described (Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing use of motor transport and suggest ways and means of financing it.

> The recommendations put forward by the Committee were carefully considered by the Government of India, whose conclusions upon them were embodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose unexpended balances should not lapse at the end of the financial year.

> The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legislative Assembly in February 1937. Its main features may be described as follows: The special tax on petrol introduced in 1929 shall continue to be levied for road development. the proceeds of which, after retaining a reserve of 15% for administration, research and special grants-in-aid, shall be allocated for expenditure in the different provinces, Indian States, etc., in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, re-construction or substantial improvement of roads and bridges including the cost of preparation of road schemes-but not for ordinary road upkeep or maintenance-on interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of Provincial Boards of Communications and establishment connected with the control of motor transport. A new clause inserted in the present resolution lays down that "if in the opinion of the Governor-General in Council the Government of any Governor's province has at any time :--

- (a) failed to take such steps as the Governor-General in Council may recommend for the regulation and control of motor vehicles within the province; or
- (b) delayed without reasonable cause the application of any portion of the Road Fund allocated or re-allocated as the case may be for expenditure within the province.

The Governor-General-in-Council may resume | Local bodies. The extent to which the adminithe whole or part of any sums which he may at that time hold for expenditure in that province. The actual statement of the Account up to data is as follows -

On the administrative side, roads are a Promain classes, Provincial Roads under the Public is responsible for Roads and Railways as well as Works Department and Local Roads in charge of Inland Navigation, Aviation Telegraphs, &c.

stration of roads has been delegated to Local Bodies varies considerably from Province to Province but in British India as a whole about 80% of the extra-Municipal mileage is under the charge of District Boards or District Councils including a certain mileage, mainly in Madras and the Central Provinces, which is termed "Provincial" but maintained under their agency; and within Municipal areas all roads, other than sections of main roads passing through the controlled by the respective towns, are Municipalities.

Up to the introduction of the Road Fund in 1929 all Provincial roads were financed exclusively from the General Revenues of the Provinces and Local roads from Local Revenue supplemented by Provincial Grants. Since 1929, however, the Road Fund is being distributed to Provinces and is available for construction, reconstruction or improvement of roads, but not for ordinary road upkeep. The object of creating the Road Fund was to supplement and not to replace the normal expenditure on "original" road works from Provincial and Local revenue but unfortunately the years following the introduction of the Fund have been marked by acute financial stringency with the result that Provincial Governments and Local Bodies have had to make drastic curtailments in the allotments made for roads from their revenue.

The effect of these curtailments has been to starve the construction and development of feeder roads, as the Road Fund was being used exclusively for roads of inter-provincial and interdistrict importance. The Government of India. however, have now laid down that at least 25% of the Provincial shares in the Road Fund should be used on feeder roads and that not more than 25 per cent, can be used on roads which compete with the Railways.

Questions affecting roads and road transport were up till recently being dealt with by the Government of India through the Department of Industries & Labour, while Railways came under the Commerce Department, each under a separate Member of the Viceroy's Executive Council. With a view to co-ordinating the different means of communications, however, a portfolio for Communication has been formed with effect from vincial subject and may be divided into two November 1937, the Member in charge of which

Including the amounts spent from the Road Development Fund the total expenditure on extra-Municipal roads during recent years is as follows !--

Annrox.

The Government of India.

was not conquest but trade. The Government of Indiarepresents the slow evolution from conditions established to meet trading requirements. On September 24, 1599, a few years before the deaths of Queen Elizabeth and Akbar, he merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed.

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1778, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treatles without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencles in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended, as it was again by the Charter Act of 1793. Under the Charter Act of 1833 the Company

The impulse which drove the British to India; Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown, became known as the Viceroy. The Governor-General was the sole representa-tive of the Crown in India; he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration.

Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in some provinces it has restricted the alienation of land from agriculturists to non-agriculturists, It undertakes the management of landed estates where the proprietor is disqualified In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and oplum. It owns the bulk of the railways of the country, and directly manages a considerable portion of them: it has constructed and maintains most of the important irrigation works; it owns and manages the post and telegraph systems; it had until ist April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agri-culturists and occasionally to owners of historic estates. It controls the sale of It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one-fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated. It was definitely regulated by the Reform Act of 1919, and the democratic principle then widely was compelled to close its commercial business implanted is greatly developed in the constituand it became a political and administrative tions for the Provinces and the centre enacted body holding its territories in trust for the by the Imperial Parliament in 1935.

THE REFORMS OF 1919 AND 1935.

Great changes were made in the system of Status were brought about by the Government government in British India by the Government of India Act, 1935, which received the Royal ment of India Act, 1919, which, together with the rules framed under it—almost as important embodied two main principles—(1) Provincial in their provisions as the Act itself—came | dinonner two main principles—(1) Provincial in their provisions as the Act itself—came | dinon |

years). Still vaster changes in the direction sions for the whole scheme are made in the Act of Indian Self-Government and of Dominion of 1935, which includes 478 sections and 16

schedules and is the largest and most complex | Instrument of Accession negotiated in relation legislative enactment of the kind ever negotiated

on to a statute book.

The new Constitutional provisions relating to force on 1st April 1937. Over the inauguration the regulation of the form and powers of the of Federation there is inevitable delay. The Government of India Paralle and Paral Indian States have, except for a small minority, indicated their readiness to enter a Federation on the lines proposed by the Act. But, because of their Treaties with the British Crown no Provinces and for the Government of India as State can be compelled to enter and each State it exists prior to Federation. which decides to enter must do so by a separate

to that State's particular circumstances. The settlement of these Instruments requires time. This was foreseen and hence the Act of 1985 of Federation.

In what here follows will be found an account of the new Constitutional arrangements for the

THE PROVINCES.

The following are under the Act of 1935 the Governors' Provinces of British India (there being besides these Provinces certain Chief Commissioners' Provinces and also certain "Excluded areas" where the population is not yet ripe for the introduction of an advanced Constitution):—Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North West Frontier Province, Orissa, Sind. The Act recognises Berar as being under the sovereignty of H. E. H. the Nizam of Hyderabad whose Heir Presumptive is elsewhere created Prince of Berar and the Act specially provides for its administration as part of the major Province to which its name is given. The Act creates Orissa and Sind separate Governors' Provinces and provides for the separation of Burma from India and for its constitution as a separate country under the Crown. The Act gives powers for the creation of other Governors' Provinces.

The Provincial Constitution provides for the exercise of the executive authority on behalf of His Majesty by the Governor. It also provides for a "a Council of Ministers to aid and advise the Governor in the exercise of his functions except in so far as he is by or under this Act required to exercise his functions or any of them in his discretion." The Governor chooses his Ministers, who hold office during his pleasure and he is directed by his Instrument of Instructions to select such as are likely to have the support of the Legislature and is enjoined to accept their advice except in special cases for which other provision is made in the Act.

The following special responsibilities are laid upon the Governor :-

- (a) the prevention of any grave menace to the peace or tranquillity of the Province or any part thereof;
- (b) the safeguarding of the legitimate interests of minorities:
- (c) the securing to, and to the dependents of, persons who are or have been members of the public services of any rights provided or preserved for them by or under this Act and the safeguarding of their legitimate interests;
- (d) the securing in the sphere of executive action of the purposes for which the provisions of chapter III of Part V of this Act are designed to secure in relation to legislation (these provisions are legislative discrimination against British in his discretion.

subjects in regard to taxation, trade, professional business and qualifications):

- (e) the securing of the peace and good govern-ment of areas which by or under the provisions of this Act are declared to be partially excluded areas;
- (f) the protection of the rights of any Indian State and the rights and dignity of the Ruler thereof : and
- (g) the securing of the execution of orders or directions lawfully issued to him under Part VI of this Act by the Governor-General in his discretion (i.e., concerning agency functions in behalf of the Central Authority, interprovincial co-operation in matters and so forth).

"If and in so far as any special responsibility of the Governor is involved he shall in the exercise of his functions exercise his individual judgment as to the action to be taken." Where the Governor is required by the Act to act in his discretion or to exercise his individual judg-ment he is placed under the control of the Governor-General in the latter's discretion.

The Provincial Legislatures.—The Act provides that there shall for every Province be a Provincial Legislature consisting of His Majesty represented by the Governor and (a) in the Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar and Assam two Chambers and (b) in the other Provinces one Chamber the two Chambers being called the Legislative Council and the Legislative Assembly and wherethere is only one Chamber the Legislative Assembly. Every Legislative Council is to be a permanent body not subject to dissolution but as near as may be one-third of its members are to retire in every third year. Every Legislative Assembly of every Province unless sooner dissolved is to continue for five years.

The Houses of Legislature are electoral bodies: with special electoral provisions for communal and other particular interests, and are based on a considerably wider franchise than was provided by the Act of 1919.

Special provisions are made for cases in which the Governor finds himself unable to assent to

Bills passed by the Legislature.

The Governor of a Province is given power to promulgate ordinances if, when his Legislature is not in session, he is satisfied that circumstances necessitate immediate action and under certain other conditions, and in certain circumstances concerned with the prevention of and under prescribed conditions to enact Acts Government to be carried on if at any time the and Nicobar Islands, Panth Piploda. Governor is satisfied that a situation has arisen is made for the possible creation of others. in which the government of the Province cannot Chief Commissioner's Province is to be adminibe carried on in accordance with the provisions of the Act.

Chief Commissioners' Provinces.—The Commission following are by the Act constituted as Chief discretion. Commissioners' Provinces-British Baluchistan,

Provision is further made to enable the Delhi, Ajmer-Merwara, Coorg, the Andaman Provision stered by the Governor-General acting, to such extent as he thinks fit, through a Chief Commissioner to be appointed by him in his

DIVISION OF POWERS.

The Act provides for the institution of a Federal Court consisting of a Chief Justice of India and such other judges as His Majesty may deem necessary, the seat of the Court being Delhi and its original jurisdiction extending to disputes between the Federation, any of the Provinces or any of the Federated States, its appellate jurisdiction to include certain classes of appeals from the High Courts of British India and of the Indian States and appeals living from it to His Majesty in Council. The Province.

Federal Court held its first sitting on 6th 11. Elections to the Provincia December 1987. Chief Justice Sir Maurice subject to the provisions of this A Gwyer, two other Judges Sir Shah Mahomed Order in Council made thereunder. Sulaiman and Sir S. Varadachariar,

it provides.

Provisions are made in the Act in relation to the recruitment and control of the Public Services Commission for the Federation and of one for each Province. The duties and powers of these Commissions in regard to the Services are laid down in the Act, which also provides that two or more Provinces may agree to have one Commission between them.

Provincial Legislation.—The Act provides for a new division of functions between the Central and Provincial authorities and the following is the new Provincial Legislative List, which came into operation on 1st April 1937 :-

- 1. Public order (but not including the use of His Majesty's naval, military or air forces in aid of the civil power); the administration of justice; constitution and organisation of all courts, except the Federal Court, and fees taken therein; preventive detention for reasons con-nected with the maintenance of public order; persons subjected to such detention.
- 2. Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list; procedure in Bent and Revenue Courts.
- 3. Police, including railway and village police.
- 4. Prisons, reformatories, Borstal institutions and other institutions of a like nature, and persons detained therein; arrangements with other units for the use of prisons and other institutions.
 - 5. Public debt of the Province.
- Public Service Commissions.

- 7. Provincial pensions, that is to say, pensions payable by the Province or out of Provincial revenues.
- Works, lands and buildings vested in or in the possession of His Majesty for the purposes of the Province.
 - 9. Compulsory acquisition of land.
- 10. Libraries, museums and other similar institutions controlled or financed by the
- 11. Elections to the Provincial Legislature subject to the provisions of this Act and of any
- 12. The salaries of the Provincial Ministers, The Act also prescribes that the Executive authority of the Federalion in respect of railway construction, maintenance and operation shall be exercised by a Federal Railway Authority, the construction and activities of which of the members of the Provincial Legislature; and, to such extent as is expressly authorised by Part III of this Act, the punishment of persons who refuse to give evidence or produce and for the appointment of a Public Service documents before Committees of the Provincial Legislature.
 - Local government, that is to say, the constitution and powers of municipal corporations, improvement trusts, district boards, mining settlement authorities and other local authorities for the purpose of local self-govern-ment or village administration.
 - Public health and sanitation; hospitals and dispensaries; registration of births and deaths.
 - 15. Pilgrimages, other than pllgrimages to places beyond India.
 - Burials and burial grounds.
 - 17. Education.
 - 18. Communications, that is to say, roads, bridges, ferries, and other means of communications not specified in List I; minor railways subject to the provisions of List I with respect to such railways; municipal tramways; rope-ways; inland waterways and traffic thereon subject to the provisions of List III with regard to such waterways: ports, subject to the provisions in List I with regard to major ports; vehicles other than mechanically propelled vehicles.
 - 19. Water, that 18 to supplies, irrigation and canals, drainage and embankments, water storage and water power.

 20. Agriculture, including agricultural educa-
 - Public debt of the Province.

 Provincial Public Services and Provincial prevention of plant diseases; improvement of stock and prevention of animal diseases:

veterinary training and practice, pounds and the prevention of cattle trespass.

- 21. Land, that is to say, rights in or over land, land tenures, including the relation of landlord and tenant, and the collection of rents; transfer, alienation and devolution of agricultural land : land improvement and agricultural loans colonization; Courts of Wards; e and attached estates; treasure trove. Wards; encumbered
 - 22. Forests.
- 23. Regulation of mines and oilfields and mineral development subject to the provisions of List I with respect to regulation and development under Federal control.
 - 24. Fisheries.
 - 25. Protection of wild birds and wild animals.
 - 26. Gas and gasworks.
- 27. Trade and commerce within the Province; markets and fairs; money lending and money lenders.
 - 28. lnns and innkeepers.
- 29. Production, supply and distribution of goods: development of industries, subject to the provisions in List I with respect to the development of certain industries under Federal cultural land. control.
- 80. Adulteration of foodstuffs and other goods; weights and measures.
- Intoxicating liquors and narcotic drugs that is to say, the production, manufacture possession, transport, purchase and sale of intoxicating liquors, opium and other narcotic drugs, but subject, as respects opium, to the provisions of List I and as respects poisons and dangerous drugs, to the provisions of List III.
 - 32. Relief of the poor; unemployment.
- 33. The incorporation, regulation winding-up of corporations other than corpora-tions specified in List 1; unincorporate trading, literary, scientific, religious and other societies and associations; co-operative societies.
- 34. Charities and charitable institutions; charitable and religious endowments.
- 35. Theatres, dramatic performances and cinemas, but not including the sanction of cinematograph films for exhibition.
 - 36. Betting and gambling.
- any of the matters in this list.

- 38. Inquiries and statistics for the purpose of any of the matters in this list.
- 39. Land revenue, including the assessment and collection of revenue, the maintenance of land records, survey for revenue purposes and records of rights, and alienation of revenue.
- 40. Duties of excise on the following goods manufactured or produced in the Province and countervailing duties at the same or lower rates on similar goods manufactured or produced elsewhere in India:-
- (a) alcoholic liquors for human consumption:
- (b) opium, Indian hemp and other narcotic drugs and narcotics: non-narcotic drugs;
- (c) medicinal and toilet preparations containing alcohol or any substance included in sub-paragraph (b) of this entry.
- Taxes on agricultural income.
- 42. Taxes on lands and buildings, hearths and windows.
- 43. Duties in respect of succession to agri-
 - 44. Taxes on mineral rights, subject to any limitations imposed by any Act of the Federal Legislature relating to mineral development.
 - 45. Capitation taxes.
- 46. Taxes on professions, trades, callings and employments.
 - Taxes on animals and boats.
- 48. Taxes on the sale of goods and on advertisements.
- 49. Cesses on the entry of goods into a local area for consumption, use or sale therein.
- 50. Taxes on luxuries, including taxes on entertainments, amusements, betting gambling.
- 51. The rates of stamp duty in respect of documents other than those specified in the provisions of List I with regard to rates of stamp dutv.
- 52. Dues on passengers and goods carried on inland waterways.
 - 53. Tolls.
- 54. Fees in respect of any of the matters 37. Offences against laws with respect of in this list, but not including fees taken in any Court.

CONCURRENT LEGISLATIVE LIST.

There is also prescribed a concurrent Legislative List in which both the Governments of from one unit to another unit. India and the Provincial Governments enjoy powers. Here it is :-PART I.

- 1. Criminal law, including all matters included in the Indian Penal Code at the date of the passing of this Act, but excluding offences against laws with respect to any of the matters specified in List I or List II and excluding the use of His Majesty's naval, military and air forces in aid of the civil power.
- Criminal Procedure, including all matters included in the Code of Criminal Procedure at the date of the passing of this Act.

- 3. Removal of prisoners and accused person
- 4. Civil Procedure, including the law of Limitation and all matters included in the Code of Civil Procedure at the date of the passing this Act: the recovery in a Governor's Province or a Chief Commissioner's Province of claims in respect of taxes and other public demands including arrears of land revenue and sums recoverable as such, arising outside that Province.
- Evidence and oaths; recognition of laws, public acts and records and judicial proceedings.

6. Marriage and divorce; infants and minors adoption. 7. Wills, intestacy, and succession, save as

regards agricultural land.

Transfer of property other than agricultural land ; registration of deeds and documents.

Trusts and Trustees.

10. Contracts, including partnership, agency, contracts of carriage, and other special forms of contract, but not including contracts relating to agricultural land.

11. Arbitration.

- 12. Bankruptcy and insolvency; administrators-general and official trustees.
- 13. Stamp duties other than duties or fees collected by means of judicial stamps, but not including rates of stamp duty.
- 14. Actionable wrongs, save in so far as included in laws with respect to any of the matters specified in List I or List II.
- 15. Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list.
- 16. Legal, medical and other professions.
- 17. Newspapers, books and printing presses.
- 18. Lunacy and mental deficiency; including places for the reception or treatment of lunatic and mental deficients.
 - Poisons and dangerous drugs.
 - Mechanically propelled vehicles. 20.

21. Boilers.

- Prevention of crucky to animals. 23. European vagrancy; criminal tribes.

- 25. Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court.

PART II.

Factories.

26. Welfare of labour : conditions of labour; 27. provident funds; employers' liability and workmen's compensation; health insurance, including invalidity pensions; old age pensions.

Unemployment insurance.

28. Trade unions; industrial and labour 29. is putes.

30. The prevention of the extension from one unit to another of infectious or contagious diseases or pests affecting men, animals or plants.

31. Electricity.

32. Shipping and navigation on Inland waterways as regards mechanically propelled vessels, and the rule of the road on such waterways carriage of passengers and goods on inland waterways.

33. The sanctioning of cinematograph films for exhibition.

34. Persons subjected to preventive deten-

tion under Federal authority. 35. Inquiries and statistics for the purpose

of any of the matters in this Part of this List. 36. Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court.

An amending bill was introduced in Parliament in 1939 to make certain readjustments found necessary in the operation of the 1935 Act. To safeguard provincial exchequers taxes on mechanical or other road vehicles or on the sale or consumption of electricity were added to the provincial list. It was further provided inter alia that in the event of a war emergency being proclaimed by the Governor-General the Central Government may assume executive in addition to legislative authority over any field and can also with the specific sanction of the Governor-General empower Federal officers with functions ordinarily the concern of provincial administrations.

THE CENTRAL GOVERNMENT.

1919 in the system of government outside the "Governors' provinces" were of comparatively minor scope, though the spirit of the Act required considerable modifications of the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The Act of 1935 provides for extensive further changes at the centre, but these will only come into force when the Indian States accede to Federation and meanwhile, at the Centre, the constitution established by the Act of 1919 prevails, subject to certain modifications required to bring it into harmony with the new conditions in the The only concrete changes made Provinces. in the constitution of the Central Government the 1919 Constitution were the removal of the statutory bar to the appointment of more than six members of the Governor-General's Executive Council (which, however had the far-reaching consequence that three of the eight members of the Council are now Indians) and the reconstitution in a much more enlarged representative and independent form of the nomince of the Governor-General. So also, central legislature. This became, like the for the first four years after the constitution of Legislative Council in a Governor's province, the Chamber, was the President of the Legis

The structural changes made by the Act of a legislature with all the inherent powers ordinarily attributed to such a body save such as are specifically withheld by the terms of the Act. It consists of two Chambers. The "Council of State" was constituted a body of on members, including 34 elected (including one member to represent Berar, who, though technically nominated, was to be nominated as the result of elections held in Berar) and 26 nominated, of whom not more than 20 might be officials. The "Indian Legislative Assembly" was constituted with 144 members, of whom 105 to be elected (including in the case of the Council of State one Berar member who, though actually elected, had technically to be a nominee). Of the 40 nominated members, not sewer than one third were required to be non-officials, The members of the Governor-General's Executive Council were not made ex-officio members of either Chamber, but each of them has to be appointed a member of one or other Chamber, and can vote only in the Chamber of which he is

a member. Any member of the Executive Council may, however, speak in either Chamber. The President of the Upper Chamber is a

Lower Chamber elected its own President and it elected its own Deputy-President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years; but either Chamber, or both simultaneously, may be dissolved at any time by the Governor-General.

Election.—The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils already described except that, firstly, the property qualification for voters (and consequently for candidates) is higher in order to obtain and the Indian Legislative Assembly. manageable constituencies, and past service with the colours is not per se a qualification for the franchise, and secondly, that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencies, are on a provincial basis; that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province and these representatives are elected by constituencies covering an assigned area of the province.

The tollowing table shows the original allotment of the elective seats plus one since added for the North-West Frontier Province -

The Government of India Act 1935 by Burma members.

Since the area which returned perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis was made in the district, it of India Act, 1935, affecting the Government may be said that the normal area unit in the of India, were described in an earlier part of this case of the Legislative Assembly is the Division chapter.

lative Assembly. But after that period the (the technical term for the administrative group of districts controlled by a Divisional Commissioner).

The Franchise.-The general result of the first franchise arrangements under the Act was thus that there was in each province a body of electors qualified to vote for, and stand for election to, the Provincial Council, and that a selected number of these voters were qualified to vote for and stand for election to those seats in the Indian Legislative Assembly which were assigned to the province. The qualifications for candidature for the Indian Legislative Assembly were made the same in each province, mutatis mutandis, as for candidature for the Provincial Council, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency was insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council The concern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen" and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country-the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted or of its predecessor, or of the Pro-vincial Legislature, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical

Powers.—The powers and duties of the Indian Legislature under the 1919 Act differed but little in character within the "central sphere from those of the provincial Councils under the same act within their provincial sphere, and it acquired the same right of voting supplies for the Central Government. But as no direct attempt was made to introduce responsible government at the centre, the step in that direction having been avowedly confined separating Burma from India eliminated the Executive Government of India romained legally responsible as a wholefor the proper fulfilment of its charge to the Secretary of State and Parliament, it followed that the powers conferred on provincial Governors to disregard an adverse vote of the Legislative Council on legislation or supplies were, as conferred on the Governor-General in his relationship with the Indian Legislature, less restricted in their operation than in the provinces; that is to say, they covered the whole field and were not confined in their application to categories of subjects.

learning and literature.

The new provisions, made in the Government

THE INDIA OFFICE.

The Act of 1919 made no structural educational and study facilities for Indian changes in the role of the India Office in students and Government officials on leave or the administration of Indian affairs. Slight. alterations were effected in the number and tenure of office of the members of the Secretary of State's Council, and come relaxations were made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provisions were made which undoubtedly as time went on had a material effect on the activities of the Office. A High Commissioner for India
was appointed for the purpose of taking
over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. His functions relate mainly to the control of Indian Government Trade Commissioners in Europe and America; arrangements in connection with exhibitions and fairs outside India; sale and distribution of Central Government publications; representation of India on Inter-Empire Organisations and at Conferences; relief and repatriation of destitute Indians; and in respect of them he is made responsib purchase of stores outside India: provision of through the Secretary of State to Parliament.

deputation, recruitment of persons for special posts; and payment of leave salary and pensions of officers in Europe, etc. Concurrently with this change, it became possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which was attributable to the exercise of its administrative as distinct from purely agency functions.

The Act of 1935 provides for the appointment

by the Secretary of State of not less than three nor more than six persons whose duty it shall be to advise him on any matter relating to India on which he may desire their advice. It also prescribes that the salary of the Secretary of State and the expenses of his Department shall be paid out of monies provided by Parliament. The Governor-General is given in his sphere of responsibility reserve powers corresponding with those already mentioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible

PERSONNEL AND PROCEDURE.

The Governor-General and the "Executive" members of his Council are, under the Government of India Act 1919 as continued by the Act of 1985, pending the establishment of Federation, appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. There are seven Executive Members of Council. These members under the Government of India Act 1919 hold respectively the portfolios of Defence; Education, Health and Land; Home; Finance; Commerce and Labour; Law; Industries and Labour; Law; Communications. The Commerce Department deals generally with commerce, industrial property, insurance and actuarial work and with blue water shipping. The department of Communications deals with posts and tolegraphs, broadcasting, civil aviation, meteorology, ports, inland navigation and roads. Rallways form a separate department, but are under the same member of the Council as the Communications Department. The Secretary for Communications attends the meetings of the Railway Board as an ex-officio member. The department of Labour deals with labour subjects. In addition it assumes with is bour subjects. In addition it assumes responsibility for labour in docks and for the administration of certain statutes affecting labour on the railways. It deals also with public works and irrigation, mines, technical education so far as that concerns industry, printing and stationery and various items of safety legislation and administration. Ecclesiastical uffairs are placed under the Defence Department.

The Vicercy acts as his own member in

may assemble at any place in India which the Governor-General appoints. In practice it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christmas, when the Viceroy is usually in residence in the Bengal Capital.

In regard to his own Department each Mem-In regard to his own Department each member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, over-rule the views of a Local Government, must ordinarily be referred to the Viceroy. Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy. The Members of Council meet more or less frequently as a Cabinet to discuss questions which the Viceroy desires to put before them, or which member who has been over-ruled by the Viceroy has asked to be referred to Council. If there to a difference of cointon in the Council. If there to a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departmental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under-Secretary of State in the United Kingdom; but with these differences—that the Secretary but with these differences that one country is present though does not speak, at Council meetings at which cases under his cognisance are discussed: that he attends on the Vicercy, charge of External Affairs. The Commanderin-Chief in practice always is an "Ordinary" nember of the Council. He holds charge
of the Defence Department. The Governors
of Madras, Bombay and Bengal become
"extraordinary" members if the Council
meets within their Presidencies. The Council concurrence should be obtained to action

proposed by the Departmental Member of of the Provincial Governments, and officers Council; and that his tenure of office is nominally limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary circulestablishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has no Civil Service of its own as distinct from that

serving under the Government of India are borrowed from the Provinces, or, in the case of Specialists, reruited direct by contract. It is proposed shortly to institute a special cadre of I.C.S. and other Officers for service in the Finance and Commerce Departments, now that the senior posts in these Departments require specialist knowledge and training.

GOVERNMENT OF INDIA.

VICEROY AND GOVERNOR-GENERAL OF INDIA.

The Bombay Province.

and otherwise. The following details relate to Bombay minus Sind:

The Bombay Province now stretches along the west coast of India, from Gujerat in the North to Kanara in the South. It has an area of 77,221 square miles and a population of 18,192,475. Geographically included in the Province but under the Government of India. is the first class Indian State of Baroda, with an area of 8,164 square miles and a population of 2,443,007. There are no States in politi-cal relations with the Government of Bombay, as they are all now under the Government of India.

The Province embraces a wide diversity of soil, dimate and people. In the Province there are the rich plains of Gujarat, watered by the Nerbudda and the Tapti, whose fertility as omarked that it has long been known as the Garden of India. South of Bombay City the Province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Above Ghats are the Deccan Districts, south of these come the Karnatic districts. On the sea side of the Ghats is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult.

The People.

The population varies as markedly as soil and climate. Gujarat has remained true to Hinduism aithough long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and the people, who although softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it; the population is much more homogeneous than in Gujarat, and thirty per cent. are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sind, Gujarati, Marathi aud Kannada with Urdu a rough lingua france where English has not penetrated.

main castes and tribes number five hundred. The

Industries.

The principal industry is agriculture, which supports sixty-four per cent. of the population. In Gujarat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and milet, and in certain tracts rich crops of sugarcane. The Konkan is a rice land, grown under the abundant rains of the submontane

Consequent on the separation of Sind from regions, and in the south the Dharwar cotton the Bombay Province as from April 1, 1986. Vies with Broach as the best in India. There Bombay has suffered a diminution territorially are no great perennial rivers suitable for irriare no great perennial rivers suitable for irri-gation, and the harvest is largely dependent upon the seasonal rainfall; supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually being completed, and this will ulti-mately make the Deccan immune to serious drought. More than any other part of India the Province has been scourged by famine and plague. The evils have not been unmixed, for tribulation has made the neonle wore selffor tribulation has made the people more selfreliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

Manufactures.

Whilst agriculture is the principal industry, others have no inconsiderable place. The mineral wealth of the Province is small and is confined to building stone, salt extracted from the sea, and a little manganese. But the handicrafts are widely distributed. The handloom weavers produce bright-coloured saris, and to a diminishing extent the exquisite kincobs of Ahmedabad and Surat. Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city. Bombay.

Number of Looms in Bombay Island. 67.294Number of Spindles in Bombay Island, 29,06,202 Number of hands employed in the Textile Industry in Bombay Island (daily average) .. 1,18,998 Consumption of Cotton by the Mills in Bombay Island (in candies of .. 5,18,496 784lbs.)

Number of Spindles in Ahmedabad, 19,42,286 Number of Looms in Ahmedabad ... Number of Spindles in Sholapore Dist. 3,17,368 Number of Looms in Sholapore Dist. 6.806

Number of Spindles in the Bombay

Province (excluding Bompay .. 12,57,704 Island and Ahmedabad) ... Number of Looms in the Bombay

Province Bombay (excluding 26,381 Island and Ahmedahad)

Administration.

With the introduction of Provincial Autonomy on April 1, 1987, the administration of the province has been largely altered at the top. There is now a Governor and a council of seven Ministers to aid and advise him in all matters except in so far as he is required by the Government of India Act, to exercise his function in his dis-cretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion, he fixes their salaries until determined by the legislature. The Governor, as in other Provinces, has certain the Governor, as in other Provinces, has certain special responsibilities and these extend to (a) the prevention of menace to the peace or tranquillity of his province or any part thereof; (b) the safeguarding of the legitimate interests of minorities; (c) the safeguarding of the rights of civil servants past and present and their dependants; (d) the securing in the executive sphere of protection against discrimination; (e) sphere or protection against discrimination; (e) the securing of the peace and good government of areas declared to be partially excluded areas; (f) the safeguarding of the rights of states and the rights and dignity of any ruler; and (e) the securing of the execution of orders given to him noder beauty VI of the last delimination. under Part VI of the Act (dealing with administrative relations) by the Governor-General in his discretion.

The Governor is assisted by a special secretariat staff presided over by a Secretary whose emolu-ments are fixed in his discretion.

In the legislative sphere the Governor is assisted with two chambers, known as the assisted with two cusmions, and the Bombay Legislative Assembly and the Bombay Legislative Council. The Council is a permanent body. One-third of the members retire each three years and the Assembly, unless sooner dissolved, lasts for five years. The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Anglo-Indians, 8 Europeans, 2 landholders, 7 Commerce and 8 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Marathas. There are also six women.

The Legislative Council will contain not less than 29 and not more than 30 members of whom not less than three and not more than four shall be nominated by the Governor. Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poona from June to November; but the Secretariatis always in Bombay. Under the Local Government the Province is administered by three Commissioners, namely, the Commissioner for the Northern Division, with headquarters at Ahmedsbad, the Central Division at Poons, and the Sou-thern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy stration in the larger cities of the Bombay Collectors. A collectorate contains on an Province. The larger municipalities are now average from eight to ten talukas, each styled as Municipal Boroughs which are now 27 consisting of from one to two hundred villages in number. The executives of these Borough

whose whole revenues belong to the State. The village officers are the patel, who is the bead of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each taluks or group of villages is the Over each taluas or group of villages is the mamilatar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions.

Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and nine puisne judges, either Civilians, Barristers, or Indian lawyers. Of the lower civil courts, the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate judge with special powers. District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. Dis-trict and Assistant Judges exercise criminal jurisdiction throughout the Province but original criminal work is chiefly disposed of by the Executive District Officers and Resident the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court. In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peacly and a Court of Small Causes, corresponding to the Pacific Courter Courts. the English County Courts.

Local Government.

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka. and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, sery funds and local taxes. The tendency of recent years has been to increase the elective and reduce the nomi-nated element, to allow these bodies to electrheir own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Province. The Act provides more adequate basis for Municipal AdminiMunicipalities are invested with larger powers Sub-Divisional Officer who is either an Assistant than hitherto exercised. Another important Superintendent of Police, or an Inspector of change introduced by the Act was the extension Police, a Deputy Superintendent of Police, of municipal franchise to occupiers of dwellings Sub-Inspectors are the officers in charge of or buildings with annual rental values of Rs. 12 Police Stations and are primarily responsible or with capital value of not less than Rs. 200, under the law, for the investigation of offences

Public Works.

The Public Works Department is under the control of a Chief Engineer who acts as Secretary to the Government. Under him are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, and the Electrical Engineer.

There is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. organizing in reservoirs in the drait regions.
The principal works are the Nira Canals fed
by Lake Whiting impounded by the Lloyd
Dam at Bhatgar, the Pravara Canals fed
by Lake Arthur Hill, impounded by Wilson
Dam at Bhandardara, the Mutha Canals fed
by Lake Fife at Khadakvasia, the Godavari Canals fed by Lake Beale at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the the Mira Lett Baik Causi in 1905-00, was Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal which has been under construction since 1912 is practically completed. The Wilson Dam at Bhandardara, the second highest yet constructed by Engineers the world over, was opened by His Excellency the Governor on 10th December 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs. 172 lakhs. on 27th October 1920, 1t cost 120, 17 1921.
It is remarkable as being the largest Dam in volume hitherto constructed and contains 21 million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police.

The Police Force is divided into 3 categories, etc., District Police, Railway Police and the Bombay City Police. The District and Railway Police in the Province proper are for the rupose of control under the Inspector-General of Police who is assisted by three Deputy inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Finger Print Burean. The executive management of the Police in each district and on Railways in the Province proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the Railway Police. For the purposes of effective Supervision over the investigation and prevention of orime, some of the larger districts are divided into one of more supervisions can burder as

Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at their Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Deputy Superintendents of Police, Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-heald. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad and Dharwar; the Grant Medical College, the Poona College Engineering, the Agriculture College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant-heald. The Bombay Municipality is responsible for primary education in Bombay City (q. v., Education).

The total number of institutions at the end of the year 1936-37 was 14,609. Of these 13,939 were recognised and 670 unrecognised. Of the recognised 12,928 are for males and 1,631 for females. The recognised institutions consisted of 15 Arts and Science Colleges excluding the University School of Economics and Sociology, 12 Professional Colleges, 639 Secondary Schools, 12,901 Primary Schools and 372 Special Schools.

There are 21,668 towns and villages in this Province. Of these, 8,975 possessed schools as compared with 8,700 in 1931-32. The area served by a town or village with school was 8.6 square miles as against 8.9 square miles in 1931-32.

There were 1,335,889 pupils under instruction at the end of the year 1936-37 as compared with 1,152,896 in 1931-32. The number of pupils in recognised institutions was 1,299,569 and in unrecognised institutions was 36,320 as compared with 1,130,462 and 22,434 respectively in 1931-32. The percentage of pupils in recognised institutions to the total population of the Province increased from 7.2 to 7.5. Of the 1,299,569 pupils under instruction in recognised institutions, 963,456 were boys and 313,940 were girls.

The total expenditure on Public Instruction increased from Ra. 34,07,240 to Ra. 3,76,01,839 during the quinquenium. Out of this amount 41.4 per cent was met from Provincial Revenues, 18.7 per cent. from Local Funds, 25.5 per cent. from fees and 14.4 per cent. from other sources.

Raliway Police. For the purposes of effective supervision over the investigation and prevention by a Director, with an Inspector in each of crime, some of the larger districts are divided into one or more sub-divisions each under a in each district.

Higher education in the Province is con-trolled by the Bombay University which was institutions for the treatment of Lepers. established in 1887. The constitution of the Vaccination is carried out by a staff under the University has recently undergone, however, direction of the Director of Public Health. University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of from the large grants made by the Government 1928. This Act altered the whole constitution ommercial and civic life of the people of the Province to enable it to provide greater facili-ties for higher education in all branches of learning including Technology and to undertake tearning including Technology and to undertake on a larger scale than heretofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1938. The authorities of the University sity, as now constituted, are chiefly the Chancellor, Vice-Chancellor, the Syndicate, the cellor, Vice-Chancellor, the Syndicate, the Academic Council and the Senate, The Senate consisting of fellows is the supreme governing body of the University. The number of fellows is 144 of whom 40 are nominated by the Chancellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of University.

Medical.

The Medical Department is in the charge of the Surgeon-General who is a member of the I. M. S., and Public Health in that of the Director of Public Health, who is usually a non I.M.S. Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district: whilst sanitation is tutions is 6,470 roughly. Well-equipped hos-loca pitals exist in all important up-country-stations. On i Over 8,218,000 persons including 111,925 in-patients were treated during the year 1937. The list.

Sanitary work has received an immense stimulus from time to time.

Two important schemes have been recently sanctioned for providing medical relief in rural

The first relates to the extension of a former scheme for subsidising medical practitioners in six selected rural centres. Government have now decided to open, in all, 200 centres for medical ald in the Province by giving subsidies to private medical practitioners. The subsidy will be given to Allopathic medical practitioners and to some Ayurvedic and Unani practitioners who may get themselves registered.

Finance.

With the introduction of Provincial Autonomy, the financial arrangements have been revised. There is a clear cut division between the finances of the Federation and those of the Provinces.

The provincial sources of revenue in addition to grants from federal taxation now include taxes raised by the local Government on land, as land revenue; taxes on land and buildings, meanure and windows; taxes on agricultural income and duties in respect of succession to agricultural land, duties of excise on goods manufactured or produced in the province and countervailing duties on goods produced or manufactured elsewhere in India, being alcoholic liquors for human consumption; optum, Indian hemp, and other narcotic drugs and narcotics; non-narcotic drugs; medicinal and tollet preparations, containing alcohol or any of the above substances, other excises being federal; taxes on mineral district headquarters are responsible for the other excises being federal; taxes on mineral medical work of the district: whilst sanitation is rights subject to any federal restrictions imposed entrusted to one of the Assistant Directors of in respect of mineral development; capitation Public Health. Four large hospitals are maintained by the Government in Bombay, and the accommodation in them has been recently sale of goods, advertisements, on luxuries includinerassed. The total number of beds available in entertainments, ammeements, betting and in all the City Hospitals including private Institutions is 0,470 roughly. Well-equipped hospitals suist in all important up-country-stations.

Over 3,218,000 persons including 11,025 in-respect of documents not included in the federal patients were treated during the vear 1937. The list

Sind.

latter, which has been carved out on a linguistic basis from three older provinces, Sind was a compact unit and was considered a province within a province even before its separation. From the point of view of geography, ethnology and language, Sind has greater affinity to the and haguage, sind has greater annies to the punjab than to Bombay. Nevertheless it has been attached to the Bombay Presidency administratively ever since its conquest by Sir Charles Napier in 1843.

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming majority, should have separate administrative machinery under the next reformed constitution, so that it might be a counterblast to provinces where the Hindus are in a majority. What was where the Hindus are in a majority. started as a bargaining point in inter-communal negotiations has now become an accomplished

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be summarised by its remark, "There is thus marised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage—the problem is whether the Barrage can stand surety for Sind.

Demand for Separation

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation. Wide divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs. 80 lakhs, the revenue from the Barrage being eaten up by interest charges. Roughly from 1945 onwards, there would be a surplus from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

Sind is one of the two provinces created in and the infant in respect of development loans 1986, the other being Orissa, Unlike the incurred during the joint family period. Lands, forests, buildings, property, etc., will pass to the province where they are situated. Arrears of taxes will belong to the province where the taxed property is situate or the taxed transactions took place. Of the outstanding Bombay Irrigation Debt incurred before April 1, 1921, Rs. 2,74,96,864, including Rs. 73,687 of the debt on account of the Lloyd Barrage and Canals system, will be borne by Sind, and the rest by Bombay. Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabad section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind. The outstanding Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay alone. Other loan works will be chargeable to the province where the works are located.

> It is also understood that the Central Government will have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was sened to conduct an inquiry. He completed his investigations and submitted his report, according to which Sind gets a cash subvention of Rs. 105 lakhs for a period of ten years, after which the aid will be progressively decreased. While on the subject of help from the centre, it may be mentioned that, according to the Niemeyer recommendations, Sind will get after the first five years of provincial autonomy 2 per cent, of the distributable portion of the income-tax revenue.

Population.

Sind has an area of 46,378 square miles and a population of 3,887,000. Of this, the Hindus (including scheduled castes) number 1,015,000 and the Muslims 2,831,000. The rest of the population is made up of 1,980 Anglo-Indians, 6,576 Europeans and 6,627 Indian Christians. The language of the province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in a form of Perso-Arabic script, is nearer the original Sanskrit than any other Indian language. Few, however, are capable of writing it, for only 70 out of every With the stage set for the advent of the new province, an Order-in-Council was issued in January, 1986, announcing that the new province, an order-in-Council was issued in January, 1986, announcing that the new province would start en its career on April, 1, 1985, and creating transitional machinery for the conduct of government till provincial autonomy is laaugurated in accordance with the provisions of the Government of India Act, 1935.

Of a permanent character are those provisions of the Order-in-Council which sever Sind from literate in Raglish are 119 per 10,000—186 per Bombay and settle the liabilities of the parent 10,000 males and 24 per 10,000 descales.

Sind. 82

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. Ten per cent, are engaged in manufacturing industries, most of which are, however, of the cottage type, there being very few factories in Sind.

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees. The Sindhiagriculturist is gradually becoming alive to the perennial regulated supply of irrigation and his outlook is becoming brighter. The rapidity with which lands supplied by the Barrage system are being taken up augurs well for the success of the scheme and the prosperity of the province as a whole. Already there has been a growth in the production of long staple cotton, all of which is easily absorbed by Indian textile

Lloyd Barrage.

The Barrage owes its existence largely to the seal of Sir George (Now Lord) Lloyd, the then Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi, the Sindhi alone knows, for the Barrage has converted-or hopes to convert-a waterless desert into a smiling garden flowing with milk and honey.

The magnificence of the achievement that is the Lloyd Barrage can be imagined when it is realised that it is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles, and that of water courses over 30,000 miles. The total lengths is thus some 36,000 miles, which means about 1} times the circumference of the earth.

The total quantity of earthwork involved excluding that for the watercourses was 628 crores cubic feet of earthwork which means a solid column measuring 100 feet by 100 feet extending to a height of over 115 miles.

The function of the Barrage is to head up the river at Sukkur and from that to distribute it all the year round according to requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river four on the left bank, three on the right. on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder East and the Khairpur Feeder West. Those on the right bank are the North Western Canal, the Rice Canal and the Dedu Canal.

The total number of openings in all the canal under cultivation in the Barr Head Ragulators is 55, each being of 25 feet span acros under wheat, 982,700 and each opening being equipped with three and 560,800 acres under rice,

electrically operated gates. The total discharge of water into all the canals is approximately 45,763 cusecs or 457,630 gallons per second. The total length of all irrigation channels including old and new watercourses is 54,300 miles. accomplish this staggering feat, excavation of earthwork to the extent of 7,500,000,000 cubic feet was involved, as much as would fill a drain 14 feet wide and four feet deep, dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows:

Wheat 2,451,000 acres; cotton 832,000 acres; rice 682,000 acres; januari, bajri, etc., 695,000 acres; and oilseeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,138,000 tons; cotton 520,000 bales; rice 487,000 tons; jawari, bajri, etc., 283,000 tons; and oilseeds 117,000 tons.

Inter-communal Co-operation.

Politically, the province is backward. the Hindu minority is politically minded, the Muslims owning allegiance toppersonalities rather than to principles. The Hindus are openly afraid of Muslim dominance and of being ousted from public life. On the other hand, there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights. Leaders of both communities are working for the creation of an understanding between the two which will bring about an area of inter-communal co-operation and goodwill so necessary for the successful working of the reformed constitution under unfavourable financial conditions.

Karachi.

No account of Sind will be complete without a reference to its capital Karachi. It is a comparatively new town, for according to known facts it was as recently as 1729 that a few traders of the neighbouring State of Kalat migrated to the "Kalachi" the land of the sand-dunes. It was several years later that its potentialities as a harbour were realised by the British-Sir Charles Napler, the Conqueror of Sind, is said to have forecast that Karachi would some day become the "Glory of the East." Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled, for with the growth of aviation, Karachi, which is on the main line of imperial aerial communication between London and Australia right across India, is bound to become a vital airport, if it is not already one. In addition to being the capital of Sind, Karachi is the outlet for the products of the Punjab. If the Barrage becomes products of the Punjab. If the Barrage becomes all that is expected of it, Karachi may have to handle in 1960 nearly 1,138,000 tons of wheat 520,000 bales of cotton, 487,000 tons of rice, 288,000 tons of jouen-their, sto, and 117,000 tons of oliseeds of the Barrage produce excluding the produce from 429,800 acres of Dubari cropped land. That this is not altogether Utopian is evident from the fact that within four years of

the commencement of Barrage operations, that is, by the end of 1937 the following acres were under estivation in the Barrage Zone: 931,000 acres under wheat, 938,700 acres under cotton

Government House.

GOVERNOR

H. E. Sir Lancelot Graham, K.O.S.I., K.C.I.E.,

J. M. Corin, 1.0.8., Secretary to H.E. the Governor.

Captain R. A. Shebbeare, Military Secretary to H. E. the Governor.

The Madras Province.

The Madras Presidency occupies the whole agricultural education is rapidly progressing in southern portion of the Peninsula, and, excluding the Presidency. The activities of the Agriculing the Indian States, all of which have now tural Department in matters educational consist however, there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin and Vizagapatam are merely open roadsteads. A plateau, varying in height above sea-level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency; on either side are the rain-clouds give a heavy fall, which may amount to 150 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rainclouds are not checked in their westward course. In the central table land on the east

The population of the Presidency was returned at the census of 1981 as 47,193,602, an increase of 10.4 per cent, over the figure of 1921. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1981-Bellary and Agencies were marked illustrations. As a natural corollary to an increase in population the Preddency density has risen. Hindus account for 88 per cent. of the Madras population, Muhammadans 7 per cent. and Christians 3.8 per cent. The actual number in other communities is incons detable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively. 40 per cent. of the population talk Tamil, 37% per cent. Telugu, 7°9 per cent. Malayalam, Oriya, Kanarese, Hindustani, Tulu follow in that order with percentages above 1.

Government.

The executive authority of the Province is exercised on behalf of His Majesty by the Governor. He is aided and advised by a Council of ten Ministers.

Agriculture and Industries.

come under the direct control of the Govern- in the running of a college at Coimbatore ment of India, has an area of 124,868 square affiliated to the University of Madras, three farm miles. It has on the east, on the Bay of Ben-labourers schools numerous demonstration gal, a coast line of about 1,250 miles; on the farms. As it was found that the present course of south on the Arabian Sea, a coast line of about middle school education does not satisfy the needs 450 miles. In all this extent of coast, of the ryots, the only school maintained by the ocast, of the ryots, the only school maintained by the harbour department at Taliparamba was closed with excep- effect from 1st April 1932. A Middle School is divisa- however now maintained by the District Board plateau, of Madura at Usilampatti. The institution of short practical courses in farm management and allied subjects in the Agricultural College at Coimbatore have been sanctioned. While paddy which is the staple food of the population, occu-Eastern and the Western Ghats, which meet in person with the staple food of the population, countries with the staple food of the population, countries with the staple food of the stap area under cotton irrigated and unirrigated is estimated at 2,372,725 acres and, as in the case of paddy, efforts are being made to produce better strains of cotton suited to different localities by means of both selection and hybridization. Side by side with an increase in the coast the rainfall is small and the heat in sum-onest the rainfall is small and the heat in sum-mer excessive. The rivers, which flow from west to east, in their earlier course drain rather than irrigate the country; but the deltas of the Godavari, Kistna and Cauvery are productive is the large industry which the planting of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall of the province. They have organised themselves as a registered body under the title of "The United Planters' Association of South India," on which are represented coffee, tea, rubber and a few other minor planting products. The aggregate value of scaborne trade of the Presidency which was Rs. 76,98,36,552 in 1934-35 and Rs. 76,09,826 in 1935-36 increased to Rs. 82,57,56,596 during 1936-37. As in other provinces, the forest resources are exploited by Government. There are close upon 18,538 square miles of reserved forests.

Forty-nine spinning and weaving mills were at work on 31st March 1988, and they employed at work of 31st march 1905, and they employed 56,875 operatives. The number of jute mills at work was four. At the close of the year 1936 the number of the other factories in the Presi-dency was 1,651. These consisted of oil mills, rope works, tis works, etc. Tanning is one of the principal industries of the Presidency and there is considerable export trade in skins and hides. The manufacturing activities which are under the direction of the Department of Industries are mainly confined to the production of tries are mainly confined to the production or soap. There are a number of indigenous match factories run on cottage lines. It is alowly becoming recognised that the Madras Presidency is one of the most suitable parts of India for sugarcane cultivation and that the several deep-rooted varieties of case which have been evolved at Company and require ware little water are Agriculture and Industries.

The principal occupation of the province is agriculture engaging about 68 per cent. of the in several areas of the Presidency where they pepulation. The principal food crops are rice, grow better than in the north. The depart-cholam, ragic and kambu. The Industrial crops are cotton, sugaronse and groundnuts. The the development of the sugar industry by demonstration of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists, by the award of scholarships and by investigating schemes for starting sugar factories.

Education.

The Presidency's record in the sphere of education has been one of continuous progress. There were at the end of the official year 1938 about 45,500 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 31,60,100. Special efforts are being made to passed a resolution in the year 1929 that poor girls reading in any educational institu-tion in the province—Government, local fund, Municipal or aided-should be exempted from School fees in any Standard up to III Form. The total expenditure of the province on Education is in the neighbourhood of Rs. 564 lakhs. The principal educational institutions in the province are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian College, the Loyola College, the Pachaiyappa's College, the Law College, the Pachalyappa's College, the Law College, and the Queen Mary's College for Women, Madras; the St. Joseph's College, Trichinopoly; the American College, Madura; the Government College, Kumbakonam; the Ceded Districts College, Aunatapur; the Government College, Rajan-mundry; the Agricultural College, Coimba-tore; the Veterinary College, Madras; the Medi-cal Colleges at Madras and Vizagapatam, the Engineering College at Madras (Guindy), the Teachers' College, Saldapet and the Government Training College, Rajahmundry.

Local Administration.

Local bodies in the Madras Presidency are administered under the following Acts:—

The Madras City Municipal Act, 1919, was amended by a comprehensive Amendment Act in 1936 and the main changes effected by the Amending Act which was brought into force on 21st April 1936 were as follows:—

- (1) the redistribution of the existing thirty divisions into forty territorial ones;
 - (2) the provision for a Deputy Mayor;
 - (3) the provision for aldermen;
- (4) the increase in the maximum strength of the council from 50 to 68 members consisting of 60 elected councillors, five aldermen elected by the council and not more than three special councillors appointed by Government for special subjects;
- (5) the reservation of three special seats for Adi Dravidas and two for Labour;
 - (6) the widening of the franchise;
- (7) the abolition of the system of representation of minority communities by nomination; (8) the provision for better control over cheri
- and hutting grounds;
 (9) the provision for the levy of a tax on advertisements:

- (10) the fixing of the minimum and maximum rates of levy of the property tax at 15 and 20 per cent. respectively of the annual value of buildings and lands, and
- (11) the constitution of a new Taxation Appeals Standing Committee with a Chairman appointed by Government.

Of the two seats reserved for labour, one is to be elected by a non-union labour electorate and the other by union labour electorate.

The Madras District Municipalities Act, 1920 as amended by Madras Act X of 1930; and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930.

The amending Acts of 1930, which came into force on the 26th August 1930, provide, inter alia, for the abolition of the system of nominations to local bodies, for the inclusion of village panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self-government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the cessation of office of the President of a district board or Chairman of a Municipal Council on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. Taluk Boards have been abolished with effect from the 1st April 1984.

In the interests of administration, commissioners have been appointed to all the Municipalities in the presidency and these have replaced non-official chairmen as executive authorities.

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April 1934. This step was undertaken as these bodies became financially embarrassed. Their functions have been entrusted to district boards; with a view to avoid extreme contrallation of administration of district boards, it was decided to bifurcate them. Up to the end of 1935, the number of district boards bifurcated was four. Eight district boards were bifurcated in 1936.

But, it was actually found later on that many of the bifurcated district boards were financially unstable so much so that the Government had to have recourse to a reversal of the policy of bifurcation and to amalgamate all of the bifurcated district boards.

By an Act of 1935, the local boards in the presidency have been divided into three groups for the purpose of elections, so that elections will be held to a third of the local boards every year. The object of this legislation was administrative convenience.

By an Act of 1986 ordinary courts of law have been debarred from issuing injunctions restraining proceedings which are being or about to be taken for the conduct of elections to local bedies and preparation of electoral rolls in connection therewith. By an Act of 1938 the franchise of the territorial constituendies of the Madras Legislature Assembly were assimilated to that of the local bodies in the Province of Madras, inclusive of the Corporation of Madras with a view to widen the franchise of local bodies and to effect economy in the cost of preparation of the electoral rolls of local bodies.

Local bodies are now enabled under the Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

During this year, the assistant engineers of the District Boards were constituted into a Local Fund Service for the Province known as the Madras Local Fund Assistant Engineers Service, This was an important step in improving the status and conditions of one of the main services of local board employees,

Irrigation.

In March 1925, the Secretary of State sanctioned the Cauvery Reservoir Project, the esti-mated cost of which amounted to about £ 41 millions. The project has been framed with two main objects in view. The first is to improve the existing fluctuating water supplies for the the existing fluctuating water supplies for the Cauvery Delta irrigation of over a million acres; the second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, add 150,000 tons of rice to the food supply of the country. The scheme which was completed in 1934 provides for a large dam at Metur on the Cauvery to store 93,500 million cubic feet of water and for a canal nearly 88 miles long with a constant distributery system. Culve to the present nected distributary system. Owing to the necesatty for providing adequate surplus arrangements to dispose of floods similar to the phenomenal floods of 1924 and to other causes the estimate had to be revised and the revised estimate was about £54 millions. The Project was how-ever completed with a saving of nearly £4 million. Another important project is the Perlyar project. Taking its rise in the Western Ghats, the river flows into the Arabian Sea through Travancore State territory. After prolonged negotiations, the Travancore Durbar consented to the water being caught and stored in the Travancore hills for being diverted towards the East. Some three thousand feet above sea-level a concrete and masonry dam has been constructed and nearly 50 feet below the crestlevel of the dam a channel through the summit of the range carries the waters into the eastern water-shed where they are led into the river Valgai. The total quantity of water impound-ed to creat level is 15,660 million cubic feet. By this work, a river ordained by Nature to flow into the Arabian Sea has been led across the Pennsula into the Bay of Bengal irrigating on its way well over 100,000 acres of land. The irrigable area commanded by the Perivar system is 148,000 acres, while the supply from the lake was sufficient only for 130,000 acres. To make up for this defict, the effective capacity of the lake was increased in 1933 by lowering the water-shed outting. The area under Government irrigation works in the Madras Presidency dusing 1880-37 was about 7-8 million acres. Of this over 3 million acres are served by petty irrination works numbering about 84,000,

Electric Schemes.

The first stage of the Pykara Hydro Electric project which was under construction by the Government of Madras has been completed and is in operation from 1st April 1933. It consists in utilising a fall of over 3,000 feet in the Pykara river as it descends the Nilgiris Plateau for the river as it descends the Nilgiris Plateau for the generation of electrical energy and its transmission for supply to thenei ghbouring districts, siz., the Nilgiris and Colmbetore, and parts of Malsbar, Salem, Trichinopoly and Tanjore. The Glen Morgan scheme started in 1928 with the object of supplying power to the main construction works of the Pykara project has been merged with it. In its present completed form the project consists of the main power house at Singara with an installed plant cancity house at Singara with an installed plant capacity of 32,700 B.H.P. and the transformer station, principal substations at Coimbatore, Tiruppur Udamaipet, Sembatti, and Madura and minor ones at Ootacamund, Coonoor, Palghat, Pollachi and Iyerpadi, 917 miles of high tension lines or 1238 miles of equivalent single circuit lines. The booked cost up to the 31st March 1938 is Rs. 2,13,28,805. The total number of units generated during the year ending March 1938 was over 82,000,000. The rapid growth of load necessitated the construction of the Mukurti Dam to provide additional storage of water. The construction of the Dam was completed during the year. The revenue realised during 1937-38 is about Rs. 25.47 lakhs against Rs. 9.20 lakhs estimated at the time the scheme was submitted for sanction. A scheme to develop power from the head of water made available by the Mettur Dam was sanctioned in 1935 at an estimated cost of Rs. 1,82,00,000. The project has been completed, and commenced regular operation in November 1937. The Trichinopoly Negapatam extensions which were first treated Negapatam extensions which were arise treased as part of the Pykara system were transferred to the Mettur power system during the year, The system covers the districts of Salem, Trichinopoly, Tanjore, N. Arcot, S. Arcot, Chittoor and Chingleput. During the part of 1937-38 when the scheme was in regular operation 17.4 million units were generated. To serve the needs of the Tinnevelly, Ramnad and Madura Districts, the Government have sanctioned in March 1938 the Papanasam Hydro Thermal Electric Scheme at an ultimate cost of Rs. 258 lakhs. Construction of this scheme has been commenced. Thermal power stations have also been established at Vizagapatam and Bezwada to serve the northern districts of the Province. These thermal schemes are expected to be in regular operation in the beginning of 1939.

Co-operation.

The slight improvement in the economic condition of the people reflected in the record of the progress of the co-operative movement during 1936-37 was maintained during 1937-38. The loan transactions of agricultural societies steadily increased from the year 1936-35 and amounted during the year 1937-38 to Rs. 211.94 labsts. Except under arrear interest in Central Banks and agricultural societies, there was a fall in overdues in all societies. The policy of rectification and consolidation of existing societies was continued. As many as

446 societies were registered during the year as the year. These advanced loans to members against 326 in the previous year, a good number to the extent of Rs. 62.12 lakhs against being non-credit societies. The registration of Rs. 26.16 lakhs in the previous year. The 235 societies was cancelled as compared with 195 in 1936-37. Liquidation was resorted to only 1935-36 is still feeling its way. The Provincial when all attempts proved futile to revive societies. Handloom Weavers' Society made a steady either by supersession of committees under section 43 of the Madras Co-operative Societies Act, 1932, or by application of by-law 62 and appointment of agents. During the year, the Registrar's scheme of rectification was pursued by Judicial work in the Presidency is the High Court all central banks and additional securities were obtained and the amount collected in respect of loans amounting to Rs. 20.01 lakhs which were ill-secured. The adequacy of the security for loans aggregating Rs. 803.01 lakhs given by as many as 7,105 societies has so far been examined. The strong reserves built up by central banks will enable them without detriment to their financial stability to write off ultimately some bad and irrecoverable debts which have been brought to notice. The Central Land Mortgage Bank recorded another year of steady and sustained progress. Thanks to cheap money, the Bank was able to float debentures at low rates of interest and no debentures carry interest exceeding 4 per cent. As in the past years, the benefit of low interest was passed on to ultimate borrowers and no loan bears more than six per cent. Debentures of the value of Rs. 25,87,100 were issued as against Rs. 87,21,000 in the previous year. Primary land mortgage banks which numbered 101 advanced loans to the extent of of Rs. 34,59,474 during the year as against tion Department and one in charge of the Malway Police and the Criminal Investigation Department and one in charge of the Madaras tasks as the second of Rs. 175.83 lakhs towards the redemption of debts by the ryots. There Police Force is 27,716 including the Malabar were 118 loan and sale societies at the end of Special Police.

progress during the year.

Law and Order.

The Superior Court for Civil and Criminal at Madras, which consists of a Chief Justice and thirteen puisne judges. The existing law provides for a maximum of 15 High Court Judges. For the administration of criminal justice there are 28 Sessions Judges in the Murassal, (including two for agency tracts) Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy. Then there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on by 26 District Judges, and 37 Subordinate Judges and 141 District Munsiffs, In The Judges and 141 District Munsiffs, In The Presidency Town there are a City Civil, Court consisting of two Judges and Small Cause Court consisting of a Chief Judge and two other Judges. Madras is a litigious province and the records show one suit for every 102 persons. The Police department is under an Inspector-General who has six deputies, four in charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investiga-

The Bengal Province.

The Presidency of Bengal comprises the Burdwan and Presidency Divisions, the district of Darjeeling and the Rajshahi, Dacca and Chittagong Divisions. The area of the Presidency is 82 955 square miles, with a population of 51,087,338. Included in the geographical unit of Bengal are the Indian States of Cooch Behar and Tripura, which are in direct political relationship with the Government of India. The area of the British territory is 77,521 square miles. The general range of the country is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cultivation and the Bay of Bengal.

The People.

Of the inhabitants of the Presidency 27,810,100 or 54.44 per cent. are Mahomedans and 22,212,069 Hindus. These two major religions embrace all but 2.09 per cent, of the population, Christians, Buddhists and Animists combined. number 1,043,049.

Bengali is spoken by ninety-two per cent. of the population of the Presidency and Hindi and Urdu by 3.7 per cent.

Industries.

According to the returns of the census of 1931 10,593,384 persons or 20.7 per cent. of the population derive their support from pasture and agriculture, and of these 6,041,495 are cultivators, and 2,718,939 are agricultural labourers. The area under jute in 1938 is estimated at 2,481,400 acres against 2,208,900 in 1937. Bengal is the most important rice-producing area in Northern India, and it is computed that 87 per cent. of the cultivated area of the Presidency is devoted to its production. Other crops include barley, wheat, pulses and oil-seeds. Sugar is produced both from the sugar-cane and from the date-palm, and tobacco is grown for local consumption in nearly every district of Bengal. The area under tea in 1936 was 213,500 acres. There were 440 plantations employing a daily Rs. 51.60 crores in 1937-38, while exports of average of 184,762 permanent and 7,841 temporary hands.

Manufacture and Trade.—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the triparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency.

There was some improvement in the jute trade of Bengal (which began to decline since the year 1928-29) owing to a rise in the price of raw jute, as a result of the policy of voluntary restriction of jute crop, undertaken by the Government of Bengal in 1934-85. The increased production of ute during the next three seasons, however, proved that the propaganda of voluntary restriction was a failure. With the foreign demand of jute and its manufactures gradually falling off, stock in the Mills began to increase enormously with the result that the prices declined and the industry was about to face a serious crisis of unrestricted production. The situation was to a certain extent cased by the timely promulgation in September 1938, by the Government of Bengal, of the "Bengal Jute Ordinance," which restricted the hours of work in the mills. The measure had a desired effect on the prices which began to rise again. The recent heavy demand of the jute manufactures by the Government of U.S.A. however, did away with the necessity of the restriction imposed by the "Ordinance" which is now withdrawn.

The trade of Bengal during 1937-38 showed an improvement over the previous year owing to the gradual lifting of the world-wide depression. The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports increased from Rs. 1.41.14 crores in 1936-37 to Rs. 1.54.64 crores in 1937-38. Imports of private merchandise increased from Rs. 35.76 crores in 1936-37 to crores in 1936-37 to Rs. 87.08 crores in 1937-38.

Statement showing the trade of Calcutta & Bengal separately during 1935-36, 1936-87 & 1987-88.

Administration.

The present form of administration in Bengal dates from January 1987. In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclamation of His Majesty the King-Emperor at Delhi, being placed under the control of Ministers the Province was raised from the status of a appointed from among elected members of the

Lieutenant-Governor to that of a Governor-in-Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments

egislative Council. There are normally four franchise was extended. Bengal Act III of embers of the Executive Council who are in 1884 was repealed by Act XV of 1982 by which large of the "reserved subjects", and three interest, who are in charge of the "transferred the franchise of the electors have been further typects." With the enforcement of the overnment of India Act of 1935 on April 1. 937, complete provincial autonomy came into eing. The entire administration vests in the overnor who is assisted by a Council of linisters holding office during his pleasure but nswerable to a wholly elective legislature omprising two houses. "Except in regard to his pecial responsibilities, the Governor corresponds o a constitutional monarch. The services no onger find a place in the legislatures and are ubordinate to the Ministers. Dyarchy has lisappeared and there is complete responsible Government.

The unit of administration is the District Magistrate and Collector. As Collector he supervises the ingathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district. The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Government. In certain revenue matters they are, in their turn, subject to the Board of Revenue in Calcutta; in other matters they are under the direct control of Government.

Justice.

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 18 Puisne Judges including three additional judges who are Barristers, Civilians or Vakils, Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate
Judges and Munsifs. Of these officers, the
District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates. On its appellate side, the High Court disposes of appeals from the order of a Court of Session. and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates, Including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presidency Magistrates is in charge of the Children's Court, is helped by Hony. Women Magis-It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government.

By Bengal Act III of 1884, and its subsequent

widened, women have been entranchised, the proportion of elected commissioners has been increased and the term of office of the Com-missioner has been extended from three to four years. Municipal expenditure now comprises a large number of objects, including veterinary institutions, employment of health officers, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial, sanitary and health exhibitions and the improvement of breed of cattle. The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and Executive Officer, and Deputy Executive officers, all elected by the Corporation. The appointment of the Chief Executive Officer is subject to the approval of Government. The total number of councillors, after the enactment of the Calcutta Municipal (Second Amendment) Act, 1932, is 91 with 5 Aldermen elected by the Councillors. Of the 91 seats, 81 are elected, of which 21 are reserved for Muhammadans. Ten of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insani-tary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the mofussil, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduces the new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, replaces gradually the old chaukidari panchayats and the union committees and deals with the village police, village roads, water supply, sanitation, primary schools and dispen-saries. The Act also empowers Government saries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Presidency and up to March 1934 over 4,737 Union Boards were actually constituted.

Public Works.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries.

The Public Works Department deals with amendments, which hitherto regulated municipal questions regarding the construction and bodies a the interior, the powers of Commissioner maintenance of public buildings and also reof municipalities were increased and the elective garding reads, bridges, etc.

regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects.

There is a Chief Engineer who is the principal professional advisor of Government.

N.B.—Under the New Constitution, the organisation of Public present (including Railways) together with Irrigation as well as Road Fund and Bengal Motor Vehicles Act transferred from the Local Self-Government Department will form the Department of Communication and Works.

Marine.

The Marine Department deals with questions connected with the administration of the port of Calcutta and the Government Dockyard, Narayangani, and inland navigation, including the control and administration of Government launches except the police launches.

Irrigation.

The Irrigation Department deals with irrigation. navigation, flood protection by means of em-bankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available.

Police.

The Bengal Police force comprises the Military Police, the District Police, and the Railway Police. The Bengal Police are under the control of the Inspector-General of Police, the present Inspector-General being a member of the Imperial Police Service. Under him are Deputy Inspectors-General for the Dacca range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakarganj range and also one Deputy Inspector-General in Charge of the C.I.D. and the Intelligence Branch. Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct charges, each under a Superintendent. The cadre comprises Assistant Superintendents, Deputy, Superintandents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sardah in the district of Rajshahi where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is over 228 lakhs.

The head of the Medical Department is the Surgeon General with the Government of Bengal, assisted by Government grants-in-aid.

The Railway Department deals with questions | In the districts the Civil Surgeons are responsible for medical work. There are 44 hospitals and dispensaries in Calcutta, 11 of which are supported by the Government and 860,540 persons were treated at these institutions of whom 57,177 were in-patients. In the Mofussil districts there are 1,200 hospitals and dispensaries. the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 9.083,248.

Education.

In the Presidency of Bengal education is imparted partly through Government agency and partly through private bodies, assisted to some extent by Government grants-in-aid. Government maintains four Arts Colleges Calcutta (of which one is a college for women, one is for Mahomedans and one the Sanskrit College), one at Hughli, one at Krishnagar, three, including the Islamic Inter College, at Dacca, one at Rajahahi and one at Chittagong. It also maintains two training colleges, one at Calcutta and one at Dacca, for teachers who teach in secondary schools through the medium of English, and 5 normal schools, one in each division, for the training of teachers in secondary schools who teach through the medium of the vernacular : also an engineering college at Sibpur and an engineering school at Dacca, two medical colleges, a veterinary college, a school of art and a commercial school college, a sunt of the second of the college of the schools for the education of boys, while to some Government Arts Colleges high schools are attached. In Calcutta there are five Government high schools for boys, two of which are attached to the Presidency College and one to the Sanskrit College. Government high schools for girls exist only in the headquarters stations of Calcutta, Dacca, Mymensingh, Comilla and Chittagong. The other secondary schools, with the exception of a few middle schools managed either by Government or by municipal and district boards, are under private control. The adminis-tration of primary education in all areas, which are not under municipalities, rests with the district boards, grants being given from provin-cial revenues to the boards, which contribute only slightly from their own funds. Only in backward localities are such schools either entirely managed, or directly aided, by Government. Apart from the institutions referred to above, 80 institutions called Guru Training Schools are maintained by the Department for the training of primary school teachers. For the education of Mahomedans, there are senior Madras as at Calcutta, Dacca, Chittagong, Hughli and Rajshahi which are managed by Government. There are also certain Government institutions for technical and industrial education. institutions for technical and industrial education (except B. E. College, the Ahsanullah School of Engineering, Dacca, the Government Commercial Institute and the Government School of Art, Calcutta) are now under the control of the Director of Industries. A large proportion of educational work of every grade is under the control of various missionary bodies, which are

The municipalities are required to expend a number of Additional or Second Inspector and certain proportion of their ordinary income on education. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a high school at Burdwan, a high school at Santipur, a high school at Kushtia and a high school at Chittagong.

In 1935-36 there were in the Presidency :-RECOGNISED INSTITUTIONS FOR MALES.

Assistant Inspectors for Mahommedan Education according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub-Divisional Inspectors and Sub-Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbier status called Assistant Sub-Inspectors and Inspecting Pandits and Maulvis. High education is controlled by the Universities of Calcutta and Dacca established in 1857 and 1921, respectively administered by the Chancellor (the Governor of Bengal), the Vice-Chancellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of Calcutta maintains a Law College, called University Law College, Calcutta. Dacca University also has a Law Department attached to it. Calcutta University is mainly an examining body, but it has now made itself responsible for advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges.

The University at Dacca is of the residential type. There is a Board for Secondary and Intermediate Education at Dacca. It conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca and also the Islamic Matriculations and Intermediate Examinations.

The Department is administered by a Director of Public Instruction, assisted by an Assistant Director, a special officer appointed temporarily, an Assistant Director for Mahammadan Education and a Director of Physical aschool for girls (both residential) at Kurseong, Education. Each division is in charge of a Divisional Inspector assisted by a certain (for women only).

THE FINANCES OF BENGAL.

After a sequence of deficit budgets for several years, Bengal is now looking forward hopefully to an improvement in her financial position. This improvement is a direct result of the special steps taken by the Central Government and by Parliament through the India Act to alleviate Bengal's plight. Under Provincial Autonomy she is better off to the extent of Rs. 75 lakhs a year than before. In the year 1985-86, despite the grant from Central revenues of an amount equal to half the proceeds of the jute export duty, the budget showed a deficit of Rs. 51½ lakhs. The Niemeyer report, however, as subsequently implemented, gave a further sum of Rs. 42 lakhs annually from an increased share in the jute export duty, and also an annual relief of Rs. 33 lakhs by cancelling the province's accumulated debt to the Centre. Thus Bengal was able to face the future with more confidence. The Budget for the year 1937-38 was a surplus Budget. The Budget for the years 1938-39 and 1939-40, which was recently presented were again deficit ones, although the revised estimates for the years 1937-38 and 1938-30 as presented along with the aforesald Budget, show a continuous improvement in the finances of the Province. The Budget for the year 1939-40 show a deficit of about Rs. 87 lakhs. After a sequence of deficit budgets for several years, Bengal is now looking forward hopefully

The United Provinces.

The United Provinces lies in practically the centre of Upper India. It is bounded on the north by Tibet; on the north-east by Bihar, on the east and seuth-east by Bihar, on the south by two of the Chota-Nagpur and Bundelkhand, the south by two of the Chota-Nagpur and believe the south by two of the Chota-Nagpur and believe the States of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbal, rand by the provinces of Delhi and the Punjab. Its total area amounts to 106,248 knare miles to which may be added the area Funiab. Its total area amounts to 100,240 square miles, to which may be added the area of the three Indian States of Rampur, Tehri-Garhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49,614,833.

The Province, originally termed the North-Western Provinces and so amalgamated in 1877, was named the United Provinces of Agra was named the United Provinces of Agra and Oudh in 1902 and received its present designation on April 1 1937. It includes four distinct tracts of country: portions of the Himalayse, including the Kumson division which consists of three hill districts, two of which are entirely in the hills and one is half in the submontane belt, the sub-Himalayan tract; the great Gangetic plain, and portions of the hill systems of Central India Including Bundelkhand. The Gangetic plain is protected by an extensive Canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equal-ly infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Province as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal. In the south there are low rocky hills, Bengal. In the south there are low rocky mus, broken spurs of the Vindhyan mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas elothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until it reached the line of the eternal snows, but the greater part of the province consists of level plain, teeming with highly-cultivated fields and watered by three rivers the Ganges, Jumna and Gogra.

The People.

The population is mainly Hindu, 84.4 per cent. ranking as such whilst Mahomedans number 15 ranking as such whilst Mahomedans number 15 better the principal land owners in Outh are the percent, the total of all other religions being 0.6 per cent. composed of Christians (Europeans and Indians), Jains, Sikhs, Parsis, Buddhists and Jews. Included among the Hindus are the Arya Samajists, followers of the Arya Samaj sect, which obtains widely in the Punjab and has extended its influence to the United Provinces. The three main tricts, there were mines of importance there physical types are Dravidian; Aryan and Mongolioid, the latter being confined to the Himalayan and sub-Himalayan districts and closed. Gold is found in minute quantities by

the people, however, show a mixed Arys-Dravidian origin. Two languages are spoken by the majority of people in the plains, Urdu, and Hindi. Urdu being more common in the urban areas and because of its close

Agriculture.

The chief industry is agriculture, which is the principal source of livelihood of 71.1 per cent. of the population and a subsidiary source of income to a further 8.2 per cent. The soils of the Province fall into three groups: the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium; the chief characteristic soil or the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil generally yields the most productive. The soil generally yields excellent crops of rice, millet, maize, linseed, cotton, wheat, sugarcane, pulses, and barley, rice being grown mostly in low-lying, heavy clays. The greater part of the Province is highly cultivated, the rainfall varies from 50 to 60 inches in the Hills to 40 inches in the Benares and Gorakhpur Divisions, whilst the Agra Division receives only about 25 to 80 inches annually. Drought seriously affected Bundelthand and the Agra Divisions in the pear. khand and the Agra Divisions. in the past; improved drainage and irrigation facilities have effected considerable improvements. In the latter area, however, shortage of water in the canals and the general lowering of the water table still continue to react against full agricultural returns. Steps are being taken to increase the amount of water passing down the canals. The commodity prices were in general lower than those prevailing in 1937 except in the case of gram which indicated an improvement during the last three months of the year over the prices prevailing in the corresponding months of the previous year. The area under wheat and rice increased with a corresponding increase in the product. The area under sugar-cane declined in comparison to that in 1937 and the outturn also decreased by 3 per cent. There was a also decreased by 3 per cent. There was a decrease in the area under cotton, but the average outturn increased considerably. The position of the agriculturist, however, remains more or less the same. Land is held on zemindari tenure in Agra and talqudari tenure in Oudh. The principal land owners in Oudh are the Taluqdars, some of whom own very large estates. The area held in taluqdari tenure amounts to 54 per cent, of the total area in Oudha.

ashing the sands in some of the rivers in ie hills. Limestone is found in the Himalayas id in the Etawah district, and stone is rgely quarried in the Mirzapur district. stage and artistic industries, however, abound U.P. Cotton is ginned and spun throughout the estern districts of the province as a home dustry; and weaving by means of handlooms carried on in most districts. Cawnpore is ie chief centre for cotton spinning and weaving ills. According to the census of 1931, 45,128 ersons were employed on cotton ginning, eaning and pressing and 408,033 on spinning ad weaving. Silk weaving used to be confined Benares (where the famous 'Kimkhab' rocade is made) but considerable work is now one at Etawah, Sandila and Mau. Embroidery ork is done at Lucknow, where the noted hikan' work of cotton on muslins is produced. nd in Benares, where gold and silver work on ilk, velvet, crepe and sarsenet obtains. Senares uses local gold thread for embroldery ork and 'Kimkhab' weaving. The glass ndustry is important at Firozabad, Bahjol, balawali, Sasni, Hathras, Harangau, Shikohabad, fakhanpur and Naini (Allahabad). Morada-ad is noted for its lacquered brass-work, Benares for brassware-engraving and repousse, Farrukhabad and Pilkhawa (in Meerut listrict) for their calico prints and Agra for is durries and marble and alabaster articles; lazed pottery is made at Chunar and Khurja, lay figures of men and fruits at Lucknow, arpets at Mirzapur and leather goods in Cawnour. Agra and Lucknow.

The making of brass utensils at Mirzapur, Farrukhabad and Oel (District Kherl); the arving and inlay work of Nagina and Saharanpur, the art silk industry of Tanda, Bilari (Moradabad) and Mau, the lock and brass fittings industry of Aligarh, the copper utensil industry of Almora, the durries of Khairabad (Sitapur), Cawnpore and Bareilly, the pottery of Nizamabad (District Azamgarh) and the Ivory work of Lucknow also deserve mention.

Campore is the chief industrial centre. It has tanneries, soap factories, oil mills, cotton, woollen and other mills. The woollen mill is the largest in India. Lucknow possesses an important paper-mill and also a cotton mill. There are cotton ginning and pressing factories at Aligarh, Meerut, Saharanpur and Bareilly and cotton mills at Agra, Hathrus, Benares and Moradabad. There are now some 70 Sugar Factories in the province worked by the vacuum pan process; they are situated mainly in the Gorakpur, Rohlikhand and Meerut divisions. A certain amount of Sugar is also made by the open pan process and a large quantity of gur is made in the villages. Excellent furniture is made at Bareilly mostly on cottage lines.

There is a card board manufacturing factory and a cigarette factory at Saharanpur. Itre. and perfumes are made at Lucknow, Kanauj and Jaunpur. Dayalbagh (Agra) has a tannery, a dairy and a factory for making door bolts, lanterns, electrical goods, fountain pens, ohemical balances, etc. Fountain pens are made in Cawnpore, Lucknow and Benares. Shoe laces, elastic, and electric fans are made in Cawnpore.

The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzafarnagar, Ghazlabad, Khurja, Gorakhpur, Ghazlubad, Shahjahanpur,

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service. Under the Reform scheme the Province was raised to the status of a Governor-in-Council. the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers in charge of the Transferred Subjects. With effect from April 1, 1937, provincial autonomy was in-augurated in this Province and a Cabinet of 6 Ministers to assist the Governor was formed, under the G. I. Act of 1935. The present abinet consists of 6 Ministers. The medium for the transaction of public business is the Secretariat, the staff of which consists of 7 Secretaries (including Chief Secretary), and Deputy Secretaries including the Director of Public Instruction and the Deputy legal Remembrancer who are ex-Officio Deputy Secretaries in the Education and Judicial Departments respectively. There is also I Under-Secretary (the Deputy Director of Public Instruction who is ex-Officio Under-Secretary in the Education Department) and 5 Assistant Secretaries. The Chief Secretary is in charge of Appointment, General Adminis-18 in charge of Appointment, General Administration, Political, Public Information, Ecclesiastical and Police Departments; the Finance Secretary deals mainly with the Finance Department; the Revenue Secretary is in charge of the Revenue and Scarcity Departments; the Education Secretary is in charge of the Education, Industries, Agriculture and Excise Departments : the L. S. G. Secretary is in charge of the Local Self-Government, Municipal, Medical and Public Health Departments and the Judicial Score-tary is in charge of the Judicial and Legislative Departments. The seventh Scoretary is in charge or Legislative Departments. tary is in charge of Public Works Department (Buildings and Roads) and (Irrigation), and Forest department. Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow. The Governor and some of the Secretaries spend the hot weather in Naini Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases lying within its jurisdiction, being the chief revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Magistrate and Collector in Agra and a Deputy Commissioner in Oudh and Kumaon. The districts are grouped together in divisions. Each division is under a Commissioner, except the Jhansi and Kumaon divisions the charge of which is held by the Collector of Jhansi and that of Kumaon by the Deputy

Commissioner, Naini Tal, in addition to their daties. There are ten divisions having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into tahsiis, with an average area of 500 square miles and an average population of 236,600. Each Taksii is in charge of a Tahsiidar, who is responsible for the collection of revenue, and also exercises judicial powers. Tahsiis are divided into parganas which are units of importance in the settlement of land revenue. Sub-ordinate to the Tahsiidars are naib tahsiidars and tanungos. Ordinarily there are three tanungos and one naib tahsiidar to a tahsii. The Kanungos and one naib tahsiidar to a tahsii. The Kanungos unjervise the work of the patvaris; or village accountants, check their papers and form a link direct between the villagers and Government. For judicial purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more tahsis, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates and Collectors) or members of the Provincial Service (Deputy Collectors and Magistrates).

Justice.

Justice is administered by the High Court of Judicature at Allahabad in the province of Agra and by the Chief Court of Oudh sitting at Lucknow which are the final appellate authorities in both criminal and civil cases. The former consists of a Chief Justice and ten permanent Judges six of whom are Indians, and the manent Judges six of whom are Indians, and the latter consists of a Chief Judge and three judges one of whom is Indian. There are thirty-two posts (twenty-four in Agra including two posts temporarily held in abeyance and eight in Oudh) of district and sessions judges of which nine are held by Indians not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar. They have both cateful and appellate jurisdiction in civil both original and appellate jurisdiction in civil and criminal cases and occasional appellate jurisdiction in rent cases. District Officers and their assistants, including tahsildars, preside in criminal courts as magistrates and as collectors and assistant collectors, in rent and revenue courts and dispose of a good deal of the work. Kumaon has been brought under the Civil jurisdiction of the High Court from 1st April 1926. The deputy and assistant commissioners exercise inferior civil powers in this division which has no separate civil courts. In the rest of the province there are civil judges, judges of small cause courts and munsifs who dispose of a large number of civil suits. In Agra the jurisdiction of a civil judge extends to all original suits without pecuniary limit and a munsif can hear cases ordinarily of a value not numer can near cases ordinarily of a value not exceeding Rs. 2,000, and if specially empowered up to Rs. 5,000. In Oudh the ordinary jurisdiction of a civil judge extends to suits valuing not more than Rs. 20,000 and the ordinary jurisdiction of a mussif to suits of Rs. 2,000 value, provided that in special cases the limit of pecuniary jurisdiction can be removed alto-gether in the case of a civil judge and that of the munsif raised up to Rs. 5,000.

Commissioner, Naini Tal, in addition to their database. There are ten divisions having an average area of nearly 10,600 square miles and an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into tabsis, with an average area of 500 square miles and an average population of 236,600. Each the value does not exceed Rs. 1,000. There are also honorary munsifs limited to Rs. 200 reachible for the callettion of revenue; and also fixed at Rs. 20.

Local Self-Government.

The main units of local self-government are the district and municipal boards, which, with the exception of one municipal board, have non-lofficial Charimen. Most of the municipal boards having an annual income of Rs. 50.000 or over have executive officers to whom certain administrative powers are reserved. The administrative functions of the municipal and district boards are performed by the Chairman and Executive Officer or the Secretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain 42.51 per cent, of their income from Government grants. The other chief sources of income are the local rate levied from the land owners and the tax on circumstances and property imposed by some of the boards. The United Provinces Motor Vehicles Taxation Act came into force with effect from January 1st, 1930. The tax realised under this act is also utilized in the payment of grants to local authorities for purposes of expenditure on the construction, maintenance and improvement of roads. The chief source of municipal income is the octroi or terminal tax and toll which is an octroi in modified form. Local opinion is strongly in favour of indirect as opposed to direct taxation for municipal purposes.

Public Works Department.

The public Works Department (Buildings and Roads and Irrigation Branches) is in the portfolio of the Hon'ble Minister of Communications and Irrigation and the post of Secretary to Government in this department is held by a member of the Indian Civil Service.

The Buildings and Roads branch is administered by a Chief Engineer, The Province is divided into circles and divisions. Each circle is in charge of a Superintending Engineer and each division is in charge of an Executive Engineer. All metalled roads maintained from Provincial funds and construction of all other department buildings except those of the irrigation branch costing more than Rs. 5,000 are in charge of the Buildings and Roads branch.

The Irrigation branch is administered by two Chief Engineers. The province is divided into circles and divisions.

top to Hs. 5,000. In Oudh the ordinary jurisdiction of a civil judge extends to suits valuing not more than Hs. 20,000 and the ordinary jurisdiction of a munsif to suits of Hs. 2,000 and the ordinary jurisdiction of a munsif to suits of Hs. 2,000 and the tube-well irrigation scheme, and the tube-well irrigation scheme, and the tube-well irrigation scheme, and the schemes in the case of a civil judge and that of the munsif raised up to Hs. 5,000. Appeals from munsif always lie to the district indige while those from the civil judges go to the High Court or the Chief Court except in charge of the Chief Engineer (East).

The Sarda Canal, a work of the first magnitude, was opened in 1928 for introducing the Armed Police irrigation into Oudh. Its head works are stuated at Banbassa on the border of Nepsl, The length of the main canal and branches, including distributaries, drainage outs and escapes, is 5,955 miles, and the area irrigated is over 10 lakhs of acres annually including over 21 lakhs acres of Sugarcane.

The Ganges Canal—Upper and Lower. The head works of the former are situated at Hardwar in the Saharanpur district and of the latter at Narora in the Aligarh district. The Upper Ganges canal came into operation in the year 1855-56, and its total mileage of channels is 5,911 miles. The area irrigated annually is nearly 12 lakhs of acres. The lower Ganges canal was opened in 1879-80 and the total mileage of its channels is 5,005 miles. This system also irrigates nearly 10 lakhs of acres.

The Ganges Canal Hydro-electric Grid supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of province, and to Shahdara in Dolhi province. Seven of the ten falls available for electrification have been developed and a stand-by steam power station at Chandausi of 9,000 kilowatts has been constructed. No less than 29,700 kilowatts in all is available. Besides supplying some 75 towns with cheap current for light and fans and minor industries, the grid provides energy for irrigation pumping from rivers and open and tube wells. The Ganges Valley State well Scheme comprises about 1,500 tube wells, covering the districts of Moradabad Bijnor, Budaun Muzaffarnagar, Meerut, Bulandshahr and Aligarh, introducing irrigation on the volumetric system over approximately one million acres hitherto without any source of irrigation. This supply of cheap power from some 2,000 sub-stations is already having an important bearing on the economic disposal of crops and the devolopment of minor industries in the urban centres.

The steam power house at Sohwal is capable of supplying 1800 kilowatts. The energy is used to electrify Fyzabad and Ayodhya and to pump 160 cusecs from the Gogra into the Fyzabad canal system 120 miles in length.

Investigations into the electrical and financial possibilities of a Grid Project for the eastern districts of the province have been completed and the recommendations of an expert Committee, appointed in November 1937, are under consideration.

Police.

The Police Force is administered by an Inspector-General, with three Deputies and three plains which are attended by students from all saistants, forty-seven Superintendents, forty-over India. Government maintain Training five Assistant Superintendents and sixty-one Deputy Superintendents excluding five temporary officers. There is a Police Training department is attached to the Lucknow Christian College. There College at Moradabad under a Superintendent to the Lucknow Christian College. There College as Moradabad under a Superintendent are training departments attached to of Police as Principal. There is a C. I. D. forming a separate department, under a Deputy nares Hindu University. There is a College of

Inspector-General with three Assistants. The Armed Police of the province is now rearmed with '410 musket in place of 476 musket and the Martini Henry Rifle which formed their previous armament. The administration of the Jail Department is in charge of an Inspector-General of Prisons, who is a member of the Indian Medical Service.

Education.

Education is maintained in part by the State and partly by means of grants-in-aid. There are five universities, the four residential universities of Allahabad, Lucknow, Aligarh (Muslim) and Benerse (Hindu) and the affiliating University of Agra. The last named was established in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, viz., the Agra and St. John's College at Agra, the Christ Church, D.A.V. and Sanatan Dharam College at Cawnpore, the Meerut College, Meerut, the Bareilly College, Bareilly and St. Andrew's College, Gorakhpur. There are Intermediate Colleges and anglo-vernacular high and middle schools which prepare boys for the high school and intermediate examinations conducted by the Board of High School and Intermediate Education, which prescribes courses for high school and intermediate examinations

There are 48 Government High Schools and 8 Government Intermediate Colleges; the remainder are under private management and are aided by Government.

The Isabella Thoburn College at Lucknow and the Crosthwatte Girls' College at Allahabad impart university education to Indian girls and the Theosophical National Girls' School and Women's College at Benares, the Muslim Girls' Intermediate College at Aligarh, Mahila Vidyalaya Intermediate College at Aligarh, Mahila Vidyalaya Intermediate College, Lucknow and Balika Vidyalaya Intermediate College, Lucknow and Balika Vidyalaya Intermediate College, Cawnpore, teach up to the intermediate stage. In addition to these there are A. V. High Schools, English Middle and Vernacular Lower Middle schools and primary schools throughout the province for the education of Indian Girls; they are controlled by a Chief Inspectress of Girls' Schools under the Director of Public Instruction. The St. George's Intermediate College, Musscorie, the Philander Smith College, Naini Tal, the St. Joseph's College, Naini Tal, sherwood Intermediate College, Lucknow, are the well-known institutions for European and Anglo-Indian children in the province which teach upto the intermediate stage. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all over India. Government maintain Training Colleges for teachers in Lucknow, Allahabad and Agra, and a training department is attached to the Lucknow Christian College. These are training departments attached to the Aligarh Muslim University and the Berting College.

University where four-year courses of training are provided, leading to degrees in the two subjects. This is the only University in India where training in these two industrial subjects is available. There is a Government Engineering College at Roorkee (Thomason College), a School of Art and Crafts in Lucknow and an Agricultural College, and a Technological Institute at Cawnpore; an Agricultural School at Bulandshahr and another at Gorakhpur, there is also a non-Government Agricultural Institute at Naini, Allahabad. Education in law is given at four residential univer-sities and at the Agra and Meerut Colleges, Davanand Anglo-Vedic and at the and Sanatan Dharma Colleges at Cawnpore and at the Bareilly College. Instruction in commerce for the B. Com. degree of the Agra University is given in the Sanatan Dharma and the D. A. V. Colleges at Cawnpore and in the and the D. A. V. Colleges at Cawnijous and in one St. John's College at Agra; a commerce depart-ment for B. Com. degree is also attached to Allahabad and Lucknow Universities. The King George's Medical College, Lucknow, now merged in the Lucknow University, prepares candidates for the M.B.B.S. degree of the Lucknow University. Besides this there are two medical schools at Agra for men and women. and also a College of Ayurveda and Tibbiya is attached to the Benares Hindu and the Aligarh Muslim Universities respectively. Public schools for secondary and primary vernacular education are almost entirely maintained or aided by district and municipal boards and vernacular education is administered through them and the expenditure of grants for vernacular education is in their hands. Government maintains eight Normal Schools and eight Central Training Schools for the training of vernacular teachers. There are also four normal schools for training of Women vernacular teachers. Each district has a deputy teachers. Each district has a deputy inspector of schools who is the Secretary of the Education Committee of the district board, assisted by several sub-deputy inspectors. There are seven inspectors who supervise both anglo-vernacular and vernacular education in their circles.

Medical.

The Medical Department is in charge of an Inspector-General of Civil Hospitals, who is assisted by a lady Superintendent for Medical aid to women in the administration of the Dufferin fund affairs. A post of Personal of the Dufferin fund affairs. A post of Personal Assistant to the I. G. Civil Hospitals has also been created from December 8, 1934, to relieve the I. G. of the routine duties in connexion with the control of his office. A Civil Surgeon is in charge and is responsible for the medical work of each district and in medical work of each district and in a few of the larger stations he has an ing of Indian girls as nurses and midwives a sasistant. In two stations (Ranikhet and Roorkee) Medical Officers in military employ hold collateral civil charge. There are 104 An Ambulance Dispensary, for medical relief to Provincial Medical service officers in charge women by women, has been started as an experi-

Mining and Metallurgy in the Benares Hindu | Provincial subordinate medical service officers Lady doctors and women sub-assistant surgeons visit pardanashin women in their own homes and much good work is done in this manner.

> The best equipped hospitals for Indian patients are the Thomason Hospital at Agra, King George's Hospital and the Bairampur Hospital at Lucknow, the Prince of Wales Hospital, Cawnpore, King Edward VII Hospital, Benares, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living the Europeans, Anglo-Indians and Indians living in European style) and Saint Mary's Cottage Hospital, Mussoorie. The Ramsay Hospital for Europeans at Naini Tal is a first-class institu-tion and there are also the Lady Dufferin Hospitals, King George's Medical College, Lucknow, pitals, king deorge's nectical College, Lucknow, is one of the best equipped colleges in the country, with a staff of highly efficient professors, and the hospital attached to it is the first in the Province. The Queen Mary's Hospital for women and children, completed in 1932, it also attached to the King Courte, Medical is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwirery and gynaecology. There are also male and female medical schools at Agra. The X-Ray Institute at Dehra Dun has been closed, but a scheme for the appointment of a Provincial Radiologist and the training of Medical Officers in X-Ray at the King George's Medical College, In X-1617 at the hing George's Medical College, Lucknow, where every facility for such work would be forthcoming is under the consideration of the Government. There are smatteria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowall in the district of Naini Tal is an up-to-date and well-equipped institution for the treatment of European and Indian consummities. A new T. R. clinic has Indian consumptives. A new T. B. clinic has been opened at Allahahad.

Arrangements for starting 16 Travelling dispensaries and 48 fixed Allopathic Dispensaries under the Rural Development Scheme have been made. Steps for starting 146 Ayurvedic and 46 Unani Dispensaries under the same scheme are also being taken.

There were 71 subsidized dispensaries and 36 subsidised medical practitioners working at the end of December 1938.

A scheme for opening Indigenous subsidized dispensaries and encouraging Hakims and Vaids to settle in rural areas on small subsidies has to settle in rural areas on sman substitute has also been introduced. A sum of Rs. 50,000 has been allotted for to assist District Boards, which, on account of financial stringency, are unable to provide adequate medicines and equipment to their rural allopathic dispensaries.

of important Moffusil dispensaries and on ment in the district of Unao under the control the reserve list and a large number of of the Countess of Dufferin's Fund, U. P.

The Puniab.

The Punjab or land of the five rivers, is so tion in comparison with the western Punjab called from the five rivers by which it is enclosed, namely, the Jhelum, Chenab, Ravi, an area of 59,000 square miles, with a popules and Sutlej. Together with the North-west Frontier Province and the Indian State of Jammu and Kashmir which lie to the porth, cast and decreasing towards the west and south frontier Baluchis), that is to say, about one-thirteenth of the area and population of the Indian Empire. But the formation of a separate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 380,000 souls, respectively. The total population of the Province in 1131, including the Baloch tribes on the border of the Dehra Ghazi Khan District, was 28,490,857 of whom 4,910,005 were in the Indian States.

Physical Features.

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in the west. The north-east is occupied by a section of the Himalayas and the Sait Range forms its north-western angle. A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided into five natural divisions. The Himalayan tract includes an area of 22,000 square miles, tract includes an area of 22,000 square miles, with a scanty population living scattered in tiny mountain hamlets. The Sait Range tract includes the districts of Attock, Rawalpindi and Jhelum and part of Shahpur district. Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract. Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, comprises some of the most fertile and thickly population of over four millions is almost slikh. Socially the landed classes stand high, agricultural and pastoral but it includes one and of these the Jats, numbering nearly five large town in Slaikot. Of the piains of the province were an area of spaking, one-half the Jats are Mahometan, one-hilf slikh and one-sighth millions. Bast of Lahore, the rainfall is everywhere so far sufficient that cultivation is essaons, but over the greater part of the number over a million and a half. The area the margin is so slight that, except where irrigation is employed, any material reduction that cultivation is employed, any material reduction in the rainfall involves distress if not actual slikhs. They are widely distributed over the famine. Within the eastern plains iis the large province. Both Jats and Rajputs of the Punctices of Lahore and Amritsar, and the populaand traversed by streams from the hills, com-

of Jammu and Kashmir which lie to the north, east and decreasing towards the west and south the Punjab occupies the extreme north-west- is everywhere so scarty that cultivation is only ern corner of the Indian Empire, and with the possible with the sid of artificial irrigation or ern corner of the Indian Empire, and with the comprises all of British India north of Eind and Rajputana and west of the river Jumma. Stance, these tracts find their security against the feudatories embraced an area of 136,330 squere miles and a population at the Census of 1911 of 24,187,750 (inclusive of 22,587 transformed). The province of Delhi reduced the area and population of the retreating floods. In this very circumstance, these tracts find their security against tamine, for there cultivation is almost independent of rain, a failure of which means of 1911 of 24,187,750 (inclusive of 28,587 transformed) in the contract of grass. So course so seldon that the crops may be said indicated the first course of the chemak and Jhelum Canals which now means the province of Delhi reduced the area and polyllenge the title of the Restate have appeared to the chemak and Jhelum Canals which now the chemak and Jhelum Canals which now the chemak and the crops are the chemak and Jhelum Canals which now the chemak and Jelum Canals which now the chemak and Jelum Canals which now the chemak and the crops are the course of the chemak and the crops are the chemak and the crops are constituted in the canals which now the chemak and the crops are constituted in the canals which now the chemak and the crops are constituted in the crops are constituted to the crops are constituted in the crops are consti the Chenab and Justium Canais which now challenge the title of the eastern plains as the most fertile, wealthy and populous portions of the province. Multan and Lyalipur are the largest towns in the western area. Owing to its geographical position, its scanty rainfall and cloudless skies, and perhaps to its rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India. The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright wun and invigorating air make the climate of the Punjab in the cold weather almost ideal.

The Indian States of the Punjab were formerly in the Political charge of the Punjab Governin the Political charge of the Punjab Government. In 1921, however, the thirteen most important States, including Patiala, Bahawaipur, Jind and Nabha, were formed into a separate "Punjah States Agency" under the control of the Agent to the Governor-General, Punjab States. The only States remaining in the charge of the Punjab Government were the Simla Hill States, for which the Deputy Commissioner of Simla was Political Officer and three available. of Simla was Political Officer, and three small States in the Ambala Division, Kalsa, Pataud and Dujana, which were supervised by the Commissioner of Ambala. From 1st October 1936 with the formation of a new Political Agency at Simla all these States have been transferred to the Punjab States Agency.

The People.

ls, comply population roughly one-half is Mahopopulation population medan, three-eighths Hindu and one-eighth almost Sikh. Socially the landed classes stand high, does one and of these the Jats, numbering nearly five area of millions, are the most important. Roughly area of speaking, one-half the Jats are Mahomedan, upulation one-third Sikh and one-sixth Hindu. In the state of th

Indian Army. In fact all the agricultural classes of the Funjab, except in the south-western districts, made a magnificent response to the appeal for recruits in the great war and the province's contribution of upwards of 409,000 men to the man power of the Empire speaks for itself. The Gujars are an important agricultural and pastoral tribe; chiefly found in the eastern half of the province and in the extreme north-west. In organisation they closely resemble the Jats and are often absorbed citosely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayada and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Hahomedans (Khojas, Parschas and Khakhas), and the numerous artisen and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population are represented by the Sainchis of Dera Ghasi Khan and neighbouring districts in the west, who number about districts in the west, who number about half a million and maintain their tribal system; and the Pathans of the Atock and Mianwall districts Pathans are also found scattered all over the province engaged in horsedealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages.

Languages.

The main language of the province is Punjabl, which is spoken by more than half the population. Western Punjabl may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Rindi, which includes Hindustani and Urdu (the polished language of the towns) Western Paharl, which is spoken in the hill tracts; and Rajasthani, the language of Rajputana. Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

Agriculture.

Agriculture is the staple industry of the province affording the main means of substance to 65'5 per cent. of the population. It assesses to do's per cent. of the population. It is assentially a country of peasant proprietors. About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the Government and is so situated that it cannot be brought under continuous mitigation without arteniary introduct. so stimated that it cannot be brought under cutivisation without extensive irrigation. Thus the Lower Chenab Canal irrigates 1,969,000 acres of what was formerly water land, the Lower Sheium Canal, 4,22,000 acres, and the Lower Bari Doab Canal, adds 1,055,000 acres to this total. On account of the opening of the Sutley Valley canals an area of about 1,504,000 acres more prought under cultivation. Large appear in the hills and elsewhere which are unsatiud to cultivation are preserved as access in the nins and ensewhere which are meaning the total extent of which is about 4,000 square miles. Of the crops grown, wheat is and most important and the development of trigation has led to a great expansion of the wheat area. Next in importance to wheat is gram. Other important staples are barley rices willists make, olisseds from their and rice, miliets, maise, oliseeds (rape, toria and seasuum), cotton and sugarcane. In the canal

colonies large areas of American cotton are grown but in the other cotton-growing districts the short staple indigenous varieties are predominant. snore stappe indigenous varieties are predominant. The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live-stock. Large profits are derived from the cattle and dairy trades and wool is a staple product in Kulu and Kangra and throughout the plains generally. The production of hides and skins is also an important industry.

Industries.

The mineral wealth of the Punjab is small. rock salt, saltpetre and limestone for road building being the most important products. There are some small coal mines in the Jhelum, Shahpur and Mianwall districts. Gold washing is carried on in most of the rivers not without remunerative results. Iron and copper ores are plentiful but the difficulty of carriage and the absence of fuel have hitherto prevented smelting on a large scale. The Punjab is not a large manufacturing province, the total number of factories being only 862 the majority of which are cotton ginning and pressing factories. Handloom weaving is one of the most important industries, both as regards the number of workers engaged and the value of products. Blankets and woollen rugs are produced in considerable quantities and the carpets of Amritsar are famous. Silk weaving is also carried on and the workers in gold, silver, brass, copper and carthenware are fairly numerous. The serioulture industry is being established in submountain districts of the province. Ivory carving is carried on extensively at Amritsar and Leish and also in the Patials State. Mineral oll is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hassanabdal, There is one pulp and paper mill at Abdullapur and one factory for the hydrogenation and refining of oils at Lyailpur.

Administration.

Prior to the amendment of the Government of India Act in 1919 the head of the administra-tion was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the Act of 1919 the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. With the introducof India Act in 1919 the head of the administra-Subjects and the Governor with his Ministers of the Transferred Subjects. With the introduction of part III of the Government of India Act, 1935, this Executive Council has been substituted by a Council of Ministers and the Legislative Council by an enlarged Legislative Assembly with wide powers of Government is carried on through the usual Council which consists of the Samuelar which consists of the severament is carried on through the usual Secretarias which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Medical and Local Government Departments, (5) Electricity and Industries Deptts., two Deputy Secretaries, two Under-Secretaries, and two Assistant Secretaries. In the Public Works Department, there are five Chief Engineers (Secretaries except in the case of Electricity Branch) one in the Bulkings and Roads Branch, one in the Electricity Branch and three in the Irrigation Branch while

the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of the Education Department an Under Secretary to Government. The Government winter in Lahore and summer (from the ment winter in Lanote and summer (rom the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala. Juliundur, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district.

The principal heads of Department in the province are the two Financial Comthe province are the two Financial Com-missioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil juris-diction in special cases. The Court sits at Lahore and is composed of a Chief Justice and ten Puisne Judges (either civilians or barristers), Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercises civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in torce the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Self-Government.

Local Self-Government is secured in certain branches of the administration by the constitubranches of the administration by the constitu-tion of Distirct Boards, each exercising authority over a district; of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Pancha-yats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession taxes and miscellaneous fees, and those of Municipal, Town, and Notified Area Com-mittees from octroi or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Fanchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abatecertain powers in respect of taxation, local Civil Surgeon. He also has a Lady Assistant option, civil and criminal justice, the abate-who is a senior Member of the Women's Medical ment of nuisances and other matters. Most of Service (Countess of Dufferin Fund).

the members of practically all local bodies are now ejected and elections are as a rule keenly contested. In the case of Notified Area Committees, however, all Members are appointed.

Police.

The Police force is divided into District Police. Railway Police and Criminal Investigation Department. The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him three Deputy Inspectors-General in charge of ranges comprising several districts and a fourth Deputy Inspector-General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. Police. The Railway Police are under an Assistant Inspector-General. The District Police are controlled by Superintendents, each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

Education.

The strides which have been made in the past decade, have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains sixteen arts colleges (including one for Europeans and three for women), three normal schools for males, twenty-four taining classes, and combined institutions for females, one hundred and thirty-one secondary schools for boys and girls and sixty-two centres for vocational training. The department maintains 2 Vernacular training classes for wives of teachers. Apart from these institutions for general education, Government maintains eight higher grade professional institutions, viz., the King Edward Medical College, de Montmorency College of Dentistry and Veterinary College at Lahore, the Agricultural College at Lyalipur, the Engineering College at Moghalpura, the Central Training College, Lahore the Lady Maclagan Training College for women, Lahore, and the Chelmsford Training College at Ghoragali, and two schools, viz., the Medical School at Amritsar and the Engineering School at Rasul. In addition there are thirty-six technical and industrial schools (thirty-two for males and four for females) scattered over the province.

The Department of Education is in the charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by an officer designated the Assistant Inspector-General of Civil Hospitals, who is at present an officer of the Provincial Medical Service of the rank of a

Public Health.

The Department of Public Health is controlled by the Director of Public Health who has, work-ing under him, four Assistant Directors of Public Health, 36 District Medical Officers of Health, and twenty-eight District Sanitary Inspectors. In addition there is a permanent is responsible for the public Health officers and 11 Sanitary Inspectors for assistance in combating epidemic diseases. The ancillary services comprise

- (1) A Vaccine Institute which is in charge of a Superintendent and prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India.
- (2) An epidemiological bureau, which is in charge of the Assistant Director of Public Health, Punjab, Epidemiology, where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out.

(3) An Education Bureau, to which is attached a photographer and a draftsman.

- (4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs.
- (5) A Public Health School, the staff of which is responsible for the training of health visitors. The Principal, who is also Inspectress of Health Centres, supervises the maternity and child welfare work throughout the province. A wholetime Medical Officer of Health (Factories), a Statistical Officer and a Nutrition Officer have been appointed and also a provincial Legrosy Officer. There appointments are temporary at present.

In matters connected with santary works the Director of Public Health works in close touch with the Superintending Engineer, Public Health Circle, Punjab, who acts as technical adviser of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical advisers of the Sanitary Board whose duty it is to examine and report upon sanitary schemes put forward by local bodies.

THE FINANCES OF THE PUNJAB.

A realised surplus of Rs. 23 lakhs, as against a budgeted deficit of Rs. 16 lakhs in 1936-37, and also a small anticipated surplus of Rs. 1,72,000 for 1937-38 were announced by Mr. Manoharlal, the Finance Minister in his first Budget presented in June 1937 to the newly constituted Punjab Legislative Assembly, Revenue receipts for 1937-38 were expected to be Rs. 10,89,39,000 and the expenditure Rs. 10,88,67,000. The improvement during the past year amounted to more than Rs. 39 lakhs over the budget figures and covered several sources of provincial revenue. Unless certain items of income show marked improvement, the small surplus is likely to be absorbed in certain additions to the budget, directly consequent on the introduction of the reforms. Income underland revenue suffered to the extent of Rs. 25 lakhs owing to halistorms, cyclones, and unseasonal rains which had caused great damage to crops. Despite this, the provision for nation building departments has been increased by Rs. 25 lakhs. A famine relief fund has been constituted and revised scales of pay have come into effect.

Burma.

West and soult-west and Statin on the Souline State. East. Its area is approximately 261,000 square miles, of which 192,000 are under direct British Administration, 7,000 are under ministered and 62,000 belong to semi-independent Native States. The main geographical feature of the country is the series of rivers and hills running fan-like from North to South with fertile valleys in between widening and flattening out as they approach the Delta. Differences of elevation and rainfall produce great variations in climate. The coastal tracts of Arakan and Tenasserim have a rainfall of about 200 inches, the Delta less than half that amount. The hot season is short and the mon-soon breaks early. The maximum shade tem-perature is about 96°, the minimum about 60°. North of the Delta the rainfall decreases rapidly to 30 inches in the central dry zone which lies in a "rain shadow" and has a climate resembl-ing that of Bihar. The maximum temperature is twenty degrees higher than in the wet zone, but this is compensated by a bracing cold season. To the north and east of the dry sone lie the Kachin hills and the Shan plateau. The average elevation of this tableland is 8,000 feet age elevation of this tableland is 3,000 feets with peaks rising to 9,000. Consequently it enjoys a temperate climate with a rainfall of about 70 inches on the average. Its area is over 50,000 square miles. There is no other region of similar area in the Indian Empire so well adapted for European colonization. The magnificent rivers, the number of hilly ranges (Yomas) and the abundance of forests, all combine to make the scenery of Burma exceedingly varied and picturesque.

The People.

The total population of Burma at the census of 1931 was 14,667,146. There were 9,092,214 Burmans, 1,037,406 Shans, 1,367,673 Karens, 153,345 Kachine, 348,994 Chins, 534,985 Arakanese and Yanbye, 836,728 Talaings and 138,739 Palaungs. There is also a large allen population of 198,594 Chinese and 1,017,825 Indians, while the European and Anglo-Indian population numbered 80,441, and Indo-Burmans, 182.166.

The Burmans, who form the bulk of the popu-Intelligence of the Burmans, who form the bulk of the population, belong to the Tibetan group and their language to the Tibeto-Chinese family. They are essentially an agricultural people, 80 per ont, of the agriculture of the country being in their hands. The Burmese and most of the hill tribes also, profess Buddhism, but Arimism, or the worship of nature spirits, is almost universal.

Burman is usually In appearance the somewhat short and with Mongolian features. His dress is most distinctive and exceedingly comfortable. It consists of a silk turban bound round his forehead, a loose jacket on his body and a long skirt or longyl tied

Burma lies between Assam on the nomy and in petty trading. Their dress is North-West and China on the North-East, somewhat similar to the men's minus the slik and between the Bay of Bengal on the turban on the lead, and the longyl is tucked West and South-West and Slam on the South in at the side instead of being tied in front. A well dressed and well groomed Burmese lally would, for grace and neatness, challenge comparison with any woman in the world.

Communications.

The Irrawaddy, and to a less extent the Chindwin, afford great natural thoroughfares to the country. At all seasons of the year these rivers, especially the Irrawaddy, are full of sailing and steam craft. In the Delta the of salling and steam craft. In the Delta the net-work of waterways is indeed practically the only means of communication. The Irrewaddy Flotilia Company, with a fine fieet of mail, cargo and ferry boats, gives the Irrawaddy and the Delta rivers and creeks a splendid river aervice.

The Burma Railways has a length 2,059.89 miles open line. The principal lines 2,037-59 miles open line. The principal lines are from Rangoon to Mandalay; from Mandalay to Myitkyina, the most northern point in the system; the Rangoon-Prome line; and the Pegu-Marshaban line, which serves Moulmein on the further bank of the Salween River.

Industry.

Agriculture is the chief industry of the province and supports nearly three-fourths of the population. The nett total cropped area is a little more than 16‡ million acres of which a little over 1/1/10 million acres are cropped more than once. Irrigation works supply water to a little over 14 million acres. India is very largely dependent on Burms for her supplies of kerosene, benzine and petrol which rank second to rice in order of importance. Teak wood is exported in large quantities from Burma to India.

Forest play an important part in the industrial life of Burma. The forest reserves cover some 22,104,311 acres while unclassed forests are estimated at about 70,617,951 acres. Government extracted some 42,295 tons of teak during the year 1937-38, private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief, extracted over \$24,492 tons. Other timber extracted by licensees amounts to 500,914 tons and firewood and charcoal 1,447,982 tons.

Tin and wolfram are found chiefly in the Tayoy and Mergui Districts. Wolfram and tin are found together in most mining areas in Tavoy, the proportion varying from almost pure tin to almost pure wolfram. There has been a

revival in the price of tin.

The improvement in the output of tin and wolfram continues. The output of tin in 1937 was 4,710.14 tons as against 4,689.45 tons in 1936. Silver, lead and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern Shan States. Copper in small quantities is also found there. There are small deposits of Molybentie in Tavoy and Mergui and of platinum in Mytikyina. Mining for precious stones in the Mogok Stone Tract of the Katha District continued to be carried out under extraordinary licenses and by native miners working under collecting thereon. round his walst, reaching to his anxies. The Mogok Stone Tract of the Katha District conti-Burmese women, perhaps the most pleasing type i nued to be carried out under extraordinary of womanhood in the Rast, lead a free and open licenses and by native miners working under life, playing a large part in the homsehold eco-lordinary licences. The output of rubbes during.

Burma. 152

1937 was 161,700 carats as compared with 141,490; the Reform Act should be applied to Burma. This carats in 1936. The output of amber in 1937 was 38.73 cwts. The output of Burmese Jadeite during 1937 compared with that of the previous year showed an increase of 1,280.41 cwts. The total output of petroleum in Burma during 1937 was 274 million gallons against 265 million gallons during 1936. The oldest and largest Olifield in the province is at Yenangyaung in the Magwe District where the Burmah Oil Company has its chief wells. There has been a gradual decrease in the output from the wells in this Oildeld as evidenced by the output of nearly 1844 million gallons in 1921 and nearly 121 million gallons in 1937. The next largest oil-field is at Chauk in the same District. There has been a gradual decrease in the output here also but there was a slight recovery in 1937 with an output of 120 million gallons. There has been an increase in the output from the wells in the Thayetmyo District. There were decreases in the output from the wells in the Minbu, Upper Chindurin and Pakokku Districts. The Burma Oil Company take their oil to the refineries at Rangoon by pipe line from the Yenaugyaung and Chauk Oilfields. Other Companies take it down by river flats. The area under rubber is 107,248 acres.

Manufactures.

There are 1,048 factories, more than half of which are engaged in milling rice and nearly one-seventh are saw mills. The remainder are chiefly engineering works, cotton ginning mills, oil mills for the extraction of oil from groundants. printing presses, ice and grated water factories. and oil refineries connected with the petroleum industry. The total number of persons employed in establishments under the Factories Act in 1937 was 87,652. Perennial factories employed 82,220 and seasonal factories 5,432. At the Census of 1981, 1,850,176 or 20.70 per cent. of the total population were engaged outside agriculture and production.

Public opinion amongst the Burmese appears to have now verred round in favour of the locally made article in preference to the imported artificial silks, mostly "iongyls" which were so much in demand for men and women's wear a few years ago. At Amarapura in the Mandalay District a revival has taken place of hand silk-weaving. Burmese carving though once famous is now on the decline for want of encouragement from the public, and few artists in silver still remain, the finish of whose work is sometimes very fine. Bassein and Mandalay parasols are well known and much admired in Burma. But perhaps the most famous of all hand-made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow traced on a ground-work of red lacquer over bamboo. The art of making bronze figures is also on the decline.

Administration.

Burma, which was originally administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that Burma differed so markedly from the Provinces in the Indian Empire that its requirements should be semarkedly from the Provinces in the Indian should be se-hampire that its requirements should be se-parately considered. After repeated discus-sions the question was referred to a special Burmas Reforms Committee, which in 1922 re-quiremented that all the essential provisions of Assistant to the Chief Engineer. There are five

recommendation was accepted and its proposals became law. Under this Act Burma became a Governor's Province, with an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q.v.). main difference was in the size of the electorate. Under the franchise accepted, the rural electorate was estimated at 1,979,450 and the urban electorate had been put as high as 99,882. The Legislative Council consisted fo 103 members, of which 80 were elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma was constitutionally separated from India with effect from the 1st of April 1987 on which date the Government of Burma 1935 came into force. Under that Act the Burma Legislature consists of His Majesty, represented by the Governor and Chambers known as the Senate and the House of Representatives. The Senate consists of 36 members and the House of Representatives

consists of 132 members.

Burma is divided administratively into Upper Burms is invited administratively into Upper Burms (including the Shan States, the Kachin and Chin Hills) and Lower Burms. The Shan States are administered by the Chiefs of the States, subject to the supervision of the Commissioner, Federated Shan States, who is also Superintendent for the Southern Shan States, and the Superintendent of the Northern Shan States. The Northern and Southern Shan States were formed into a Federation on the 1st October 1922, and are designated the F. S. The other Shan States in Burma are States. subject to the supervision of the Commissioner, Sagaing Division. The Civil, Criminal and Revenue administration is vested in the Chief of the State, subject to the re-strictions contained in the sanad. The law administered is the customary law of the State.

Under the Governor are eight Commissioners of divisions, three in Upper, four in Lower Burma, and one in the Federated Shan States.

Justice.

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and ten other permanent Judges. The Superior Judicial Service consists of District and Sessions Judges; there are also separate Provincial and Subordinate Judicial Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited extent.

In pursuance of the policy of decentraliza-tion steps were taken in 1917 to restore to the village headmen the power and influence which they possessed in Burmese times before the centralizing tendencies of British rule made them practically subordinate officers of the administration.

Public Works.

The P.W.D. comprises two Branches, vis., the Buildings and Roads Branch and the Irrigation Branch.

Burma. 153

officers of the administrative rank.

Those of the executive rank are the Executive Engineers and Assistant Executive Engineers who number 20 (twenty), including the Personal Assistant to the Chief Engineer, on the cadre of the Indian Service of Engineers.
Besides this there is also the Burma Engineering Service (Class I) which has been constituted for the purpose of gradually replacing the Indian Service of Engineers in the B. & R. Branch; so far 19 appointments have been made to the latter service. There are 17 officers in service at present.

The Irrigation Branch of the P.W.D., which is under the control of the Hon'ble Minister of Lands and Revenue, is administered by the Chief Engineer, P.W.D., Burma Irrigation Branch, who is assisted by a Personal Asstt. There are two permanent Superintending Engineers in charge of Circles, one of whom is stationed at Rangoon and the other at Maymyo. These are officers of the Administrative rank

Those of the Executive rank are the Executive Engineers and Asst. Executive Engineers who number 15 on the cadre of the Burma Service of Engineers, Class I, Irrigation Branch. Besides this there is also the Burma Service of Engineers, Class II.

Further, there are a River Training Expert and a Temporary Engineer, the latter being engaged on contract for work of a special nature.

The Burma Defence Force.

The Burms Defence Force comprises the Army in Burma and the Burma Frontier Force. supreme command of the Burma Defence Force is vested in the Governor of Burma, subject to the general control of the Secretary of State for

The Army in Burma which is directly under the General Officer Commanding, consists of the following units, corps and departments:-

Units :-- 2nd (Derajat) Mountain Battery, R.A. F.F., Rangoon Field Brigade, R.A., B.A.F., 2nd Battallon, The King's Own Yorkshire Light Infantry, 1st Battallon, the Gloucestershire Regiment, Tenasserim Battallon, B.A.F., Rangoon Battallon, B.A.F., Burma Rallway Battalion, B.A.F., Upper Burma Battalion, B.A.F., No. 13, Field Company, Q.V.O. Madras Sappers and Miners, 1st Field Company, The Burma Sappers and Miners, 1st Field Company, The Burma Sappers and Miners, 1st, 2nd, 3rd, and 4th Battalions, The Burma Rifles, 11th Battalion, The Burma Rifles, B.A.F., The Rangoon University Training Corps, B.T.F., No. 11 Animal Transport Coy. (Mule) and Burma Hospital Company.

Corps and Departments :- The Burma Army Service Corps, The Burma Army Ordnance Corps, The Burma Military Engineer Service, The Burma Medical Service, The Burma Veterinary Service and the Burma Army Corps of Clerks.

The Burma Frontier Force has been constituted with effect from the 1st April 1937 from the 6 Frontier Battalions and the Reserve Battalion of the Burma Military Police. The under the Governor of Burma as part of the education is in the hands of Local Educational Government of Burma's defence organization, authorities.

permanent Superintending Engineers in charge The general superintendence of the force is of Circles, three of which are stationed at exercised, subject to the orders of the Governor, Rangoon and two at Maymyo. These are by the Inspector-General, Frontier Force, Burma, who is appointed by the Governor. force is divided into 6 battalions the administration of which is vested in Commandants and Assistant Commandants : its officers are seconded from the British or Indian Army and its rank and file are recruited from natives of India and Rurma

> Police. The Police Force is divided into: Civil, Military and Rangoon Town Police. The Inspector-General of Police, the latter is under the control of the Inspector-General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an officer of the rank of Deputy Inspector-General. There are four

other Deputy Inspectors General, one each for the Northern, Southern and Western Ranges, and for the Railway and Criminal Investigation

Department.

A special feature of Burma is the Military Police. Its officers are seconded from the British or Indian Army and its rank and file are recruited from natives of India and Burma. The experiment of recruiting Burmese on a small scale has been moderately successful. The organisation is military, the force being The divided into three Battalions. object of the force is to supplement the Civil Police in the maintenance of law and order. Their duties, apart from furnishing columns for active operations against dacoits, etc., are to provide escorts for specie, prisoners, etc., and guards for treasuries, jails, lockups and courts.

Education.

Under the Minister of Education there is the Director of Public Instruction with an Assistant Director, both belonging to Indian the Educational Service and an Additional Assistant Director in the Burma Educational Service, Class I (temporary for the present). There are ten Inspectors of Schools drawn Bervice, the Indian Educational from and the Burma Educational Service (class I) while the Burma Educational Service (class II) provides eight Assistant Inspectors. There is provides eight Assistant Inspectors. There is one Asstt. Inspector of School Physical Training, appointed on a Temporary basis. There is also one Inspectrem of Schools. There is a Chief Education Officer for the Federated Shan States.

A centralized, teaching and residential University for Burma has been established in Rangoon. It now provides courses in Arts, Science, Law. Education. Economics. Engineering. Law, Education, Economics,

Medicine and Agriculture.

English and A. V. Schools are controlled by the Education Dept. A remarkable feature of education in Burma is the system of elementary education evolved, generations ago, by the genius of the people. Nearly every village has a monastery (hoongyi-kyaung); every monastery is a village school and every Burman boy must, in accordance with his religion, attend that school, shaving his head and for the time wearing the yellow robe. At the hoponsyl-kyaungs the boye are taught reading and writing and an elemen-tary indigenous system of arithmetic. The result Burma Frontier Force is governed by the Burma is that there are very few boys in Burma who Frontier Force Act, 1937. The Force is directly are not able to read and write. Vernacular Among special institutions, the Government Technical Institute, Insein, provides courses in Machanical, Civil and Electrical Engineering, the Burma Forest School, Pyinmana, courses in Forestry, the Agricultural College, Mandalay, courses in Agriculture and the Veterinary College, Insein, courses in Veterinary science. The Mary Chapman Training College for Teachers and School for the Deaf exists in Rangoon and achoels for the blind, at Moulmain and and schools for the blind, at Moulmain and Rangoon

A liberal scheme of State Scholarships provides for the despatch of 6 to 12 scholars each year for the education and training overseas of persons domiciled in Burma.

Medical.

pitals. Under him are 37 Civil Surgeons. There are also a Director of Public Health, two Assistant Directors of Public Health, and a Director. Haroourt Butler Institute of Public Health, at which there is now a Public Analyst (which post is at present held in abeyance for purposes of economy) and to which is also attached a Malaria Bureau. There are also an Inspector-General of Prisons, three whole-time Inspector-General of Prisons, three whole-time Superintendents of Prisons, a Chemical Examiner and Bacteriologist and a Superintendent of the Mental Hospital. There is also a post of Hygiene Publicity Officer, which for the present is held in abeyance. There are as a temporary and the state of the state post of special Leprosy Officer and a Nutrition Survey Officer.

The Pasteur Institute was opened in Rangoon The control of the Medical Department is in July 1915. The Director is a member of the vested in an Inspector-General of Civil Hos- Indian Medical Service.

Bihar.

As in the case of Bombay Presidency, the province known hitherto as Bihar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details there-fore appertain to the new Bihar province after the separation of Orisas as from April 1, 1986.

Bihar lies between 20°-30' and 27°-30' N. latitude and netween 82°-81' and 88°-26' K. longitude and includes the provinces of Bihar and Chota Nagpur, and is bounded on the north by Nepal and the Darjeeling district of Bengal; on the east by Bengal and the Bay of Bengal; on the south by the new province of Orissa; and on the west by the United Provinces of Agra and Oudh and the Central Provinces Provinces

The area of the territories which constitute the Governorship of Bihar is 69,348 square miles. The States in Chota Nagpur which were included in the Province have since the lat April 1933 been transferred to the control of the Resident, Eastern States and no longer form part of the Province. Chota Nagpur is a mountainous region which separates them from the Central Indian Plateau. Bihar comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. South of Bihar lies Chota Nagpur. Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Musaffarpur (for Tirbut), Bhagaipur and Rauchi (for Chota Nagpur). The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People.

The Province has a population of 32,558,050 persons. Even so with 467 persons per square mile, Bihar is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely. Patns, Gaya, Jamshed pur and Bhagalpur. During the last ten years the population of Patna has been steadily increasing. Hindus form an over-whelming majority of the population. Though the Muhammadans form about one-tenth of the total population they constitute more than one-fifth of urban population of the province.

Animists account for 5°9 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a northeasterly direction.

Industries.

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still for the bulk of the population of the province agriculture continues to be the basic occupation. 80 per cent. of the population depends wholly on agriculture while only 7.8 depends on industries.

The soil throughout the whole of that portion

provincial boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile. The province occupies a transitional position between Bengal with its damp climate so suitable for the paddy crop, and the provinces to the north and west where large irrigation schemes have had to be provided to enable the soil to produce its bounty.
As in Bengal, rice is by far the most important crop as it occupies an area of approximately 12 million acres or about 52 per cent of the cropped area of the province. As canal irrigation is available only in the Sone valley and to a moderate extent in Champaran District the importance of the south-west monsoon to the province of Bihar cannot be overestimated.

In addition to the rice crop, however, other grain crops are grown on a tolerably large scale. Of the monsoon cereals, maize is grown in an area of almost 17 lakhs of acres while in the cold weather wheat and barley are extensively grown and occupy 12 and 14 lakhs of acres respec-tively. The cultivation of oil seeds like castor. mustard and linseed forms a large and important part of the agriculture of Bihar, the area under oilseeds being estimated at about 18 lakhs of acres.

After the United Provinces, Bihar is the most important white sugar area in India, some 26 per cent of the total production of white sugar in the country being turned out in Bihar factories, The importance of the agricultural aspect of the industry cannot be overestimated as probably 2 crores of rupees have been paid to the growers in the past season for cane purchased and crushed by the factories. Apart from this, numbers of young graduates and a large labour force find employment at the factories from year to year. The number of factories in the province has risen from 12 in 1931-32 to 88 at the present time.

Jute is also an important crop and is confined almost entirely to Purnea district on the Bengal border where about 97 per cent of the total crop in the province is produced. The total area under the jute crop is about four lakh of acres but little of the produce is manufactured within the province.

Tobacco is a crop of increasing importance in the province and one which is likely to expand in importance. There are two factories at present in the province.

Manufactures.

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest eigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Timplate Company of the Indo-Gangetic plain lying within the of India, Agricultural Implements, Ltd., Enfield

Cable Company of India, Enamelled Ironware, On the oriminal side the Sessions Judge hears Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approach powers while the District Magistrate is the ing 100,000 and it consumes 1½ million tons of coal annually. This part of the province has also some of the richest and most extensive Magistrate can also be, though in point of fact iron mines in the world and supplies the iron and steel works in both Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coaffields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed st Ramgarh, Bokaro and Karanpurs at Razaribagh. This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau, Ranchi, the Santal Parganas and Gava are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually.

Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council thus being unique in India as the only Lieutenant Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained elsewhere.

Public Works.
The Public Works Department in the Province of Bihar consists of two separate branches, viz.:—(1) the Buildings and Roads which includes Railways and the Public Health Engineering Branches and (2) Irrigation. was only one Chief Engineer, in charge of both the branches up to the 15th October 1987, who was also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non-professional Assistant Secretary and a Deputy Chief Engineer in the Irrigation branch under him. The Chief Engineer was also Chief Inspector of Local Works, Bibar. An additional post of temporary Chief Engineer and Deputy Secre-tary to Government was restored with effect from the 16th October 1937 and the Irrigation Branch was placed under direct charge of this officer, leaving Buildings and Roads Branch under the Chief Engineer and Secretary to Government from the above date. The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates. Justice.

The administration of justice is con-trolled by the High Court of Judicature at Patna. In the administration of civil justice at Patna. In the administration of civil justice below the High Court are the District Judges as below the High Court are the District Judges and the Courts of Appeal, the Subordinate Judges and the Munaifis. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognitable by the Civil Courts. It does not, however, include the powers of a Small Cause Court, unless these be specially conferred. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject

he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or a Deputy Magistrate to receive complaints and police reports, cases of difficulty or importance being referred to the District Magistrate who is responsible for the peace of the district. In the non-regulation districts the Deputy Commissioner and his subordinates exercise civil powers and hear rent suits.

Almost the whole of the province of Bihar was covered by the permanent Settlement of 1893. A number of estates are held direct by Government, having come into the direct management of Government in various ways. Other estates are managed temporarily by the Board of Revenue under the Court of Wards Act, while in Chota Nagpur a number of estates are managed by Managers appointed under the Chota Nagpur Encumbered Estates Act. There are two Tenancy Acts in force in the Province:— In Bihar the Bihar Tenancy Act is in force. This is the same as the Bengal Tenancy Act, 1885, with a number of important differences consequent on recent amendments of the Act. In Chota Nagpur, which is largely inhabitated by aboriginal peoples, the Chota Nagpur Tenan-cy Act, an Act specially adopted to their requirecy act, an act specially adopted to their requirements, is in force. It has also recently undergone several important amendments beneficial to the people of Chota Nagpur. There is a third tenancy system in the Santal Parganas where the tenancy law is contained in Regulation 114 1270 a. 15. tion III of 1872 and II of 1886 and the recordof rights prepared in the settlement. Finally in a small part of South Bihar where there is a large aboriginal population a special chapter of the Bihar Tenancy Act designed to prevent alienation of land by aborigines is in force.

Throughout the province a system of periodic settlements is in vogue. In these settlements the maps and cadastral ledgers are revised and fair rents may be settled. In many districts the settlement records are now out of date and in one or two it is nearly 40 years since the last settlement was undertaken.

In the greater part of the Santal Parganas and in many parts of Chota Nagpur the headmen system prevails. The usual practice is that the headmen are responsible for the collection of the rents and their payment to landlords after deduction of a percentage as their remuneration. Special steps have been taken in the settlements to record the rights and duties of the headmen, and the special rights and privileges of certain privileged classes of tenants among the aboriginals.

Police.

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assistants. The Commissioner of Excise and Salt

suits in which the amount or value of the subject is also Inspector-General of Registration.

matter in dispute does not exceed Rs. 1,000 Under the Inspector-General of Police are though the limit may be extended to Rs. 4,000. three Deputy Inspector-General and 24 Super-

intendents. There are also 25 Assistant Superintendents of Police and 28 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional oriminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked. There are three companies of Unmounted Military Police and one company of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties. There are also five platoons of armed police stationed at Patna to serve as a provincial reserve.

Education.

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (a. v.) showing in great detail the educational status of the administration.

There is a University at Patna, whose functions are described under the Indian Universities, (q. v.)

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 16 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are stationed. 60 Dispensaries are maintained by Government in addition to 630 Dispensaries maintained by Local bodies, Reilways, private persons, etc. 7,191,877 patients including 82,680 in-patients were treated in all the dispensaries in 1985. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs. 34,91,716.

A large mental hospital for Europeans has been opened at Ranchi which receives patients from Northern India. A similar institution for Indians has been opened at Ranchi since September 1925 for the treatment of patients from Bihar, Orissa and Bengal. A sanitorium at Itkl in the district of Ranchi has also been established for the treatment of tuberculosis. An institute for radium treatment has also been established at Patna. Centres for anti-rabic treatment have been started at Patna.

A medical college has been opened at Patna and the Medical School which was in existence at Patna has been transferred to Darbhanga.

The finances of the province have undergone a change owing to the separation of Orissa from Bihar, so that it is not possible to give correct budget figures for Bihar for the year 1936-37.

ADMINISTRATION.

GOVERNOR.

His Excellency Sir Maurice Garnier Hallett, Babu Shivanandan Prashad Mandal, M.L.A., K.C.S.I., C.I.E., I.C.S.

PERSONAL STAFF.

Secretary to Governor, Mr. W. G. Lacey, I.C.S. Military Secretary to Governor, Lieut. D. G. Walker, 1st Battalion, D.C.L.I.

Aide-de-Camp-2nd-Licut, A. C. Mace Savage, 1st Battalion, The Queen's Royal Regiment, and Lieut, B. E. Hastings Thomas, 1st Battalion, Northamptonshire Regiment.

Orissa.

Like Sind, Orissa was constituted a separate province on April 1, 1936. If Sind was a separate geographical, ethnological and linguistic unit inside the administrative boundary of Bombay Presidency, the new province of Orissa is the result of the amalgamation of various Oriyaspeaking peoples who had till then belonged to three separate provinces, viz., Bihar and Orissa, Madras and the Central Provinces.

The Oriyas are an intensely patriotic people who bear great love for their culture and language. They have always opposed any move to dismember the Oriya-speaking tracts for political or administrative considerations. The Oriyas trace their traditions far back to the days of Mahabharata, when there was the ancient kingdom of Utkal embracing a wide territory now known as Orissa. Through successive conquests and annexations in known history, the Oriyas passed through varying fortunes, until at the time of the Moghul conquest the Orisas country was broken up, and the people gradually lost race consciousness, although common language and literature continued to act as a link.

Race consciousness was revived with the spirit of education under the British regime and after the great famine of 1866, Sir Stafford Northcote suggested the separation of Orissa from Bengal. The proposal was turned down, but the patriotic fervour underlying the new move persisted and gave rise to a series of demands.

History of Separation.

The agitation for the unification of Oriya tracts first obtained official recognition in 1903 when the Government of India accepted the principle of bringing in the scattered sections of the Oriya speaking population under a single administration. About the same time, there was brought into existence the Utkal Union Conference, which carried on a sustained agitation to unify the Oriyas.

The first stage of success was achieved in 1912 when the area of modern Orissa was separated from Bengal and amalgamated with Bihar to form what came to be known as the province of Bihar and Orissa. Although the status of Orissa in the province of Bihar and Orissa was much better than before, the advocates of Oriya unity continued to press their claim for the formation of Orissa into a distinct administrative unit. The late Mr. Montague and Lord Chelmsford saw the justice of the Oriyas' claim and generally favoured the redistribution of provinces on a linguistic basis for the success of responsible government. They left it, however, to the provincial governments concerned to formulate opinions and make concrete proposals after the advent of the Montford constitution in 1920.

The Bihar and Orissa Legislative Council endorsed the idea of amalgamation, but the Madras Council held an inconclusive debate. The Madras Government was against the surrender of any of its territory, while the C. P. Government had an open mind.

The Government of India then appointed what is called the Philip-Duff Committee to make local inquiries with a view to ascertaining the attitude of Orlya-speaking people in the north of Madras Presidency on the question of their union with Orissa. Mossrs. C. L. Philip and A. C. Duff reported that there was "a genuine, long standing and deep seated desire on the part of the educated Oriya classes of the Oriya-speaking tracts for amalgamation of these tracts with Orissa under one administration".

The next stage came with the appointment of the Simon Commission in 1927. A sub-committee of the commission presided over by Major Attlee recommended the creation of a soparate administrative unit for Orissa, agreeing with the Oriyas' contention that, under the autonomous conditions proposed by the Commission, the Oriyas would be an ineffective minority in Madras, Bengal, Bihar and Orissa and the C. P.

Round Table Conference.

When the idea of a federation of autonomous units dawned at the first Round Table Conference, the Oriyas' demand was presented in a crystallised form by the Maharaja (then Raja) of Parlakimedi, who asked for a separate province for Orissa. "We want a province of our own," he said, "on the basis of language and race so that we can be a homogeneous unit with feelings of contentment and peace, to realise, and be benefitted by, the projected reforms and look forward to the day when the United States of India will consist of small federated States based on common language and race."

The Oriyas' demand derived adventitious support from the strength of the Muslim claim for the constitution of Sind as separate province. Those who backed up the case of Sind could not oppose Oriyas' claim, which, therefore, came to be recognised at the Round Table Conference.

In September 1931, the Government of India appointed the O'Donnell Committee to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee recommended the creation of a new province including the Orissa division; Angul, the Khariar Zamindari of the Raipur district and the greater part of the Ganjam district and the Vizagapatam agency tract. According to the Committee, the new Orissa province was to have an area of 32,681 square miles and a population of about 8,174,000 persons. On the question of financial and other consequences of separation, the Committee made recommendations generally on the lines of the Sind Committee,

In January 1936, an Order-in-Council was Issued by His Majesty's Government constituting Orissa as a separate province to be brought into line with other provincial units on the luanguration of Provincial Autonomy on April 1, 1937.

Extent of Province.

The following are the areas comprised in the new province of Orissa:—

- 1. That portion of the Province of Bihar and Orissa which was known as the Orissa Pilvision thereof.
- 2. Areas transferred from the Presidency of Madras:-
 - (i) The Ganjam Agency Tracts;
- (41) The following areas in the non-Agency portion of the Ganjam district, siz, the taluks of Ghumsur, Aska, Surada, Kodais and Chatrapur, so much of the taluks of Ichapur and Berhampur as lies to the north and west of the boundary line:
- (iii) So much of the Parlakimedi Estate as lies to the north and east of the said line; and
- (iv) The following areas in the Vizagapatam district, that is to say, the Jeypore (Impartible) Estate and so much of the Pottangi taluk as is not included in that estate.
- 3. Areas transferred from the Central Provinces:--
- (i) The Khariar Zamindari in the Raipur district; and
- (ii) The Padampur Tract in the Bliaspur district, that is to say, the detached portion of that district consisting of 54 villages of Chandrapur-Padampur estate and also of the following villages, etc., Kuhakunda, Badimai, Panchpudgia (Soda), Barhampura (Malgusari), Panchpuragia (Palsada), Jogni and Thakurpai, (Jogni).

Agriculture.

Agriculturally and industrially, Orissa is a backward region. It has suffored as the result of being tacked to one or other of many provinces for administrative purposes. This explains why there are no big factories in Orissa, although there are a large number of indigenous cottage industries be speaking the people's attisanship. Among the cottage industries may be mentioned handloom industries, brass, bell metal, silver digree, cutlery, wood and paper pulp and horn articles. Sugarcane and jute are two important commercial crops in Orissa, and areas under both these are already increasing. The Orissa forests can supply a large quantity of valuable timber and fuel. Fisheries too are an important industry of Orissa. The two valuable sources of supply are the extensive Chilka lake and Puri where on an average 9,000 maunds of eured fish and 50,000 maunds of uncured fish respectively are exported to calcutate every year.

The chief mineral resources of Orisas are iron, coal, limestone, manganese and mica. Iron ere is mostly found in Mayurbhanj, Keonjhar, and Bonai, all States. The deposits in this area are remarkable for the enormous quantity of extremely rich ore they contain. More than 60 per cent, of the ore extracted in India comes from these areas of Orisas for which there is a ready demand from the Tata Iron and State Works in Jamshedpur and Messrs. Bird

& Co. of Calcutta. Orissa cannot boast of such extensive coal mines as those of Bengal and lishar, but coal has been found in Angula, Sambalpur and in the states of Gangpura. Talcher and Athmalik. Talleher has the largest coalfields and they are being progressively exploited. The Agricultural and the Industries Departments which remained under the control of the Revenue Commissioner till November 1936 was taken over by the Director of Development. A Deputy Director of Agriculture was appointed for Orissa. By the amalgamation of the ex-Madras and ex-Central Provinces areas 15 additional factories were added to those already in Orissa Division and four fish curing yards with their staff were transferred from the Madras Presidency.

Administration.

Sir John Austin Hubback, K.C.S.I., was appointed to be the first Governor of the infant province of Orissa.

Under paragraph 19 of the Order in Council, the Patna High Court is the High Court for the Province. To enable the High Court to hear on Circuit, cases of the Ex-Madras and ex-Central Provinces areas, Clause 35 of the Letters Patent was amended by Regulation XII of 1936. A new Court of an Agency Sub-Judge at Jeypur, a Munsif's Court at Nawapara and three additional Criminal Courts, consisting of a District Magistrate's Court and two subdivisional Magistrate's Courts, were established in 1936,

The Cadre of the Indian Civil Service was provisionally fixed at 17 including 13 superior posts and 4 inferior posts. As it was considered undesirable to form a separate Cadre for such a small number the Cadre is joint with Biffar.

In the elections under the new Reforms the Congress secured complete majority of seats in the Assembly.

The first general elections under the constitution which established Orissa as a separate province resulted in a clear majority for the Congress Party. In a house of 56 the Congress counted 36 as its adherents. The Governor theseupon summosed the leader of the Congress Party to form a Ministry, but the latter, in obedience to the directions of the party head-quarters, declined unless he were given certain assurances by the Governor. (See chapter on Indian National Congress). After a prolonged controversy this point was amicably settled, and the Congress Party leader formed a Cabinet. Late in 1937, the legislature decided that Cuttack should be the capital of the province.

The working of self-government in the infant province was threatened with interruption twice in 1939—once early in the year and later in the summer. The former did not relate directly to Orises, but the latter did. In this chapter we are concerned only with the latter. Sir John Hubback wished, for reasons of health, to go home on leave. In his place the Revenue Commissioner, the seniormost civilian in the province, was appointed to act for a period of four months. The Pressler opposed this appointment on the ground that it is bad in principle and derogatory to the pressign

of the Ministry to ask it to work under a Governor who till the other day took his orders from the Ministry and will continue to do so on his reversion to his substantive post. The Orissa Premier's complaint was taken up by the Congress and Mr. Gandhi. An all-India crisis was threatened on this issue, but it was a verted through the goodness and self-sacrifice of Sir John Hubback who postponed his leave.

Orissa is a poor province, its annual budget being in the vicinity of two crores of rupees. Being an infant administrative unit, all ite resources are needed to live and grow. It is therefore surprising that the Government of the day has embarked on a programme of prohibition which threatens seriously to cripple the provincial finances. In his budget for 1939-40 the Premier announced Government's decision to forego excise revenue to the tune of Rs. 7.60.000 which made a substantial contribution towards a total deficit of Rs. 18,35,000. Here is a summary of the budget for 1939-40.

The year is expected to start with an opening balance of Rs. 26,96,000, which is better than the opening balance of 1988-39 by Rs. 2,09,000. Revenue receipts have been placed at Rs. 1,84,82,000 and expenditure on revenue account at Rs. 2,02,67,000, the gap between the revenue and expenditure thus being Rs. 18.85.000. The substantial decrease in revenue receipts is due to the anticipated loss in Excise revenue on account of the anti-opium campaign and the introduction of other temperance measures".

Receipts other than revenue are estimated at Rs. 3,38,76,000 and expenditure not charged to revenue at Rs. 3,20,92,000, the net receipt being Rs. 17,84,000. This taken with the revenue deficit of Rs. 18,85,000 results in a reduction of Ra. 51,000 in the opening balance of Rs. 20,98,000, i.e., to Rs. 26,45,000 only. The ordinary balance at the close of the year 1939-40 is estimated to be reduced to Rs. 7,78,000.

The receipt side shows a decrease in the Land Revenue being Rs. 48,77,000 in 1939-40 as against Rs. 49,19,000 in 1938-39; in Excise the receipt being Rs. 23,22,000 in 1939-40 as against Rs. 30.82,000 in 1938-39.

The main heads of expenditure are for General Administration-Rs. 29,06,000; Police-Ra. 22,97,000; Education-Rs. 27,05,000: Medical-Rs. 9,18,000; Public Health-Rs. 2,32,000 ; Industries-Rs. 2,78,000 and Civil Works-Rs. 30.13.000.

Some of the special features of the Budget for 1939-40 (which has a deficit of Rs. 18,85,000) are the new schemes which the Government propose to take up and for which Rs. 11,52,746 have been earmarked in this Budget.

A remarkable feature of these new schemes is the provision of Rs. 5.00,000 for the constitution of a Village Development Fund in Oriesa.

A sum of Ra. 77,505 will be pent in connection

propaganda against the use of intoxicants Rs. 44,842 for Rs. 44,842 for appointment of temporary additional staff and Rs. 22,840 for Medical Establishment, grants to dispensaries, etc., in this connection.

A sum of Rs. 1,000 has been provided for the removal of illiteracy but "the Government propose to spend up to one lakh of rupees in the year on this account as soon as definite schemes are formulated."

Other important grants under Education head are provision of Rs. 25,000 for primary education in municipalities, Rs. 1,384 for the opening of a science class at the Ravenshaw Collegiate School at Cuttack; Rs. 300 as additional grants to primary schools for girls; an additional grant of Rs. 5,600 for the encouragement of Oriya literature; Rs. 1,000 as grants to public libraries; Rs. 15,000 for the establish-ment of a Central Library in Orissa and Rs. 10,000 for the establishment of a Municipal Library in Orissa.

Under head 'Medical' have been provided Rs. 5,591 for hospitals and dispensaries; Rs. 2,700 as grants to local bodies for drugs and instruments and remuneration to local Indian doctors and compounders for leprosy work; Rs. 20,000 for medical aids to local bodies and also several grants to leprosy clinics.

For public health purposes Rs. 30,000 have been provided as grants to local bodies for water supply and public health and Rs. 20,000 as grants to the Cuttack Municipality.

Under head "Civil Works" Rs. 30,000 has been provided for the construction of buildings for a Museum in Orissa.

Under the above new scheme money has also been provided under agricultural development for the appointment of a skilled labourer from outside the province to demonstrate better methods of Pan cultivation, raising of cocoanut seedlings in the Puri Farm for sale to the public, specially in the flood-affected areas; distribution of seeds in the province; expenditure in connection with the holding of exhibitions; stipends to Oriya studente reading in the Bihar Veterinary College at Patna, Rs. 5,418 for the scheme for co-operative training and education and Rs. 48,875 for payment of the dues in settlement of the claims of the Bihar and Orissa Provincial Co-operative Bank,

Under the head "Industries" Rs. 2,391 have been provided for the demonstration of a match factory at Outtack, Rs. 11,520 as grants to the All-India Village Industries Association for training students in date-palm gur and for training students in date-paim gur and palmyra gur-making, hand-made paper and agriculture and for demonstration of improved ghani and paddy-husking machines and survey of cottage industries; Has 8,215 as grants to the All-India Spinners' Association for cotton cultivation for the control of the contr A sum of Ra. 77,505 will beginer in connection cultivation, for training of spinners and for with the optum prohibition in Balasore. Of this supply of more efficient simply of more efficient sum Ra. 10,323 will be spent for carrying on Ra. 3,000 for industrial experiments. 3.

ORISSA LEGISLATIVE ASSEMBLY.

The Central Provinces and Berar.

great triangle of country midway between Bombay and Bengal. Their area is 131,557 sq. miles, of which 80,637 are British territory proper, mer Hindu names, being descendants of forom H.B.H. the Nizam and the remainder positions. The last census shows that a gradual held by Feudatory Chiefs. The population [1831] Brahmanising of the aboriginal tribes is going is 15,323,058 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the and the several parts were amaigamated after the Mutiny, in 1861, into the Chief Commissioner-ship of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H.E.H. the Nisam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H.E.H.the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyan plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealimportant couton traces or india and the weat-thiest part of the C. P. proper. The Kastern half of the plain lies in the valley of the Waingan-ga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Further east is the far-reaching rice country of Chattisgarh, in the Mahanadi basin. The southeast of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kankar lie in this region. Berar lies to the south west of the C. P. and its chief characteristic is its rich black cotton-soil plains.

The People.

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The main divisions of the newcomers are indicated by the language divisions of the province. Hindi brought in by the Hindustani-speaking peoples of the North, prevails in the North and Kast, Marathi in Berar and the West and centre of

The Central Provinces and Berar compose at 7 per cent. The effects of invasion are curiously Brahmanising of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries.

When Sir Richard Temple became first Chief Commissioner of the C. P. the province was landlocked. The only road was that leading in from Jubbulpore to Nagpur. The British administration has made roads in all directions, the two trunk allways between Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construc-tion of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the malguzari, or landlord system, ranging with numerous variations, from the great Feu-datory chiefships, which are on this basis, to holdings of small dimensions. A system to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay raiyatwari system. 16,090 square miles of the C. P. is Government Reserved forest; in Berar the forest area is about 3,339 square miles, the total forest area being one-sixth of the whole Province. The rugged nature of the greater part of the country makes forest conserved. ter part of the country makes forest conservation difficult and costly. Excluding forest and waste 67 per cent. of the total land is occupied for cultivation; for the two most advanced districts in the Central Provinces, the proportion averages 83 per cent., while the average figure for the Berar Districts is as high as 93 per cent. The cultivated area has extendas 93 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 32 per cent. of the cropped area. Wheat comes next with over 16 per cent, then pulses and other cereals used for food and oil-seeds with nearly 50 per cent, and continue the process of the continue of the cont and oil-seeds with nearly ou per cent., and comments of per cent. In Berar cotton coefficies 44 per cent. Next comes juar and then per cent. Next comes juar and then per cent. Then comes juar and other cereals and oil seeds of the crossed area, jowar covers 33 per cent, then what and oilseeds. In agriculture more than walf the working population is female.

Commerce and Manufactures.

Industrial life is only in its earliest development except in one or two entree, where the introduction of modern enterprise along the railway routes has laid the foundations for great future developments of the natural wealth of the province. Nagpur is the chief centre of a the Central Provinces. Hindle is spoken by lawy cotton spinning and weaving industry.

56 per cent. of the population and is the lingue.

The Empress Mills, owned by Parsi mannfrance. Marathi by 81 per cent. and Gondi facturers, were opened there in 1877 and the

eneral prosperity of the cotton trade has led; and Superintendent of Stamps and Inspectorto the addition of many mills here and in other parts of the province. The total amount of Indian yarn exported from the Province during the years 1986-87 and 1987-38 was 201,105 and

239.935 maunds, respectively.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1937 employed 22,106 persons and ruised 695,177 tons. Then follow soal mining with an output of 1,504,159 tons and 11,918 persons employed, the Jubbul-pore marble quarries and allied works, the limestone quarries and the mines for pottery clay, soapstone, etc.

The total number of factories of all kind legally so described was 1,058 in 1937, the latest period for which returns are available and the number of people employed in them 61,186. The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P. and Berar, gradually sapping the strength of the old village industries as communications improve, and concentrating industries in the towns. While the village industries are fading away, a large development of trade has taken place. The last pre-war reports showed an increase in volume by one-third in eight years.

Administration.

The administration of the Central Provinces and Berar is conducted by a Governor who is appointed by the Crown. He is assisted by seven Secretaries and six Under Secretaries. Under the provisions of the Govt, of India Act, 1985, the administration is conducted by a Governor with a council of ministers, chosen and summoned by him and sworn as members of the council.

This Province which has a unleameral Legislature, consists of 112 members distributed as

follows :-

Of the 84 General seats 20 seats are reserved

for members of the Scheduled castes.

The C. P. are divided for administrative purposes into three divisions and Berar constitutes a division. Each of these is controlled by a Commissioner. The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Pro-vincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Paulue Health, the Inspector General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner | bodies in the Province.

General of Registration, and Registrar-General of Births, Deaths and Mariages, the Director of Agriculture, the Registrar of Co-operative Societies, the Director of Indusor Joperative Societies, the Director of Indus-tries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon, (except Mandla, Drug and Balaghat where there are Assistant Briggons who is generally also Superintendent of the District Jail except at Central Jails at Nagpur and Jubbulpore and District Jails at Rajpur, Narsinghpur and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service; (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib Tahalidars, or members of the Subordinate service. The district is divided for administrative purposes into taballs, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman.

Justice.
The High Court of Judicature at Nagpur, which was established in January 1986, is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

Subordinate to the High Court are the District and Sessions Judges (9 in number) cach of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and

second class.

Local Self-Government.

Municipal administration was first introduced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1864. Several revising Acts extend its scope and the C. P. Municipalities Act passed towards the end of the year 1922 has considerably increased the power of the Municipal Committees. The C. P. Municipalities Act has also been extended to Berar. Viewed erally, municipal self-government is considered to have taken root successfully. The larger towns have municipalities, there being 79 such

Under the Central Provinces Local Self-Gov- from these works more than covers ernment Act passed in 1920 as amended in 1931 there is a local Board for each tahsil and a district council for each district excepting Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government officials not exceeding in numbers one-fourth of the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members selected by those representatives and of members other than Government servants, nominated by Government.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions of local boards also are non-officials.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention while expenditure on famine relief is also a legitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1920. So far 968 Panchayats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933.

Public Works.

The Public Works Department, which com-prises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer who is also Secretary to the Government. are two Superintending Engineers who between them supervise the work of both branches. The Province is fairly well served by a network of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03). During the last thirty-eight years a sum of Rs. 7.25 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula, Mahanadi, Kharung and Maniari canals.

Three works, oiz., the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all failed to justify their classifica-tion in that category and have now been trans-ferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their cannot be expected to be productive and their 1922 but for the convenience of pupils whose construction is justified only on account of their matter torgue is not a recognised indian value as a protection against famine. The language of the locality, a few English medium sections are still maintained. For administrashout \$17,000 acres, mainly rice and the income tive purposes, schools are further divided

expenditure incurred on their maintenance and management.

Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. A Special Armed Force of 924 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police. The Central Provinces has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

Education.

The Education Department of the Central Provinces and Berar is administered by a Directo Government in the Education Department; three Deputy Directors of Public Instruction, (who is also Secretary to Government in the Education Department); three Deputy Directors of Public Instruction, an Under Secretary, Education Department who is also Secretary, High School Education Board; two Inspectresses of Schools, assisted by four Assistant Inspectresses; and nineteen District Inspectors assisted by sixty-nine Assistant District Inspectors of Schools. Besides the above there is an Officer on Special Duty with 3 Assistant District Inspectors of Schools to assist him. Schools are divided into (a) schools for general education and (b) schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The main division of schools for general education is into Primary and Secondary. In the Primary Schools the teaching is conducted wholly in the recognized Indian languages of the province and these schools are known as Primary Schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Middle Schools in which instruction is given (a) wholly in a recognised Indian language or (b) mainly in a recognised Indian language with the option of English as an additional language, the option of English Middle Schools in which instruction is given in a recognized Indian language but English is a compulsory subject. In the High School classes instruction is given through the recognized Indian language since 1922 but for the convenience of pupils whose

according to their management into schools; under public management and schools controlled by private bodies. The former consist of (a) schools controlled by Government and (b) schools controlled by Local Bodies or Boards. The latter consist of (a) schools which are aided by grant from Government or from Local Funds and Municipal Funds and (b) unaided schools, All schools under public management, all aided schools and all unsided recognised schools conform in their courses of study to the standards and syllabl prescribed by the Education Depart-ment or by the Board of High School Education in Central Provinces and Berar, They are subject to inspection by the Department and to the general rules governing schools of this type. They are "recognised" by the Department and their pupils may appear as candidates for any prescribed public examination for which they are otherwise eligible. Unrecognised schools do not follow the rules of the Department, nor are they subject to inspection by the Department. Their pupils may not appear as candidates at any of the prescribed public examinations without the previous sanction of the Department. Primary Education is under the control of District Councils and Municipal Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Higher Education is under the control of the Nagpur University of which the following are constituent colleges:—at Nagpur: Morris College, the College of Science, Hislop College, City College, the Agriculture College, the University College, that Agriculture College, the University College of Law, and the Central College for Women; at Jubbulpore: the Robertson College, the Hitkarini City College, the Spece Training College (for teachers), and the Hitkarini Caw College; at Amraoti: the King Edward College; at Wardha: Wasudev Arts College; at Wardha: Wasudev Arts College; at Akolas: the Bern Art College; and at Raipur: the Rajkumar College and the Chhattisgarh Arts College. There are also an Engineering School and a Medical School at Nagpur.

Secondary Education is under the control of the Board of High School Education, on which the University is represented. The High School certificates awarded by the Board qualifies for entrance to the University.

Medical.

The medical and public health services of the province are respectively controlled by an Inspector General of Civil Hospitals and Director of Public Health. The Medical department has made some progress since the year 1911. A striking advance has been made in recent years with urban sanitation, and the opening of a Medical School at Nagpur in 1914 supplied a long felt need. The principal medical institutions are the Mayo Hospital at Nagpur, opened in 1874 with accommodation for 222 in-patients; the Victoria Hospital at Jubbulpore, opened in 1886 with accommodation for 177 in-patients; the Daga Memorial (Dufferin) Hospital and the Muir Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump Children's Hospital at Jubbulpore, these last four being for women and children and can together accommodate for 270 in-patients. In addition to the existing hospitals for women at Chhindwara, Khandwa and Murtisapur a new hospital for women has recently been opened at Khamgaon

and at all district head-quarters where no separate women's hospital exist, sections have been opened at the Main Hospitals for the treatment of women by women. The Mayo Hospital, Nagpur, was provincialised in 1923, the Irwin Hospital at Amraoti in 1925, the Victoria Hospital at Jubbulpore in 1926 and the Silver Jubilee Hospital at Raipur in 1928. In accordance with recent policy, 132 out of 102 local fund dispensaries have been transferred to the administrative and executive control of local bodies. The Province has one Mental Hospital at Nagpur. Four tuberculosis clinics have been opened at Nagpur, Jubbulpore, Raipur and Amraoti during the year 1937 and 40 beds have been reserved at the Pendra Road Sanatorium for the treatment of patients sent by Government. There is a great deal of eye diseases in the province and this problem is receiving special attention. The Central Provinces and Berar Blind Relief Association is doing propaganda work and helping the blind. So far 12 Assistant Medical Officers have been given training in eye work for six months at the Mayo Hospital, Nagpur. These specially trained officers are posted to eye centres in the province. Anti-rabic treatment is now available at 10 Raipur, Akola, Wardha, Hoshangabad, Saugor, Chanda, Chhindwara and Amraoti. Vaccination is compulsory in nearly all municipal towns in the province. The Central Provinces Vaccine Institute at Nagpur was opened in 1913.

Finances.

The province derived a benefit of Rs. 181 lakhs year from the Niemeyer Settlement, but the bulk of this has since been absorbed by new recurring expenditure on development (Rs. 8-27 lakhs), the service of the public loan floated in 1937-38 (Rs. 2.91 lakhs); the inevitable annual rise in pension charges (Rs. 2 lakhs); and the cost of ways and means accommodation and other miscellaneous charges accompanying the new Constitution (Rs. 3 lakhs). Pari passu, the Provincial Government has considered it expedient to abate the land revenue demand to the extent of Rs. 10.25 lakhs and to give concessions in the shape of reduction of water rates and forest grazing rates costing Rs. 3.18 lakhs. In the meanwhile the loss of Stamp revenue on account of the operation of the debt conciliation boards continues and is now placed at Rs. 10 lakhs a year. The extension of prohibition in its second stage will also cost the dovernment Rs. 8 lakhs a year. The provincial Government has endeavoured to make good the loss partly by economies in administrative expenditure, which have so far given an aggregate saving of Rs. 15 lakhs a year, and partly by new taxation, consisting of Rs. 3 40 lakhs, enhancement of Zamindari land revenue, Rs. 2 50 lakhs, the estimated yield from sales tax on motor spirit and lubricants, Rs. 2-25 lakhs, from the tax on trades, professions, etc., Rs. 1-25 lakhs, revenue from increased rates of registration. The province's share of income tax is also received to the extent of Rs. 7 lakhs a year, earlier than was anticipated when provincial autonomy was inaugurated. In normal agricultural and economic conditions the province is capable of balancing its budget, but the economic depression of the last 10 years has strained rural economy, and the situation has been aggravated by the unfavourable seasons of 1937 and 1938. The cotton crop, the pivot of the finances of the province, was the worst since 1934-35 and prices remain low. Liberal relief by way of remissions of arrears, reduction or abatement of the demand and suspension of land revenue had to be given. The year 1937-38 closed with a deficit of Rs. 12-29 lakhs, and according to the revised estimates the deficit for 1938-39 is Rs. 34-18 lakhs. A small surplus of Rs. 1-26 lakhs is estimated for 1939-40.

The liabilities of the province in the shape of loans due to the Central Government and public issues will stand at Rs. 375·76 lakhs on 1st April 1939 and unfunded ilability (provident fund and other deposits) at Rs. 2:20 lakhs and carry over of floating debt at Rs. 76·96 lakhs. By the end of the year the permanent debt will have risen to Rs. 423·20 lakhs (including the funding of Rs. 50 lakhs out of the floating debt), unfunded debt to Rs. 2:29 lakhs and carry over of floating debt reduced to Rs. 20·61 lakhs, making a total of Rs. 672·81 lakhs, and carry over these there are Rs. 49.54 lakhs, value of the investments of the Famine Relief Fund, cash balance of Rs. 21.35 lakhs in treasuries and the Reserve Bank, Rs. 56 lakhs, cash balance of the

Famine Relief Fund, Rs. 2-31 lakhs in the sinking fund and additional assets Rs. 105.44 lakhs in the shape of loans outstanding against local bodies and Rs. 1.22 lakhs with Government Servants. Other tangible assets in the shape of Irrigation works, Roads, Buildings and the Forest Transway far exceed the total liabilities; but, even if these are left out of account, the net liabilities are only a little in excess of one year's revenue.

The province has become responsible for arranging for its ways and means from 1st April 1938 and is experiencing some difficulty owing to the absence of a working cash balance and the earry over of recurring deficits.

The province has two major reserves of resources, viz., (i) reduction in the cost of the higher services as a result of the application of revised scales of pay and other economies and (ii) land revenue demand by modifying the malguzari settlements in the Central Provinces. But both of these will take time to mature.

A committee has recently been appointed to survey the financial position of the province, one of the terms of reference being to explore the possibility of augmenting the fiscal resources of the province.

North-West Frontier Province.

The North-West Frontier Province, as its the two great waves of Muhammadan invasion. name denotes, is situated on the north-west fast came the 8lkhs invasion beginning in frontier of the Indian Empire. It is in form 1818. The Frontier Territory was annexed by the British in 1849 and placed under the cast and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the India and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hundu Kush. From this range a long state of the Punjab Government Frequent with the border tribes. The most serious phases of these disturbances were the Hundu Kush. From this range a long state of the Hundu Kush. the Hindu Kush. From this range a long against the Waziris in 1919-1920. These have broken line of mountains runs almost due south, resulted in the establishment at Razmak, a posi-dividing the province from Afghanistan, until tion dominating the Mahaud Waziri country, the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest breadth 270 miles and its total area about 80,856 square miles. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Marian, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the four districts in the second division contain 13,518 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political coutrol of H. E. the Governor in his capacity as Agent to the Governor coneral. The area of this tract is roughly 22,828 square miles and in it are situated, from north to south, the political agencies severally known as the Malakand, Khylor, Kurram, North Wazirstan and Bouth Wazirstan Agencies. Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans-border Territory are internally administered by the Political Agents, but the bulk of the trans-border population is free from any internal interference, so long as offences are not committed and so long as the tribes observe the conditions on which allowances are paid to many of them.

The area of the Province is a little more than the local officer; an arrangement de-half that of Bombay (excluding Sind and Adea)) signed to secure both prompt disposal and amounts to more than three-fifths of the of references and utilisation of the size of England without Wales. The density expert knowledge of frontier conditions of population throughout the Province equals 99 persons to a square mile, but in the more favoured portions the pressure of population is much greater. In the Hazara District there are 20 persons to a square mile and in the trans-Indus plains tract the number is 156. Density for the 6 rented Districts 5,179 persons per s. mile. The key to the history of the people of the N.-W. F. P. lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern more diolety connected pointerary with Exercity Province and the Punjan and neard numerous fran than with India, though in pre-Maho-witnesses. Its members were Messers. Raza medan times its population was mainly Indian All, M.C.S., T. Raugacharia, Chaudhri Shahaby race. Early history finds the Iranians dominating the whole Indus valley. Then Khan, members of the Legislative Assembly, H. seme the Greek lavasion under Alexander N. Bolton. I.C.S. (Foreign Pept.) and A. H. the Great, in B.C. 337 then the invasions of Parker, I.O.S. (Punjab) furnishing the Sakas, and of the White Huns and later developed practically into a contest between

of a permanent garrison of 10,000 troops drawn nostly from stations lying in the Plains imme-diately below the hills. A circular road from Isannu, through Razmak to Sararogha, Jandola and back to the Derajat provides communications transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of the Tribal area.

The division of the Frontier Province from the Punjah was frequently discussed, with the double object, in the earlier stages of these debates, of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the esta-blishment of improved relations between the local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab adcommon the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The way bear to the Punjab. ordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headquarters at Peshawar, in direct communi-cation with the Government of India in the Foreign and Political Department. In April 1932 the Province was constituted a Governor's Province, In political questions there is no intermediary between the Governor and for which the head of the administration is selected. The advisability of re-uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and unofficials to investigate it. The Committee, presided over by Mr. D. de S. Bray, M.L.A., Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous

Mahomedans and Hindus on communal lines. unknown to men. The evils of unskilled mid-The Hindus, allied in sympathy with their wifery and early marriage are among them. co-religionists in the Punjab, demanded the Both the birth and death-rates of the Province co-reigionists in the Punjab, demanded the Both the birth and death-rates of the Province reunion of the administered districts of the are abnormally low. The birth-rate in the Province with the Punjab or, if that were not administered districts, according to the last attainable then the placing of the indicial available official reports, is 25.6 and the deathadministration of the Province under the Punjab rate 21.9. High Court at Lahore. The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that Mne. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leadings towards and later than the state of the province and the state of the state would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favour the population confuses ethnical divisions. able to the Hindu viewpoint already explained and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for-

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India;

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister;

Appointment of a second Judicial Commissioner which has since been sanctioned and of the judicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

nationality is allowed self-determination and trict. given scope for that self-development within the Indian Empire under the Reforms Scheme

is 4,684,364, made up as follows:-

669,636 HAZATA Trans-Indus Districts Trans-Border Area . . This last figure is estimated. There are

only 561 '3 females per 1,000 males in the towns and 872.2 females per 1,000 males in rural 27066

This disproportion of the sexes cannot at wholly from agriculture. The P present be explained in the N.-W. F. P. any practically without manufactures. process to expanies in the R.-w. F. P. any preciously without manufactures. There is more than in other parts of Northern India in considerable surplus of commercial pro-where it also appears. The discrepancy is greater ducts for export. Any commercial importance here than in any other Province of India. There which the province possesses it owes to the is no ground for believing that the neglect of fact that it lies across the great trade route girls in infancy has any effect in causing the which connect the trans-border tribal terriphosomenon. On the other hand, the female tories and the marts of Afghanistan and Cespopulation has to face many trials which are tral Asia with India, but the influence of rail-

The dominant language of the Province is The dominant language of the Frevince is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the acministered districts and are the ruling race of the tribalarea to the west. There is a long India, with leanings towards the allied racial list of Pathan, Baluch, Rajput and other tribal to only 5 per cent. of the total and Sikhs to a few thousands. The occupational cleavage of

> (Under the North-West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience. In these matters the Mohammadan Law where the parties are Mohammadans, and Hindu Law, where the parties are Hindus, is applied in so far as that law has not been altered or abolished by any legislative enactment and is not opposed to the provisions of the Regulation and has moreover not been modified by any custom.

The climatic conditions of the N.W.F.P. which is mainly the mountainous region, but "If (concluded the Majority) the Pathan includes the Peshawar Valley and the river in tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the after which it is now striving we are assured that with a contented Frontier population indis can face with calm resolution the future that the Frontier has in store for her."

The People.

The total population of the N.W.F.P. (1931) Arabian Sea and the Bay of Bengal: the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources .. 1,755,440 of supply are precarious and not infrequently .. 2,259,288 either the winter or the summer rainfall fails either the winter or the summer rainfall fails almost entirely.

Trade and Occupations.

The population derives its subsistence almost The Province is There is

ways is diminishing the importance of these trading interests. Special mention may be made of the railway comparatively recently opened linking Baluchistan, in the south-west of the N. W. F. P., via Nushki with south-east Persia. The line connects with the north-west railway system of India and extends 343 miles to Duzdap, within the Persian border. Two weekly trains run each way and the freight carried largely consists of carpets, wool and dates, from Perala and of tea, sugar and piece-goods from the Indian side. Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders (or Powindahs) from the trans-frontier area have always pursued their wanderings into India and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India, The Railway line from Pir to Lankitshina which is complete and open to public traffic now will similarly, in course of time, dovelop both the manner and amount of transport community. manner and amount of transport communications and trade. The new roads in Waziristan are already largely utilised by the Tribal inhabi-tants for motor traffic. Prices of agricultural produce nave in recent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the land amounts to 25 per cent. and uncultivated to 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have improved, trade has advanced, free medical relief has been vastly extended, police admi-nistration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the Imposed by manous dimarrasements. In the districts under the Deputy Commiscentage of male Scholars to the total perpopulation is 6.4 and that of female Scholars solicetorates in charge of tahalidars, who are to the total female population is 1.52 invested with criminal and civil and revenue for the year 1937-38, 25 per cent. makes and 7 powers, and are assisted by naib-tahalidars, per cent. females of the total population who exercise only oriminal and revenue powers, are returned as literates. The figures for makes denote a very narrow diffusion of edu-or Extra Assistant Commissioners. The vil-oation even for India. Those for females are lage community characteristic of some parts not notably low, but they are largely affected of India is not indigenous among the Pathans, by the high literacy amongst Sikh women, of Its place as a social unit is to some extent taken by the high literacy amongst Sikh women, of its place as a social unit is to some extent taken whom is 3 per cent. are returned as literate. Its insuguration of a system of light railways throughout the Province, spart from all cost districts of kinship and ancient ancestry, real or imagistations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few lines of the Paharpur Canal, also completed a few lines of Superintendent of Jail and a District of the Paharpur Canal, also completed a few lines of Schools. The Province forms years ago, will bring ease and prospectity to a number of peasant homes.

Administration.

The administration of the North-West Frontier Province is conducted by H. E. the Governor and Agent to the Governor-General. The administration comprises

- The Hon'ble the Chief Minister.
 The Hon'ble Minister for Finance.
 The Hon'ble Minister for Education. (1) (2) (3)
- The Hon'ble Minister for Industries. (4) (5) The Political Resident on the N.-W.
- Frontier. The Hon'ble the Speaker, Legisla-(6)
- tive Assembly. (7)Officers of the Political Department of
- the Government of India. Members of the Provincial Executive (8) and Judicial Service.
- Members of the Subordinate Civil Service. (0) Superintendents and Assistant Super-(10)
- intendents of Police. (11) Officers recruited for the service of departments requiring special special knowledge—Militia, Engineer Education, Medicine and Forestry.

The cadre posts reserved for officers coming under the fourth head above are :-

The Pol. Resident on the N. W. Frontier. Chief nief Secretary, Revenue and Divi. Commr. Secretary, Development Departments. Administration Home Secretary. Dv. Commissioners Political Agents .. 5 Senior Sub-Judge .. 1 Commissioners Asst. and Asst, Political 14 Agenta. One Additional District and Sessions Judge.

P. W. D. of the Province carries out duties: connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D. who is also ex-officio Secretary to H. E. the Governor. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special an amproved vocatrat. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Toohi Valley pay land revenue to the British Government. The revenue administration of all five administerdistricts is controlled by the Revenue and Divisional Commissioner. For the administra-tion of civil and criminal justice there are two Civil and Sessions districts, each and Sessions districts, each presided over by a District and Sessions Judge. The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province. The improvements needed to bring the judicial administration up-to-date, in accord with the growth of the business of administration, are dealt with in the Inquiry Committee's report to which reference was made above.

FINANCES.

In order to meet the excess in expenditure over the income of the Provinces a subvention of Rs. one crore per annum is given by the Government of India out of Central Revenues.

The Administration.

The principal o officers in the present

H. E. the Generator and Agent to the Governor-General.—II. E. Sir George Cunningham, K.C.B.E., K.C.I.B., O.B.E. (Assumed charge 2nd March 1937).

Secretary to Governor-Captain A. J. Dring. Aide-de-Camp-Capt, J. Gross.

Political Resident on the N.-W. Frontier-J. G. Acheson, C.I.E., 1.C.S.

The Province of Assam, omitting the partify Cachar and Chittagong to the Arakan coast, administered and unadministered tracts on its where it has a S.S.E. trend. northern and eastern borders, comprises an area of some 67,334 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur. It owes its importance to its situation on the north-east frontier of India. It is surrounded by mountainous ranges on the surrounded the fourth (the west) thus the Province of Bengal on to the planter of which debouch the two valleys of the Brahmaputra and the Surma
william of the Brahmaputra and the Surma
william form the plains of Assan. These two
valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population.

The total population of the Province in 1931 The total population of the rrovince in awas 9,247,857, of whom 445,606 were in Manipur. Of the population in 1931, nearly 52 millions were Hindus, over 22 millions were Muslims, a million belonged to tribal religions and a quarter of a million were Christians. 43 per cent. of the population speak Bengali, 21 per cent. speak Assamese: other languages spoken in the province are Hindi, Uriya, Mundari Nepali and a great variety of languages classified under the general heading of the Tiboto-Burman languages. Owing to the great areas of waste and rivers the density of the province is only 187, which compared with that of most other parts of India is low.

Agricultural Products.

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river sys-tems all being alike favourable to cultivation. Rice is the staple food crop, nearly 5,056,823 scres being devoted on this crop. Except in the Himalayan Terai irrigation is unnecessary. Tea and jute are the most important crops grown for export. The area under tea consists of 4,39,801 export. The area under tea consists of 4,39,801 acres. Wheat and tobacco are also grown and about 39,197 acres are devoted to sugarcane.

Meteorological Conditions.

Rainfall is everywhere abundant, and ranges from 23:39 to 241:76 inches. The maximum is reached at Cherrapunji in the Khasi Hills, which is one of the wettest places in the world, having a rainfall of 520-09 inches. The temperature ranges from 59 at 81basgar in January to 84.8 in July. Earthquakes of considerable severity have taken place, by far the worst being that which occurred in 1897.

Mines and Minerals.

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. The most extensive coal measures are in the Naga Hills and the Lakhimpur districts, where about 218,488 tons were raised Sadiya Railway and connects the Surma and in 1937. Limestone is quarried in the Khasi Brahmaputra Valleya. A branch of the line runs and Jaistia Hills. Petroleum is worked only in from Badarpur to Silohar at the Eastern end Lakhimpur and Cachar.

Manufactures and Trade.

Silk is manufactured in the Assam Valley, the weaving being done by the women. Cetter weaving is also largely practised by the women, and almost every house contains a loom; the cloth is being gra-dually displaced by imported goods of finer texture and colour. Tea manufacture is the most important industry of the province. Boat building, brass and metal and earthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent. of the population. Assam carries on a considerable trade with the adjoining foreign tribes and countries.

Communications.

Much of the trade of Assam is carried by river. The excellence of its water communications makes the province less dependent upon roads than other parts of India. A large fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Navigation company pless of the fivers in both Valleys. An alternate day service of passenger-boats runs between Goalundo and Dibrugarh, In recent years the road system has been greatly improved. There are two trunk roads on either bank of the Brahmaputra most of which are metalled or gravelled and the rest unmetalled. metaliculor gravelled and the rest unmetalied. There are excellent metallied roads from Shillong to Sylhet and to Cherrapunjee and also between Dimapur, on the Assam Bengal Railway, and Imphal, the capital of the Manipur State. The Government of Assam had in 1928 carried out a considerable programme of road improvement and another programme which aims at the improvement of nearly 800 miles of road either by metalling or gravelling and the construction of 12 big bridges is practically completed. In September 1937 a further road improvement programme totalling Rs.1,05,25,000 was drawn up from which 22 schemes amounting to Rs. 32,15,000 were selected as a priority class. The Government of India have recently approved these priority class schemes to be finan-ced from the Road Fund. Kutche roads are being maintained by means of mechanical plant which has proved successful in maintaining, throughout the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads has been The open mileage of railway insistent. has also shown a steady improvement and several branch lines to the Assam Bengal Railway system have been added in recent years. The main Assam Bengal Ballway line runs from Chittagong Port, in Bengal, through the North Cachar Hills to Tinsukia, a station on the Dibruof the Surma Valley and another runs through the west of the Assam Valley from Lumding Lakhimpur and Cachar.

An account of the petroleum occurrences in Assam was recently published in the memoirs of the Geological Survey of India. It is dated that the petroleum localities in this province are confined to a curved belt or country along the basins of the Brahmaputra and Surma. This belt is traceable over a distance of some 800 miles from N. E. Assam through putra has been opened to traffic.

THE FINANCES OF ASSAM.

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1919. The present financial position for 1939-40 is set out in the following table:—

Administration.

The prevince of Assam was originally formed in 1874 in order to relieve the Leutenant-Governor of Bengal of part of the administration of the huge territory then under nim. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the castesn portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912: the Eastern Bengal Districts were united with the Bengai Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked, with certain minor provinces, to suit its undeveloped character with the older

major provinces of India.

The capital is Shillong, a town laid out with great taste and judgment among the pine woods on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

MOMINATED.

Mrs. Zubide Atsur Rahman.

The Hon'ble Bai Bahadur Heramba Praesd, Barua, M.A., B.L. Rai Sahib Senndhar Das Sonapati.

Baluchistan.

Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879; (2) Agency Territories with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers; and ₹3) the Native States of Kalat and Las Bels with an area of 80,410 square miles. The Province embraces an area of 184,688 square miles and according to the census of 1931 it contains 868,617 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Persia. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren, sun-burnt mountains, ent by high chaems and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich grops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from Government with Bainchistan commenced from the outbreak of the First Afghan War in 1899; it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachhi, Gusta and Mastung were handed over to the Amig of Aghanistan and Political Officers were appointed to admissible the country. At the close of the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalas. The founder of the Baischistan Province as it sow exists awa Sir Robert Sandeman who it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahul Chiefs into a close conlederacy. In the Afghan War of 1879 Pishin, Showared, Sibi Zawara Valley and Thal-Chotlail were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenmone insistence.

Industries.

Baluchistan is an oblong stretch of country rainfall is about 5 inches, decreasing in some occupying the extreme western corner of the cases to 8. The majority of the indisences cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the pastoral life. Previous to the advent or use liftital, life and property were so inscourse that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mckran Coast is famous for the constitution of the distribution of the constitution of the superior was quality of its fish and for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

> Education is imparted in 109 public schools of all kinds with 7,372 scholars. There is a distinct desire for education amongst the more enlightened headmen round about Quetta and other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pam. The output of coal in 1937-38 was 17,519 tons. Chromite is extracted in the Zhob District near Hindubagh. Lime-stone is quarried in small quantities. The output of chromite during 1987-88 amounted to 27,209 tons.

Administration.

The head of the local administration is the The head of the local administration is the officer styled Agent to the Governor-General, Resident and Chief Commissioner. Next, in rank comes the Revenue Commissioner who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration in Baluchistan is self-government by the tribesson, as far as may be, by means of their Jirgas or Councils of Eders along the ancient constonary lines of tribal law, the cesnoe of which is the satisfaction of the aggreeved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime. The district levies play an unob-trustive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to Balushistan lies outside the monsoon area and other miscellaneous work. In addition to these district levies there are ordinarily three and its rainfall is exceedingly irregular and Irregular Corps in the Province; the Zhoù scanty. Shahrig, which has the heaviest Corps in the Province is 2 in a familiar nearest than 1.72 inches in a part. The highlands few places receive more than 10 inches and in the plains the average into deficit being met from its control of the control of the

Baluchistan Agency.

ANDAMAN AND NICOBAR ISLANDS.

This is a group of islands lying in the Bay of Bengal. Port Blair, the headquarters of the Administration, is 780 miles from Calcutta, 740 miles from Madras, and 500 miles from Bangoon, with which ports there is regular communication by Government chartered steamer.

The total area of the Andaman Islands is 2,508 square miles and that of the Nicobar Islands 635 square miles.

The total area under cultivation on 31st March 1928 was 10,795 acres and the remaining area being dense forest.

The population enumerated at the Census of 1931 was 29,463 of whom 7,552 were convicts. The number of convicts on lat April 1938, was 6,125.

PORTS:—Port Elair and Bonington in the Andamans and Car Nicobar and Camorta in the Nicobars. Timber and coconuts are exported from the Andamans, and coconuts and their products from the Nicobars.

The Islands are administered by a Chief Commissioner. A penal settlement was established at Port Blair in 1858 and is the largest and most important in India,

Chief Commissioner, C. F. Waterfall, C.S.I., C.I.E., 1.O.B.

COORG.

Coorg is a small petty Province in Southern India, west of the State of Mysore. Its area is 1.593 square miles and its population (165.827 according to the census of 1931.) Coorg came under the direct protection of the British Government during the war with Sultan Tippu of Seringapatam. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with his headquarters at Bangalore. In him are combined all the functions of a local government and a High Court. The Secretariat is at Bangalore where the Secretary to the Resident is styled Secretary to the Chief Commissioner of Coorg. In Coorg the chief authority is the Commissioner whose headquarters are at Mercars and whose duties extend to every branch of the administration. A Legislative Council consisting of 15 elected members and five nominated members was created in 1924. The chief wealth of the country is agriculture and especially the growth of coffee. Although owing to overproduction and insect pests coffee no longer commands the profits it once enjoyed, the Indian output still holds its own against the severe competition of Brazil. The bulk of the output is exported to Europe.

Chief Commissioner, Coorg., The Hon. Lt.-Col. J. H. Gordon, O.I.E., O.B.E., M.O.

AJMER-MERWARA.

Aimer-Merwara is an isolated British Pro-Hon'his the vince The in Rajputana. Resident for Rajputana administers Chief Commissioner. The Province is divided into the Sub-divisions of Ajmer and Kekri and into the Sub-divisions of a juner and a warrania, the Teshila of Reawar and Todgarh, 'the two latter forming the Merwara Sub-division with a total area of 2.440 square miles and a population of 5.05,906. At the close of the Pindari war Paulat Rao Scindia, by a treaty, dated June 25, 1818, orded the district to the British. Bixty-two per cent. of the population are supported by agriculture, the industrial population being principally employed in the ootton and other industries. The principal crops are maize, millet, barley, cotton, oilseeds and wheat.

Chief Commissioner, The Hon. Mr. A. C. Lothian, C.S.I., C.I.E., I.C.S.

Aden.

Aden was the first new territory added to the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian buggalow wrecked in the neighbourhood. Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 19th, 1839.

Aden is an extinct volcano, five miles long and three broad, jutting out to see much as Gibraitar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that surrounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shaikh Othman, 39 square miles in extent, was sound necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent, in the Straits of Babelmandeb at the entrance to the Red Sea. The Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854, are included in the Aden Colony, but for administrative purposes were transferred to the control of the Rittish Resident in the Persian Gulf in 1931.

The whole extent of the Aden Colony including Aden, Little Aden, Shaikh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,338.

The language of the Settlement is Arabic, but several other Asiatic tongues are spaken. The population is chiefly Arab. The chief industries are sait and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are jowar, seamum, a little indigo. In the hills, wheat madder, fruit, offee and a considerable quantity of wax and honey are obtained. The difficult problem of water supply has been solved. An artesian supply of fresh water has been obtained at Sheikh Othman. Early in 1924 a start was made with a deep bore and sweet water was found at a depth of 1,545 feet. The artesian flow of water now rises from this bore at 750 gallons per hour. A second bore was extreted in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water supply mains for distributing water by pipe connection to houses have been laid at Crater and Tawahi and soveral of the private houses have been connected to the mains. Drainage systems at Tawahi and Crater have been composed and composed aparts and the private houses are the productive than the supplementation of the private houses have been connected to the mains. Drainage systems at Tawahi and Crater have

Climate.—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulls between the monsoons in May and September are very oppressive. But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maiadies common to tropical countries. The annual rainfall varies from \$\frac{1}{2}\$ inches, with an irregular average of \$\frac{3}{2}\$ inches, with an irregular average of \$\frac{3}{2}\$ inches.

Aden Protectorate.—The Aden Protectorate which has an area of approximately 112,000 square miles, is bounded on the East by Dhufar, which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemen, whose southern boundary was temporarily fixed by Article III of the Treaty of San's (February, 1934) by which His Malesty's Government and the Yemen Government agreed to maintain the status quo frontier as it was on the date of the signature of the treaty. The cosselline of the Aden Protectorate, which is about 750 miles long, starts in the West from Husn Murad, opposite the Island of Perim, and it runs eastwards to Ras Dharbat 'All where it meets the Sultanate of Muscat and Oman.

History.—Up to the 18th century, the Aden Protectorate used to be in the hands of the Lamo of San's (capital of the Yemen of to-day) and several of the ralers of the tribal districts such as the Abdall, Haushabl, Amiri, Yafa'i and 'Aulaql, were the Imam's "wakils" or Governors until his power declined and they declared their independence. This occurred in 1728 in the case of the Abdall and 1758 in the case of the Yafa'l.

After the capture of Aden by the British in 1839, most of the neighbouring Chiefs entered into Treaty relations with His Majesty's Government. Others followed suit as time went on, the last to do so being the Andhall Suitas in 1914. The treaties are Treaties of Protection.

In 1904, an Anglo-Turkish Commission delineated the frontiers between the Protectorate and Turkish Yemen.

In July 1915, during the Great War, the Turks occupied the Abdali, Haushabi and Amiri districts until the Armistice.

Subsequent to the end of Turkish rule in Arabia after the Armistice, the limsm of the Yemen advanced into the Protectorate and between 1919 and 1925 occupied the Amiri district, including the Radfinsh tribes, and portions of Haushabi, Subelhi and Upper Yafa's territory. He also occupied the district of the Beldins Suitan who was not in Treaty relations with His Majesty's Government, and the Audhali plateau.

In 1928 he was forced by air and ground action to evacuate the Amiri district with the exception of a small portion in the North, and also the district of Shaih. On the concincion of the Treaty of San's he evacuated the remaining

portion of the Amiri district and the Audhali plateau.

Division of Aden Protectorate.—The Aden Protectorate can be more conveniently described by dividing it into two areas, the Western and the Eastern. The former consists of the following Tribal districts, the Chiefs of which are all in protective treaty relations with His Majesty's Government.

'Abdali.—His Highness Sultan Sir Abdul Karlin Fadhl, K.C.M.C., K.C.I.E., Sultan of Lahej, who is the premier Chief of the Aden Protectorate.

Fadhli.—Sultan Salih bin 'Abdullah, Capital Shuora.

Amiri.—Amir Nasr bin Shaif Self, C.M.G. Capital Dhala'.

Lower Yafa'i.—Sultan 'Aidrus bin Muhsin, Capital Al Qara'.

Haushabi.—Sultan Sarur bin Muhammad, Capital Museimir.

Upper Yafa'i Confederation.—Sultan Muhambin Salih, Capital Mahjaba; Shelkh Bubakr Ali 'Askar, Naqib of the Mausatta Tribe, Capital Al Qudma. Shelkh Salim Salih, of the Dalubi Tribe, Capital Dhi Sura. Shelkh Qasim 'Abdurrahman, of the Matlahi Tribe, Capital Al Jurba. Shelkh Muhammad Muhain Ghalib, of the Hadhrami Triba, Capital Ash Shior.

Shalb,—Sheikh Muhammad Muqbil Az Saqladi, Capital Bakhal.

Quieibi.—Sheikh Hasan 'Ali, Capital Ath

· Aloui .---

'Agrabi.—Sheikh Muhammad Fadhi Ba 'Abdullah Canital Bir Ahmed.

'Audhali, Sultan Salih bin Husein, Capital Lodar,

Upper 'Aulaqi,—Suktaa 'Awadh bin Salih bin Abduliah, Capital Nisab. Sheikh Muhsin bin Farid, Capital Yeshbum.

Louis Aulagi. Sultan 'Aidrus bin Ali, Capital Ahwar.

Bellan,—Sharif Salih bin Husein, Capital

Subsini.—Sheikh Muliammad bin 'Ali, the Barhimi Sheikh. Sheikhs Muhammad 'Ali Ba Salih and Hawwash bin Sa'id, the Atin Sheikhs.

The Eastern area comprises Hadhramaut, consisting of the Qu'aiti State of Shihr and Mukalla and the Kathiri State of Selyun), the Mahri Sultanate of Qishn and Socotra, and the Wahidi Sultanates of Bir * 'Ali and Balibaf, all of which have been for many years in proceedive treaty relations with His Majesty's Government. His Highness Sultan Sir Salih bin Ghalib al Qu'aiti, K.O.M.O., Sultan of Shihr and Mukalla, is the premier Chief in the Eastern Aden Protectorate, and Hadhramaut is the most important and best organised of these areas. It is bounded on the west by the Wahidi Sultanates and on the east by the Mahri Sultanates and on the east by the Mahri Sultanates

The Mahri Sultanate of Qishn and Socotra is the most easterly area in the Aden Protectorate, being bounded on the east by the Sultanate of Muscat and Oman. The Sultan of Qishn and Socotra resides on the island of Socotra (area 1,400 square miles) which lies 150 miles from Cape Guardaul. The island was occupied by the East India Company in 1834 and it came under British protection in 1886 when the treaty with the Mahri Sultan was concluded.

Population.—The population of the whole Protectorate is roughly estimated to be about 600,000. They are chiefly Muslims, nearly all being of the Shaf'l persuasion, but there are also a few Jews. The Western Aden Protectorate is divided into tribal confederations and Sultanates, and the inhabitants are for the most part, settled or agricultural, though a few are normadic. The indigenous type of Arab is chiefly confined to the littoral and to the martime ranges. Further North and East of the Protectorate chiefly in Yafa'l and 'Aulaqi territory, one gets a tailer and more semitic type wine came originally from the Yemen, especially from Jauf.

Physical character. The Western Protectorate is divided into

- The littoral belt, which varies between 4 -40 miles in width.
- 2 The maritime ranges.
- The intramontaine plains, about 3,000 feet shows sea level.
- The huthland plateau ranging from 5,000 to 8,000 feet,
- The Great Desert with a mean altitude of 2.500 fact.

The country between the litteral and the plateau is a tangle of mountainous valleys. Some of the valleys are very fertile. The plateau itself is broken up by numerous hills and it is intersected with several deep valleys. The plateau of the Upper Vafa' and 'Audhali districts are particularly fertile.

Climate.—The climate is not unhealthy, and the nights are usually good. The cultivated oases and river leds such as the Lahej delta, Abyan, and the Tiban and Bana valleys are malarious.

In the maritime hills and intramontaine plains the heat is fierce, but dry, by day. On the highland plateau it never gets unbearably hot even in the day time and in the summer, whilst the nights are always cool. In the Winter, one often seeks the sun for choice, while, at night, the cold is severe, though frost is rare. The air in the highlands is invigorating and the citmate delignated.

There is little rainfall in the littoral and mari-

There is note rainial in the littoral and maritime hills and intramoutaine plains, and cultivation is chiefly dependent on irrigation from the water courses.

On the highland platean water is obtained near the surface and irrigation is chiefly from wells which are numerous. There is more rainfall, while, in the Sugmer, thunderstorm are frequent towards the evening and hail occasionally falls. The region is also liable to dense

^{• 1.} Sultan Naser bin Talib of Bir * Ali. 2. Sultan Ali bin Muhain, Wahidi of Baliha now made and represented by his brother Abdulla bin Muhain.

white mists which provide considerable moisture and are beneficial to agriculture.

On the southern fringes of the Great Desert rainfall is scarce, and the heat very fierce, contrasting with cool, and in the Winter cold, nights.

The prevaling diseases are malaria, internal disorders, billiaria and rheumatism. Consumptive cases are above the normal. Ophthalmia and cataract are fairly common, and the diseases of the eye are particularly common in the Northern and coastal 'Aulaqi districts, perhaps on account of the frequent sand storms blowing there. Perhaps the most common complaint is the "Yemen" ulcer. This ulcer is not harmful if treated in its early stage, but, if neglected, as is so often the case in the interior where few opportunities for cure exist, it develops muto a septic, spreading sore, often resulting in the loss of a leg. In some of the bigger towns where sanitation does not exist and files abound, dysentry is common.

Communications.—There are no rallways or metalled roads in the Western Aden Protectorate. A single-line metre-gauge railway was constructed in 1916 for war purposes and upto the Armistice railhead was four miles north of Sheikh Othman. Immediately after the Armistice, the railway was extended to a point seven miles beyond Lahej. It was pulled up at the end of 1920, as the expense to His Majesty's Government in maintaining it was only justified as long as there was any risk of the Imam of the Yemen extending his encroachment towards Lahej. This risk ceased with the expulsion of the Imam's forces from the Amiri and Haushabi districts.

There are several natural roads which have been improved to take motor traffic. The chief of these are .—

- 1. Sheikh Othman to Lahej
- 2. Lahej to Museimir
- 3. Lahej to the Yemen frontier towards
- Lahej to the Yemen frontier towards Mafalis.
- 5. Lahei to Dhala'
- 6. Khor Maksar to Abyan and Shuqra.

A Rough road is under construction for motor traffic between Shuqra and the foot of the Audhali plateau.

Recently, successful attempts have been made to take passengers by motor traffic to the Aulaqi district as far as the foot of the main 'Aulaqui range of mountains, the route being in Ahwar on the coast. Passengers have also been taken by taxi to the port of 'Irqa. In the absence of roads auitable for motor traffic, communication is chiefly by camel, though in the mountainous districts of Upper Yafa', mules or donkeys are more suitable.

The Royal Air Force maintain a number of landing grounds in the Protectorate.

There is no civil aircraft service in the Western Aden Protectorate, but the firm of A. Besse used to run a service between Aden, Mukalis and Hadhramset which has been temporarily suspended.

Products, Industries and Trade.—Agriculture is the chief occupation of the majority of the inhabitants of the Western Aden Protectorates. Viewed from the barren surroundings of Aden, it is difficult to realize the surprising fertility of the mountain valleys and alopes, and of the highland plateau in the Protectorate. Every possible use is made of irrigation and water rights are a frequent cause of tribal feuds.

The stable crops are "Dhura" and "Dukhn", a millet, of which there are various varieties. Indian corn is also grown. Wheat and barley are found at the higher elevations especially in Yafa', the 'Audhail plateau and the Yeshbum valley. Other crops are juilli (sesamum) and lucerne. Dates are grown in the Subelhi country. Coffee is grown in Yafa.

Of fruits, grapes, peaches and pomegranates are found in the Dhala' district and 'Audhall plateau. Bananas and papayas are grown in the Lahej oasis and in some other parts.

Cotton and indigo ("hawir") is grown in Beihan and the 'Aulaqi districts.

Honey is largely exported from Yeshbum, and to a less extent, from the 'Audhali, Yaf'a and Dhala' districts.

Trade in the Western Aden Protectorate is chiefly transit trade from the Yenen, from which coffee, skins and "qat" are exported, the latter being a plant cultivated in the Yemen, the leaves of which are chewed. Most of the coffee, however, is exported by sea. In return, Kerosene oil, piece goods and food stuff are imported. All the main trade routes from the Yemen pass through Lahej, a town 15 miles north of Shekh Othman, and the Sultan of Lahej's chief source of revenue is derived from transit dues, 'which make him the richest, and consequently the most important. Chief in the Western Aden Protectorate.

The only industries are weaving, dyeing and charcoal burning, though such Jews as there are make silver work. Potash is manufactured in the 'Abdali and Fadhil districts. Sheep and goats are imported from Somalliand, while oxen, fodder, vegetables and fuel come in by caravan from the neighbouring districts.

Government.—His Majesty's Government does not at present attempt to administer the Aden Protectorate, but the Eastern Aden Protectorate has a European adviser, with his staff, who is resident at Mukalla. The interests of the Western Aden Protectorate are looked after by a small staff of Political Officers who, together with the Resident Adviser at Mukalla, work under a Political Secretary in Aden who is responsible to the Governor and Commander in-Chief for Protectorate affairs. The Political Secretary has an assistant to help in Secretariat work.

The tribes nominate their own Chiefs who have subsequently to be recognised by the Aden Government. The majority of the Chiefs have little control over their subjects, an outstanding exception being the Sultan of Lahej (or 'Abdali Sultan) whose westh and trained military forces assist him. The foundation of tribal administration is the Sahri'a law of the Qur'an, which is entrusted to the Qadhis. The tribal Chief

adjudicates in serious cases and assists the Qadhi in the execution of his decisions.

Each large tribe is divided into sub-tribes under an 'Aqii or Sheikh. These sub-tribes are further sub-divided into claus, and each clau into families or "beits."

There are no Government regular troops in the Adea Protectorate. In the Western Aden Protectorate, the only Chiefs with trained troops to whom the designation "regular" might apply are the Sultan of Lahej and, in a minor degree, the Amir of Dhala'. The Amir of Dhala' has, in addition, a small force of Tribal Guards Other Chiefs with tribal guards are the Eadhil and Hausshabl Sultans, and the Sharif of Belham.

Latterly the Aden Government has raised small force named "Government Guards" for police duties in the Protectorate. These, with the "Tribal Guards", are jointly known as "Protectorate Guards." They were raised and trained by a Political Officer in whose charge they are, but whereas the Government Guards are paid and controlled entirely by H1s Majesty's Government, the Tribal Guards are mider the direct control of the Tribal Chief concerned who also contibutes to their upkeep.

Towns, ports and Water courses. The chief towns in the Westein Aden Protectionte are Lahej, Dihala', Shuqin, Lodar, Ahwai, Yeshbum, Nisab and Beilian al Qasab. Upper Yaf'a has several large settlements, the largest being Bent Buk.

The chief ports are Shuqra, Masani' (Ahwar) ' 110a and Haura.

The chief water courses are the Tiban, Hardaba-Sahelb, Bana, Salab-Yaramis and Dhelqa-Ahwar. The first two and the last come down in flood a few times each year.

The Hadhramaut States—The On'aiti Rulesof Shihir and Mukulla entered into a treaty with His Majesty's Government in 1882 in which they bound themselves not to cede any parts of their territories to any person or power other than the British Government, in addition the Qu'aitis bound themselves to abide by the advice and conform to the wishes of the British Government in all matters relating to their dealings with neighbouring chiefs and foreign powers. In consideration of these stipulations they were to receive a stipend of \$300 of which the equivalent amount paid at present is 84, 720.

Prior to this treaty the Qu'aiti Jemadar of Shihr and the kusadi Nakib of Mukalla had entered into agreements for the abolition of the slave trade in 1873 and an even earlier agreement (1863) had been made with the latter on the same subject. The treaty of 1882 was strengthened in 1888 by the conclusion of a Protectorate in the common form of the treaties with the Protectorate chiefs and in 1918 the Kathiri Sultans of the Hadhramaut made an agreement with the Qu'aiti Sultan whereby the former acknowledged that this treaty was binding on them. This agreement provided for the conduct of relations between the Qu'aiti Kathiri Sultanates and acknowledged that the Province of Hadhramaut should be one province, an appanage of the British Empire under the Sultan of Shihr and Mukalla.

Sultan.—His Highness Sultan Sir Salih bin Ghalib al Qu'alti, K.C.M.G.

Heir apparent,-Sultan 'Awadh bin Salih al Ou'aiti.

The Qu'aiti State of Shihr and Mukalla on the Gull of Aden is bounded on the West by the Widdle and 'Auliaji Sultanates and the Kingdom of Yemen, on the North by the Great Desert and on the East by the Mahri Sultanate. The Kuthiri State forms an endace on the North.

The country is large in extent but the greater part of its surface consists of barren mountains intersected by Wadis some of which are lettile and cultivated. Of these the most important are the Wadis Menta, Hajr, Du'an, Lessan, and part of the Wadi Hadhiannaut. The principal crops are millet, sesame, beans and wheat These are all consumed locally but Hammaum tobacco is exported and so is Du'an honey. The other exports are principally fish products.

The Capital and the Residence of the Sultan is Mukaila (population about 16,000). Shift is also an important port and both are visited by ocean going ships. The country is divided into five provinces. There are several hundred miles of motorable tracks, including the Al Kat Road, which is under separate administration and links Tamm with Suhr. Other tracks are under construction.

The population is estimated at about 202,000 and the reven1s and expenditure are about 7 and 6 lakhs of rupees respectively.

The relations between the Qu'aiti State and Great Britain are governed by the Treaties referred to above and by a Treaty of 1947 by which Great Britain agreed to appoint a Resident Mylsen.

| Resident Advisor,-W H regions one

Assistant .- U. C. Figgls,

Secretary .- E. S. Kennedy.

The Kathiri State is bounded on the North by the Great Descrit and on all other sides by the Qu'aiti State.

The kathiri country was formerly of great extent—itstill methods the most rettile portion of the Wadi-Hashiramant—ind its tributary wadis such as Wadis Adim and Bin—Ah—Hs crops are mainly grain and dates which are air consumed locally, but cofton grows well and this may develop into an export.

The Capital and Residence of the Suitan is selyun (population about 18,000) but Tarini is also a large and important city which is joined with the port of Shihr by the Al Kai Road constructed by the Al Kai Solyds who spend large sums on the advancement of the country Kathiti towns and villages are mostly accessible by motor.

The population is estimated at about 58,000 and contains a large number of extremely well-to-do-people, who live mostly on remutances from the East Indies.

The relations between the Kathiri State and Great Britain are governed by the Qu'ait; Treaty of 1886 and the Kathiri agreement of 1018.

Sultan of Ahl Kathir-Jaffer bin Mansur Al Kathiri

Resident Adviser .- W. H. Ingrams, C.M.G., O.B.K.

Administration.-Aden was transferred from the administrative control of the Government of India to that of the Colonial Office with effect from 1st April 1937, from which date it assumed the status of a Crown Colony.

The Administration is vested in His Excellency the Governor and Commander-in-Chief who is assisted by an Executive Council.

In spite of the transfer in control it is intended that there should be as great a degree of continuity as possible in the machinery and methods of Government. This will involve the retention of the spirit and in most cases of the letter of existing laws and regulations, the preservation in judicial cases of the right of appeal to the High Court of Bombay, the continued use of Indian postage rates and Currency and the maintenance of the port as a free port.

The management of the port is under the control of the Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide.

The Police Force, consists of land, harbour and armed Police.

The Executive Committee of the Aden Settlement performs all municipal functions in Aden.

Names and Designations of Officers. His Excellency the Governor and Commander-in-Chief of the Colony and Protectorate of Aden, Lieutenant-Colonel Sir Bernard Rawdon Reilly, K.C.M.G., C.I.E., O.B.E.

Air Officer Commanding, British Forces in Aden, Alr Commodore G. R. M. Reid, D.S.O., M.O.

His Honour the Chief Justice of the Supreme Court of Aden, The Hon'ble Mr. J. Taylor Lawrence, M.A., I.C.S. (Retd.).

Political Secretary, Lieutenant-Colonel M. C. Lake, C.M.G.

Chairman of the Port Trust and Settlement, J. V. Alexander, M. Inst. C.E.

Civil Secretary, Major M. C. Sinclair, O.B.E.

Finance Officer, A. Muchmore.

Legal Adviser, G. V. Cameron, B.A. (Oxon.). Bar.-at-Law.

Senior Medical Officer of the Colony of Aden and Port Health Officer, Dr. J. C. R. Buchanan, M.D. (Edin.), M.R.C.P., (E) D.T.M. & H. (Eng.). Commissioner of Police, Capt. L. S. Parke,

KAMARAN.-The Island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Government of the Colony of Aden. has an area of 22 square miles and a population of about 2,200. A quarantine station for pil-grims travelling to Mecca from the East is maintained on the Island under the joint control of the Government of India and the Government of the Netherlands Indies.

Civil Administrator, Captain D. Thompson.

The Home Government.

sented for sixty years the gradual evolu-tion of the governing board of the old East India Company. The affairs of the were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By de-grees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State With modifications this system India. lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

Secretary of State and the Secretary of State in of purely Indian interest where the Government Council had, and exercised, the fullest powers and the Legislature of India are in agreement.

Home Government of India repre-10f superintendence, direction and control over the government and revenues of India, subject, old of course, to a large measure of delegation. The Secretary of State was the statutory heir of the East India Company and the linard of Control, and it was as such that the generality of his powers were exercised.

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Provincial Legislatures and Ministers, while it greatly increased the elected element in, and the influence of, the Central Legislature at Delhi. In the sphere so affected the power and responsibilities of Parliament and its representative, Secretary of State, were correspond Secretary of State, were correspondingly curtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired. No statutory change in the rela-tions between the Secretary of State and the Central Government was made, but there was a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature. The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention The Secretary of State.

should be allowed to grow up that only in acceptional circumstances should the Secretary of State be called upon to intervene in matters

The Council of India.

The Act of 1858 established besides the Secretary of State the body known as the Council of India, which was associated with the Secretary of State in the exercise of many of his powers and, in particular, held control of the revenues of India and was charged with the conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India. Members of the Council, originally appointed for life, now hold office for five years, and receive a statutory salary of £1,200 with an additional subsistence allowance of £600 per annum for those domiciled in India. The Act of 1919 established their members at a minimum of 8 and a maximum of 12, one half of whom were required to have served or resided in India for at least ten years. Lord Moriey opened the door of the Council to Indians, and since 1917 the usual number of Indian Members has been three.

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and servants known in this case as the India Office. Its staff are recruited through the same source and serve on the same conditions as Civil Servante in corresponding positions in the other Government Offices in London. Until 1919, the whole cost was borne by Indian revenues, except that the Home Government made certain grants and attributable to the performance, on behalf of the remissions, in lieu of a direct contribution, amounting to £50,000 a year. The Act of 191-2 Secretary of State agrees that his Department transferred the salary of the Secretary of State to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £ 115,000 was made to the total cost, which now stands at about £ 230,000. The basis of the contribution was that Home estimates should bear the outlay needed for the controlling and political functions of the India Office; Agency functions being still an Indian charge.

The Government of India Act. 1935.

Substantial changes in the machinery desoribed above have resulted from the dovernment of India Act of 1935. The Secretary of State is or india Act of 1935. The Secretary of State is no longer the final authority upon whose super-intendence, direction and control depend the Acts of the Government of India and all grants, payments and charges arising out of the revenues of India. The powers of the Executive in India now run in the name of the Governor-General and the Governor, to whom they flow direct from the Crown, and there is no delegation of powers through the Secretary of State. In so far as the Executive Governments in India function on the advice of the Ministers responsible to the new Logislatures, the responsibility of the Secretary of State to Parliament, and consequently his control, is at an end. Where, however, the Governor-General or the Governors are empowered to act in their discretion or on their individual judgment, in their discretion or on their individual judgment, they are subject to direction by the Secretary of State who remains, in these matters, the channel of their responsibility to Parliament. Busing the interim period between the 1st April, 1857 (the date on which Provincial Autonomy came into operation) and the establishment of the Federation, the Secretary of State has power

to issue directions to the Governor-General in Council, and such directions, if they are with respect to the revenues of the Governor-General in Council, require the concurrence of his Advisers. The Council of India ceased to exist from the 1st April, 1937. Some of its functions, particularly in relation to Service matters, have passed, however, to a body of Advisers with the same numerical limits during the interim period, reduced after Federation to a minimum of 3 and a maximum of 6. The position of the India Office as the Department serving the Secretary of State remains, but the change brought about by the Act involves the transfer of the whole cost to a Parliamentary vote with a contribution from Indian revenues based on the cost of Agency functions still performed by the Secretary of State for the Government of India. There is no constitutional change in the position of the High Commissioner.

To some extent the working of the Home Government is affected by the separation of Burma, involving as it does the separate exercise in respect of Burma of the functions of the Secretary of State. The Government of Burma Act provides also for the appointment of not more than 3 Advisers to the Secretary of State in relation to Burma, whose status and functions are analogous to those of the Advisers established by the Government of India Act. Provision has also been made for the payment from the revenues of Burma in respect of the expenses should perform

INDIA OFFICE.

Secretary of State.

LL.D.

The Indian States.

The area enclosed within the boundaries of ment of India has had to intervene, to pre-India is 1,808,679 square miles, with a population of 352,837,778 of people—nearly one-fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 712,508 square miles with a population of 81,310,845. The Indian States embrace the widest variety of country and jurisdiction. They vary in size from petty states like Lawa, in Rajputana, with an area of 19 square miles, and the Simla Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy, with a population of over fourteen millions. They include the inhosfourteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the most favoured spots on the face of the globe.

Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their posses-To this general policy however there was, for a brief period, an important departure. the regime of Lord Dalhousie During the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernment of its rulers. Then came the Mutiny. It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic. On the other hand, the Indian States are Proclamation of Queen Victoria it was set out under an obligation not to enter into relations that "We desire no extension of our present with foreign nations or other states; the that "We desire no excession of our present with foreign nations of other states; the territorial possessions; and while we will state their territories. Their subjects outside rights to be attempted with impunity, we shall their dominions become for all intents and allow no encroaciments on those of others. purposes British subjects. Where foreign We shall respect the rights, dignity and honour interests are concerned, the Paramount Power We shall respect the rights, dignity and honour interests are concerned, the Paramount Power of the Native Princes as our own; and we must act so that no just cause of offence is desire that they, as well as our own subjects, given by its subordinate allier. All Indian should enjoy that prosperity and that social States alike are under an obligation to refer advancement which can only be secured by to the British every question of dispute with internal peace and good government." Since other states. The Indian States maintain the issue of that proclamation there has been a fixed proportion of Indian States maintain no encroachment on the area under Indian units for co-operation with the Imperial Government by the Government of India. On the ment in the event of emergencies, and for contrary, the movement has been in the opposite direction. In 1881 the State of Mysore, generally speaking, organised and armed on which had been so long under British administance that the traditions of Native rule addition many states keep un irrequire forces. which had been confident in the maintained almost on a feudal basis. These old Hindu ruling house, In 1911 the Maharajah forces do not possess modern arms and equipof Benares, the great taluqdar of Oudh, was ment. Although old and unaltered treaties granted ruling powers over his extensive post declare that the British Government will have

vent gross misgovernment, or to carry on the administration during a long minority; but always with the undeviating intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The inhabitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities; they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is scriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India. Except in rare cases, applied to mari-time states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States.

sessions. On many occasions the Govern- no manner of concern with any of a Maharajah's

dependants or servants, with respect to whom tonments exist in an Indian State, jurisdiction Maharajah is absolute, logic and public tion both over the cantonment and the civil opinion have endorsed the principe which Lord station is exercised by the suzerain power. opinion have endorsed the principe which Lord Canning set forth in his minute of 1860, that the "Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturbed area, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Crown Representative is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The advise and assist subjects of European Powers and the United administrative or States are on the same footing. Where can may be consulted.

Political Officers.

The powers of the British Government are exercised through Political Officers who, a rule, reside in the states themselves. In the a rule, reside in the dates themselves. In the larger states the Crown Representative is represented by a Resident and in groups of states by a Resident, assisted by local Residents or Political Agents. These Officers form the sole channel of communication between the Indian States and the Crown Representative with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Chiefs in any administrative or other matters on which they

AIDES-DE-CAMP TO HIS MAJESTY.

His Majesty the King has approved the appointment of the following Indian Princes as Hon, Aides-de-Camp to the King :-

Hon. Major-Gen. the Maharaja of Ratlam. Hon. Col. the Maharaja of Jodhpur.

Hon, Lt.-Col. the Nawab of Palanpur. Hon. Lt.-Col, the Maharaja Jam Saheb of Nawanagar.

The following have been appointed Hon. Aides-de-Camp to the King (extra) :-

Hon. Gen. the Maharaja of Bikaner

Hon, Major-Gen. Nawab Malik Sir Umar Hayat Khan. Hon, Major-Gen, the Maharaja of Jammu

and Kashmir. These were all A.D.C.s to King Edward VIII and have been reappointed collectively.

HYDERABAD AND BERAR

His Exalted Highness the Nizam exercises full sovereignty in all internal affairs. He grants titles and is the fountain head of all powers retained by him or delegated to individuals or institutions. Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Ministers, but an Executive Council was established in that year which now consists of seven members. A Legislative Council consisting of 20 members of whom 12 are official, six nonofficial, and 2 extraordinary, assists in considering bills and recommending them for sanction by the Ruler. The administration is carried on by a regular system of Departments on lines similar to those followed in British, India. By the 1936 Berar Agreement, the sovereignty of the Nizam over Berar was re-affirmed, the Berar rent was to continue as before to be paid by the British Government to the Nizam, but the administration of Berar was to continue as before as part of the Province of Central Provinces and Berar. The State (apart from Berar) is divided into two divisions, Telingana and Mahratwara, fifteen districts and 153 taluqus. Local boards are constituted in each district and taluqa. The State maintains its own currency which consists of gold and silver coins and a large note issue. of gold and silver coins and a large note issue. The rupee, known as the Osmania Sicca, exchanges with the British Indian rupee at an average ratio of 116,10/8 to 100. There is a State postal Service and stamps for internal purposes. His Exaited Highness the Nizam maintains his own army consisting of 17,453 troops of all ranks of which 10,246 are Irregular and 7,207 are Regular Troops, which includes 2 cavalry regiments for Imperial Service, 1,662 strong. strong.

Finance.-Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 9 crores, which is approximately the same as that of the Central Provinces and Berar and more than double that of any other of the larger States. After many vicissitudes, its finances are at present in a prosperous condition and it enjoys an annual surplus of revenue from which a total reserve of 12 crores has been built up. This is comprised of separate Reserve Funds for Debt Redemption, Famine Relief, Industrial Development, O. S. Currency Stabilization and Deposits, The Budget Estimates for the present year show a revenue of 928.74 lakhs and an expenditure of 895.46 lakhs, inclusive of large sums set aside for Famine Insurance and Debt Redemption. for famine insurance and new beautinputs.
The Capital Expenditure programme provides
for an expenditure of 189-00 lakhs which
includes 14-95 lakhs for completion of largingation projects and 75-17 lakhs for construction of Railways, Open Line Works and Road Motor and Air Transport. The year opened with a cash balance of 270.89 lakes which is expected to be 109.82 lakes by the end of the year. The 51 per cent. Government loan 1852-62 F. is quoted at 109-12 and the 31 per cent. loan 1355-65 F. at 106-8.

and ladustry.—The princi-of the State is agriculture Production and industry which maintains 57 per cent, of the population. The common system of land tenure is ryotware. About 55 per cent, of the total area is directly administered by the State. The rest consists of private estates of His Exalted Highness the Rizam which comprise about one-tenth of the total area of the State, and the estates of the Jagirdars and Paigah nobles. The total land

crops are millet and rice; the staple money-crop is cotton, which is grown extensively on the black cotton soils, and oil seeds. Hyderabad is well known for its Gaorani cotton which is the finest indigenous cotton in India. The total area under cotton exceeds,34 million acres (1846-1347 Fasii-Forecast). Hyderabad possesses the most southerly of the Indian coal mines and the whole of Southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singareni, which is not far from Bezwada junction on the Calcutta-Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are 6 large established while about nearly one-half of the established while about nearly one-half of the cloth worn in the Dominions is produced on local hand-looms. There are about \$25 ginning, pressing and decorticating factories in the cotton tracts and also a number of tanneries and flour mills, the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 517. The Shahabad Cement Co., which has been established at Shahabad on the Great Indian Peninsula Railway not far from Wadi, now associated with the Associated Cement Companies, 1.td., has at present an annual output of 1.54,800 tons. A sugar factory of a capacity of more than one thousand tons daily has been established recently at Bodhan and commenced work.

Taxation.—A part from the land revenue which, a stated above, brings in about 3-13 crores, the main sources of taxation are Excise and Customs. The receipts from each are estimated for the present year at 194 lakhs and 110 lakhs respectively. After these come interest on in vestments (32 lakhs), Railways (122 lakhs) and Berar Rent (29 lakhs). The Customs Revenue is derived from an advelorem duty of not more than 5 per cent. on all imports and exports.

Communications.—One hundred and thirty-wo miles of broad-gauge line from Bombay to Madras traverse the State; also 30 miles of metre-gauge in the Masulipatam to Marmagoa line. At Wadl, on the Bombay-Madras line, the broad-gauge system of the Nizam's State Railway takes off and running cast through Hyderabad City and Warangal reaches the Calcutta-Madras line at Berwada, a total length of 363 miles. From Kazipet, near Warangal on this line, a new link to Bellarshah strikes north providing the shortest route between Madras and Delhi. From Secunderabad the metre-gauge Godavari Valley Railway runs north-west for 386 miles to Manmad on the main line of the Great Indian Peninsula Railway to Calcutta. A metre-gauge line also runs south from Secunderabad through Mahbungara the border and is now linked up with Dronachallam on the Madras and Southern Mahratta Railway. Branch lines exist from Purns to Hingoli, Parbhani to Purli Vaijnath. Karipali to Kothagudham and Vikarabad to Bidar which last was extended to Purli-Vaijnath. A branch line of 12 miles from Jankampet to Bodhan has recently been completed. Thus, with branch of the metre-gauge in the State. The Barsi

allway owns a short extension of 36 miles British Re uwadi on the Bombay-Madras line to G. Mackensie,

revenue is over 3 crores. The principal food grops are millet and rice; the staple money-crop is cotton, which is grown extensively on the black cotton solls, and oil seeds. Hyderabad is well known for its Gaorani cotton which is the finest ladigenous cotton in India. The total area well-considered programme.

From June 1932 the Railway is running motor bus service in the city and suburbs of Hyderabad and on some district roads. At first the fleet consisted of 27 passenger vehicles operating a route mileage of 284 miles. New services have been opened from time to time and the present motor mileage operated is 4,000 miles with 311 passenger vehicles. Now there are probably few important roads in the State not operated by the Railway Rus Service.

Co-ordination of road rail services has been achieved by the opening of many out-agencies in the districts for through booking of goods and by arranging for the collection and delivery of goods at economic rates from merchants' godowns to railway stations, and by connecting up bus service with the railway at various places for passenger traffic also.

of the Railway Department is also in charge of Avlation. At present the activities are confined to the running of an Aero Club, training local men in the art of flying, constructing Aerodromes at various places in the State and undertaking charter flights.

Education.—In 1937-38 the total number of educational Institutions were 5,131 (excluding Colligeate education), the number of Primary schools in particular having been largely increased.

The Osmania University which was established at Hyderabad by a Charter in 1918 marks a new departure in Indian education as it imparts instruction in the faculties of Arts, Science, Law, Muslim Theology, Medicine, Engineering and Education through the medium of Urdu, English being a compulsory language in the B.A. Examination and the Examinations leading upto it. In addition to the University College comprising the faculties of Arts, Science, Muslim Theology and Law if has a Medical College, an Engineering College a Training College for teachers and a Women's College teaching up to M.A. and M.Sc. standards. The total number of students in the Colleges of the University is 1,998. The annual expenditure is about 22 lakhs of rupees. The Nizam College at Hyderabad (First Grade) is however affiliated to the Madras University and uses English as the medium of instruction.

Executive Council.—The Rt. Hon'ble Sir Akbar Hydari, Nawab Hyder Nawax Jung Bahadur, Kt., P.C., D.C.L. (Oxon), LL.D., President; Nawab Sir Aqeel Jung Bahadur, Army and Medical Member; Nawab Mahdi Yar Jung Bahadur, M.A. (Oxon), Education Member: Sir Theodore J. Tasker, Kt., C.I.K., O.B.R., 1.C.S., Revenue and Police Member; Raja Shamraj Rajwant Bahadur, Public Works Member; Nawab Fakhr Yar Jung Bahadur, Finance Member; Nawab Galadur, Judicial and Ecclesiastical Member, Mr. K. M. Ansari, B.C.S., secretary.

British Resident —Hon'ble Sir Duncan, G. Mackenzie,

MYSORE.

The State of Mysore is surrounded on all-sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or mainad) on the west and the wide spreading valleys and plains (the maidan) on the east. The State has an area of 29,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,55.302 of whom over 92 per cent. are Hindus. Kannada is the language of the State.

History .- The ancient history of the country is varied and interesting. Tradition connects the tableland of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historic times, the north-eastern portion of the country formed part of Asoka's Empire in the third century B.C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A.D. Mysore was ruled by three dynasties, the northwestern portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out early in the twelfth century by the Hoysalar, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar Empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the domi-nant empire of Vijayanagar, the dynasty attain-ed its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century, the real sovereignty passed into the hands of Hyder Ali and then his son, Tippu Sultan. In 1799, on the fall of Seringapatain, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wadayar Bahadur III. Owing to the insurrections that broke out in some parts of the country, the management was assumed by the British Government in 1831. In 1881, the State was restored to the dynasty in the person of Sri Chamarajendra Wadayar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with the assistance of Mr. (afterwards Sir) K. Seshadri Iyer, K.G.S.I., as Dewan, brought Mysore to a state of great prosperity. He died in 1894, at assate of great prosperity. He died in 1993, and was aucoseded by the present ruler His Highness Sri Krismansjendra Wadiyar Bahadur, e.O.S.I., e.B.E., who was installed in 1902. In November 1913, the instrument of Transfer was replaced by a Treaty which indicates more appropriately the relation substitutes between the British Government and stating between the British Government same Basis of Mysors. In 1927, the Government in the Francisco of the Basis of the allowed from 1987-38, in accordance with recommendation of the Indian States stry Committee (Financial), 1982.

Administration.- The City of Mysore is the Capital of the State, but Bangalore is the Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by an Executive Council consisting of the Dewan and two Members of Council. The High Court consisting of the Chief Justice and three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State. the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time. Under the scheme of constitutional developments announced in October 1923, the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation, XVIII of 1923. The franchise has been extended and the disqualification of women on the ground of sex, from exercising the right to vote and standing as candidates for election has been removed. The privilege of moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and of interpellating Government. The Assembly is also consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council are before they are passed in the Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for one or more special session of the Assembly to be summoned by the Government when the State or public business demands it.

The strength of the Legislative Council has been raised from 30 to 50 by Act XIX of 1923, of whom 20 are official and 30 are non-official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of resolutions on all matters of public administration is, under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the exofficio President of both the Representative Assembly and the Legislative Council.

The Legislative Council has a Public Accounts Committee which examines the andit and appropriation reports and brings to the notice of the Council all deviations from the wishes of the Council as expressed in its Budget grant.

Standing Committees.—With a view to entative of the people to influence the Administration of the State, Standing Committees consisting of members of the Representative Assembly and the Legislative Council have been formed one for the Rallway Electrical and P.-W. Departments, another for Local Self-Government and the Departments of Medicine, Sanitation and Public Health and the third for Finance and Taxation.

1988, a Committee for examining and making recommendations upon matters pertaining to the provisions of the Government of India Act of 1985, relating to Federation and questions

incidental or auxiliary to lt.

Again on 1st April 1938, the Government appointed a Special Committee for the purpose of examining, in relation both to the administration and to the public life of the State, the development and working of the Representative Assembly and Legislative Council. The Committee was instructed to formulate, having due regard to the present state of education and public spirit, comprehensive proposals as to further changes, that may be desirable, to secure the steady and harmonious constitutional progress of the State.

The Mysore Army.—The total strength of the Mysore Army was 1,794, consisting of 1,397, Combatants and 397 non-Combatants, at the end of June 1938. The Combatant strength of the Mysore Lancers was 471, and that of the Mysore Horse was 107. The strength of the Mysore Infantry was 903. The expen-diture under "army" amounted to about 15

lakhs of rupces.

The cost of the Police administration was

about 20 lakhs of rupees.

Agriculture.- Nearly three-fourths of population are employed in agriculture, and the general system of and tenure is ryotwari. The principal food crops are ragi, rice, jola, millets, gram and sugarcane, and the chief fibres are cotton and sun-hemp. The Seri-cultural industry is the most important subsidiary industry practised by the agriculturists.

As elsewhere in India the industry is passing through one of the gravest crises in the course of its history owing to the competition of cheap foreign silk. The area under mulberry during the year ended June 1938 was 26,175 acres. The Department of Agriculture is popularising agri-culture on scientific lines by means of demons-trations, investigations and experiment. There are 7 Government Agricultural Farms at Hebbal, Babbur, Marthur, Nagenahally, Hunsur, Mandya and the coffee experimental station at Bale-honnur. A live-stock section has been organised which has been asking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvatharayanakere, near Ajjampur in the Kadur District with a sub-station at Basur. A Serum Institute has been opened at Hangalore for the manufacture of scrum and virus for inoculation against rinderpest and other contagious disseases. There are 75 Veterinary Institutions in the State under the control of the Civil Voterinary Department.

Medical Relief.—The improvement of medical relief and sanitation in urban and medical retire and sanitation in treats are rural areas has also received special attention. The headquarters of every one of the 80 taluks in the State is provided with a heapital and there are 143 dispensaries in hobits outside taluk headquarters. A scheme of subsidising rural practitioners has been sanctioned. Waterworks have been established at great cost in Mysore and Bangalore. Both these cities (and 170 towns and villages) are lit by electricity, and much has been done in the way of clearing Mysore and Bangalore. Both these cities (and of sugar, paper, chemicals and fertilisers, span 170 towns and villages) are lit by electricity, silk, tobacco and coffee curing, electrical feature and much has been done in the way of clearing teries, glass-making and vegetable oils. These out congested areas, providing them with are now 24 large scale industrial establishments

The Government appointed on 14th March i" lungs," opening out extensions, and inducing the people to build houses of an improved type

Industries and Commerce.—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State. Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of Information in industrial and commercial matters. The department has under its chai matters. The department has under its control the following demonstration factories:—the Government Soap Factory, Government Porcelain Factory, Government Silk Weaving Factory, Government Electric Factory and the Central Industrial Workshop. The Department has a well-equipped Government Industrial and Testing Laboratory, with a section devoted to the manufacture of pharmacentical drugs and preparations. The Well-Boring Section which is engaged in the drilling of boreholes for meeting the requirements of drinking water in the rural areas is now under the control of the Bureau of Sanitary Engineering Department of Public Health. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general control of the Director of Industries and Commerce. Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work.

With a view to demonstrate and impart instructions in the utilisation of the high grade slik produced in the State, Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore. The Sandalwood Oil Factory started on an experimental basis is now working on a commercial scale. A factory is working at Mysore.

At Bhadravati are located the Mysore Iron and Steel Works, owned and run by the Government. The works are the second largest of their kind in the British Empire and contain the only charcoal blast furnace and wood distillation plant in the East, A plant for manufacturing steel and steel products has been added in April 1986. The slag produced by the blast furnace is now being utilised by the newly erected cement plant attached to the works. Near-by is also situated the Mysore Paper Mills started as a joint-stock company, which has just begun production of paper. Bhadravati blds fair to become one of the most important industrial centres in India. Among other industries may be mentioned a sandal oil distillery, a silk filature, a soap factory, a weaving factory, technical art and industrial workshops, porcelain factory, industrial and testing faboratory, lac factory, and a factory for the manufacture of electrical goods.

A notable feature during the past few years has been the coming into being of several stateaided joint-stock companies for the manufacture owned or aided by Government with a capital investment of about five crores of rupees.

A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Finances.-The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget estimate for 1936-37 and budget for 1937-38 were as below:-

Yes	ar.		Receipts.	Disbursements.	Surplus.	Deficits.
1932-83			Rs. 3,88,27,528	Rs. 3.56,15,671	Rs.	Rs. 17.88.148

Works. Hydro-Electric and Irrigation The river Cauvery in its course through the State, possesses a natural fall of about 380 feet near the island of Sivasamudram, and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H.P. for supplying power mainly to the Kolar Gold Mining Companies and incidentally for lighting the cities of Mysore and Bangalore. in course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the generation of additional power to meet the growing demands, the "Krishnaraja-sagara Reservoir" called after the name of the present Maharaja was constructed. The storage from the reservoir besides enabling the generation of electric power up to 46,000 H.P. will also bring under irrigation about 1.20,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927, and the main canal is named the "Irwin Canal" after Lord Irwin the then Viceroy. An area of about 13 thousand acres under this Canal has been brought under sugarcane cultivation and a Sugar Factory with a crushing capacity of and a sugar ractory with a drussing capacity of about 2,000 tons of cane per day has been estab-lished nearby at Mandya. An up-to-date Distillery has been erected as an adjunct to the Sugar Factory. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift Irrigation.

The construction of a reservoir across the river Kumadvathi near Anjanapur, Shikaripur Taluk, was completed at a cost of Rs.18 lakhs and the reservoir was opened for irrigation. The area expected to be irrigated is about 10,000 acres. The area In addition to large new irrigation works in progress, the work of constructing a Reservoir across the river Shimsha at Marconahalli, Kunigal Taluk, which is estimated to cost Rs,22 lakhs to irrigate an extent of about 10,000 acres, has been started.

To provide for the ever-widening demand for power for industrial, domestic and town lighting purposes, the Shimsha and Jog hydro-electric schemes are being pushed through at an aggregate cost of over two crores of rupees.

There are 4.340 power installations, 84.671 lighting installations and 630 irrigation pumping installations. The total number of towns and villages electrified so far is 172.

Education.—A separate University for Mysore was established on the 1st July 1916. It is of the teaching and residential type composed of the Central and Engineering Colleges at Bangalore and the Medical, Maharaja's and Maharani's Colleges at Mysore, and three Intermediate Colleges with headquarters at Mysore. The colleges are efficiently equipped and organised and there is a training college for men located at Mysore. The Maharani's College at Mysore is a College for Women.

There are 34 High Schools of which 8 are for girls, 310 Middle Schools of which 41 are for Provision has been made for teaching several vocational subjects in general school with a view to giving a bias towards the vocations and in order to enable the pupils to take to such vocations after their High School life. are 10 Training Institutions for training teachers in Middle and Primary Schools; 4 of them are for women. The control over Primary Education has been made over to the Local Bodies under the Elementary Educational Regulation of 1930 and the Local Bodies are responsible for making due provision for extension of Primary Education in accordance with a definite programme spread over 10 years. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There were altogether 6,948 schools at the end of June 1938 with a strength of 837,257 pupils. This gives one school to every 3.7 square miles of the area, and to every 809 persons of the population. The total expenditure on Education was Rs. 67,58,101 yielding an average of Rs. 1-0-7 per head of population.

Descan .- Amin-ul-Mulk Sir Mirza M. Ismail.

K.O.I.E., O.B.E.

Members of the Executive Council.—Rajamantrapravina N. Madhava Rao, B.A., E.L.,
First Member of Council; and Mr. K. V. Anantaraman, B.A., Second Member of Council.

Resident in Mysore and Chief Commissioner of Coorg.-The Hon, Col. J. H. Gordon, C.I.B., O.B.E., M.C.

BARODA.

The State of Baroda is attuated partly in | and mostly surrounded by British territory; Gujerat and partly in Kathlawar. It is divided (2) central district north of the Narbada, in which lies Baroda, the capital city; (8) to the of Navaari near the mouth of the Tapit river, north of Ahmedabad, the district of Mehaana;

and (4) to the west, in the peninsula of Kathlawar have been formed which form part of a scheme for the district of Annrell, formed of scattered tracts of land. The area of the State is 8,164 square partment, under a Legal Remembrancer, which miles; the population is 24,43,007 of whom over four-fifths are Hindus.

History.—The history of the Baroda State Empire. The first Maratha invasion of Gujerat took place in 1705. In later expeditions Pllafi Gaekwar, who may be considered as the founder of the ruling family, greatly distinguished himself. Songhad was the headquarters till 1766. After 1723 Pilaji regularly levied tribute in Gujerat. His son Damaji finally captured Baroda in 1734, since then it has always been in the hands of the Gaekwars; but Mughal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gackwar and the Peshwa. In spite of the fact that Damaji was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Fattesing Rao, Mannaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao, A period of political instability ensued which was ended in 1802 by the help of the Bombay Government, who established the authority of Anand Rao at Baroda. By a treaty of 1805 between the British Government and Baroda, it was arranged inter alia that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged. Baroda was a staunch ally of the British during the wars with Baji Rao Peshwa. the Pindari hordes and Holkar. But from 1820 to 1841, when Sayaji Rao II was Gaikwar. differences arose between the two Governments which were settled by Sir James Carnac, Governor of Bombay, in 1841. Ganpat Rao suc-ceded Sayaji Rao II in 1847. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor, Khande Rao, who sacended the gadi in 1856, introduced many reforms. He stood by the British in the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for "notorious misconduct" that he had instigated the attempt to poison Col. Phayre, the Resident, was not proved. Bayaji Rao III, a boy of it years of age, who was descended from a distant branch of the family was adopted as heir of Khande Rao in 1875 and was invested with full powers in 1881. Sayaji Rao III., after a glorious reign of 58 years died in February 1939 and was succeeded by Prince Pratap Singh, who is the present Ruler.

Administration.—An executive council consisting of the principal officers of the State carries on the administration, subject to the control of the Maharaja, who is assisted by a Dewas and other officers. A number of departments have been formed, which are presided over by officials corresponding to those in British India. The State is divided into five Presste each of which is sub-divided into Mahais and Post Mahais of which there are in all 42. Attempts have for some years been made to restore village sutonomy, and village panchaysts.

have been formed which form part of a scheme for local self-government. There is a Legislative Department, under a Legal Remembrancer, which is responsible for making laws. There is also a Legislative Council, consisting of nominated and elected members. A High Court at Baroda possesses jurisdiction over the whole of the State and hears all final appeals. From the decisions of the High Court appeals lie in certain cases to the Maharaja who decides them on the advice of the Huzur Nyaya Sabha. The State Army consists of 5,086 Regular forces and 3,806 Irregular forces.

Financa.—In 1937-38, the total receipts of the State were Rs. 2,67,18,000 and the disbursements Rs. 2,22,35,000. The principle revenue heads were: Land revenue Rs. 1,27,59,000; Abkari Rs. 24,53,000, opium 2,72,000; Railways Rs. 17,77,000; Interest 18,55,000; Tribute from other States Rs. 7,41,000. British currency was introduced in 1901.

Production and Industry.—Agriculture and pasture support 63 per cent. of the people. The principal crops are rice, wheat, gram, castor-oil, rapeseed, poppy, cotton, san-hemp, tobacco, sugarcane, maixe and garden crops. The greater part of the State is heid on ryoteari tenure. The State contains few minerals, except sandstone, which is quarried at Songir, and a variety of other stones which are little worked. There are 118 industrial or commercial concerns in the State registered under the State Companies' Act, There are four Agricultural Banks and 1,139 (Co-operative Societies in the Baroda State)

Communications.—The B, B, & C, I, Railway crosses part of the Navaari and Baroda prasts and the Raiputana. Malwa Railway passes through the Mehana prant. A system of branch lines has been built by the Baroda Durbar in all the four prants in addition to which the Tapti Valley Railway and the Baroda-Godhra Chord line (B, B, & C, I) pass through the State. The Railways owned by the State are about 723 miles in length. The total mileage of metalled and fair weather roads in the State is 532 and 932 respectively.

de Rao, who ascended the gadi in 1854, direct many reforms. He stood by the in the Mutiny. He was succeeded by other Malhar Rao in 1870. Malhar Rao was ed in 1875 for "notorious misconduct" gross misgovernment," but the suggestion he had instigated the attempt to poison Phayre, the Besident, was not proved, it Rao III, a boy of 15 years of agre, who descended from a distant branch of the years descended from a distant branch of the years of the policy of free and compulsory primary and was invested with full powers in 1881. I Rao III, after a glorious reign of 58 died in February 1939 and was ausoced.

Capital City.—Baroda City with the cantonment has a population of 112,860. It contains a public park, a number of fine public buildings, palaces and offices; and it is crowded with Hindu temples. The Cantonment is to the north-west of the city and is garrisoned by an infantry battalion of the Indian Army.

Ruler.—His Highness Farzandi-i-Khas-i-Dowist-i-Englishia, Maharaja Pratap Singh Gaekwar, Sena Khas Khei, Samsher Bahadur. Maharaja of Baroda.

Resident.—Lieut.-Col. E. J. D. Colvin, C.I.E. Decem.—Sir V. T Krishnamachari, K.C.L.E.

GWALIOR.

of patel in a village near Satara. The head of the family received a patent of rank from Aurang-The founder of the Gwalior House was Ranoii Scindia who held a military rank under the Peshwa Baji Rao. In 1726 the Peshwa granted deeds to Puar, Holkar and Scindia, empowering them to levy "Chauth" and "Sardesmukhi" and retain half the payment to their troops. In 1736 Ranoji Scindia accompanied Baji Rao to Delhi where he and Malhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain, which for the first time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Daulat Rao Scindia Gwalior played an important part in shaping the history of India. Despite partial reverses which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken. For the first time he was now recognised by the British as an independent sovereign and not as a vassal of the Peshwa.

In 1790 his power was firmly established in Delhi. While he was indulging in ambitious hopes he fell prey to fever which ended his remarkable career on 12th February 1794. Himelf a military genius, Mahadji Scindla's armice reached the zenith of their glory under the dis-ciplined training of the celebrated French adventure De Boigne. Mahadji was succeeded by his grand nephew Daulat Rao in whose service Perron, a military commander of great renown played a leading part. The strength of Scindia's army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Assaye, Asigarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputable possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigues and party spirit were rampant and the army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpur and Pannihar.

Jankoji Rao was succeeded by Jayaji Rao Scindia whose adherence to the British cause during the dark days of Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empress. Subsequently he received other titles. He entered into treaties of mutual exchange of retered into treaties of mutual exchange of To bring closer to the outer world His Highness territories with the British Government. He sanctioned the construction of a Saspiane does not be succeeded by the sanctioned the construction of a Saspiane base, which will sarve as a halting station his son Lieutemant-General H. H. Maharaja Sir on the Imperial Air Line at Madbay Sagar. Madhav Rao Scindia, Alijah Bahadur, G.C.V.O., and an aerodrome at Maharajpur.

The House of Scindia traces its decent to a | G.O.S.I., G.B.R., A.D.C., to the King. He succeeded family of which one branch held hereditary post in 1886 and assumed powers in 1894. In 1901 he went to China during the war. He died in June 1925 and was succeeded by his son His Highness the Maharaja Jivaji Rao Scindia, Alijah Bahadur. During His Highness' minority the administration of the State had been conducted by a Council of Regency. His Highness assumed full ruling powers on November 2, 1936.

> In matters of administration, His Highuess is assisted by a Council consisting of eight Ministers and the Huzoor Secretary. The new constitu-tion came into force from March 1937, when with a view to improve the efficiency of the Government, the distribution of work among various Ministers was revised and redistributed. The State has a Legislative Assembly called Mailis-i-Am, to which members are both elected and nominated. The State maintains an efficient army consisting of Cavalry, Infantry and Artillery units. It has its own Postal system. Besides possessing a number of schools the State maintains two Colleges for boys and one for girls. The State runs a public school on European lines to impart education to the children of nobles and well-to-do people.

> The State has an area of 26,397 sq. miles and population of 3,523,070 according to census of 1931. Its average rainfall varies from 25 to 36 inches. The average revenue is two and half CCOPes.

> There is a well equipped State workshop in Gwalior, the Capital of the State; there are sleetric power house, Leather Factory, Tannery and Pottery Works. There are outton mills in Gwalior and Ujjain. The State has its own Light Bailway. The portion of the G.I.P. Railway which passes through a major portion of the State territories is owned by the Gwallor Darbar.

> The Ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

> Since the present Ruler assumed powers vigorous impetus has been given to an all-round moral and material progress. The construction of the Harsi reservoir costing about one and half crores, a proposal to construct an up-to-date Female Hospital and the sanction of one crore of rupes for rural reconstruction are the land-marks in the history of Gwalior. The network of roads have been utilised by the motor service run by Gwalior Northern India Transport Company, and those corners which were unconnected are being now joined with important highways.

BALUCHISTAN AGENCY.

feudatory State of Las Bola.

Kaiat is bounded on the North by the Chagai district, on the East by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The Kalat State, unlike the other Indian States, is a confederacy of partially independent chiefs, whose head is the Khan of Kalat. The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Mekran and Kharan. The inhabitants are, for the most part Muhammadans of the Sunni sect. The area is 73,278 square miles and the population 3,42,101 (1931).

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta. Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir-i-Azam, at present a retired

In this Agency lies the State of Kalat with its | Political officer. The Resident and Agent to the Governor-General in Baluchistan conducts the relations between the Government of India and the Khan, and exercises general political appervision over the State through the Political Agent in Kalat. The revenue of the State is about Rs. 15.7 lakhs, out of which the Khan retains a civil list of Rs. 3,00,000 per annum. The present Khan is Captain His Highness Beglar Begi Sir Mir Ahmad Yar Khan, G.C.I.E., born in 1904.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Purali river, Area 7,132 square miles; population 63,008 (1931), chiefly Sunni Muhammadans. The estimated average revenue is about Rs. 3. 6 lakhs. The ruling chief of Las Bela, known as the Jam, is Mir Ghulam Qadir Khan a minor son of late Jam Mir Ghulam Muhammad Khan, born in 1920. The young Jam has studied at the Aitchison College, Lahore. The administrative control of the State is exercised by the Hon'ble the Agent to the Governor-General and Chief Commissioner in Baluchistan through the Political Agent, Kalat. The Jam also employs a Wazir to assist him in the administration of the State.

RAJPUTANA AGENCY.

Rajputana is the name of a great territorial; and unproductive, but improves gradually from circle with a total area of about 1,35,001 square being a mere desert in the far west to comparamiles, which includes 21 Indian States, one tively fertile lands to the north-east. To the Chiefship, one estate, and the small British south-east on the Aravalli Hills lie higher and district of Ajmer-Merwara. It is bounded on the more fertile regions which contain extensive hill west by Sind, on the north-west by the Punjab ranges and which are traversed by considerable State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Provinces and Gwallor, while the southern boundary runs across the central region of India in an irregular zigzag line. Of the Indian States, Chiefship and estate 10 are Rajput, 2 (Bharatpur and Dholpur) are Jat, and two (Palanpur and Tonk) are Mahomedan. The chief administrative control of the British district is rested as officio in the political officer, who holds the post of Resident for Rajputana for the supervision of the relations between the several Indian States of Rajputana and the Crown Department, and has his headquarters at Mount Abu. For administrative purposes they are divided into the following groups:—Bikaner and Sirchi in direct relations with the Resident for Rajdirect relations with the Resident for Maj-putann. Eastern Rajputann States Agency 8 States (Bharatpur, Bundi, Dholpur, Jhalawar, Kauraulii and Kotah); Jaipur Residency 5 States and one estate (Aiwar, Jaipur, Kishangarh, Tonk, Shalpura and Lawa Estate); Mewar, Residency, and Southern Rajputann States Agency 4 States and one Chiefship (Mewar, Agency 4 States and one Cheminip (mewar, pangarpur, Banswara and Pratabgarh and the Kuahalgarh Chiefahlp); Western Rajputana States Residency 4 States (Jodhpur, Jaisalmer Palanpur and Danta).

rivers.

Communications .-- The total length of railways in Rajputana is 3,250 miles, of which about 1,000 are the property of the British Government. Phe B. B. & C. I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi. Of the Indian State railways the most important are the Jodhpur and Bikaner lines from Marwar Junction to Hyderabad (Sind) and to Blkaner.

inhabitants.-Over 50 per cent. of the population are engaged in some form of agriculture ; about 20 per cent. of the total population are maintained by the preparation and supply of material substances; personal and domestic service provides employment for about 5 per cent. and commerce for 21 per cent. of the population. The principal language is Rajasthani. Among castes and tribes, the most numerous are the Brahmans, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balais. The Rajputs are, of course, the aristocracy of the country, and as such hold the land to a very large extent, either as receivers of rent or as outlivators. By reason of their position as integral families of pure descent, The Aravalli Hills intersect the country as a landed nobility, and as the kinsmen of almost from end to end. The tract to the north-rulink chiefs, they are also the aristocracy of west of the hills is, as a whole, sandy, ill-watered India; and their social prestige may be measured by observing that there is hardly a tribe or clan ; (as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Raiput stocks.

Udaipur State (also called Mewar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palaces, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island palaces. It is situated near the terminus of the Udaipur-Chittorgarh Railway, 697 miles north of Bombay. His Highness Maharajadhiraj Maharana Sir Bhupal Singhji Bahadur, 6.0.8.1., K.C.I.E. who succeeded his father the late

80.6 lakhs. Its archeological remains are numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Raiputana within the Political Agency of the Southern Rajputana States. The area of the State is 1,946 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana. Banswara with Dungarpur originally formed a country known as Bagar, which was, from the beginning of the thirteenth century until about the year 1529, held by certain Rajput Rulers of the Ghelot or Sishodiya clan, who claimed descent from an elder branch of the family. now ruling in Udaipur. After the death of Maha-Rawal Udai Singhii, the Ruler of Bagar, about 1629, his territory was divided between his two sons Jagmal Singhii and Prithvi Rajii, and the descendants of the two families are now the Rulers of Banawara and Dungarpur respectively. Where the town of Banawara now stands, there was a large Bhilpal or colony under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawai Jagmal Singhji about 1530. The name of Banswara is by tradition said to be a corruption of Wasnawara or the country of Wasna, Others assert that the word means the country (wara) of bamboos (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhji, Maharawal Bijal Singhji anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government. in 1818, a definite treaty was made with his successor, Maharawal Umed Singhji. Banswara has been described as the most beautiful portion of Rajputana; it looks at its best just after the rains. The principal rivers are the Mail, the Anas, the Eran, the Chap and the Haran.

The present Ruler is His Highness Ravan Rai Maharajadhiraj Maharawalji Sahib Shree Maharajadhiraj manarawaji Samo Smee Sir Pirthi Singhji Bahadur, K.C.I.E., who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji. His Highness was educated in the Mayo College and succeeded his father in 1914. His Highness is entitled to a salute of 15 guns. The State is ruled by His Highness the Maharawalji Sahib Bahadur with the assistance of the Diwan. It has enlarged its Judicial and Legislative Councils, of which the Diwan is the President. The revenue of the State is about 7 lakhs and the expenditure is about the same.

Diwan.-Dr. Mohan Sinha Mehta, Ph.D., M.A., LL.B., Bar-at-Law.

Dungarpur State, with Banswara, for-merly comprised the country called the Bagar. It was invaded by the Mahrattas in 1818. As in other States inhabited by hill tribes, it became necessary at an early period of Bittish supremacy to employ a military force to correct the Bhits. The State represents the Gadi of the eldest branch of the Sisodias and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jalor, fied to Bagar and killed Chowrasimal, Maharana His Highness Maharajadhiraj King of Chitor, when driven away by Kirtipal Maharana Sir Fatch Singhji Bahadur, 6.C.S.L., 6.C.J.R., 6.C.Y.O., in 1930, is the Premier Ruling Chief of Baroda, and founded the State of Prince of Rajputana. The revenue and Dringerpur. The present Chief is His Highness expenditure of the State are now about Rai-i-Rayan Mahimahendra Maharajadhiraj

Maharawal Shri Sir Lakshman Singhji Bahadur, K.C.S.1., born on 7th March 1908, succeeded on 15th November 1918 and assumed charge of the administration on the 16th February 1928. No railway line crosses the territory, the nearest railway station, Udaipur, being 65 miles distant and Talod on Ahmedabad side, being about 70 miles distant. Revenue about 8 lakhs.

Partabgarh State, also called the Kanthal, was founded in the sixteenth century by a descendant of Rana Mokal of Mewar. The town of Partabgarh was founded in 1698 by Partab Singh. In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of Salim Shahi Rs. 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of Rs. 15,000 formerly paid to Delhi. The first connection of the State with the British Government was formed in 1804; but the treaty then entered into was subsequently cancelled by Lord Cornwallis, and a fresh treaty was made in 1818. The tribute used to be paid to Holkar is being paid to the British Government under the terms of the treaty of Mandsaur, and in 1904 was converted to Rs. 86,350 British currency. As the amount of tribute was excessive, it has now been reduced to Rs. 28,350 from the year 1037-38.
The present Ruler is His Highness Maharawat Sir The present Ruler is his Highness manarawat Sir Ram Singhi Bahadur, K.O.S.I., who was born in 1908 and succeeded in 1929. The State enjoys plenary jurisdiction. The highest administrative and executive office is termed "Mahakma Khas," where sit His Highness and the Dewan of the State. There is a duly graded judiclary under a High Court. Bevenue about 5% lakhs; expenditure nearly 54 lakhs.

Jodhpur State is the largest in Rajputana with an area of 86,071 square miles and a populawith an area of 86,071 square miles and a popula-tion of 2.1 millions, of which 83 per cent, are Hindus, 8 per cent. Musalmans and the rest Jains and Animists. The greater part of the country is an arid region. It improves gradually from a mere desert to comparatively fertile land as it proceeds from the West to the East. The rainfall is scanty and capricious. There are no perennial rivers and the supply of sub-soil water is very limited. The only important water is very limited. The only important river is Luni.

The Maharaja of Jodhpur is the head of the Bathor Clan of Rajputs and claims descent from Rama, the delited King of Ayodhya. The earliest known King of the Clan named Abhimanyu, lived in the fifth century, from which time their history is increasingly clear. After the breaking up of their Kingdom at Kanau; they founded this State in about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459. He abolished the tax levied by Hussain Shah of Jampur from Hindu pilgrims at Gaya. His descendant was the famous Rao Maideva, the most powerful ruler famous Rao Maideva, the most powerful ruler. of the time having an army of 80,000 Eajputs; in the eighteenth century from the wars with the Emperor Humayun when expeiled by Sher in 1542 A.D. had sought refuge with him. Eajs Sur Singh, son of Raja Udai Singh, in recognition of his deeds of valour was created a "Sawai Raja" with a mansab of 5,000 Eat was granted in 1823. The present ruler is His Highess Maharajadhray Baharas Shri Sir and 8.800 Sowars by the Emperor Akbar. Sarup Eam Singh Bahadur, G.C.I.E., E.C.S.L.

The administration is carried on with the aid of a State Council composed of His Highness the Maharaja Sahib Bahadur as President, Lt.-Colonel Sir Donald M. Field, Kt., C.I.E., I.A., Chief Minister, holding the Finance portfolio, Diwan Bahadur Thakur Madho Singhli, Home Minister, Mr. S. G. W Anderson, C.I.E., Vice-President, State Council and Finance Member; (2) Khan Bahadur Sz. Mohammad Adbul Tawwab Khan, Home Member; (3) Khan Bahadur Shamsul Hasan, E.A., I.I.B., Syed Nasiruddin Hayder, Esq., Judicial Member; (4) Revenue Member; (5) Maulve Mohammad Maula Bakhsh, M.A. (Oxon.), F.L.S., Development Member.

Revenue .. Rs. 24,24,869. Expenditure 19,32,416,

Secretary Council.—Mr. Maqui Ahmed, B.A. Private Secretary to H. H.—R. S. Babu Chandmall, B.A.

Durbar Secretary to H. H.—Khan Sahib Mirza Hamid Ali Khan

Shahpura State.—The ruling family belongs to the Seesodia clan of Rapjute. The State came into evistence about 1029 when the Parganah of Phulla was granted by the Mughal Emperor Shahi-i-Jehan to Maharaj Sujan Singh, son of Maharaj Surajmal, the second son of Maharana Amar Singh of Udalbur. Later on Raja Ran Singhji received the parganah of Kachhola from the Maharana of Udalpur and was recognised as a great noble of the Mewar State.

The present Ruler is Rajadhiraj Sri Umaid Singhji Bahadur. The State enjoys permanent honour of nine guns salute.

Bharatpur State.—Consists largely of an immense alluvial plain, almost 2,000 sq. miles in size watered by the Banganga and other monsoon rivers.

present ruling family of Bharatpur The are Jats, of the Sinsinwar clan who trace their pedigree to the eleventh century. The family derives its name from its old village Sinsini. Bharatpur was the first State in Rajputana that made alliance with the British Government in 1803. It helped Lord Lake with 5,000 horses in his conquest of Agra and the battle of Laswari wherein the Maratha power was entirely broken and received 5 districts as reward for the service. In 1804, however, Bharatpur with Jaswant Rao Hoikar against the British Government which resulted in a war. Peace was re-established in 1805 under a treaty of alliance and it continues in force. The Gadi being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Sahib. Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir to the Throne, came into his own. Bharatpur also rendered valuable service to the British Government during the Matiny. During the Great War the Bharatpur Durbar gave valuable help to the Imperial Government. The Bharatpur Imperial

Service Infantry served in East Africa and the Mule Transport Corps served in all theatres of war except Africa. The present Ruler is His Highness Shri Maharaja Brijendra Sawal Brijendra Singh Bahadur, Bahadur Jung, who was born in 1918 and succeeded his father, Maharaja Sir Kisheu Singh who died on the 27th of March 1929. During his minority the State is administered by a Council presided over by Sir Richard Tottenham, C.S.I., C.I.E. I.C.S.

Revenue Rs. 33.06.000.

Dholpur State.-The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors. The family took the name of Bamrolia about the year 1367. They next migrated to Gwalior. where they took the part of the Rajputs in their struggles against the Emperor's Officers. Eventually the Bamrolia Jats settled near Gohad and in 1505 Surjan Deo assumed the title of Rana of Gohad. After the overthrow of the Mahrattas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost it six years later. In order to bar the encroachments of the Mahrattas, a treaty was made with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties re-took Gwalior. In the treaty of the 13th October, 1781 between the British Government and Scindia, it was stipulated that so long as the Maharaj Rana observes his treaty with the English, Scindia should not interfere with his territories. The possession of Gohad however led to disputes between the British and Scindia, and in 1805 the Governor-General transferred Gwalior and Gohad to Scindia, and that of Dholpur, Bari, Baseri, Sepau and Rajakhera to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grandson, the late Chief Maharaj Rana Nehai Singh, succeeded to the Gadi. Lt. Col. His Highness Rais-ud-Daula Sipandar-ul-Mulk Saramad Rajhai Hind Maharajadhiraj Sri Sawai Maharaj Rana Sir Udai Bhan Singh Lokindra Bahadur Diler Jang Jai Deo, G.O.I.E., K.C.S.I.. K.O.V.O., the present ruler, is the second son of Maharai Rana Nehal Singh and was born on the 12th February, 1893. On the death of his brother Maharaj Rana Ram Singh, His Highness succeeded to the gadi on March 1911.

Karauli State.—A State in Rajputana under the Political control of the Resident for Rajputana, lying between 26° and 27° north latitude and 76° 30′ and 77° 30′ east longitude. Area, 1,242 square miles. The river Chambal forms the south-eastern boundary of the State, dividing it from Gwalior (Scindia's Territory; on the south-west it is bounded by Jaipur; and on the north-east by the States of Bharatpur, Jaipur and Dholpur. laiji, B.A., LL.B., Dewan.

Bikaner State in point of area is the second largest of all the Indian States and the second largest in Rajputana. The population of the State is 9,36,218 of whom 77 per cent. Hindus, 15 per cent. Mahomedans, 4 per cent. Sikhs and 3 per cent. Jains. The espital city of Bikaner, with its population including the suburbs of 86,927, is the third city in Rajputana.

The northern portion of the State consists of level loam land, whilst the remainder is for the most part sandy and undulating. The average rainfall is about 12 inches. The water ievel over most of the State is from 150 feet to

300 feet deep.

The Reigning Family of Bikaner is of the Rathore clan of Rajputs, and the State was founded 101465 A.D. by Rao Bikaji, the eldest son of Rao Jodhaji, Ruler of Marwar (Jodhpur), and after him both the Capital and the State are named. Rai Rai Singhji, the first to receive the title of Rajah, of Akbar's most distinguished was " one Generals ' and it was during his reign that the present Fort of Bikaner was built in 1593. The title of Maharajah was conferred on Rajah Anup Singhji by the Mughal Emperor in 1687 in recognition of his distinguished services in the capture of Golconda. The conspicuous services of Maharajah Sardar Singhii who in the Indian Mutiny of 1857 personally led his troops to co-operate with the British forces in the field on the outbreak of the Mutiny was acknowledged by the Government of India by the transfer of the Sub-Tehsil of Tib, consisting of 41 villages

from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler, General His Highness Maharajadhiraj Raj Rajeshwar Narendra Maharajah Shiromani Sri Ganga Singhii Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., K.C.B., A.D.C., LL.D., is the 21st of a long Ωf distinguished rulers renowned for their bravery and statesmanship. He was born on the 13th October, 1880, and assumed full ruling powers in December, 1898. He was awarded the first class Kaisari-llind Medal for the active part he took in relieving the famine of 1899-1900, and soon after he went on active service to China in connection with the China War of 1900-1901 in command of his famous Ganga Risala and was mentioned in despatches and received the China Medal and K.C.I.R. The State Forces consist of the Army Headquarters with a strength of 7 Camel Corps, known as 'Ganga Risala,' whose sanctioned strength is 466 strong, an Infantry Battalion known as Sadul Light Infantry 819 strong, a Regiment of Cavalry known as Dungar Lancers 342 strong, including His Highness' Body Guard, a Battery of Artillery (4 guns 2.75°). 236 strong, two sections of Motor Machine Guns 100 strong and State Band 35 strong. The total strength of the Bikaner Army thus, excluding the Camel Battery 20 strong, armed with Machine Loading Guns and a Militia regiment 600 strong, the raising of which is under consideration, totals 1805. At outbreak of the Great War in totals 1805. At outbreak of the Great War in 1914, His Highness immediately placed the services of himself and his State forces and all the resources of the State at the disposal of His Imperial Majesty the King-Emperor, and the Ganga Risala reinforced by the Infantry Regiment which became incorporated in the Camel Corps in the field, rendered very valuable services in Egypt and Palestine. An extra force was also raised for internal security. His Highness personally went on active service in August 1914 and enjoys the honour of having fought both in France and Egypt, and thus has the distinction of having fought for the British Crown on three Continents, viz., Asia, Europe and Africa. He was mentioned in despatches both in Egypt and France. His Highness also played a very conspicuous political part during the period of the War when he went twice to Europe as the Representative of the Princes of India, once in 1917 to attend the meetings of the Imperial War Cabinet and Conference, and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty of Versailles. His Highness led the Indian Delegation to the 11th Assembly of the League of Nations at Geneva and represented the Indian States at the Imperial Conferences in 1930. His Highness played a conspicuous part in the Indian Bound Table Conference and the Federal Structure Sub-Committee both in 1937 & 1931 and attended the Silver Jubilee of the Reign of His Majesty King George V and the Coronation of His Majesty King George VI in 1985&1937 respectively. His Highness enjoys a salute of 19 guns (per-

His Highness enjoys a salute of 19 guns (personal) whilst the permanent local salute of the State is also 19. His Highness has also had the honour of being elected the first Chancellor of the Chamber of Princes, an office which he filled most creditably for 5 years till 1925.

Bhatianiji Her Highness Maharaniji Sri received the Imperial Order of the Crown of India on New Year's Day, 1935.

His Highness is assisted in the administration by a Prime Minister and an Executive Council. The post of Prime Minister is held by Colonel Sir Kailas Narain Haksar, Kt., C.I.E. LL.D. A Legislative Assembly was inaugurated in 1913, and consists of 45 Members, 20 out of whom are elected Members: it meets twice a

The revenues of the State are over a crore of rupees and a quarter. The State owns a large Railway system, the total mileage being 795.85. Work has started on a further extension from Sadulpur to Rewari, a distance of 86 miles, sanction to the construction of which was received from the Government of India in March 1987. This extension will form an important connection towards Delhi. Another project under contemplation is that from Sri Kolayatji to Sind via Jaisalmer, an approximate distance of 300 miles.

Hitherto there was practically no irrigation In the State, the crops depending only on the scanty rainfall; but the construction and opening in 1927 of the Gang Canal taken out from the Sutlej River has helped to protect about 6,20,000 acres of land in the northern suffered in the past. 3,34,977 bighas of the Canal land have already been sold and further sale is going on. Even larger expectations are held out from the Bhakra Dam Project from which it is hoped that the remaining level lands in the north of the State will be irrigated.

A coal mine is worked at Palana, 14 miles south from the Capital.

Alwar State is a hilly tract of land in the East of Rajputana. The Alwar Ruling House is the head in India of the Naruka cian who are descendants of 'Kush,' the eldest son of Shri Ram in the Solar dynasty. Raja Udai Karanji was the common auccestor of both the Alwar and the Jaipur Houses. Bar Singhji, the eldest son of Udai Karanji of Amer, renounced his Resident.—Lieut. Colonei G. V. B. Gillan, C.I.E.

right to succession in favour of his younger brother Nar Singhji. Nar Singhji's line founded Jaipur while in Bar Singhji's line Pratap Singhji founded the Alwar State. Pratap Singhji's successor Maharao Baja Bakhtawar Singhji entered into offensive and defensive alliance with the British Government in 1803. His successor Maharao Raja Viney Singhji rendered valuable services to British Government during mutiny. The Alwar State rendered very valuable services to the British Government during the China War, the Great War and the Afghan War and stood first in recruiting in Rajputana during the Great War. The population of the State in 1931 was nearly 71 lacs and the revenue is about 40 lacs. The present Ruler is His Highness Maharaja Shri Sewai Tei Singhii Bahadur.

Palanpur.—Palanpur is a first class State with an area of 1,774.64 square miles and a population of 2,65,424. The net revenue of the State calculated on the average of the last five years is about Rs. 11,65,000.

Licut.-Colonel His Highness Zubd-tul-Mulk Dewan Mahakhan Nawab Shri Taley Muhommed Khan Bahadur, G.C.I.E., R.C.V.O., A.D.C., Nawab Saheb of Palanpur, rules the State. The Ruling Family is of Afghan origin, belonging to the Lohani Stock, and had established their principality in Rajputana in the 14th century. The connection with the British may be said to have definitely begun from 1817 A.D., when Dewan Fatch Khan II entered into relations with the East India Company. A considerable trade in eight where these week below coater. trade in cloth, wheat, ghee, wool, hides, castor and rapesceds, sugar and rice is carried on in the State. The capital city of Palanpur is situated on the B. B. & C. I. Railway and is the junction station of the Palanpur State Railway. Palanpur is a very old settlement of which mention was made in the 8th century,

RAJPUTANA.

The How'ble the Resident in Rajputana.—The Hon. Mr. A. C. Lothian, C.S.I., C.J.E., 1.C.S.

CENTRAL INDIA AGENCY.

Indore.-The founder of the House of the Holkar of Indore was Malhar Rao Holkar, born in 1693. His soldierly qualities brought him to the front under the Peshwa, who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Rao Holkar who had been associated with her to carry the Military Administration and had in course of it distinguished himself in various battles. Tukoji Rao was succeeded by Kashirao, who was supplanted by Yeshwant Rao, his step-brother, a person of remarkable daring strategy as exhibited in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined armies of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the independence of Holkar State. During 1804-5 he had a protracted war with the British, closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights. Yeshwant Rao showed signs of insanity from 1808 onwards and succumbed to that malady in 1811, when he was succeeded by his minor son Malhar Rao II. During the Regency which followed, the power of the State was weakened by various causes, the most important of which was the refractory conduct of the Military Commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these Commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Peshwa, while the regent mother and her ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar Army which culminated in the latter's defeat. Holkar had to come to terms and a treaty

of peace and amity was signed in 1818. This Treaty still regulates the relations between the Crown and the Maharaja Holkar.

Malhar Rao died a premature death in 1883. Then followed the weak administration of Hari Rao and his son. In 1844 Tukoji Rao II ascended the Throne; but as he was a minor the administration was carried on by a Regency under Sir Robert Hamilton, the Resident, as its Adviser. The prosperity of the State revived a great deal during this administration and the progress was maintained after the Maharaja assumed powers in 1852. It was interrupted by the outbreak of the Mutiny in 1857 in British India. This wave of disaffection did not leave some of the State troops untouched. The Maharaja with his adherents and the remaining troops remained, however, staunch to the British and gave every possible assistance to the British authorities at Indore, Mhow and other places which was recognised by the British Govern-ment. The Maharaja died in 1886 after having effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. He was succeeded by Shivaji Rao who reigned for 16 years and will be specially remembered for his beneficent measures in matters of education, sanitation, medical relief and abolition of transit duties. Tukoji Rao III succeeded in 1903 while yet a minor. The Regency Administra-tion was continued till 1911 and it effected a number of reforms in all the branches of administration. The policy of the Regency was maintained by the Maharaja. With his assumption of powers the State advanced in education in general, including female education, commerce and industrial developments, municipal franchise and other representative institutions. This prosperity was specially reflected in the Indore City, the population of which rose by 40 per cent.

During the war of 1913 the State placed all its resources at the disposal of the British Government. Its troops took part in the various theatres of war and the contribution of the State towards the war and charitable funds in money was 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while the contribution from the Indore people amounted to over one erore. This assistance received the recognition of the British Government.

His Highness Maharaja Tukoji Rao III abdicated in favour of his son. The present Ruler, His Highness Maharajadhiraj Raj Rajeshwar Sawai Shree Yeshwant Rao Holkar Bahadur, G.C.I.E., was born on 6th September 1908. He received his education in England during 1920-23 and again at Christ Church College, Oxford, from 1928 till his return in 1929. He married a daughter of the Junior Chief of Kagai (Kolhapur) in February 1924. Her Highness Maharani Sanyogita Bai died in July 1937. His Highness's educational career at Oxford in England having come to an end, he returned to India arriving at Indore on the 12th November 1929, and after receiving administrative training assumed full ruling powers on the 9th May 1930.

The administration of the State is carried on by the Ruler assisted by the State Cabinet and the Prime Minister and other Ministers. The Prime Ministeris the President of the State Cabinet and the Chief Executive Authority. Wazir-ud-Dowlah Rai Bahadur Sir Seray Mal Bapna, Kt., C.I.E., has been the Prime Minister since February 1926.

The area of the State is 9,902 square miles with a revenue of about one crore and thirtyfive lakhs. According to the Consus of 1931 the population of the State is about 1,325,000, showing an increase of 14.5 per cent, over the Census figures of 1921.

There are two first grade Colleges in the City, one is maintained by the State and teaches up to M.A. and LL.B., the other is established by the Canadian Mission and teaches up to M.A. in Philosophy. The State has six High Schools, 1 Sanskrit College and 530 other educational and 76 medical institutions. An Institute of Plant Industry for the improvement of cotton is located at Indore. It has also 9 spinning and weaving mills.

The strength of the State Army is about 3,000. The State is traversed by the Holkar State Railway, the principal station of which is Indore, the B. B. & C. I. Railway and the U. B. Section of the G. I. P. Railway. Besides the trunk roads, there are 691 miles of roads constructed and maintained by the State. The reforms introduced recently are the establishment of State Savings Banks, a scheme of Life Insurance of State officials, establishment of the Indore Legislative Council (formerly known as the Indore Legislative Committee) consisting of 30 members, excluding the President and the Vice-President, of whom 15 are elected and 15 nominated, introduction of a scheme of Compulsory Primary Education in the City of Indore, measures for the expansion of education in the mofussil, a scheme for the formation of the Holkar State Executive Service, a scheme of water supply and main drainage in the Indore City, raising of the marriageable age of boys and girls to 18 years and 14 years respectively, and the passing of the Indore Nukta Act and the Marriage expenses Controlling Act for controlling expenditure on funeral coremonies and marriages.

The Chief imports are cloth, machinery, sugar, salt and kerosene oil. The total imports iu 1986-87 amounted to Rs. 2,09,68,927.

The chief exports are cotton, cloth, tobacco and cereals. The total exports in 1936-37 amounted to Rs. 68,00,283 exclusive of the exported produce of the Ginning and Pressing factories.

Cloth manufactured at the local mills is valued at over two crores and the local trade in wheat is estimated at one crore.

Cotton excise duty at 31 per cent. ad valorem has been abolished from 1st May 1926 and an industrial tax is levied on the cotton mills from the same date.

The City has a well equipped Power house and an aerodrome.

Bhopal.—The principal Mahommedan State in Central India ranks next in importance to Hyderabad among the Mahommedan States of India. The ruling family was founded by Sardar to Dost Mohammad Khan, Diler-Jung, a Tirah Afghan, who, after having served with distinction in the army of the Emperor Aurangaeb, obtained the pargans of the Moghal Empire, Rhopal the disingration of the Moghal Empire, Rhopal Hopal Highness was married in 1919 to the sister of the

part of the 19th Century the Nawab successfully withstood the inroads of Scindia and Bhonsla, and by the agreement of 1817 Bhopal undertook to assist the British with a contingent force and to co-operate against the Pindari bands. In 1818, a permanent treaty succeeded the agreement of 1817.

The present Ruler of the State, His Hignness Sikander Saulat Nawab Iftikharul-Mulk, Mo-hammad Hamidullah Khan Bahadur, G.C.S.I., G.C.I.E., C.V.O., B.A., succeeded his mother, Her late Highness Nawab Sultan Jahan Begam, on her abdication in May 1926. He had previously actively participated in the administration of the State for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice.

His Highness is assisted in the work of administration by an Executive Council consisting of the following five Members and a Secretary :-

Ali-Martabat, Motamid-us-Sultan, Rai Bahadur Raja Oudh Narain Bisarya, B.A., President and Member, State Council.

Members, State Council .- Ali-Martabat, Attimadul Mulk, Rafi-ul-Qadr, Ziaul-Uloom Mufti Mohammad Anwarul Haq, M.A., M.F.; All-Martabat, Mushirul-Mulk, Ali-Qadr, Kazil-Ali Haider Abbasi; Ali-Martabat, Dabir-ul-Mulk, Ali-Qadr, Mohammad Shuahb Qureshi, M.A., LL.B., BAR-AT-LAW; and Alimartabat, Aminul Mulk, Wala Qadr, Salamuddin Khan, B.A., LL.B.

Secretary .- Mir Dabir, Dabirul-Insha, Kazi Wali Mohammad (Offg.).

The work of legislation with the right of discussing the Budget, moving resolutions and interpollations rests with a representative Legislative Council inaugurated in 1927. The raiyatwari system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are extensive and valuable, and the arable area which comprises more than two-thirds of the total area consists mostly of good soil, producing cotton, wheat, other cereals, sugar-cane and tobacco. The State contains many remains of great archmological interest including the famous Sanchi Topes, which date from the 2nd Century B. C. and which were restored under the direction of Sir John Marshall. Sanchi Station on the G. I. P. main line to Delhi adjoins the Topes.

Among other troops, the State maintains one full strength Infantry Battalion. The Capital, Bhopal City, beautifully situated on the northern bank of an extensive lake, lies on the main broad-gauge line between Bombay and Delhl and is the junction for the Bhopal-Ujjain Section of the Great Indian Peninsula Railway.

Rewa .- Is the largest State in Central India Agency with an area of 13,000 square miles and a population of 1,587,445 (1981). The Rulers are Baghel Rajputs descended from the famous Solanki clan which ruled over Guirat from the 10th to 13th Century. During the mutiny the Durbar rendered meritorious services to Maharaja of Jodhpur. Upon the death of his father, Lt.-Col. Sir Venkat Raman Singhji Bahadur, G.C.S.I., on 30th October 1918. His Highness Bandhyesh Maharaja Sir Gulab Singh Bahadur succeeded to the Gadi on 31st October as a minor. His Highness Maharaja Sir Gulab Singh Bahadur attained majority in 1922 and was invested with full ruling powers by His Excellency the Viceroy. The Maharaja exercises full sovereignty within his State and the administration is now carried on by him with the help of a State Council of which His Highness himself is President. His Highness is very much interested in all-round progress of the State. He takes a keen interest in administration and development of agriculture and mineral resources. He has opened extensive tracts by construction of roads and bridges throughout the State. A State Bank-Bank of Baghelkhand-has recently been instituted. which has its branches all over the State. Highness is a keen sportsman and the number of tigers bagged by him totals over 537. His Highness has got a son and heir named Sri Yuvraj Maharai Kumar Martand Singhji born on 15th March 1923.

His Highness' second marriage with the daughter of H.H. the Maharaja of Kishengarh was performed on the 18th February 1925.

Dhar .- This State, in the Agency for Southern States in Central India, takes its name from the old city of Dhar, long famous as the capital of the Parmar Rajputs, who ruled over Malwa from ninth to the thirtcenth century and from whom the present Rulers of Dhar-Puar Marathas—claim descent. of the 18th century the middle Ruler of Dhar, Anand Rao, was one of the leading chiefs of Central India, sharing with Holkar and Scindia the rule of Malwa. The State came into treaty relations with the British Covernment in virtue of the treaty of 1819.

Lt.-Colonel H. H. the Maharaja Sir Udaji Rao

Puar Sahib Bahadur, K.C.S.I., K.C.V.O., K.C.S.I., K.C.V.I. 1926. There are 13 K.B.E., died on 30th July 1926. Feudatories and 9 Bhumias of whom 13 hold a guarantee from the British Government. SIKKIM.

by Tibet, on the south-east by Bhutan, on the south by the British district of Darjeeling and on the west by Nepal. The population consists of Bhutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas, which runs east and west, forms the boundary between Sikkim and Tibet. The Singalila and Chola ranges, which run southwards from the main tion of 1890 provision was made for the opening chain, separate Sikkim from Nepal on the of a trade mart but the results were disappoint west, and from Tibet and Bhutan on the east. In an another than the singulia range rise the great snow obligations resulted in 1904 in the despatch of a peaks of Kluchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much loftler than that of Singalila, leaves the main chain at the Dongkya La.

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814, the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by ary 1923. The average revenue is Rs. 5,20,422, a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British and received Rs. 12,000 annually in lieu of it. C.M.G., C.I E.

Sikkim is bounded on the north and north-east; The State was previously under the Government of Bengal, but was brought under the direct supervision of the Government of India in 1906. The State is thinly populated, the area being 2,818 square miles, and the population 109,651, chiefy Buddhists and Hindus. The most important crops are maize and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet. In the convenreat snow obligations resured in 1904 in the despated of a mission to Liasa, where a new convention was to fine of the mission to Liasa, where a new convention was to fill signed. Trade with the British has increased in the Since of the Lajas in the Rajas in the Highness Maharajah Sir Tashi Namgyal, the mission where the same trade of the constructed in recent years. The present ruler, the Rajas in the Highness Maharajah Sir Tashi Namgyal, K.C.I.E., was born in 1893 and succeeded in 1914, His Highness was invested with full ruling powers on the 5th April 1918. The title of a C.I.E. was conferred upon the Maharaja on the 1st January 1918 and K.C.I.E. on 1st Janu-

are nominally two supreme authorities; the Dharma Raja, known as Shapting Renipoche, the spiritual head; and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raia a year or two is allowed to clause. and his reincarnation then takes place, always in the Choje, or royal family of Bhutan.

Cultivation is backward and the chief crop is

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Dir, Swat and Chitrai. The area of the latter three is 3,000, 1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively.

Amb .- Is only a village on the western bank of the Indus in Independent Tanawala.

Chitral .- Runs from Lowarai top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nivam-ul-Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umrakhan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1, 1895) to their reliet.

The valleys of which the State consist are extremely fertile and continuously cuitivated. The internal administration of the country is conducted by His Highness Capt. Molid. Nasir-ul-Mulk, the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand. The ruler proceeded on pilgrimage to Mecca in February 1939.

Dir.-The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non-Pathan luhabitants being now confined to the upper portion of the Panjkora Valley known as Dir Kohistan. A motor road has been constructed to Dir from Malakand,

Swat .- The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, K.B.E., is a descendnt of the famous Akhund Sahib of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wall of Swat in 1926. The area of the State is 4,800 square miles and population 300,000. The Headquarters of the State is at Saidu Sharif about 38 miles from Malakand and connected with Malakand by motor road.

Political Agent for Dir, Swat and Chitral-Major E. H. Cobb, C.I.E., I.A.

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency includes 5 The Indian States covering an area of 10,644 square with miles. Of these, the States of Travancore and 1923. Madras Presidency includes Cochin represent ancient Hindu dynasties. called the Tondiman, Banganapalle and Sandur of 5,095,973 with a revenue of Rs. 261 lakhs. two petty States, of which the first is ruled by a Nawab, lie in the centre of two British districts.

Name.	Area sq. miles.	Popula- tion.	Estimated Gross Revenue in lakhs of rupees.
Travancore Cochin Pudukottai	7,625 1,480	5,095,973 1,205,018	245.28 87.58 20.47
Banganapalle . Sandur	1,179 275 167	400,694 39,239 18,583	3.65 1.53

*The States of Banganapalle and Sandur have been transferred to the Political chagre effect from 1-1-39.

These States were brought into direct relation with the Clovernment of India on October 1st,

Travancore.-This State, which has an Pudukottal is the inheritance of the chieftain area of 7,625 square miles and a population occupies the south-west portion of the Indian Peninsula, forming an irregular triangle with its apex at Cape Comorin. The early history of Travancore is in great part traditional; but there is little doubt that H. H. the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time in Southern India. The petty chiefs, who had subsequently set up as independent rulers within the State. were all subdued, and the whole country, in-cluded within its boundaries, was consolidated and brought under one rule, by Maha-raja Marthanda Varma (1729-58). The English first settled at Anjengo, a few miles to the north of the Hon'ble the Resident in Mysore with of Trivandrum, and built a factory there in 1084. In the wars in which the East India

Company were engaged in Madura and Tinne-; halled all the world over as a great piece of velly, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. To protect the State from possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded, by which the Company agreed to protect Travancore from all foreign enemies. In 1805 the annual subsidy to be paid by Travancore was fixed at 8 lakhs of rupees.

H. H. the Maharaja (b. 7th November 1912) ascended the masnad on the 1st September 1924. During the minority the State was ruled by Her During the minority the State was ruled by Hor Highness Maharani Setu Lakshmi Bai, C.I., aunt of the Maharaja, as Regent on his behalf. His Highness was invested with ruling powers on the 6th November 1931. The work of legislation was entrusted to a Legislative Council established as early as 1888. The Legislature was last re-constituted in January 1938, when a bicameral body was instituted. The new Chambers, viz., the Sri Mulam Assembly and Chambers, etz., the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual Budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers will be settled by a Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature.

Local Self-Government on a small scale exists in the more important towns. The State has joined the Indian State Forces Scheme and supports a military force of 1,906 men. H. II. The Maharaja is Colonella-Chief of the Travancore State Forces. Education has advanced considerably in recent years and the State takes a leading place in that respect. In the matter of female education the State has a leading place among Indian States and the British Indian Province. According to the census of 1931, the number of literates per 100 of the population excluding children under 5 years of age is 28.9. For males the figures are 40.8 per 100 and for female 10.8. The princi pal food-grain grown is rice, but the main source of agricultural wealth is the coccanut. Other crops are pepper, arcca-nut, jack-fruit sugar-cane and taploca. Rubber and tea are among other important products. Cotton weaving and the making of matting from the colr are among the chief industries. Within recent years a fillip has been given to the development of industries as well as the arts and crafts of the State: The Pallivasal Hydro-electric works, the Rubber factory in Trivandrum, the contemplated China clay and Porcelain factory and the addition of an Art Gallery named Chithralayam at Trivandrum are the results of the new policy initiated by Ris Highness the Maharaja, in November 1986 His Highness the Maharaja issued the historic

social and religious reform. His Highness evinces great interest in matters connected with art and culture and his recent tour of the Dutch East Indies was undertaken primarily with the purpose of studying the cultural and artistic influences of ancient India on the people of the Islands of Java. Ball and Sumatra.

By another Proclamation in the November of 1937, a University designed in addition to ordinity studies specially to promote technological studies and research has been established. The Government of His Highness have taken in hand the first instalment of a scheme of nationall; ing the transport system of the State and have established the Travancore Credit Bank for extending long-term loans to the agriculturists and small industrialists of the State. The Andhra and Benares Universities have conferred Honorary degrees on His Highness and His mother Her Highness Maharani Sethu Parvathi Bai. The State is well provided with roads, and with a natural system of back-waters, besides canals and rivers navigable for country crafts. One line of rallway about one hundred miles in length cuts across the State from east to west and then runs along the Coast to the Capital. The capital is Trivandrum. There exists a weekly air mail service between Bombay and Trivandrum, and Trivandrum and Trichinopoly which is on the Madras Colombo Air Mail route.

Dewan-Sachivottama Sir C. P. Ramaswami Aiyar, K.C.I.E.

Cochin .- This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal, who governed the whole country of Kerala, including Travancore and Malabar, as Vicercy of the Chola Kings about the beginning of the ninth century, and afterwards esta-blished himself as an independent Ruler. In 1502, the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the earlier wars with the Zamorin of Calicut, they assisted the Rajas of Cochin. The influence of the Portuguess on the west coast began to decline about the latter part of the seventeenth century, and in 1663 they were ousted from the town of Cochin by the Dutch with whom the Baja entered into friendly relations. About a century later, in 1750, when the Dutch power began to decline, the Raja was attacked by the Zamo-rin of Callent, who was expelled with the assistance of the Raja of Travancore. In 1776, the State was conquered by Hyder All, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu and to pay a subsidy.

His Highness Shri Sir Rama Varmah, G.C.I.E., who ascended the throne in January 1915 having Tample Entry Proclamation which has been demised on 25th March 1982, His Highness Shri

Sir Rama Varma, G.C.I.E., LL.D., who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932. The administration is conducted under the control of the Maharaja whose chief Minister and Executive officer is the Dewan, Sir R. K. Shanmukham Chetty, K.C.I.E. in relation to "reserved subjects" and the Minister, Dr. A. R. Menon, M.B.Ch.B. (Edin) responsible to the Legislature appointed under the Government Cochin Act in relation to 'Transferred subjects, The forests of Cochin most valuable assets, form one of its They abound teak, ebony, blackwood, and other valuable trees. Rice forms the staple of cultivation. Coconnuts are largely raised in the sandy tracts and their products from the chief exports of the State. Communications by road and back-waters are good, and the State owns a line of railway from Shoranore to Erna-kulam, the capital of the State, and a Forest Steam Tramway used in developing the forests. The State supports a force of 113 officers and 573 men.

Resident for Madras States .- Lt, -Col G. P. Murphy.

Pudukkottai.-This State is bounded on the north and west by Trichinopoly, on the south by Ramnad and on the east by Tanjore. In early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. Relations with the English began during the Carnatic wars. During the siege of Trichinopoly by the French in 1752, the Tondiman of the time did good service to the Company's cause by sending them provisions, although his own country was on at least one occasion ravaged as a consequence of his fidelity to the English. In 1750 he sent some of his troops to assist Muham and Yusuf, the Company's sepoy commandant, in settling the Madura and Tinnevelle countries. Subsequently he was of much service in the wars with Haidar Ali. His services were rewarded by a grant of territory subject to the conditions that the district should not be alienated (1806). Apart from that there is no treaty or arrangement with the Raja. Ills Highness Sri Brihadamba Das Raja Rajagopala Tondiman Bahadur, the present ruler, is a minor. He was installed as Raja on 19-11-28. The administration of the State is carried on by an Administrator. The various departments are constituted on the British India model. The principal food crop is rice. The forests which cover about one-seventh of the State, contain only small timber. 'There are no large industries. The State is well provided with roads, but Pudukkottai is the only municipal town in the State.

Resident for the Madras States .- Lt. Col.

G. P. Murphy.

Banganapalle.-This State, whose area 275 square miles, is in two detached portions which in the 18th century passed from Hyderabad to Mysore and back again to Hyderabad. The control over it was coded to the Madras Govern-ment by the Nizam in 1800. The present Ruler is Nawab Mir Fazle-eAll-Khan Bahadur, who enjoys a salute of 9 guns and is a member of the Chamber of Princes in his own right. The Nawab pays no tribute to the Crown and maintains no military force. The chief food-grain is cholam. The revenue of the State is nearly 4 lakhs. From the 1st January 1939 the State has been transferred from the political charge of the Resident for the Madras States to that of the Hon'ble the Resident in Mysore.

Resident .- The Hon'ble Lieut, Colonel J.-de-la Hay Gordon, C.I.E., O.B.E., M.C.

Dewan,-Mr. Humayun Mirza.

Sandur .--Sandur is the only Mahratta State in South India and in political relations with the Government of India through the Resident at Trivandrum. The State was conquered in early eightcenth century by Siddoji Rao, ancestor of the present Ruler from a poligar of the Bedar tribe. During the time of his son and successor, Morar Rao, the State reached the zenith of its territorial expansion. In the Carnatic and Mysore wars Morar Rao was the staunchest ally of the British The State came into political relations with the British in 1818. The Ruler exercises powers of life and death. In 1876 the proper style of address of the Ruler was acknowledged by the Government of India. This is one of the 146 Important States which received Canning's Sanad of Adoption in 1862. The Ruler also has vested interests in Gajendragad, a jaghir in Bombay Presidency, held on his behalf by certain junior members of his family. The State pays no tribute to the Crown. The Ruler is the fountain-head of all authority—judiclal, legisla-tive and executive. He has established an independent Chief Court presided over by the seniormost member of the Madras judicial service, whose services have been lent to the State under a special arrangement with the Madras Government. There is a State Council to initiate all legislative measures and an Executive Council in charge of the administration.

The State has mineral deposits of the first

quality, especially manganese. The forests abound in sandalwood which is as rich in oilcontent as that of Mysore.

The present Ruler is Raja Shrimant Yeshwant Rao Hindurao Ghorpade Mamlakat-Ruler is Raja Shrimant madar Scnapathi.

President of the Executive Council :- Shrimant Sardar B. Y. Raje Ghorpade.

Resident :-- C. P. Skrine, Esq., O.B.E., I.C.S.

STATES OF WESTERN INDIA.

Western India States Agency.—Kathlawar for the Gir forest, where there exist the in which the majority of the States in this Agency are situated is the peninsula lying immediately to the north of Gujerat in the unusual in that besides the normal system of Bombay Presidency. Its extremo length is about 220 miles and its greatest breadth about 165 miles, while the total area is about 23,445 aq. miles. It is for the most part flat except!

unusual in that besides the normal system of Salute States in political relations with the Resident and non-salute States in political relations with the Political Agents of the subordinate agencies, there are administered areas, which include the Civil Stations of Rajkot, Wadhwan and Sadra, and groups of innumerable petty estates, known as "Thanas". The latter are under the direct supervision of the Political Agents. These "Thanas" were originally off-shoots of larger States, but owing to the system of successive holders dividing their heritage amongst all their heirs, a custom prevalent amongst the Kathis, who give their name to the province, they have become so sub-divided as to render impractical the normal administration and the exercise of any jurisdictional powers by each individual holder. The Agency has, therefore, assumed their powers and carries out the administration on their behalf.

The history of the British connection with Kathlawar commences with Colonel Walker's settlement of 1807. In 1863 the States were divided into seven classes and although these have since been abolished, the jurisdictions fixed in that year still remain graded.

Formerly the Political Administration of the Wostern India States was theres ponsibility of the Government of Bombay. The transfer of States to direct political relations with the Government of India, a change which was advocated in the Montague-Chelmsford Report on Constitutional Reforms, was not carried out until 1924. The first stage in the process was the creation of a new Agency in direct relation with the Government of India, known as the Western India States Agency. This Agency comprised the whole of the area containing the old Kathlawar, Cutch and Palanpur Agencies.

The other States in the Bombay Presidency, which for the time being remained in political relations with the Government of Bombay, were transferred to the control of the Government of India with effect from the 1st April 1933. This transfer necessitated the regrouping, not only of the remaining Bombay States, but also of some of the States of the Western India States Agoncy. The States of Danta and Palanpur were included in the Rajputana Agency; the former having been part of the old Mahi Kantha Agency and the latter part of the Western India States Agoncy. The States and estates of the Mahi Kantha and Banas Kantha Agencies were united in the present Saber Kantha Agency, the third subordinate Agency of the Western India States Agency.

The headquarters of the Western India States Agency are situated at Rajkot, which has been the seat of the Bepresentative of the Government for over 100 years, in the Rajkot Civil Station which was first leased from the Rajkot State in 1863. The personnel of the Headquarters is as follows:—

Resident for the States of Western India: The Hon'ble Mr. E. C. Gibson, C.I.E., I.P.S.

Judicial Commissioner in the States of Western India: D. R. Norman, I.C.S.

Secretary to the Hon'ble the Resident: Major E. W. Fletcher.

The Salute States in this Agency are 17 in number, namely:—

1. Cutch State, 2. Idar State, 3. Junagadh State, 4. Nawanagar State, 5. Bhavnagar State, 5. Porbander State, 7. Dhrangadhra State.

8. Radhanpur State, 9. Morvi State, 10. Gondal State, 11. Jafrabad (Janjira State) 12. Wakamer State, 13. Palitana State, 14. Dhrol State, 15. Limbdi State, 16. Rajkot State, and 17, Wadhwan State,

The subordinate agencies are three in number, namely:--

Western Kathiawar Agency, Kastern Kathiawar Agency, and

Sabar Kantha Arency.

Western Kathiawar Agency.—The Western Kathiawar Agency, with Headquarters at Rajkot Civil Station, was constituted by the amalgamation in 1923 of two (Sorath and Halar) out of the four Prants or Districts into which the province of Kathiawar was formerly divided. The combined district which was at first named "The Western Kathiawar States" was given its present designation in 1927.

The Agency contains 47 non-salute jurisdictional States and Talukas and four Thana circles. Jurisdictional States in direct political relations with the Political Agent include;—

Jasdan, Manavadar, Thana-Devli, Vadia, Virpur, Malia, Kotda-Sangani, Jetpur, Bilkha and Khirasra.

Political Agent: A. J. Hopkinson, C.I.E., I.C.S.

Eastern Kathiawar Agency.—The Eastern Kathiawar Agency, with Headquarters at Wadhwan Civil Station, was constituted in 1923 by combining the two Prants of Jhalawad and Goholwad. The combined District was first styled "The Eastern Kathiawar States" and was given it present designation in 1927. The administration and constitution are similar to those prevailing in the Western Kathiawar Agency.

The Agency contains 15 non-salute jurisdictional States and Talukas and 7 Thana Circles.

Among jurisdictional States in direct political relations with the Political Agent, Eastern Kathiawar Agency, the following are prominent:—

Lakhtar, Sayla, Chuda, Vala, Lathi, Muli, Bajana and Patdi.

Political Agent: Lt. Col. H. M. Wightwick, I.A.

Saber Kantha Agency.—The Saber Kantha Agency, with Headquarters at Sadra Civil Station, was constituted by the amalgamation of the Mahi Kantha and Banas Kantha Agencies. Previous to 1933 the administration of these two agencies was on the usual lines with a Political Agent in charge of each, while after that date the organisation was assimilated to that of the other two agencies.

The Agency contains 46 jurisdictional nonsalute States and eight Thana Circles.

Among Chiefs in direct relations with the Political Agent, the States of Maipur, Mansa and Mohanpur in the Sadra Division and those of Tharad and Wao in the Banas Division are prominent.

Political Agent: Captain L. W. Wooldridge. Bhavangar.—This State lies at the head and west side of the Gulf of Cambay. The Gohei Rajputa, to which tribe the Ruler of Bhavangar belongs, are said to have settled in the country

about the year 1260, under Sajakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectively the rulers of Bhavnagar, Lathi and Palitana. An intimate connexion was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates which infested the neighbouring seas, The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gackwar; but the various claims over Bhavnagar were consolidated in the hands of the British Government in 1807. The State pays an annual tribute of Rs. 1,28,060 to the British Government, Rs. 3,581.8-0 as Peshkashi to Baroda and Rs. 22,858 as Zortalbi to Junagadh. His Highness Maharaja Krishna Kumarsinhii succeeded to the gadi on the death of his father, Maharaja Sir Bhavsinhji, K.C.S.I., on 17th July 1919 and was invested with full powers on 18th April 1981. The State Council consisted of Sir Prabhashankar D. Pattani, K.O.I.E., as President. The other members of the Council were Dewan Bahadur T. K. Trivedi, Khan Bahadur S. A. Goghawala, Wa LI.R. Represt. Lawand Mr. A. P. Pattani M.A., LL.B., Barat-Law and Mr. A. P. Pattani, M.A. (Cantab.). This Council was abolished from November 10th, 1937 and Diwanate system room rovember 10th, 185' and Diwanate system was introduced with Mr. A. P. Pattani, M.A. (Cantab.), as Dewan, Mr. N.M. Surti, B.A., LL.B., as Nalb Dewan, Mr. B. V. Mehts, M.A., LL.B., as Nalb Dewan, Mr. B. V. Mehts, M.A., LL.B., as Personal Arsistant and Mr. H. M. Trivedi, B.A., LL.B., as Personal Assistant. One noteworthy feature of the administration is the complete separation of judicial from executive functions and the decentralisation of authority is another. The authority and powers of all the Heads of Departments have been clearly defined, and each within his own sphere is independent of the others being directly responsible to the Dewan.

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and brass vessels and cloth. The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town and port of Bhavnagar, which has a good and safe harbour for shipping and carried on an extensive trade as one of the principal markets and harbours of export for cotton in Kathiawar. Bhavnagar supports Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whom 86 per cent. were Hindus and 8 per cent. Mahomedans. The average income for the last ave years was Rs. 1,27,12,329, exclusive of Railway income, and the average expenditure Rs. 1,37,04,325.

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles exclusive of the Dhrangadhra portion of the Runn of Cutch. The ruler of Dhrangadhra is the had of Cuten. The ruler of Dhirangaonra is she head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput cian is of great antiquity having migrated to Kathlawar from the North, establishing itself first at Patri in the Almedabed District, thence moving to Makvad and Small matthins in the Treatent seat

into that Peninsula, but after suffering the various vicissitudes of war they were confirmed in their possession of Halvad, its surrounding territories and the salt-pans attached thereto by an Imperial Firman issued by Emperor Aurangzeb. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than-Lakhtar are off-shoots from Dhrangadhra. Major His Highness Maharaja Maharana Shri Sir Ghanshyamsinhil, G.C.I.E., K.O.S.I., Maharaja Raj Saheb, is the ruler of the State and the titular head of all the Jhalas. The administration is conducted under the Maharaja's directions by an officiating Dewan Mr. Mahaprasad W. Arvind, B.A., LL.B. The soil being eminently fit for cotton cultivation, the principal crops are long stapled cotton and cereals of various kinds. Excellent building and ornsmental stone is quarried from the hills situated within the State. Wadagara Salt of an excellent quality with Magnesium Chloride and other bysproducts of salt are also manufactured in the State Salt Works at Kuda which offer practically inexhaustible supplies for their manufacture. To utilize these valuable resources, the State built a huge factory in Dhrangadhra, known as the Shri Shakti Alkaii Works, for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye-products of salt. The capital town is Dhrangadhra, a fortified town, 75 miles west of Ahmedabad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Haivad, a distance of 40 miles, which is worked by the B. B. & C. I. Raliway. An extension of this line to Mailya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda-a distance of 11 miles-to facilitate the salt traffic.

Gondal State .- The Ruling Prince Gondal is a Rajput of the Jadeja stock with the title of H. H. Maharaja Thakore Saheb, the preuses of R. R. manaraja I nakore Saneb, the present Ruler being H. H. Shri Bhagwat Sinhij, G.O.S.I., G.C.I.S. The early founder of the State Kumbhoji I had a modest estate of 20 villages. Kumbhoji II, the most powerful Chief of the House, widened the territories to almost their present limits by conquest; but it was left to the present ruler to develop its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State."
The State pays a tribute of Rs. 1,10,721.
The chief products are cotton, groundnuts and grain and the chief manufactures are cotton and woollen fabrics and gold embroidery. Gondal has always been eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the earliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa-Dhoraji line. It owns the initiated the Dhasa-Dhoraji line. It owns the Dhasa-Jam Jodhpur section called the Gondal Railway with its Kunkavav Bagasra Extension and manages it along with the Porbandar State Railway and the Jetalsar-Rajkot Railway subsequently built in partnership with other Native States in Kathlawar. There are no export and import dues, the people being free from taxes and dues. Gondal Haivad and finally settling in its present seat. If ree from taxes and dues. Gondal Being the guardians of the North-Eastern marches of Kathiawar they had to suffer repeatedly of the spread of education, female education from the successive inroads of the Mahomedans have been spent on irrigation tanks and canals water supply and electricity to the towns of Gondal, Dhoraji and Upleta. The capital is Gondal, a fortified town on the line between Ralkot and Jetalson.

Junagadh State .- A first class State under the Western India States Agency and lies in the South-Western portion of the Kathlawar Peninsula between 24°-44' and 21°-53' North latitude: 70° and 72° East longitude with the Halar division of the province as its northern boundary and Gohilwad Prant to its east. It is bounded on the south and west by the Arabian Sea. The State is divided into 12 Mahals. It has 16 ports of which the principal are Veraval, Mangrol, and Nawabandar. The principalrivers in the State are the Bhadar, Uben, Ozat, Hiran, Saraswati, Machbundri, Singaoda, Meghal, Vrajmi, Raval and Sabli. The principal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and the Datar Hills, while in antiquity and his-torical interest it yields to none. The Upperkote or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honey-combed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka in-scription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill, which is sacred at the foot of the Girnar Hill, which is sacred to the Jains, the Shivaties, the Valsinavites and other Hindus. To the south-east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 gunthas. It supplies tim-ber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian tion. The area of the State is 3,337 square miles and the average revenue amounts to about Rs. 1,00,00,000. The total population according to the census of 1931 is 545,152. Until 1472 when it was conquered by Sultan Mahomed Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chuda Sama tribe. During the reign of the Emperor Akbar it became a dependency of Delhi under the immediate authority of the Moghal Vicercy of Gujarat. About 1735 when the representative of the Moghals had lost his authority in Gujarat, Sherkhan Babi, the ancestor of the present Babi Ruler, expelled the Moghal Governor, and established his own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, juwar, sesamum, wheat, rice, sugar-cane, cereals, grass, timber, stone, castor-seed, fish, country tobacco, groundnuts, cocoanuts, bamboos, etc., while those of manufacture are give, molasses, sugar-candy, copper, and brassware, dyed cloth, gold and silver embroldery, pottery hardware, leather, bamboo furniture, etc. The State pays a tribute of Rs. 28,394 annually to the Persmount Power and Peshkashi of Rs. 37,210 to His Highness the Gaekwar; on the other hand, the State of Junagadh receives a tribute styled Zortabl amounting to Rs. 92,421 from not less than 134 States and Talukas, a relic of the days of Mahomeodan supremacy. The State maintains State forces consisting of Lancers and the Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 219 inclusive of Bag-pipe Band.

The present Nawab is Captain His Highness Sir Mahabat Khun III, G.C.I.E., K.C.S.I., who is the inith in succession and seventin in descent from His Highness Bahadurkhanji I, the founder of the Babi-Family of Junagadh in 1735 A.D. His Highness the Nawab Saheb was born on 2nd August 1900 and succeeded to the gadi in 1911.

Ruler:—Captain His Highness Sir Mahabat Khanji Rasulkhanji, G.O.I.E., K.C.S.I.

Herr-Apparent—Shahzada Mah o m e d Dilawarkhanji, 2nd Shahzada Mahomed Himatkhanji.

President of the Council.—J. Monteath, Esq. C.I.E., 1.0.8. (Retd.)

Nawanagar State, on the southern shore of the Gulf of Cutch, has an area of 3,791 square miles. The Maharaja of Navanagar is a Jadeja Rajput by caste, and belongs to the same family as the Rao of Cutch. The Jadejas originally entered Kathiawar from Cutch, and dispossessed the ancient family of Jethwas then established at Ghumli. The town of Jamnagar was founded in 1540. The present Jam Saheb is Lieut.-Colonel His Highness Maharaja Jam Shri Digyijayasinliji Saheb, G.C.L.E., K.C.S.L. A.D.C., who succeeded in April 1933. The principal products are grain, cotton and oil-seeds shipped from the ports of the State, A.D.C., who was a superscript of the State, A.D.C., who was a superscript of the State, A.D.C., who was a superscript of the s small pearl fishery lies off the coast. The State pays a tribute of Rs. 1,20,093 jointly to per annum jointly to the British Government, the Gaekwar of Baroda and the Nawab of Zortalbi to Junagadh. maintains two squadrons The State Nawanagar State Lancers and 11 company, of the State Infantry. The capital is Jammagar, a flourishing place, nearly 4 miles in circuit. situated 5 miles east of the port of Bedi, a modern port affording all facilities. The State owns a Railway which traverses through its entire territory and is part of the Railway system connecting the Peninsula with the mainland. Population 4.09.192. Revenue nearly Rs. 94 lakhs.

Dewan:-Khan Bahadur Merwanji Pestonji, B.A., LL.B.

Military Secretary and Home Member-Col. R. K. Himmatsinhji.

Personal Assistant,-Capt. Geoffrey Clarke.

Cutch.—The State is bounded on the north and north-west by Sind, on the east by the Palanpur Agency, on the south by the Peninsula of Kathiawar and the Gulf of Cutch and the south-west by the Indian Ocean. Its area, exclusive of the great salt marsh called the Rann of Cutch, is 8,249 square miles. The capital is Bhuj, where the ruling Chief (the Maharao) His Highness Maha Rao Sri Khengarji Saval Bahadur, G.Calt, G.C.L.B., resides. From its isolated position, the special characteristic of its people, their peculiar dialect, and their atrong feeling of personal loyalty to their

ruler, the peninsula of Cutch of the elements of a distinct nationality than any other of the dependencies of Bombay. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Sind tribe of Samma Rajputs in the fourteenth century. The section of the Sammas forming the ruling family in Cutch were known as the Jadejas or 'children of Jada'. The British made a treaty with the State in 1815. There is a fair proportion of good arable soil in Cutch. and wheat, barley and cotton are cultivated. Both iron and coal are found but are not worked. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea. The ruling chief is the supreme authority. A few of the Bhayats are invested with jurisdictional powers in varying degrees in their own estates and over their own ryots. A notable fact in connection with the administration of the Cutch State is the number and position of the Bhayat. These are Rajput nobles forming the brotherwood of the Maha Rao. They were granted a share in the territories of the ruling chief as provision for their maintenance and are bound to furnish troops on an emergency. The number of these chiefs is 137. and the total number of the Jadeja tribe in Cutch is about 16,000. The British military force having been withdrawn from Bhu, the State now pays Rs. 82,257 annually as an Anjar equivalent to the British Government. The military force consists of about 1,000 in addition to which, there are some irregular infantry, and the Bhayats could turnish on requisition a mixed force of four thousand.

Porbandar.—The Porbandar State on the Western Coast of the province of Kathiawar comprises an area of 642½ square miles and has a population of 1,15,741 souls according to the Census of 1931. The capital of the State is Porbandar, a flourishing port having trade connections with Java, Burma, Perslan Gulf, Africa and the important Continental Ports. The State has its own Rallway. The well-known Porbandar stone is Quarried in the Barda Hills near Adityana and is largely exported to important places in as well as outside India. Porbandar Ghee (butter) has also a reputation of its own and is largely exported to Africa. The Indian Cement Factory of Messrs. Tata & Sons was established at Porbandar in 1912. It manufactures Ganapati Brand Portland cement which has stood keen competition. Among more recent industries may be mentioned the establishment of the Nadir Salt Works, the Maharana Spinning and Weaving Mill, the Natwar Match Works and the Hosiery Works. The State maintains a Military Force. Porbandar is the terminus of the Air Services of India Ltd.

His Highness Maharaja Rana Saheb Shri Sir Natwarsinhil Bahadur, K.O.S.I., is the present Ruler of the State. Born on the 30th June 1901. His Highness ascended the gadi on the 26th January 1920 and has married Princess Rupaliba Saheb, M.B.E., of Limbdi.

Radhampur is a first-class State, with an area of 1,150 square miles, which is held by a branch

has more of the illustrious Babi family, who since the nationality of eight of Humayun have always been prominent in the annals of Gujarut. The present Kuler in the Amals of Gujarut. The present Kuler is His Highness Nawab Murtuzakhanji Jor. Varkhanji Nawab Saheb of Radihanyt the Sind pur. The State maintains a Police force teach the control of 176. The principal products are cotton, wheat and grain. The capital is Radhanpur wheat and grain. The capital is Radhanpur wheat and grain. The capital is Radhanpur country and grain factory at Munipur and one at cultivated. Sankesiwar which is a great centre of Jain not worked. Sankesiwar which is a great centre of Jain pligrimage all the year round. Gotarka, Dev and Traked Lotl are also the principal places of silk and pligrimage for Mahommedans, Vaishnavas and Brainmins, respectively.

There are several ancient monuments in the State, viz., Fatchkote at Radhanpur, Jhalore's Teba at Subapure, Loteshvara Mahadev at Loti, Sankheshvara temple at Sankheshvara, Waghel tank at Waghel, Varanatha place at Waghel Tatleshwar Mahadev at Fatchpur, Rajaypura Bhotava, Old Masjid at Munjpur, Piace of Ashan at Gotarka, Mahabali Pir's Dargah at Gotarka and Nilkantha Mahadev at Kunwar.

Idar.—Idar is a first-class State with an area of 1,669 square miles and an average revenue of about 20 lakhs. The present Ruler of Idar H. H. Maharaja Shri Himmat Singhii is a Rajput of the Rathod clan. He was born in 1899 A.D. and ascended the gadi in 1931 on the demise of His late Highness Maharaja Sir Dowlat Singhji. His Highness accompanied His late Highness Lt-Col. Sir Dowlat Singhii to Europe when the latter went to attend the Coronation of His Majesty the King-Emperor in London and acted as Page to his Imperial Majesty at the Coronation Darbar held at Delhi in 1911. The subordinate Feudatory Jagirdars are divided into three classes. The Jagirdars comprised in the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pattawats are descendants of the military leaders who accompanied Anand Singhiji and Rai Singhiji, the founder of the present Marwar dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Shiv Singhji in 1741 A.D. on condition of military service. In the case of the Bhoomias are included all subordinate Feudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired by their ancestors by grant from the former Bao Rulers of the State. The Maharaja receives Rs. 52,427 annually on account of Khichdi and other Raj Haks from his subordinate Sardars the tributary talutas of the Mahi Kantha Agency and others and pays Bs. 80,840 as Ghasdana to Gaekwar of Baroda through the British Government,

Vijaynagar.-The State has an area of 135 square miles with a population of 8,491 and an annual revenue of about Rs. 93,859. The Ruler is Rathod Bajput. His ancestors having left Idar, established their rule in Pola after having conquered the Padhiar Rajputs of that place. The State enjoys full plenary powers and pays no tribute to any authority, but on the contrary receives Chauth, Tika, Hathgarna

and other Haks from Idar. The present Ruler is Rao Shri Hamnirsinhii Hindusinhii. He was born on 3rd January 1904 and succeeded to the gadi in 1916. The Ruler has no salute but on account of the historic importance of the family he enjoyed rank above the Ruler of the salute State of Danta in the old Mahi Kantha Agency.

Rewa Kantha Agency.—Including the Surgana State and the Dangs.

This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non-salute States and Estates of the Old Rewa Kantha Agency, the State of Surgans, previously in the Nasik Agency, and the petty states known as the Dangs, previously in the Surat Agency.

Rewa Kantha means the district or province situated on the banks of the river Rews or Narmada or Narbada. This river is held in high veneration among the Hindus especially in the Bombay Presidency.

All the States comprised in the Province of Rews Kantha are not on the banks of Narbada, for some of the Northern States, i.e., Kadana and the States in Pandu Mewas are on the banks of the Mahi river. In fact the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers.

The population consists of the following main classes: Hindus, Jains, Musalmans, Animistic Bhils, Dhankas, Kolis and Naikdas.

The Dangs consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty Chiefs.
Of these 13 are Bhils and 1 a Kokani.

The headquarters of the Agency, which is situated at the Baroda Residency in view of the fact that the Sccretary to the Resident at Baroda and the Guierat States is also ex-officio Political Agent of this Agency, consist of :-

Political Agent .- M. Worth, Esq., I.C.S.

Deputy Political. Agent -- Kumar Shri Banesinhji J. Jhala. Political Agent for the Dangs .--

Deputy Political Agen Mr. E. O. Sampson, M.B.E.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The four Chiefs of Kadana, Bhaderwa, Surgana and Jambughoda are however, larger and more important, the first three named being included in the list of electorates for representative members of the Chamber of Princes.

Colleges, the growing importance of modern testify to the growing importance of modern Kolhapur and to its progressive administration

Janjira .- This State is situated to the South of the Kolaba District of the Bombay Presidency. The most noticeable point in its history is the successful resistance that it alone, of all the States of Western India, made against the deter-mined attacks of the Marathas. The British, on succeeding the Marathas as masters of the Konkan, refrained from interfering in the administration of the State. The Chief is a Sunni Mohammedan, with a title of Nawab. He has a Sanad guaranteeing succession according to Mahommedan law and pays no tribute. The last ruler, H. H. Nawab Sidi Sir Ahmed Khan G.C.I.E., died on 2nd May 1922, and was succeed-ed by his son, His Highness Sidi Muhammad Khan born on the 7th March 1914. The State was under a minority administration until 9th November 1933 when His Highness the present Nawab was invested with ruling powers. The area of the State is 379 square miles, and the oppulation 1,10,388. The average revenue is about 11 lakhs including that derived from a small dependency named Jafarabad in the south of Kathiawar under the Western India States Agency. The Capital is Murad on the main land the name of Janjira being retained by the island

930 square miles and a population of 230,589. The average revenue is Rs. 6,56,140. It lies to the north of the Portuguese territory of Gos, the general aspect of the country being ex-tremely picturesque. Early inscriptions take the history of the State back to the sixth cen-tury. The late Ruler Major His Highness Raje Bahadur Shrimant Khem Sawant alias Bapusaheb Bhonsle, K.O.S.I., having expired on the 4th July 1937, His Excellency the Crown Representative recognised his only minor son His Highness Raja Shivram Sawant Bhonsle, the present Ruler, as his successor and appointed Her Highness Rani Parwatibaisaheb Bhonsle as Regent to conduct the administration of the State during the minority of the present Ruler from 5th October 1937. Rice is the principal crop of the State, and it is rich in valuable teak. The sturdy Marathas of the State are favourite troops for the Indian Army and supply much of the immigrant labour in the adjacent British districts. The Capitalis Sawantwadi, also called Sundar Wadi, or simply Wadi. The Raja enjoys a dynastic salute of 9 guns and a permanent local salute of 11 guns.

Sawantwadi.—This State has an area of Ranisaheta as Regent. The minor Raja was born on the 15th October 1929 and succeeded to the gadi on the 9th November 1937. The Ruler enjoys a dynastic salute of 9 guns and is entitled to be received by the Viceroy.

Sangli .- The State has an area of 1,186 square miles, a population of 2,58,442 and an annual revenue of Rs. 15,29,349. The founder of the family was Harbhut who rose to distinction during the rule of the Peshwas. The present Ruler Captain (Honorary) His Highness Raja Shrimant Sir Chintamanrav Dhundiraj alias Appasaheb Patwardhan, K.C.I.E., was born on the 14th February 1890 and succeeded to the gadi in 1901 on the death of his adoptive father Dhudiraj Chintamanrav Patwardhan. He was invested with ruling powers on 2nd June 1910 on attaining his majority. His Highness has been granted the hereditary title of Raja. He enjoys a dynastic salute of 9 guns and a personal salute of 11 guns. His Highness exercises first class jurisdiction.

Cooch Behar.—This State is situated in North Bengal, bounded by the Districts of Jalpaiguri, Goaipara and Rangpur. It has an area of 1,318 square miles and a population of 590,866, the revenue being Rs. 26,93.000. The town of Cooch Behar is connected by the Cooch Behar State Railway with the Eastern Bengal Railway system. The late Ruler, Maharaja Jitendra Narayan Bhup Bahadur, attended His late Majesty King George V's Coronation in England as an Honorary A.D.C. to his father Maharaja Nripendra Narayan Bhup Bahadur, and was made a K.C.S.I. in the year 1917. The present Ruler is His Highness Maharaja Jagaddipendra Narayan Bhup Rahadur who was born on the 15th December 1915, and succeeded his father Maharaja Jitendra Narayan on the 20th December 1922

On April 1st, 1933, the Eastern States Agency | born on 19th August 1908 and succeeded the late Maharaja Manikya Birendra Kishore Deb Barman Bahadur on 13th August 1923. Besides being the Ruler of Tripura, the Maharaja holds a large landed property situated in the plains of the districts of Tippera. Noakhali and Sylhet.

> Mayurbhani.—The Ruler is a permanent member of the Chamber of Princes. Archæolofinds to light gicai that have come within the State area, as also outside. go to show that the ancient Bhanja Kingdom covered a considerable part of Orissa. Though the origin of the kingdom is lost in hoary antiquity, tradition recorded by Hunter places it more than two thousand years ago. Bhanja Kings ruled over their extensive territory from Khijinga-Kotta, modern Khiching, whose ancient remains bear testimony to the eminence and culture of the then Rulers which found expression in diverse forms of art of a very high order styled the Mayurbhani School by Rene Grousset and art critics of acknowledged authority. During the Moghul period, Mayurbhanj was recognised by the Emperors as an autonomous principality, and in the days of Mahratta supremacy in Orissa, the Rulers of Mayurbhanj were often at war with the Mahrathas who attempted to key a precarious tribute by force of arms. In 1761, the East India Company took possession of Midnapore and aimost immediately afterwards the Ruler of Mayurbhanj opened friendly negotiations with the British authorities. During half a century preceding the British conquest of Orissa, the British authorities maintained their friendship with Mayurbhanj and a treaty was concluded between the East India Company and Mayurbhani State In 1829.

> Keonjhar is an off-shoot of Mayurbhanj being held by a junior branch of the Ruling family which separated from the parent State.

> Kharsawan and Seraikela.—The Rulers of these States belong to the family of the Raja of Porshat whose States were confiscated by the British Government. These States first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chiefs were bound, when called upon, to render service to the British Government, but not required to pay tribute. The Bengal Nagpur Railway runs through a part of the State.

on the 20th December 1922.

Tripura.—This State lies to the east of the district of Tippers in Bengal and consists.

Athgark, Athmalki, Bamra, Baramba, the district of Tippers in Bengal and consists.

History, Rayagara, Nayagara, Nayagara, Najarara, Najara

on incessant warfare with their neighbours, the brother of the late Raja of Warangal fied In course of time their hill retreats were into Bastar and established a kingdom there, openetrated by Arynn adventurers who gradually overthrew the tribal Chiefs and State was virtually independent, its inaccessive stablished themselves in their place. Tradi bility securing it from all but occasional raids tion relates how these daring interiopers, most of Mohammadan freebooters. The Bhonslas of whom were Rajputs from the north, came to Puri on a piigrimage and remained behind to found kingdoms. The Chiefs of Baudh and Daspalla are said to be descended from the same stock as the Rulers of Mayurbhani; and a Rajput origin is also claimed by the Rajas of Athmalik, Narsinghpur, Pal-Lahara, Talcher and Tigiria, Nayagarh, it is alleged, was founded by a Rajput from Rewah, and a scion of the same family was the ancestor of the present house of Khandpara. The ruling family of Ranpur is of Khond origin and furnishes the only known instance in which amid many vicissitudes, the supremacy of the original settlers has remained intact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders; but in other respects neither the ancient kings of Orissa nor their successors, the Moghuls and of Orist produce. The principal imports are administration. All the States have annals of the dynasties that have ruled over them; but hardware. The State income in 1938 was they are made up for the most part of legend approximately rupes ten and a half lakhs, and fiction and long geneological tables of doubtful accuracy, and contain very few features of general interest. The British contains the Chota-Nagpur States of Bengal. The extract of the property of the contains the quest of Orissa from the Mahrattas which took place in 1803, was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

Bastar, Changbhakar, Chhuikhadau, Jashpur, Kanker, Kawardha, Khniragarh, Korea, Nandgaon, Raigarh, Sakti, Sarangarh, Surguja, Udaipur.—These States are scattered round the Chattisgarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

Bastar ... This State is situated between the Central Provinces, Orissa and the Madras Presidency, and is in the Eastern States Agency. The State is the twelfth, largest in the Indian Empire, its area being 13,725 square miles. The late Chief of Bastar whose son is the present H. F. Mooney, I.F.S. Maharaja, was a Rajput lady. She was the last direct descendent on the male line of an ancient family of Lunar Raignts, which ruled over Warangal until the Mohammadan conquest, pur: -S. D. Bahuguna, M.A., LL.B., Dip. Ed. of the Deccan in the 14th century A.D. when (Leeds), M.R.S.T. (England).

of Nagpur imposed a small tribute on Bastar in the 18th century which is now paid to the British Government, Nearly 11,000 square miles are covered by forest, of which about 3,000 square miles are reserved, and the cultivated area is about 8,86,000 acres. The capital of the State is Jagdalpar (population in 1931 census 10.128) on the Indravati, 184 miles from Raiour in the Central Provinces, and 159 miles from Vizianagram in the Madras Presidency by motorable road. The population of the State numbered, 5,24,721 at the 1931 census and by far the greater number of the inhabitants are aboriginals: Murias, Marias, Parjas and Bhatras, related to the Good race. The State is at present under administration by the Government of India owing to the minority of the Maharaja. The principal exports are tice, rape-seed, tora

Surguja.—Until 1905 this was included in the Chota-Nagpur States of Bengal. The early history of Surguja's obscure, but according to local tradition the present Ruling family is said to be descended from an Arksel Raja of Palamau. In 1758 a Mahratta army overran the State and compelled its Chief to acknowledge himself a tributary of the Bhonsia Raja.

UNDER THE GOVERNOR OF ASSAM.

Manipur.—The only State of importance, the reign of Pamhelba or Gharib Nawaz, who under the Government of Assam, is Manipur subequently made several invasions into which has an area of 8,620 square miles and Burma. On the Burmese retaliating, Manipur a popultion of 4,45,606 (1931 Census), of which negotiated a treaty of alliance with the British about 58 per cent. are Hindus and 35 per cent. in 1762. The Burmese again invaded Manipur animistic hill tribes. Manipur consists of a during the first Burmese war, and on the congreat tract of mountainous country, and a valley clusion of peace in 1826 Manipur was declared about 50 miles long and 20 miles wide, which independent. The chief event in its subsequent is shut in on every side. The State adopted bistory was the intervention of the British in

Hinduism in the early eighteenth century, in 1891 to establish the claim of Kula Chandra

Singh as Maharaja, followed by the treacherous | various kinds cover the great part of the murder of the Chief Commissioner, Mr. Quinton, and the officers with him, and the withdrawai of the escort which accompanied him. From 1891 to 1907 the State was administered by the Political Agent, during the minority of H. H. Sir Chura Chand Singh. The Raja was invested with ruling powers in 1907 and formally installed on the gadi in 1908. For his services during the War the hereditary title of Maharaja was conferred on him. He was made a C.B.E. in Dec. 1917, and K. C. S. I. in Jan. 1934. He is entitled to a salute of 11 guns.

The administration of the State is now conducted by H. H. the Maharaja, assisted by a usually a member of the Indian Civil Service, additional members, who are all Manipuris. The cratic character. The Sicur exercising but little staple crop of the country is rice. Forests of control over his people.

mountain ranges.

States.-These petty chiefships. Khasi 25 in number, with a total area of about 3,700 square miles and a population of 1,80,000, are under the control of the Governor of Assam acting as the Agent of His Excellency the Crown Representative. Most of the States have treaties or engagement with the British Government. The two largest are Khyrim and Government. The two largest are knyrim and Mylliem and the smallest is Nongliwai, which has a pepulation of only 213. Most of them are ruled by a Chief or Siem. The Siemship usually remains in one family. The succession was originally controlled by a small electoral body Durbar, which consists of a President, who is constituted from the heads of certain clans but in recent years there has been a tendency to his services being lent to the State by the broaden the elective basis. The constitution of Assam Government, three ordinary and three a Khasi State has always been of a very demo-

Benares	•••	875	391,165	18

Rampur State.—The State of Rampur was founded by Nawab Syed All Mohammad Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Rohiikhand. The founder belonged to the famous Sayed clan of Bareha in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered valuable services to the Moghal Emperor who recognised him as Ruler of Rohilkhand and bestowed on him the Mahl Maratib, i.e., the Insignia of the Royal Fish.

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizullah Khan Bahadur. The Province of Rohilkhand had now passed into the hands of the East India Company, Nawab Sayed Faizulla Khan Bahadur was very loyal to the British Government to whom he always looked for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry, 2,000 strong, to the British Government in 1778 and received the following message of thanks from the then Governor-General:-

the Company and the English Nation."

are of the Mutiny of 1857. His Highness Nawab Sir Sayed Yusuf Ali Khan Bahadur occupied the Mushad of Rampur in these days. From the very start of the Mutiny till peace was restablished in the country, he spared neither usen nor money in the help of the British Government. He saved the lives of many Europeans whom he provided with money and other means of comfort. He established his reputation as a good administrator to such an extent that he was placed in charge of the administration of Moradabad and the other neighbouring districts on behalf of the British Government. These signal services were recognised by the British Government by the grant of an Illaga besides other marks of distinction.

During the reign of Nawab Sir Kalb-i-Ali Khan Bahadur who was an Oriental scholar of repute, the Court of Rampur came to be surrounded by artists, poets, and musicians, who were left without any patronage on the break up of the Moghal and Oudh Courts. This Prince collected all those rare and most previous Persian manuscripts and Moghul Miniatures now preserved at the Rampur Oriental Library. Indeed, the years of his rule meant for Rampur the splendour of a rich renaissance. In 1887, Nawab Sir Kalb-i-Ali Khan Bahadur died and was suceceded by his invalid son, Nawab Mushtak Ali Khan Bahadur, who, after a brief reign, passed away in 1889.

During the reign of His late Highness Nawab Sir Syed Mohammad Hamid Alı Khan Bahadur. Rampur made great strides in trade and commerce and in fact in every walk of life. He maintained the traditions of his House for devotion to the British Crown. The Great War of 1914 found him foremost in offering his per-"That in his own name as well as that of sonal services and all the resources of the State the Board, he returned him the warmest thanks to the British Government. The 1st Rampur for this instance of his faithful attachment to Infantry was sent to East Africa and returned home after nearly four years' service and won Another opportunity arose for the ruler of favourable remarks from high British officers. Rampur to evince his steadfast loyalty and He contributed one lakh of rupoes towards the devotion to the Imperial Cause on the outbreak cost and upkeep of the hospitalship "Royalty."

At the time of the Afghan War of 1919 the L.S. (Lancers and the Imperial Service Infantry were sent on garrison duty in British India.

The present Ruler, Captain IIIs Highness Nawab Sir Syed Raza Ali Khan Bahadur. 20th June 1930. His Highness was born on 17th November 1996 and was educated at the Raikumar College, Raikot,

During the short period that the reins of the State have been in his hands, the administration of the State has been overhauled and reorganised A State Council consisting of four members is responsible for the administration of the State on the principle of the joint and several responsibility of every member.

Since 1935, His Highness has completely separated his Civil List from the State Budget.

The Rampur Municipality has a representative character, and has a non-official and elected Chaliman. Two-thirds of its members are elected and the remainder nominated. Town Areas in two mofusell towns of the State have also been established.

The Legislative Committee consisting of experts who drafted enactments for the State has been remodelled and a representative element has been introduced into it to afford opportunities to the subjects to ventilate their views and take part in the framing of laws for the State, as well as to discuss and offer their advice on matters in which their opinion may be invited.

The State employees have recently been given the benefit of pension rules and time sente salaries have been fixed for them. A Development Board has been instituted to encourage and toster the growth of industries and improve agriculture in the State.

The permanent sainte of the State is 15 guns and the annual income about 50 laklis of tupies.

Benares -- The kingdom of Benares under its Hindu rulers existed from time immenorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Shahab-ud-din Ghori and formed a separate province of the Mohammadan Empire. In the 18th century when the powers of Mochal adopted by His late Highnes Emperors declined after the death of Aurangaeb, succeeded to the gade in 1959.

Raja Mansa Ram an enterprising zamindar of Gangapur (Benaies district) founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raia Balwant Singh in 1738. Raia Mansa Ram dled in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were unsuccessfully made by Safdar Jang and after him by Shujaud-daula of Oudh to destroy the independence of the Rain and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City, Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was placed on the gadi. The latter proved an imbecile and there was maladministration which led to an agreement in 1794 by which the lands, held by the Raia in his own right which was granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one takk of rupees was assured to the Raja while the former constituted the Domains, Within the Domains the Raja had revenue powers similar to those of a Collector in a British district. There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangiam). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise.

The present ruler is H H Bibliuti Narain Singh. Born on Aovember 5, 1927, he was adopted by His late Highness as his son and

States, on States Nos. 7, 11, 13, 14, 18, 19 and 21 to 45 were placed in political relations with the Hon'ble the Resident for the Punjab the 1st October, 1836. Q Inclusive of two personal. # Tributaries of Jubbal. + Tributaries of Keonthal. · Tributaries of Bashahr.

Patiala .- This is the largest of the Phulkian States, and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jaipur and Alwar States. Area of 5,932 square miles. Population 16,25,520. Gross income Rs. one crore and forty lakhs. Its history as separate State begins in 1762. Its Ruler, Lieutenant-General His Highness Farsand-i-Khas Daulati-Inglishia Mansur-ul-Zaman Amir-ul-Umra Maharaja Dhiraj Raj Rajeshwar, Sri Maharaja-i-Rajgan Sir Bhupindra Singh Mohinder Bahadur, Yadu Vanshavatans Bhatti Kul Bhushan, G.O.S.I., G.C.I.E., G.C.V.O., G.B.R., A.D.O., LL.D., died in March 1938 and was succeeded by his son, His Highness Maharaja Dhiraj Vadavinder Singh, His Highness the Maharaja Dhiraj enjeys at present personal salute of 19 guns and he and his successors have been exempted from presenting Nazar to the Viceroy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugar-cane, rapeseed, cotton and tobacco. A great part of the State is irrigated by the Sirhind and Western Jumna Canal distributaries. It possesses valuable forests. The State is rich in antiquities, especially at Pinjaur, Sunam, Sirhiud, Bhatinda, Narnaul, etc. One hundred and thirty-eight miles of broad-gauge railway line comprising two Sections—from Rajpura to Bhatinda and from Sections—from Halpura to Bhaunda and from Sirbind to Rupar—have been constructed by the State at its own cost. The North-Western Railway, the E. I. Railway, the B.B. & C.I. Railway and the J. B. Railway traverse the State. His Highness maintains a contingent of two regiments of Cavalry and four battalions of Infantry—one battery of Horse Artillery.

The State maintains a first grade college which imparts free education to state subjects. Primary education is also free throughout the State. The Durbar sanctioned a scheme of compulsory education in 1928.

Since the State entered into alliance with the British Government in 1804 and 1809 A.D. It has rendered help to the British Government on all critical occasions such as the Gurkha War of 1814-15, the Sikh War of 1845, the Mutiny of 1857, the Aighan War of 1878-79, and the Tirah and N. W. F. campaign of 1807. On the outbreak of the European War His late Highness placed the entire resources of his State at the disposal of His Majesty the King-Emperor and offered his personal services. The entire Imperial Service Contingent was on active service throughout the period of the War and served on various fronts in Egypt, Gallipoli, Missopotamia and Palestine, winning numerous distinctions. Two mule and one camel corps were raised and placed at the service of the British Government for the period of the War, and in addition to furnishing nearly 25,000 requits for the British Indian Army and maintaining the State Imperial Service Contingent at full strength, contributed substantishly in money and material. Again in 1919 on the outbreak of hostilities with Afghanistan the iste ruler served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent as a chive

service towards Kohat and Quetta fronts. For his services on the N. W. Frontier His late Highness was mentioned in despatches.

The present ruler has inherited fine qualities of sportmanship and achieved distinction in the field of Cricket.

Bahawalpur.—Bounded on the North-East by the District of Ferozepur; on the East and South by the Rajputana States of Bikaner and Jaisalmere; on the South-West by Sind, on the North-West by the Indus and Sutlej rivers. Area, 15,000 square miles.

This State is about 300 miles in length and about 50 miles wide, is divided length wise into three great strips. Of these, the first is a part of the Great Indian Desert; the central track which is as barren as uplands of the Western Punjab; has however been partly rendered capable of cultivation by the network of Sutiej Valley Canals constructed recently; and the third a fertile alluvial tract in the river valley is called the Sind. The State is a partner in the great Sutiej Valley Project.

The ruling family is descended from the Abbaside Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durrani Empire in the Treaty of Lahore in 1809. Ranjit Singh was confined to the right bank of the Sutlej.

The firsttreaty with Bahawalpur was negotiated in 1833, the year after the treaty with Ranjit Singh for regulating traffic on the Indus. It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej. During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and life pension. On his death his helr being minor for a time the sadministration of the State was in the hands of the British authorities. The present ruler is Major Dr. His Highness Rukn-ud-Daula-Nusrat-l-Jang-Sa if u d da u l la Hafful-Mulk Mukhlisud-Daule, Muinuddaula Nawab Sir Sadiq Muhammad Khan Sahib Bahadur Abbasi V., LL.D., G.G.I.E., K.O.S.I., K.O.V.O., who was born in 1904 and succeeded in 1907. During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was invested with full power. His Highness is now assisted in the administration of his State by a Prime Minister, Israt Nishan, Imad-ul-Mulk, Rais-ul-Worra, Khan Bahadur, Mr. Nabi Buksh Mahomed Husain, M.A., LL.B., C.L.E., &C.A.O., B.O.S.S., a Public Works and Eavenue Minister, Amin-ul-Mulk, Umdat-ul-Umra, Sardar Mohammad Amir Khan, O.H.O., an Army Minister, Major General Sahibsada Haji Mohammad Dilawar Khan Abbasi, M.B.E., O.H.O., a Aminister for Commerce, Metha Udho Dass, B.A., L.E., and Major Shamsuddin Mohamad, B.A., Minister for Education.

The chief cropus are wheat, tyee and miliet. The

iste ruler served personally on the Frontier on the Staff of the General Officer Commanding Labore-Karachi branch of the North Western and the Imperial Service Contingent saw active I state Railway passes through the State. The

State supports an Imperial Service combined infantry, in addition to other troops. The capital is Bahawalpur, a walled town built in 1718.

Income from all sources over 146 lakhs. Languages spoken Multani or Western Punjabi (Jatki), and Marwari.

dent for the Lt.-Col. H, Resident the Puniab States:-The Wilberforce-Bell, C.J.E., Hon. K.C.I.E., C.B.E., I.C.S.

Khairpur.—The state of Khairpur lies in Upper Sind between 26°-10° and 27°-46° North Latitude and 68°-20° and 70°-14° Fast Longitude. It is bounded on the East by Jodhpur and Jessalmere territories and on the North. West and South by British Districts of Sind. The climate is similar to the rest of Sind. The maximum temperature in summer is 117° in the shade and the minimum in winter 30°. The nearest hill station is Quetta,5,500 feet above sea level. Rainfall is scarce, the last 13 years' average being 4°-0". The area of the State is about 6,050 square miles. The population of the State according to the census of 1931 is 2,27,183 souls of whom 82% are Muslims. The majority of them are cultivators. Others are engaged in trade, State services and labour. The Muslims are mainly Sunnis, but the Ruler and his family and some others are Shias. State's revenue from all sources calculated on the average of the past five years amounts to Rs. 23.65 lakhs. The relations of the State with the British Government are those of subordinate alliance. The State pays no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdu and English are also spoken. The chief products of the State are grain and cotton which are cultivated on irrigation canals taking off from the Indus river at the Lloyd Barrage and to a small extent on wells. Oil-seeds, ghee, hides, tobacco, Fuller's earth ("met"), carbonate of Soda ("Kharo chaniho"), and wool are also produced. The manufactures comprise cotton, silken and woollen fabrics, lacquer work, carpets and pottery.

The Rulers are Muslim Talpur Balochs and The Rulers are Austin Taipur Balocus and belong to the Shia sect. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history of the State belongs to the general history of Sind. In that year Mr Fatehali Khan Taipur established himself as Ruler of Sind and subseestaniance number as runer of Sind and Subsequently his nephew, Mir Sohrab Khan Talpur, founded the Khairpur Brauch of the Talpur family. In 1852 the individuality of the Khairpur State was recognized by the British Government. The Ruler is a first-class prince and is entitled to a permanent salute of 15 guns ontside and 17 guns inside the State limits.

Present Mir: His Highness Mir Faiz Mahomed Khan Talpur of Khairpur State. Born on 4th January 1913. Ascended the Gadi on 30th April 1936.

Resident for Punjab States: Lt.-Col. Sir H. Wilberforce-Bell, K.C.I.R.

Jind .- Jind is one of the three Phulkian States (the other two being Patials and Nabha). Its area is 1,268 square miles, with a popula-tion of 324,676 souls and an income of 26 lakhs.

The history of Jind as a separate State dates from 1763, when Raja Gajpat Singh, the maternal grandfather of Maharaja Ranjit Singh, and greatgrandson of the famous Phul, established his principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh in 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Raghbir Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878). The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887, and invested with full powers in 1899. The State rendered exemplary services in the Great European War. It supplied 8,673 men to the Indian Army and Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution amounted to nearly 35 lakhe, in gifts of cash, materials, animals and loan.

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North-Western Railway. The principal executive Officer of the State is called Chief Minister.

Ruler.-Colonel His Highness Farzand-i-Dilband Rasikh-ui-Itikad, Daulat-i-Inglishia Raja-i-Rajgan Maharaja Sir Ranbir Singh Rajendra Bahadur, G.O.S.I., G.O.I.F., etc.

Nabha.-Nabha which became a separate State in 1763 is one of the 3 Phulkian States —Nabla, Patials and Jind—and though second in point of population and revenue of the 3 sister States, it claims seniority being descended from the eldest branch. It consists of two distinct parts, the main portion comprising 12 separate pieces of territory scattered among the other Punjab States and Districts, forms the City of Nabha and the Nisamats of Phul and Amich; the second portion forms the Nizamat of Bawal in the extreme south-east of the Punjab on the border of Rajputana; this Nizamat of Bawal was subsequently added to its territory as a reward from the British Government for the loyalty of the Rulers of Nabha. The State now covers an area of about 1,000 square miles and has a population of about 3 lakhs. The State maintains one battelion of Infantry known as the Nabha Akal Infantry under the Indian States Forces Scheme consisting of 496 men. For the preservation of the peace there is also a Police force consisting of about 400 men.

The State is traversed by the main and 3 branch lines of the N. W. Ballway and the B. B. & C. I. crosses the Nisamat of Bawal. A portion of the State is irrigated by the Sirhind Canal. The crops of the State are Minister: S. Ijaz Ali, Esquire, M.R.E., Khap gram, pulses, bajra, sugarcane, cotton, wheat Bahadur, Retired Collector, United Provinces. and barley; to facilitate trade the Durbar has opened grain markets and Banks near the principal railway stations within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils, and cotton, carpets, lace and gota, etc. There are some ginning factories and 5 cotton Steam Presses in the State which are working successfully. In 1923 an inquiry was held into certain matters in dispute between the Patiala and the Nabha Durbars which showed that the Nabha Police had fabricated cases against persons connected with the Patiala State with the object of injuring them through the Patiala Durbar. As a result, the Maharaja Ripudaman Singh, who was born in 1883 and succeeded his father in 1911, entered into an agreement with the Government of India whereby he voluntarily separated himself from the administration and the control of the State was accordingly assumed by the Government of India. In consequence of repeated breaches of the agreement by the Maharaja, he was in February 1928 deprived of the title of Maharaja, His Highness and of all rights and privileges pertaining to the Ruler of the State, and his eldest son, Partap Singh, was recognized as Maharaja in his stead. His Highness as manaraja in his stead. His Highness Maharaja Pratap Singh is a minor and during his minority the State is being administered by a Council of Regency consisting of a President (Raja Gyan Nath, C.I.E., Indian Political Service) and three Members. His Highness is at present receiving his education in England.

Kapurthala.-This State consists of three detached pieces of territory in the great plain of the Juliundur Doab. The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans-Sutlej and also in the Bari Doab. In the latter lies the village of Alhu whence the family springs, and from which it takes the name of Alhuwalia. When the Juilundur Doab came under the dominion of the British Government in 1846, the estates north of the Sutlej were maintained in the independent possession of the Kapurthala Ruler, conditional on his paying a commutation in cash for military service engagements by which he had previously been bound to Maharaja Ranjit Singh, of Lahore. This annual tribute of Rs. 1,31,000 a year was remitted by the Government of India in perpetuity in (1924) in recognition of the splendid war record and uniformly efficient administration of the State. The Bari Doab estates are held by the head of the House as a jaghir in perpe-tuity, the civil and police jurisdiction remaining in the hands of the British authorities. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh, which yield a large annual income equal to those of Kapurthala State. The present Ruler's titles are Col. H. H. Farsand I-Dilband Rakh-ul-Itiqad Daulat-I-Inglishia Raja-I-Rajgan Maharaja Jagutjit Singh Bahadur Maharaja of Kapurthala, G.C.S.I. (1911), G.C.I.E. (1918), G.R.E. (1927) who was born on 24th November, 1872 and succeeded his father, His Highness the late Raja-I-Rajgan Kharak Singh of Kapurthala in 1877. He was granted the title of Maharaja as an hereditary distinction in 1911. His salute was raised to 15 guns and he was made Honorary Colonel of the 45th Rattrays Sikhs. The Maharaja

received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the Order of Carlo 3rd, of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order Menelek of Abyssinia, Grand Cross of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chill, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba (Grand Cross of the Order St. Maurice and Lazzare [Italy]); represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927, and the Diamond Jubilee in 1937.

The rulers of Kapurthala are Rajput Sikhs, and claim descent from Rana Kapur, a distinguished member of the Rajput House Jaisalmer. Only a small proportion of the population however are Sikhs, the majority being Mahomedans. The chief crops are wheat gram, matce, cotton and sugarcane. The town of Sultanpur in this State is famous for handprinted cloths. Phagwara is another important town in the State has a large Sugar Factory on modern lines, and is very prosperous also on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it. A branch rallway from Juliundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been re-organized and are now designated as Kapurthala State Forces. These State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. The Maharaja's third son, Major Maharaj Kumar Amarjit Singh, C.I.E., I.A., served with the Indian Army in France. Frimary education is free throughout the State, and it spends a large proportion of its revenues on its Education Department. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver white of the reien in 1016. The certified in 1016 of the reient when the control of the reient in 1016. Jubilee of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts of modern amenities such as electric light, water-works,

Political Officer: The Hon'ble Resident for the Punjab States.

Tehri State (or Tehri-Garhwal).—This State lies entirely in the Himalayas and contains a tangled series of ridges and spurs radiating from a lofty series of peaks on the border of Tibet. The sources of the Ganges and the Jumna are in it. The early history to the State is that of Garhwal District, the two tracts having formerly been ruled by the

dynasty since 688 A.D. Pradyumna same Shah, the last Raja of the whole territory, was killed in battle fighting against the Gurkhas: but at the close of the Nepalese War in 1815, his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuable assistance to Government. He died in 1859. The present Maharaja is Liout .-Col. H.H. Sir Narendra Shah Bahadur, K.C.S.I., who is 59th direct male lineal descendant from the original founder of the dynasty, Raja Kanak Pal. The principal proudets are rice and wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Maharaja has full powers within the State. The strength of the State forces is 330. Tehri is the capital but His_Highness and the Secretarial Office are at Narendranagar for the greater part of the year, the summer capital being Pratapnagar, 8.000 feet above the sea-level.

The State is politically transferred to the Residency of the Punjab State.

Mandi is an Indian State in the Punjab Political Agency, lying in the upper reaches of Bias river, which drains nearly all its area. It area is 1.200 square miles and it lies between 31°-23' North Lat., and 76°-22' East Long, and is bounded on the east by Kulu; on the south by Suket and on the north and west by Kangra. It has an interesting history of considerable length which finally resulted in its entering into a treaty with the British in 1846.

The present Ruler, Major His Highness Raja Sir Jogindar Sen Bahadur, K.C.S.I., assumed full powers in February, 1925. His Highness married for the first time the only daughter of His Highness the Maharaja of Kapurthala. His Highness married again in 1930 the younger daughter of K. Prithiraj Singh of Rajpipla. A son and heir was born on 7th December 1923.

The Mandi Hydro-Electric Scheme was formally opened by His Excellency the Viceroy in March, 1932. The principal crops are rice, maize, wheat and millet. About three-fifths of the State is occupied by forests and grazing lands. It is rich in minerals. The capital is Mandi, founded in 1527, which contains several temples and places of interest and is one of the chief marts for commerce with Ladhakh and Yarkand.

Sirmur (Nahan) .- This is a hilly State in the Himalayas under the Political control of the Political Agent, Punjab Hill States, Simla. Ita history is said to date from the 11th century. In the eighteenth century the State was able to repulse the Gurkha invasion, but the Gurkhas were invited to aid in the suppression of an internal revolt in the State and they in turn had to be evicted by the British. In 1857 the Raja rendered valuable services to the British. and during the second Afghan War he sent a contingent to the North-West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1933. The main agricultural feature of the State is S.A., Chief Secretary. The State comprises an the recent development of the Klarda Dun, area of 643 square miles with a population of a fortile level plain which produces wheat, 1,64,346 souls and has a gross annual income of

gram, rice, maize and other crops. The State forests are valuable and there is an iron foundry at Nahan which was started in 1867 but, being unable to compete with the imported iron. is now used for the manufacture of sugar-cane crushing mills. The State supports a Corps of Sappers and Minors which served in the Great War. It was captured with General Townshend's force at Kut-al-Amara but another Corps was formed and replaced it in the field.

Malerkotla.-This State consists of a level sandy plain unbroken by a hill or stream. bounded by the district of Ludhiana on the north, by Patiala territory on the east and south and by the Ludhiana District, Patiala and Nabha territories on the west. The Rulers (Nawabs) of Malerkotia are of "Kurd". descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at Maler, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors.
As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created adjacent Sikh States. After the victory of Laswarl, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Malerkotia joined-the British Army, the British Government succeeded to the power of the Mahrattas in the districts between the Sutiej and the Jumna. The State entered into political relations with the British Government in 1809. The present Ruler is Lt.-Col. His Highness Nawab Sir Ahmad Ali Khan, Bahadur, K.O.S.I., K.O.I.E., who was born in 1881 and succeeded in 1908. He was created How. Major in the Indian Army was created Hony. Major in the Indian Army in June 1916 and promoted to the rank of Lt .-Col. in December 1919.

The chief products are cotton, sugar, poppy, aniseed, mustard, ajwan, methi, tobacco, gariic, onions and all sorts of grains.

The State maintains Sappers, Infantry, Cavalry and Artillery. The capital is Malerkotia. The population of the town is 30,000. Annual revenue of the State is about 16 lakha.

Faridkot.-The Faridkot Rajas are sprung from the same stock as the Phulkian Chiefs having a common ancestor in Brar more remote by twelve generations than the celebrated Phul. The Faridkot House was founded in the middle of the seventeenth Century. The present Ruler Farzand - Saadat-Nishan Hazrat - Raisar-Hind, Lt. His Highness Raja Harindar Singh Brarbans Bahadur was born on the 29th January 1915, succeeded to the Gadi in 1918, and was invested with full Ruling Powers in October His Highness was blessed with an apparent on October 22, 1937. His 1934. 1933. His Highness was blessed with an Heir-Apparent on October 22, 1937. His Highness personally administers the State assisted by his younger brother Kanwar Manjitindar Singh Bahadur, Military Secretary, and an efficient Cabinet of three other Secretaries headed by Sardar Bahadur Sardar Indar Singh, S.A., Chief Secretary. The State comprises an area of 643 square miles with a population of 1434 and the property of the secretary of the secreta over 191 lakhs. The Ruler is entitled to a salute over 19 iskins. The Ruler is entitled to similar to 11 guns and a visit to and return from the Viceroy. The State Forces consist of Field Company of Sappers and Miners (233 men plus a depot of 30 and a reserve of 100 espoys), and His Highness' Body Guard. Farickot, the Capital town, lies on the main Delhi-Bhatinda Lahore Section of the North Western Railway.

Chamba.-This State is enclosed on the west and north by Kashmir, on the cast and south by the British districts of Kangra and Gurdaspur, and it is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen. It possesses a remarkable series of copper plate inscriptions from which its chronicle

have been compiled.

Founded probably in the sixth century by Maruta, Surajbansi Rajput, who built Brahma-pura, the modern Barmaur, Chamba was extended by Meru Varma (680) and the town of Chamba built by Sahil Varma about 920. State maintained its independence, until the Moghal conquest of India.
Under the Moghals it became tributary to

the empire, but its internal administration was not interfered with, and it escaped almost un-

scathed from Sikh aggression. The State first came under British influence in 1846. The part, west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand, and it was declared independent of Kashmir. The present Chief is H. H. Raja Lakshman Singh who was born in 1924 and succeeded in 1935. As he is a minor the Administration of the State is being conducted by a Council, consisting of a President (Colonel H. S. Strong, C.I.E.), Vice-President and Chief Secretary (Diwan Bahadur L. Madho Ram), and a Judicial Member (Lala Hargobind). The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but the management of them has now been retroceded to the Chamba Durbar. The mountain ranges are rich in minerals which are little worked. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North Western Railway. Chamba town, on the right bank of the Ravi, contains a number of interesting temples, of which that of Lakshnii Narayan, dating possibly from the tenth century, is the most famous.

UNDER THE GOVERNMENT OF BURMA.

The States under this Government comprise the Shan States which are included in British Burma though they do not form part of Burma proper and are not comprised in the regularly administered area of Burma and the Karenni States which are not part of British Burma and are not subject to any of the laws in force in the Shan States or other parts of Burma.

The Shan States comprise the two isolated States of Heawnghoup and Singkaling Hkamti in the Upper Chindwin District under the supervision of the Commissioner, Sagaing Division, the seven petry village communities under segarate hereditary Chiefs known as Hkamti Long in the Myttkyins District and the two main divisions of the Shan States known as the Northern and Southern Shan States numbering six and twenty-nine States respectively which are under the Commissioner, Federated Shan States.

Hawnghoup with an area of 529 square railes and a population of 7,239 lies between the 24th ani 25th parallels of latitude and on the 95th parallel of longitude between the Chindwin river and the State of Manipur.

Singkaling Hkamti has an area of 983 square miles and a population of 2,157 and lies on the with and 90th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 5,349 and lie between the 27th and 28th parallels of latitude on the Upper Waters of the N'Mai

Wa States (arra about 2.000 miles) and the Kareuni States, a huge triangle iving roughly between the 19th and 24th parallels of latitude and the 96th and 102nd parallels of iongitude with its base on the plains of Burma and its apex on the Mehkong river.

The population consists chiefly of Shans who belong to the Shan group of the Tai Chinese family; the remainder belong chiefly to the Wa-palaung and Mon Khmer groups of races of the Austro-Asiatic brand of the Austric family, or to the Karen family which Sir George Grieveon now proposes to separate from the lai Chinese family. There are also a number of Kachins and others of the Tibeto Burman tamily. The Shans themselves shade off imper-ceptibly into a markedly Chinese race on the frontier. Buddhism and Animism are the principal religions.

The climate over so large an area varies The dimate over so large an area varies greatly. In the narrow lowlying valleys the heat in summer is excessive. Risewhere the summer shade temperature is usually 80 to 95° Fahr. In winter frost is severe on the paddy plains and open downs but the temperature on the hills is more equable. The rainfall varies from 50 to 100 inches in different localities.

The agricultural products of the States are rice, pulses, maise, buckwheat, cotton, sessa-mum, groundnute, oranges and pineappies.

Land is held chiefly on communal tenure but unoccupied land is easily obtainable on lease from the Chiefs in accordance with special rules branch of the Irrawaddy.

The Northern Shan States (area 20,156 square miles and population 636,107) and the Southern Shan States (area 86,157 square miles and population 870,230), form with the The mineral resources of the States are still unexplored. The Burma Corporation have concession for silver, copper, lead and zine in the Northern States which they claim to be the richest in the world. The Mawson area in the Southern States is also rich in lead. Lignite and iron ore of a low grade are found in many places.

Lashio, the headquarters of the Northern Shan States, is the terminus of the Mychannz-Lashio Branch of the Burnan Railways (178 miles) and is also connected with Mandalay by a motor road.

The Burma Corporation's narrow-gauge private railway track 44.49 miles long connects their Bawdwin mine with the Burma Railways system at Namyao.

The Southern Shan States are served by the Burma Railways branch line Thati to Heho (87 miles) which has been extended to Shwenyaung, 98 miles from Thazi.

Taunggyi, the headquarters of the Southern Shan States, is connected with Thazi by a well-graded motor road. The States vary much in size and importance. The largest State is Kengtung with an area of 12,400 square miles and population of 225,894.

Hsipaw with an area of 4,400 square miles and population 148,731 is the richest State with a gross revenue of Rs. 10,62,418.

The Sawbwas of Kengtung, Hsipaw, Yawngbwe and Mongnal have salutes of nine guns.

Administration.

Under the Burma Laws Act, 1898. Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the sanad of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British Burms. The customary law may be modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and proceedings of such officers. The chiefs are bound by their sanads to follow the advice of the Superintendents appointed but subject to certain modifications which have been made in the customary law relating to criminal and civil justice have more or less maintained the semi-independent status which was found existing at the annexation of Upper Burma.

In 1920, Sir Reginald Craddock, Lieutenant-Governor of Burma, proposed a scheme for the sanction of the Secretary of State under which the Chiefs of the Northern and Southern Shan States have agreed to federalise the departments of Government in which they had been previously largely dependent on contributions from the Provincial Funds. Under this scheme ao interference is centenplated in the internal management of the States and the Chiefs continue to collect their taxes and be responsible for law and order, maintain Courts for the

disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superintendents. But the Federation is responsible for the centralised Departments of Public Works, Medicai, Forests, Education, Agriculture and to a small extent Police. In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Burma Government surrenders to Federation all revenue previously derived from the States to enable it to maintain its services at the same degree of efficiency tormerly enjoyed. The Federation on the other hand makes a payment of a fixed proportion of its revenue to the Burma Treasury in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub-entity of the Burma Government, is selfcontained and responsible for its own progress. The Chiefs express their views on Federal and general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawbwa and four elected representatives of the lesser Chiefs. The Superintendent, Northern Shan States and the Commissioner of the Federated Shan States to whom the supervision of the Federation has been entrusted are ex-officio members of the Council. The scheme was sanctioned and brought into force with effect from October 1922. The first meeting of the Council of Chiefs was formally opened by His Exceliency the Governor Sir Spencer Harcourt Butler, G.O.I.E., K.O.S.I., I.O.S., in March 1928.

Karenni.

This district which formerly consisted of five States now consists of three as two have been amagemated with others. It has a total area of 4,230 square miles and a population of 58,761. It lies on the south of the Synthern Shan States between Slam and the British district of Toungoo. The largest State is Kantarawadi with an area of 8,015 square miles and a population of 30,677 and a revenue of nearly it lakis of rupees. More than half of the inhabitants are Red Karens. An Assistant Political Officer is posted at Lolkaw subject to the supervision of the Superintendent, Southern Shan States, who exercises in practice much the same control over the Chiefs as is exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contributions from Provincial revenues have been made to the Karenni Chiefs for aducation and medical service. The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accough very considerable advantages might accough very considerable

The principal wealth of the country used to be in its task timber and a large alien population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

JAMMU AND KASHMIR STATE.

The territory known generally as the Jamma and Kashmir State, lies between 32° and 37° N. and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas; the upper, comprising the area drained by the River Indus and its tributaries; the zeliddle, drained by the Jhelum and Kishenganga Rivers; and the lower area, consisting of the level strip along the southern border, and its adjacent ranges of hills. The dividing lines between the three areas are the snow-bound inner and outer Himalayan ranges known as the Zojiia and the Panchal. The area of the State is 84,471 square miles. Deginning in the south where the great plain of the Punjah ends, it extends northwards to the high Karakoran mountains "where three Empless Meet."

Briefly described, the State comprises the valleys of the three great rivers of Northern Indis, viz. the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 36,46,243 souls.

History .- Various historians and poets have left more or less trustworthy records of the history of the valley of Kashinir and the adjacent regions. In 1586 it was annexed to the Moghul Rmpire by Akbar, Srinagar, the capital, originally known as Pravarapura, had by then been long established, though many of the fine buildings said to have been crected by early Hindu rulers had been destroyed in the four-teenth century. In the reign of Sikandar, who was a contemporary of Tamerlane, a large number of Hindus was converted to Islam. Jahangir did much to beautify the Valley, but after Aurangzeb there was a period of disorder and decay and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country experienced the oppres-sion of Afghan rule until it was rescued in 1819 by an army sent by Maharaja Ranjit Singh. The Sikh rule was not more beneficial to the people than that of the Afghans. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singhiji, a scion of the old Ruling Family of Jammu, who rose to entinence in the service of Maharaja Ranjit Singh of Lahore and was, in recognition of his distinguished services, made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikks, only appearing as modiator after the battle of Sobraon (1846), when the British made over to him the valley of Kashmir and certain other area in return for his services in re-establishing poace. His son, His Highness Maharaja Ranbir Singaji, a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son, His Highness Maharaja Sir Pratap Singhii, who died on 28rd September 1925, and was anoseeded by His Highness the present Ship Maharaja Hari Singhji Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the

Land Revenue Settlement originally carried out under Sir Walter Lawrence and revised from time to time.

Administration.—For some years after the accession to the gadi of the late Maharaja, the administration of the State was conducted by a Council over which the Maharaja presided, in 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until the 24th January 1922, when an Executive Council was inaugurated. Very recently certain modifications have been introduced in the constitution.

The British Resident has his headquarters at Srinagar and Slaikot and there is also a Political Auent at Gligit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India, which passes through Kashmir.

In the Dogras (Hindus and Muslims) the State has splendid material for the Army which consists of about 8,800 troops. Besides this, thousands of Dogras serve in the Indian Army,

Finance.—The financial position of the State is strong. The total revenue including Jagirs, is about 2,70,00,000; the chief sources being land, forests, customs and excise and sericulture. There is a reserve and no debt.

Production and Industry.-The population is pre-eminently agricultural and pastoral. The principal food crops are rice, maize and wheat. Ollseed is also an important crop. Barley, cotton, saffron, tobacco, beans, walnuts, almonds and hops are also grown. Pears and apples, the principal fruits of the Valley are exported in large quantities. The State forests are extensive and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests occur in Kishtwar, Karnah and Kamraj Iliagas. A survey of the mineral resources of the State is being conducted. The most noteworthy of the minerals expected to be found in the State are bauxite, coal, Fuller's carth, kaoline, slate, zinc, copper and tale.
Gold is found in Baltistan and Gilgit, sapphires
in Paddar, aquamarines in Skardu and lead in Uri. The silk filature in Srinagar is the largest of its kind in the world. Manufacture of silk is a very ancient industry in Kashmir. Zain-ul-Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan and settled them here. Woollen cloth, shawls, curpets, papier mache and wood carving of the State are world famous. The State particithe State are world famous. The State partici-pated in the British Empire Exhibition of 1924. The Kashmir Court was styled "The Gem of The Smaller Courts" and attracted many visitors. An Industrial and Agricultural Exhibition is held in the State annually, where the products of indigenous arts and craftsmanship for which Kashmir is famous are displayed. His Highness' Government are maintaining a Visitors' Bureau at Srinagar for the convenience of visitors, who are attracted by the scenery and charm of the beauty-spots of Kashmir.

Communications.—Great efforts have been made and are being made towards the improve-

ment of roads for wheeled traffic in the State. The Jhelum Valley road (196 miles) which links the Kashmir Valley with the Punjab and the North-Western Frontier Province is considered to be one of the finest motorable mountain roads in the world.

The Banihal Cart Road, 205 miles long, joins Kashmir with the North Western Railway system at Jammu-Tawai and is also a fine motorable road

Roads for pack animals lead from Srinagar. the summer capital of Kashmir, to the frontier districts of Gilgit and Ladakh Internal village communications have also been much improved.

The Jammu-Suchetgarh Railway, a section of the Wazirabad-Sialkot branch line of the North Western Railway system, is the only Railway in the State. The mountainous nature of the country has so far prevented the extension of the line into the heart of the State.

Public Works.—In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum, A number of canals have been constructed at considerable expense both in Jammu and Kashmir. The State has been recently connected with the telephone system of British India. An aerodrome has been constructed five miles from Srinagar, and it is hoped that an aerial service between Lahore and Delhi and Kashmir will be established soon, Good progress has been made with irrigation, but the most important scheme of recent years has been the installation of a large Electric Power Station

The Narendra Mandal, or Chamber of Princes came into existence, with the earnest co-operation of a number of leading Princes themselves as one of the results of the Report on Indian as one of the results of the keport of Indian constitutional reform presented to Parliament by Mr. Montague, Secretary of State for India and H. E. Lord Chelmsford, Viceroy and Governor-General of India, in 1919. The proposal was that the Chamber should exist as a permanent consultative body, with the Viceroy as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes, or whose membership might otherwise be considered desirable by the Viceroy. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year. The Chamber is a recommendatory body, which performs its functions under a constitution approved by the Secretary of State and it deals with questions submitted to it concerning the Princes and their rights and privileges generally and their position in imperial affairs.

The Chamber was formally inaugurated by H.R. H. the Duke of Connaught on 8th February 1921. It meets regularly once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber who at present is His Highness the Maharaja of Patiala. The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber.

on the Jhelum River and Mahora which was completed in 1907. The bridge over the Chenab at Aknur which was completed in 1935 at a cost of Rs. 4 lakhs, has the longest unsupported span in India.

Education.—According to the last census of the State, there were 1,23,800 persons able to read and write of whom 9,000 only were females. In other words, four per cent. of all persons aged 5 or more could read and write. Among males 60 in every 1,000 persons could read and write. The number of educational institutions including two Arts Colleges is 1,440. The number of scholars in 1937-38 was 94,824. Nearly 30.7 per cent, boys and 6 per cent. girls of the school-going age were at school. In Municipal areas education for boys has been made compulsory since 1929.

Reforms.-One of the important reforms connected with the present Maharaja's reign has been the establishment of an independent High Court of Judicature modelled on British High Courts. Important legislative measures passed by His Highness' Government in recent years include the raising of the age of marriage to 14 for girls and 18 for boys, and the Agriculturists' Relief Regulation meant to cope with the problem of rural indebtedness.

As sign of constitutional progress of the State may be mentioned the freedom granted to the press, and the introduction of the State Assembly. Over 30 newspapers are in existence in the State, and the Assembly which has a nonofficial majority has already held nine sessions years and a half of its during four existence.

THE CHAMBER OF PRINCES.

This Committee considers before the annual meetings the subjects to be discussed at

Until 1929, the proceedings of the Chamber were considered as confidential and there was no admittance of the general public to its meetings. At the annual session in February 1929, the Princes passed a resolution by which all meetings were ordinarily made open to the public. The Chamber contains very restricted accommodation and admission has to be regulated according to the number of seats

The most important question which the Chamber has ever discussed is Federation, This subject came before it on various occasions after the Princes' representatives at the first Round Table Conference, in connection with the latest Constitutional Reforms scheme, made a pronouncement in favour of Federation which led to the incorporation in the new Reforms Legislation of provisions for its establishment. The consideration of this great issue, though sometimes taking place in open debate, has for the most part been conducted at meetings of the Standing Committee of the Chamber, which always meets in private, at informal meetings of the Princes with or without their Ministers and in an important Committee of Ministers. This latter body has been representative of all the States, including those whose Rulers have never exercised the privilege of sitting in the Chamber.

Federation caused sharp divisions of opinion among the Princes. Meanwhile, as the constitution of the Chamber provided for each State-Member exercising one vote on any question coming before the Chamber, power in the Chamber gradually fell into the hands of a majority representing the smaller States, because these States were naturally the readlest to exercise their membership privileges. This development caused serious dissatisfaction among the Greater States and out of that sprang a movement for the re-organization of the Chamber.

The differences between the Greater States and the Lesser States were much sharpened by the different viewpoints which they occupied in regard to Federation. His Highness of Patials early in 1938 resigned the Chancellorship on this account. Thereafter His Highness of Bitaner resigned from one Standing Committee of the Chamber. Only one Ruling Prince with a salute as big as 17 guns was then left an active participent in the Chamber's affairs. His Highness of Patials was succeeded in the Chancellorship by His Highness of Dholpur, who automatically proceeded to the appointment from that of pro-Chancellor. There was no meeting of the Chamber in 1938. His Excellency the Viceroy, in consultation with the Princes, convened a meeting commencing on 22nd February, 1987.

This meeting was preceded by intensive deliberations in the Informal Conferences of Princes. Their Highnesses at discussions which they held in Bombay in October 1936 appointed a Constitutional Committee, under the Chairman-ship of His late Highness the Maharaja of Patila and including the Chancellor, to examine the Government of India Act of 1935 from the point of view of the States' entry into Federation. This Committee produced its report in the first week of February, 1937, and in the course of it said that upon careful consideration of the Act they had "come to the conclusion that the safeguards have been substantially met" and that certain further recommendations now newly made by themselves would, if adopted, completely fulfil them. These recommendations, the Committee said, had been drafted in consideration of the fact that the Act had already been passed. They comprised, therefore, four proposed changes in the States' Draft Instrument of Accession.

This report was taken into consideration by the general body of Princes in their Informal Conference. At the same time as His Highness the Chancellor brought it before that body, he also laid before it an Opinion upon the same subject by Counsel whom the Standing Committee of the Chamber had recently engaged from London. This Opinion was a lengthy document and in effect amounted to a warning to the Princes against the risks in which entry into Federation would involve them. Its receipt led to its urgent examination by other expert advisors to the general body of Princes. Their criticisms of it were destructive. A further opinion in favour of Federation was at the same time independently given to the Princes, at the request of His late Highness of Patisla, by the Right Hon'ble Sir Tej Bahadur Sapru.

The upshot of all this was that under the leadership of the late Maharaja of Patilal the Informal Conference adopted the report of the Constitutional Committee in favour of the entry into Federation on the basis of the Government of India Act 1935 and subject to the satisfactory conclusion of negotiations with the Crown on the subject of the Constitutional Committee's newly made recommendations. This decision was endorsed in a formal meeting of the Chamber of Princes on 24th February by the re-election of His late Highness of Patiala to the Chancellorship by an overwhelming majority, and by the election of a pro-Chancellor and Standing Committee in sympathy with the same decision.

But early hopes of a speedy decision by the Princes faded out for various reasons. The draft Instrument of Accession came under prolonged scrutiny. On His Excellency the Crown Representative devolved the task of negotiating with individual States, and His Excellency's envoys visited most of the States on this mission.

His Highness the Jam Saheb of Nawanagar succeeded His late Highness of Patiala in the Chancellorship and continues to hold office.

No formal session of the Chamber was held in 1938, the next being the one held in March, 1939. Opening the session, His Excellency the Viceroy, who presided, dealt mainly with Federation, but also referred to the agitation in the States for reforms. He urged on the Princes the need to look for and remedy the legitimate grievances of their subjects, the importance of publicity designed to set out the true facts about the States, and the necessity for the Princes to be in personal touch with their people. Reviewing the Chamber's work, the Chancellor referred to some of the important questions settled during the period, viz. the attachment of British Laison Officers to Indian States Forces Units, extradition of criminals between Indian States and British India and the reorganisation of the Princes' Chamber so as to make it fully representative of the big as well as the small States etc. The reorganisation scheme which was drafted at a conference in Bombay owed much to the activities of His Highness the Maharaja of Bikaner.

The question of accession to Federation was fully considered by a Committee of States Ministers convened by the Rt. Hon'ble Sir Akbar Hydari. The Hydari Committee closely examined the draft Instrument of accession, which, it was claimed, revealed differences relating to certain specified subjects, such as the protection of treaty rights and the rights of administration by the States of certain Federal subjects. After considering the opinions of legal advisers, the Committee unanimously adopted a report raising objections to certain points in the Government of India draft and left it to the Princes to take such action as they might think necessary to asfeguard their rights.

These recommendations were considered at a Conference of Princes and Ministers held in Bombay in June, 1939, under the chairmanship of His Highness the Jam Saheb of Nawanagar, the Chancellor. The Conference passed a resolution stating that the Princes found the revised draft Instrument of Accession unacceptable, two of their main reasons being that the form in which it seeks to protect their treaty rights is held to be inadequate for the purpose; and secondly, that the orbit of federal authority and jurisdiction has been extended beyond that contemplated by the framers of the Constitution. Individual Princes were advised to reply on these terms before the end of July, when all replies had to be sent in.

Government of India circles professed surprise at this decision, but decided to await the decisions of individual Princes before taking further action.

The pace of administrative and constitutional reform in the States has rapidly increased in their demands and called off a the last few years owing to the introduction of disobedience movements into States.

provincial autonomy in British India, the approach of Federation, and pressure—sometimes direct—from the Indian National Congress. State after State is announcing reforms aimed at associating more fully its subjects with the administration. An extraordinary develop-ment took place early in 1939 when Mr. Gandhi decided on a fast to death to compel the Thakore Saheb of Rajkot to implement his promise concerning the membership of a reforms committee. The Vicercy intervened and Mr. Gandhi agreed to the adjudication of the Chief committee. Justice of the Federal Court, which went in his favour. But subsequently further difficulties over the constitution of the committee arose owing to Mr. Gandhi's promise to the minorities and Mr. Gandhi eventually recanted and declarcd that his fast had been coercive in character. He therefore left the committee to be constituted by the State, Later Mr. Gandhi announced a "new technique" for agitation by States' subjects, in which he counselled moderation in their demands and called off all civil

Payments from Indian States.

Many of the States make payments, varying in amount according to the circumstances of each case, to His Majesty. These payments are frequently due to exchange of territory or settlement of claims between the Governments, but are chiefly in lieu of former obligations to supply or maintain troops. The annual receipts on account of these payments from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States in the Western India and Gujarat States Agencies pay tribute of some kind to Baroda, and that Gwalior claims tribute from some of the smaller States of Central India States making payments directly to His Majesty.

States paying tribute directly to the Government of India.

It was announced at the Coronation Durbar of 1911 that there would in future be no Kazarana payments on successions,

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguero possessions in India, all of which are situated within the limits of Bombay Presidency, consist of the Province of Goa on the Arabian Sea Coast; the territory of Daman with the small territory called Pragana-Nagar-Avely on the Gujarat Coast, at the entrance to the Guif of Cambay; and the little island of Diu, with two places called Gogia and Simbor, on the southern extremity of the Kathiawar less than 4 thousand square kilometers.

Peninsula. All these three territories constitute what is called the State of India.

The Portuguese colonies consist of Cabo Verde, Guine, S. Tomé e Principe, Angola e Congo, Mocambique, India, Macau and Timor which occupy together an area much larger than the total area of Portugal itself, which together with its colonies make up over 2 million square kilometers. Portuguese India has an area of

GOA.

Goa forms a compact block of territory surrounded by British districts. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kauara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 square miles and consists of the Velhas Conquisdas, or Old Conquests, comprising the island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez. and Mormugao acquired in 1548; and of the Nevas Conquistas, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepem, Canacona, Satari and Sanguem acquired in the latter half of the 18th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion, the predominating physical feature being the Western Ghats, which besides bounding the country along the northeast and south-east, just off westward and spread across the country in a succession of spurs and ridges. There are several conspicuous isolated peaks. of which the highest, Sousagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats, and the principal eight, which are all navigable, are in size of some importance. Gos possesses a fine harbour, formed by the promonteries of Bardea and Saisette. Half-way between these extremities lies the cabe, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and see and to the formation of sand bars across the estuary of the Mandovi river, which opens into Aguada. Mormugao is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines. A breakwater and port have been built there and the trade is considerable being chiefly transit trade from British territory.

The People.

The total population of Portuguese India 14 579,970 of which 279,398 are males and 300,572 females. Portuguese India has 4 cities. 3 towns and 593 villages in which reside 127,180 families. The density of the country is about 153, the highest being in Bardez with 468 inhabitants per square kilometer and lowest in Sanguem with only 24 inhabitants per square kilometer.

In the Velhas Conquistas the majority of the population is Christian. In the Novas Conquistas Ilindus are more numerous than Christians. The Moslems in the territory are numbered in a few thousands. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chardos and low castes, which do not intermarry. The Hindus who form about one-haif of the total population are largely Maratha and do not differ from those of the adjacent Konkan districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words. The official language is Portuguese, which is commonly spoken in the capital and the principal towns as well as by all educated people. Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecciosiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in foreign countries and Mocambique (Portu-guese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed and Diu are subject under a new Treaty signer in 1928 between Portugal and the Holy See to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuita and Franciscans prior to the axtinction of the religious orders in Portuguese territory. The churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The policy of the Portuguese Republic established in 1910 was to persecute Catholic Religion and to suppress all religious Societies. As a result of this policy Jeaults were driven away from the country. The New State has entirely roversed the religious policy of the country.

All religious Orders are freely allowed and several of them have now established Convents and Schools in the country including the Jesuits who have started a Secondary College at Panjim. A number of nuns have also come to the country. A new Seminary is being built and a new religious Order is proposed to be started in Goa.

The Country.

A little over one-third of the entire territory of Gos is stated to be under cultivation. The fertility of the soil varies considerably according to quality, situation and water-supply. Velhas Conquistas areas a rule better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good or streem but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the useds of the population for two-thirds of the year. Next to rice, the culture of cocoanut palms is deemed most important. from the variety of uses to which the products are applied. Hilly places and inferior are applied. Hilly places and inferior soils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen. Stately forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory; but has not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to the Continent.

In recent years a remarkable change has come over the means of transport throughout the country. A large number of new roads have been built which have brought the most outlandish villages of Gos into close and intimate connection with the cities and towns. It is easy to cover the whole country in motor car within practically a single day and Novas Conquistas are now easily accessible to the remotest parts of the Velhas Conquistas. A number of new bridges have been built which have made easy interdistrict communication. There are bus services throughout the country at regular intervals and with cheap rates. These have quickened the communication with British India and have enabled the district of Salecte and Bardez to import a larger quantity of foodstuffs, fruits and vegetables from the adjoining British territories.

Commerce.

In the days of its glory, Goa was the chief little indication of its productive capacit entrepot of commerce between East and West annual wealth. The national wealth and was specially famous for its trade in horses of pure conjecture for lack of statistics.

with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs. 141 lakins and exports to about Rs. 30 lakins in 1937. The discrepancy is mot from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports chiefly consist of cocoanuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway. Its length from Mormugao to Castle Rock above the Ghats where it joins the British system is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The tolegraphs in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories.

Most of the commerce of Portuguese India is with British India with whom it maintains close commercial relation. About 65 per cent. of the imports of the country are from British India which also receives most of its exports which have experienced in recent years a remarkable fall. Among the most important imports are rice, textiles, sugar, cereals, petrol, kerosene oil, etc. There is a large entrepot trade running into about 8 to 9 crores of rupees a year, which is generally cleared by the port and railway of Morfungao.

Taxes and Tariffs.

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and these were mot by fresh taxes and new loans. Most of the new trves were the result of the initiative of the Governor-General Jaime de Morais, who is popularly known as the "Governor of Taxes." Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 13 per capita. There is no income-tax, except for government servants, but there is a special ten per cent tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, Excise and the customs. There is a special tax on emigrants which yields to the State about Rs. 40,000. The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent. according to the nature of the commodities, but the duties in several cases are specific, not ad valorem. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent. on their basic price.

For the last seven years the country has experienced recurring surpluses due to the increasing indirect taxes. Public revenues between 1914 and 1938 have almost doubled themselves and the indirect taxes yield to the State about \$2 lakhs of rupees and direct taxes about 9 lakhs of rupees. The surplus from 1935 to 1937 came to 17 lakhs which together with other special funds make up a reserve of about 65 lakhs of rupees available for developmental expenditure in which sum is included about 17 lakhs of rupees available for developmental expenditure in which sum is included about 17 lakhs of rupees due by other colonies of Portuguese India. Recently all the different special funds have been merged into one consolidated reserve fund with the exception of the yield of the rice tax which will constitute a separate reserve ear-marked entirely for the development of rice cultivation. A heavy duty on imported rice has been established from the end of last year and it is expected to yield about 7 lakhs of rupees a year. The public debt of Gos is made up of dues to Portugal has been wiped out by lump payments. The currency of the country is the monopoly of the Banco Nacional Ultramarino which is the State Bank of issue for some of the Portuguese colonies. The State holds a percentiage of share capital on which interest is payable by the Bank to the respective colonies. The total fiduciary issue of the Bank at the end of last year was about 135 lakhs, but its active note circulation did not exceed 90 lakhs of rupees.

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Vicercy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturaque and this impression is not belied by a closer inspection of its neak and apacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press. Other noticeable buildings are the Cathedrai and various churches, the

viceregal palace and the High Court. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

Panjim has been undergoing in recent years many remarkable improvements. The electrical supply of the country has been reorganised under the auspices of the Municipality and a better system of lighting, public and private, is now in force. Most of the important roads are being asphalted at a large cost and recently a large number of buildings have come up on Allinho which is the Malabar Hill of Panjim, A decree has been published compelling all houseowners to introduce septic tunks as a preliminary step to the working out of a scheme of water-supply.

History.

Gos was captured for the Portuguese by Alfonso de Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From this time Gos rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bigapur kingdom but the Portuguese held their own and gained the surrounding territory now known a the Velhas Conquistass.

The subsequent history of the town is one of ostentation and decay. Gos reached its a immit of prosperity at the end of the sixteenth contury. The accounts of travellers show that the Gos of those days presented a scene of military, ecclesiastical and commercial magnificence which has had no parallel in the British capitals of India. Portugal, however, with its three millions of population, was too small to defend itself against Spain and maintain at the same time its immence Empire in the four Continents. Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties. His contemporaries, however, could not understand his far-seeing statemanship and after his death they undid all his work basing their dominion on conquest by the sword and military force and they laboured to consolidate is by a proselytising organisation which throws all the missionary efforts of every other European power in India into the shade. Old Gos, as the ruins of the old capital are called to-day, had a hundred churches, many of them of magnificent proportions, and the Inquisition which was a power in the land. The sixty years' subjection to Spain in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far-off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the colonials began to enjoy full Portuguese citisenship and seen the term of the late of the properior of the particular of the properior of the particular of the properior of the particular of the particular of the properior of the particular of the properior of the contury that the colonials began to enjoy full Portuguese citisenship and seen the test of the particular of the properior of the particular of the particular of the particular of the particular o

Modern Times.

There was frequency recurring fighting and lo 1741 the Marahas invaded the neighbourhood of Gos and threatened the city itself. An army of 12,000 men arrived from Fortugal at the critical moment. The invaders were beaten

off, and the Novas Conquistas were added to the Fortuguase possessions. In 1844 the shalter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay, In 1652 the Ranes of Satari, in the No-vas Conquistas, revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so disbanded the native army, which has never been reconstituted. But another outbreak among the troops took place in 1896 and the Banes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1918. There has been no outbreak after that date.

The people on the whole appear to be quite satisfied with the Portuguese connection. There is no agitation for further reforms as in British India and not a sign of disaffection against Portuguese rule. This is chiefly due to the fact that under the present regime the natives of Goa enjoy complete equality with the natives of Por-tugal many of the sons of Gua occupying high and responsible positions in Portugal. Thus Hivino de Britto who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Betten-court Rodrigues, Minister for Foreign Affairs in General Carmonas dictatorial Government. Natives of Gos are also Dr. Almeida Arez, the President of the Supreme Court in Lisbon, Dr. Caeteno Gonsalves, Judge of the same Court and Mr. Alberto Xavier, ex-Secretary-General of

the Ministry of Finance.

The establishment of dictatorship in Portugal has produced profound changes in the administrative machinery of Gos. A system of centrali-sation, financial and administrative, has been introduced with the result that all important inancial and administrative acts require the sanction of the Lisbon Government. The Governor-General has to submit frequent reports of his administration to the Lisbon Government. A press law very severely controls the freedom of the Press and imposes heavy penalties on all of the Press and imposes heavy penalties on all crimes committed by newspapers. Old news-papers are exempted from deposits, but new ones have to keep with the State considerable sums of money before they are allowed to appear. Every paper has to be previously censured by official censors and so also the publication of books, brochures and pamphlets. The powers of the Council of Government are also reduced, particularly their legislating functions. particularly their legislative functions. A system of periodical conference has been established made up of all the colonial Governors. rument made up or all the colonial Governors. There is a common parliament and the whole Portuguese Empire is constituted into a single constituency electing about 90 members to the Rational Assembly. Recently elections were held for this Assembly. Presidents of municipalities and charitable associations are appointed by the a Governor-General.

The Liebon Government by Decree No. 2224, ited 27th July 1917, seeded new rules to thing the educate table of Pertugues Agile 1

under an Organic Charter (Carta Organica) in force since 1st July 1918. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos. 7008 and 7030, dated 9th and 16th October. A new Organic Charter modifying in certain parts the earlier one was next to the Decree No. 1848 of 4th October. ranted by Decree No. 12499 of 4th October 1926 and is now in force.

The territory or Portuguese India is ruled by one Governor-General, vesiding in the Capital of the State, at Panjim atles Rovas-Gen-and is divided into three districts; Gos. Benan and Diu. The last two are each unders. Lieutenant-Governor. The district of Goa is under the direct superintendency of the Governor-General.

Subordinate to the Governor-General the Subordinate to the Governor-General re-following Secretariats are working: Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works. There are also three special and autono-mous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Ballway.

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (Conselle do Governo) with Legislative and advisory powers. The Council is constituted, in addition to the Governor-General, ex-officio President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing Velhas Conquistas, one the Novas Conquistas and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu there is a District Council to supervise the Municipalities and other local institutions. District Council of Goa is composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova-Gos Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finances; the Chairman of the Municipal Corporation of the Islands; one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; due member elected by the Associations of Land owners and Farmers of the District; and one member advocates elected by the Legislative Council among the legally qualified.

There is one High Court in the State of India with five Judges and one Attorney-General: and Courts of Justice at Panjim, Margao, Mapues, Bicholim, Quepem e Damao; and Municipal Courts of Justice at Morgangão (Vasco da Gama), Ponds, Diu and Magar-Aveli.

A new Administrative Code has been intro-duced which improves administrative discipline and holds public servants directly and personally appossible for all their actions. No public sevant can guidess communium and has to make a declaration to that effect. The Governor has

wide disciplinary powers over the public servants | subject to the right of appeal to the Supreme Administrative Court or the Supreme Court of Discipline. The judiciary has its own autonomy as regards promotions, discipline, punishments

and dismissal subject to general supervision and control by the Minister for Justice, The whole Portuguese Empire forms one judicial district directly under the Lisbon Government,

PORT OF MORMUGAO.

Mormugae is situated towards the south of Agusda Bar, on the left Bar, on the left bank of Zuary River in Lat. 15° 25'N, and Long. 78° 47' E., about 225 miles south of Bombay and 64 miles south of Panjim, the Capital of Portuguese India. The Port of Mormugae is the activation of the contract of the co served by the M. & S. M. Ry. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugao is about the same as from Aden to Bombay. The Port is provided with lightto Bombay. The Fort is provided with agni-house, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compul-sory but when usual pilot fiag is hoisted, a qualified officer will board the vessel and render such assistance.

Mormugao Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras.

With a view to promoting the economical, commercial and industrial development of Mormugao, a special Department under the designation of the "Mormugao Improvement Trust" with its head office at Vasco da Gama, 2 miles from Mormugão Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour.

DAMAN.

The settlement of Daman lies at the enteriory is under tillage. The principal crops trance to the Gulf of Cambay, about 100 miles are rice, wheat, the inferior cereals of Gujarat north of Bombay. It is composed of two portions, namely, Daman proper, lying on the minerals. There are stately forests in Nagar coast, and the detached pargans of Nagar Aveli, and about two-thirds of them consist of separated from it by a narrow strip of British territory and bisected by the B. B. & C. I. Railway. Daman proper contains an area of 25 villages and has a population of the proper contains an area of 25 villages and has a population (1921) of 17,565 of whom 1,480 are Christians. The number of houses is according to the with the east coast of Africa. In those days ission (1921) of 17,000 of whom 1,000 are, unra-tians. The number of houses is according to the same census 4,095. Nagar Aveit has an area of 60 square miles and a population (1921) of 31,048, of whom only 271 are Christians. The number of houses is 6,069. The town of Daman was sacked by the Portuguese in 1531 rebuilt by the natives and retaken by the Portuguese in 1558, when they made it one of their permanent establishments in India. They converted the meaque into a church and have since built eight other places of worship. The sative Christians adopt the European cos-tume, some of the women dressing themselves after the present European fashion, and others fellowing the old style of petticoat and mantle

decline of Portuguese power in the East, Daman carried on an extensive commerce especially with the east coast of Africa. In those days it was noted for its dyeing and weaving.

The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military fovernor invested with both civil and minitary functions, subordinate to the Governor-General of Goa. The judicial department is administered by a judge, with an establishment composed of a delegate of the Attornsy-General and two clerks. In Nagar Aveil the greater part of the soil is the property of the Government, from whom the cultivators hold thair fellowing the old style of petiticoat and mantle tanures direct. A tax is levied on all once prevalent in Spain and Portugal.

The soil of the settlement is moist and ferrors, whether alienated or the property of the State. The chief sources of revanue talls, especially in Nagar Aveil, but despite the are land-tax, forests, excise and customs case of cultivation only one-twentieth part of the

Din is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Din proper (sland), the village of Gogla, on the Peninsula, separated by the channel, and the fortress of Simhor, about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely rids at anchor in two fathoms of water and swing to the great advantages which its position offers for trade with Arabia and the Perusian Guiff, the Portuguese were fired at an easily possed with a desire to obtain possession Diu is an island lying off the southern ex-

of it. This they gained, first by treaty with the Sultan of Gujarat and then by force of arms. Diu became opulent and famous for its commerce, It has now dwindled into inalgnificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1921, is 13,844, of whom 228 were Christians.

FRENCH POSSESSIONS.

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 31st Dec. 1987 of 295,508. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it falled, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first Campagnie d'Orient, but its efforts met with no success. Colbert reconsti-tuted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the indian trade for fifty years. After having twice attempted, without success, to establish tited in Madagascar, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on find-ing that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel coast, in 1672, selsed St. Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was, however, compelled to restore it to the Dutch in 1674.

pedied to restore it to the Jutca in 167 a.

The rain of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the week of the settlements at Trincomalee and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Bajs of Gingee. He built fortifications, and a trade began to avring up: but he was unable to hold began to apring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1698, and held it until it was restored to the French by the Peace of Byswick, in 1697. Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was purchased by a European Company from a native prince, and what Job Charnock was to Calcutta. Francois Martin proved to Pondicherry. On its restriction to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Dehit Emperor: Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circurs, was taken possession of in 1750, and formally ceded to the French two years later.

Administration.

The military command and administration-inchief of the French personsions in India are vested

Service " in the different administrative departments. In 1879 local councils and a councilgeneral were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boar's, were erected in 1907, namely, Communal Boar's, were erevosed in 1907, namety, Pondicherry, Arianoupam, Modeliarpeth, Oulgaret, Villenour, Tiroubourané, Bahoar and Nettapacam, for the establishment of Pondi-cherry; Karlkai, Neravy, Nedouncadou, Cir-soular, Grande Aldée, Cotchery, for the establishment ment of Karikal, and also Chandernas, re. Mahe and Yanaon. On municipal boards nextives are entitled to a proportion of the seats. (1911 and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry and those of administrators. at Chandernagore, Yanson, Mahe and Karikal, together with other headquarters charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four dependent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India: and of the Missions Etrangeres, the successors of the Mission du Carnatic founded by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British subjects and many of the churches are in littuan territory. The British rupes is the ordinary tender within French territories. A line of rail-way running siz Villenour, from Pondicherry to Villupuran on the South Indian Bailway, main-tains communication with Madras and the rest of British India, and Karikai is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of Buropean descent, was reorganised by a decree of 7th March, 1914. The capital, Pondicherry, is a very handsome town, and presents, especially from the sea a striking appearance of French civilisation.

People and Trade.

The Settlements are represented in Parliament at Paris by one senator and one deputy. The Senator is Mons. Lenacignic. The Deputy is Mons. Pierre Dupuy. There were in 1987 67 primary schools and 3 colleges all maintained by the Government, with 352 teachers and 13,602 pupils. Local revenue and expenditure (Budget of 1989) Rs. 3,897,090. (Budget 1927) Rs. 3,240,986. (Budget of 1989) Rs. 3,444,086. The principal crops are paddy groundout, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagors 1 jute mill. The cotton mills have in 62 1,969 looms and 84,744 spindles, employing 7,600 persons for The Settlements are represented in Parin a Governor, whose residence is at Pondi-cherry. The office is at present held by Minstear Bonvin (Louis). He is satisfied by a Chief Justice and by neveral "Chefs de factory. The chief suports from Fendisherry at

oil seeds at the ports of Pondicherry and Karikal, | visited by French steamers, salling monthly In 1988 the imports amounted to frs. 79,058,000 between Colombo and Calcutta in connection and the exports to frs. 118,446,000. At these with the Messageries Maritimes. The figures two ports in 1988, 296 vessels entered and contained in this paragraph are the latest avail-cleared; tonnage 986,187 T. Pondicherry is able and are corrected up to December 1988.

PONDICHERRY.

Pondicherry is the chiof of the French Settlements in India and its capital is the head-quarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondi-cherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in the 26th Feb. 1931 was 188,555. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under Francois Martin. In 1698, it was captured by the Dutch but it was captured by the Dutch but
was restored in 1699. It was besieged four
times by the English. The first siege
under Admiral Boscawon in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number. isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea. The Collector of

South Arcot is empowered to deal with ordinary correspondence with the French authorities on these and kindred matters, and in this capacity is styled the Special Agent. At Pondicherry itself is a British Consular Agent accredited to the French Government, who is usually an officer of the Indian Army. who is usually an officer of the Indian Army. The town is compact, neat and clean, and is divided by a canal into two parts, the Ville blanche and the Ville noire. The Ville blanche has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visitor of continental boulevards, and the houses being constructed with courtyards and embel-lished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual masula boats of this coast. Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

CHANDERNAGORE.

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. Population (in the 26th Feb. 1981) 27,262. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1676. It did not, however, rise to any importance till the time of Dupleix. It changed hands between British and French various tution is the times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has

disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Railway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator who is subordinate to the Governor of the French Possessions. The chief public insti-tution is the College Dupletz, fermerly called St. Mary's institution, founded in 1882 and under the direct control of the French

KARIKAL.

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 58 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry. The popu-lation has in recent years rapidly decreased. In lation has in recent years rapidly decreased. In 1883 it was 93,055; in 1891, 75,525; in 1991, 54,008; in 1923, 57,023 in 1924, 56,922; and in 1931, 57,914; but the density is still very high, being 1,068 persons per square mile. Kumbakonam is the only tests in Tanjore District which has a higher density. Each of the six commune—namely, Restinal, La Grande Aldee, Nedunyadu, Ortang, Hémny and Tirmoular—possesses amayer universal suffrage but in the municipality Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on

The capital of the settlement is attuated on the north bank of the river Arasalar, about 13 miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open readstead, provided with a light-house 142 feet high, the light in which has a range of from \$2.0.10 miles. In 1898 Katilal was considered. 8 to 10 miles. In 1899 Karikal was connected with Peralem on the Tanjers District Board Railway. Karikal Rasily came into French and the Control of the Control of the Control

The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a twofold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times was for the international aspect to recede and for the local supert to grow in importance, until it might be said, with as much truth as characterises all generalisations, that the local issue dominated, fit tidd not absorb the situation.

The Local Problem.—The local problem in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Nepal is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are poorly populated by hardy, brave, militant mountaineers, rendered the fleroer and the more difficult by professing the martial Moslem faith, accentuated by the most bitter fanaticism. But sparse as the copulation is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to eke out their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Bobert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal ohlers, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government or Inque from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations, and the Gomal Pass was involved in the gatesti tithel disturbances which followed the wanton declaration of war by Atganistan.

By those who take a long view of politics in le wide sense of the term, it will be seen that brought peace to Baluchistan, and to the large large in the discussion of Indian questions, always borne a twofold character—the local sue and the international issue. For almost century the international issue was the greater and constructive policy.

Towards Afghanistan.—Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That was, for three quarters of a century, the scene of almost ceaseless military operations, which constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan fron-tier would only shift the frontier problem farther north. Instead of the differing tribes. should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahaman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were meved against the rebellious Khostwalis, and the Amir had so make peace with his troublous vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Which our motivation would simply mean that is time of trouble we should have to deal with Afghanistan instead of a tribe or two, and the irreconcilable tribesmen along our difficult line of communications. The Kabul Government now have greater control over their tribes near the frontier than formerly but the old argument still applies. There was the further consideration that financiers were of the fixed being that even if the Ferward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover on this section of the Frontier, the position was complicated by the

expansion of Russia in Central Asia. The easiest asses, and the passes down which for centuries passes, and the passes down which the freat invaders from the time of Alexander the Great invaders have swept from Persia and Central Asia to loot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to constrol, if not to cocupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward Bohool, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier, and the Close Border School, which would have us remain out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth. The extreme advocates of this school would even have had us return to the line of the Indus.

The Two Policies .- The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly un-satisfactory. We pushed forward posts here and there, which irritated the Tribesmen, and made them fearful for their prized independence, without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting resery were they intend with their supporting posts by adequate means of communication. We preserved between our administrative trontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Independent Territory, in which neither we nor the Afghan Government exercised urisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the ferennial topics of Frontier discussions. But stress was laid upon the essential differences between was laid upon the essential differences between this sone and Baluchistan. Sir Robert Sande-man found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefa. There is no such tribal organisation in the Independent Territory. The tribal Chiefa, or Malika, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser greybeard. innuance, as the voice of the waser greybeard. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uneasiness fiamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Nepal. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation was the immense difficulties of transportation, was anable effectively to deal with the situation, though peace was made. The emergency thus ereased synchronised with the advent of Lord Ourson as Vicercy. He dealt with it in master-ful fashion. In the first place, he separated the frontier zone from the Government of the Pandab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the

Vicercy had been able to carry it through in the face of the strong opposition of successive Punjab Governments. The area so separated was constituted into a separate administrative sone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the Regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development polley. The construction of the Upper Swat Canal, afterwards developed into the Swat Canal (q.v. Irrigation) led to such an increase Canal (q.v. Irrigation) led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

Lord Curzon's Success,—Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace. There were cocasional punitive expeditions demanded, such as for instance the Zakka Khel and Mohmand expeditions, and the Waziris, and in particular the truculent Mahsud Waziris, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the Waxiris built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jelalabad. Although he does not figure so prominently in frontier history as his iron ather Abdurrahaman Khan, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to Abdulrahaman Khan could hold in the least of a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. Yet this Habibullah did. On occasions his attitude seemed to be equivocal, as when armed gatherings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Independent Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European standards; the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered on the war, and called Moslems everywhere to arms on the side of Germany was extraordinarily difficult. He received Turkish, German and Austrian missions in Kabul, from which British representthe purpose a special force of Frontier soldiers, atives were stillexoluded. But he kept Alghani-knewn as the Pushab Irregular Frontier Force, stan out of the war, and with the complete defeat Fulls was the revival of a scheme as old as the Piesseyalty of Lord Lytton, though no other policy was justified up to the lilit. Indeed,

his success was the cause of his assassination; convoys and to loot the abandoned posts. To The irreconcilable elements in the Kingdom saw expect the militae to remain firm in retreat that the day of reckoning had come and strove to avert the settlement of their account by the murder. When he was done to death, his brother, Nasrulish Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the archfanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiery the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always was at once see in motion, and as nas aiways been the case the regular Afghan Army was easily beaten. Dacca was seized, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, knyber solage. With one or two exceptions, the Tribal Militia, left without the support of the regular troops, who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either an appeal from their fallow tribesment, and either melted away or joined the rising. This has often been described as the failure of the Curson policy, which was based on the tribal militia. But there is another aspect to this question. The Militia numbered only some 8,000 men. They were distributed in a number of isolated and semi-isolated posts. There was no possibility of their withstanding the onslaught of an Afghan invading force. They were not intended for such a purpose. If they had, when the invasion began, been supported by regular troops their loyalty might have remained sound. But other counsels prevailed. It was sound. But other counsels prevailed. It was at the outset decided in high military quarters that in the face of the Afghan invasion it was inadvisable to send regular troops to support the Waziristan militia posts as it was concluded that the Mahsud and Wazir tribes of Waziristan would join the enemy. Orders were therefore issued that the posts should be abandoned, the British officers in them withdrawing with such men as remained loyal. The officer commanding the Bannu bricade immediately despatched a the Bannu brigade immediately despatched a movable column for the succour and reassurance of the militia garrisons in his area but superior orders followed directing the return of the column forthwith. The militia were therein such circumstances was to refuse reasonable consideration of the facts of the situation.

Russia and the Frontier.—The Curson policy was up to this inevitable collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three-quarters of a century a velled warfare for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her and with neighbours who would not let her alone, Russia had to advance. True, the advanturous spirits in her armies and some of the great administrators in the Tsarist capital were not adverse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilia enterprise between the hardlest spirits on both sides, accompanied by periodic panies in the sides, accompanied by periodic panies in the British Press each time the Russians moved forward, which induced the colning, after the Russian occupation of Merv, of the generic term "Mervousness." This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. It involved us in the second Afghan War of 1878, which left the baffing problem of no stable government in Afghanistan. There was a gleam of light when Abdurfahaman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, if one ruthless in his a strong and capacite river, it one runness in methods. But in the early eighties the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a broke out in another form when intringes wish a Buriat monk, Dorjieff, during Lord Curson's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dis-persed the missma of this intrigue. But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived agreement of 1907 mat the wor counters arrived upon ordered to withdraw and their commencement to do so, accompanied by the burning of such stores as they could not carry, quite naturally produced the instant upon ordered to withdraw and look the retiring agreement of 1907 mat the wor counters arrived upon the stores. The actual authors of the such stores as they could not carry, quite naturally produced the instant upon of the retiring agreement of 1907 mat the wor counters arrived agreement of 1907 mat the wor counters are a stage to agreement of 1907 mat the wor counters arrived agreement of 1907 mat the wor counters are a stage to agreement of 1907 mat the wor counters are a stage to agreement of 1907 mat the wor counters are a stage to agreement of 1907 mat the world of

ed by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement. This embraced the whole frontier zone. There were many unsatisfactory features in the Agreement, especially in regard to Persia, for which we had to pay a considerable price in the attitude of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War-Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Oligarchy in Moscow uneasiness returned, for the geographical and allied dircumstances which influenced the policy of the Tarist regime exert precisely the same pressure upon its successor, and the Soviet have a troublesome motive which the Taris had not: their aim to produce world revolution is avowed and Britain and the Constitutionalism for which she stands were for long admittedly the greatest obstacles in their path and despite the recent effects of Totalitarianism this is still fundamentally the case.

German Influence.—As nature abhors a vacuum, so in the case of States bordered by higher civilisations, no sooner does one strong inducence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manchuria, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kalser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracked by Europe for his direct complicity in the massacres of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His theatrical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructived more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haidar Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties and decared that the acquisition of a territorial foothold in the Persian Gulf by any power—Russia and the port of Bunder Abbas being them is view—would be regarded as an unfriendly act. There followed a replica of the period of alesmas and exourations which had disfigured one that their endeavour to secure British co-operation in the enterprise failed, and when the Edwalution in Turkey which set the Committee of Union and Propress in power entsitée.

temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourgulu, and constructed a line northwards from Baghdad to Samara. They sent a mission to explore the potentialities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subordinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Bara to Koweit, or the vicinity of Koweit at the deep water inlet behind Bubian Island. They commenced the most difficult part of the work in piercing the Amanus and Taurus ranges by a series of tunnels, and laid the rails on the other side of the mountains across the en the other side of the mountains across the Euphrates to Ras-al-Ain. Behind this rail-way activity stood a grandiose policy, which is indicated in what became known in Germany as "B.B.B."—Berlin, Byzantium, Baghdad. Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf. at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. under this agreement the Guif section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed. Once again with a new German drive to the East in Europe, a footing on the Black Sea if obtained would revive that old ambition.

The Significance of the Baghdad Ratiway, was little appreciated in Great Britain. It was constantly pictured as a great trunk line, which would short-circuit the traditional British dominance by sea, and absorb the passenger and goods tradic from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of passenger tradic from India is from April to June, in order to escape the hot weather in India and the return tradic is spread over the period of from October to January, From April to June the heat in Mesopotamia is appalling. To fungine that the passenger tradic from India would turn from the easy and comfortable, as well as fairly expeditious sea route from Bombay to Marsellles and thence by the easiest railway travelling outside the British Isles to Calais and London, for such aland route was an amasing chimers. The Baghdad route would have involved a sea voyage from Bombay or Karschi to Koweit or Baars, then a fourey across the burning plains of Mesopotamia and Asia Misor to Hakar Pasha, also across the Straits to Constantinople, and finally right aeroes Europe

to a North Sea port. This would in any circumso a North Sea port. This would in any circumstances have been a coatty freak journey in comparison with the sea route. Then as for the commercial aspect of the line, the natural port of the Middle East is Baara. The sea regight from England or Germany to Basra was often less than half the freight from Basra to Baghdad. To imagine again that merchandise would desert this route for a land and sea route, which would have involved a double break of bulk at Constantinople and Haidar Pasha, was again a chimera.

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constantinople—and that Power the Teutons were resolved should be Germany—complete master of Asia Minor and The Middle East, and the route-select-ed, often criticised, was the best for the rapid movement of troops to the strategic centres. movement of troops to the strategic centres.

As a commercial line, the Railway, if completed, would have served three zones. The western area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. The eastern zone at Basra. The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg-America corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus. The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg; that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East: Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of re-building their bankrupt State, deprived of the most intelligent section of the old population—the Greeks and the Armenians, by massaore and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction that was one of the red herrings they drew across are many and great, the ultimate construction of the through line was only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion at a later stage.

Turkey and the Frontier.—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never

raised the status of Mesopotamia, and after the Revolution that fine soldier Nasim Pask became a power in the land. But speaking broadly Turkey remained in Mesopotamia broadly Turkey remained in mesupoward because it was no-one's interest, even that of the Arab, to turn her out. When however even that of the Arab, to turn her out. When however Germany developed her "B.B.B." policy, Turkey was used as a stalking horse. Bhe moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a de facto suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Baara and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Bussian debclet we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaff. But the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite fron-tiers. This enabled the Turks, if they were so disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Irak. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation shouldbe left to The League of Nations. Negotia-tions were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak. The issue therefore went to the League of Nations, That body despatched a neutral commission te study the position on the spot; this commission reported that the best settlement would be for the Morul vilayet to be incorporated in Irak, M the British Government were prepared to prolong its mandate over that State for a period any considerable importance in itself, and never assumed any significance, save as the sevent courts of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established during the war. Although so long established in Mesopotamia, Turkay was not very firmly seated in that country, the Arabs tolerated who affirst recognized the decisive authority of rather than accepted Turkish rule so long as they were substantially left alone, and the administration, if is understood, never paid its way. For a brief period Midhat Pasha

which was known as The Brussels Line, After at first breathing nothing but armed resistance to acceptance of the award, the Turks afterward assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression, accepted the frontier line demarcated by the League.

France and the Frontier.—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling station at Maskat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite ammunition. We can find no more defining policy, a desire to play the part of Eussia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments siowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burms. We were established in Lower Burms in the thirties and in the eightles the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic sessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule. Far otherwise was it on the confines of Sian. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burms, then a pain as a numer state netween number, then a regular Province of the Indian Empire, and French Indo-China. This policy was definitely challenged by French enconchments on Siam, Masters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between wants might have chosen in open was become the two States. But as in the case of Penjdah, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam. That agreement has been consolidated by wise and progressive rule in Siam itself, under its own independent sovereign, who is imbued with a strong friendship for Great Britain, whilst at the same time main-teining good relations with French neighbours.

The New Frontier Problem.—The whole

the events leading to the Afghan War of 1838the Indian frontier problem has never been a local problem. It has been dominated by external influences in the main the long struggle between Greet Britain and Russia, for a brief period the German ambition to build up a dominant position in the Bast through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey. The circumstances affecting the The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. Recent events in China and the development of aggressive air power have during the past year given the Indian North-Eastern frontier a vital aspect which it has never before borne. And, generally, conditions have become more like those normal to critical land frontiers any where in the world in this present time of swift communications, aerial operations and easy propagands. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman on the Indian north-west border-land was always an opponent to be accepted to he have a constituted by the second control of the property of the second control of the property of the second control of the second contro conditions have become more like respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Knowing every inch of the inhospitable country to ing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearguards and given them an infinite of trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagonist. Now these tribesmen are everywhere armed with magazine rifies, either imported through the Persian Gulf when gunrunning through the Ferman Gur when guardnames was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Bethen regiments, or signal in the tribal the Pathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The Afghan regular army was of little account. The tribesmen who rose at the call of the jihad, especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier; their markemen-ship and fire discipline were described by ex-perienced soldiers as admirable. The tribat militia for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in Waziristan. This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completaly independent State, there were many who urged the desirability that for three generations-most assuredly since of complete withdrawal, even to the line of the

support. Our position in Quetta on the one side because they wanted to share the benefits and Peshawar on the other is fully consolida- which they saw British occupation to be bringing ted, and no good case could be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them it they emerged from their fastnesses. The military standpoint was that the Waziristan tribes are intractable; that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions; and that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Ladha, and linking these posts with our military bases, and particularly with the termini of the Indian frontier railways, by good motor roads.

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922, when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppres-trouble which has not yet been flattened out, sion of the tribal outbreak which the Afghans A serious military campaign in Waziristan in stirred up in support of their invasion of India 1938-37, necessitated by the disturbing religious in 1919. The ensuing policy has been aptly agitation, showed that conditions there are far described as the "half-forward" policy. It is from settled. The trouble there is not yet over described as the "half-forward" policy. It is from settled. The trouble there is not yet over in truth a repetition of the Sandeman and its extent has resulted in serious official policy, adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at years terminated at Jamrud, at the easterly Razmak, not at Ladha. A network of conse-leatoration continues. In South Waziristan, opposite end of the Pass, was in the autumn Wana has been re-occupied, partly in response frontier between India and Afghanistan.

Indus. This extreme school gained little to a pressing invitation from the Wana Wasirs, to their cousins northward of them. In February, 1983, control over tribal territory was pushed forward beyond Razmak towards the Afghan Border because of a rebellion on the Afghan side and of the need to assist the Eing of Kabul by preventing excursions by bodies of Wazirs into His Majesty's disturbed territory. The work of control and of civilization rapidly progressed in the whole territory. Of this particulars are given on 253 and following pages. One of its recent fruits was a request by the Afridis for roads in their country of Tirah. A beginning with construction was made, but dissensions within the tribe in regard to it caused the work to be suspended. The desirability of better controlling the Afridis was demonstrat-ed in 1930 when, incited by Congress party agents from India, the young Afridis invaded the Peshawar Plain and the need for the adoption of a more active policy in Waziristan was shown by a rising of the Tori Khel Wazirs in 1936-37, a

L-THE PERSIAN GULF.

From what has gone before it will be seen | that the keynote of this discussion of Indian frontier policy is that the external menace has largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work is quietly and efficiently performed. Piracy was stamped out, the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Boyal Navy kept watch and ward, and our consuls regulated the external affairs of the Arab rulers on the Arab coast. on the Arab coast. In return for these services Great Britain claimed no selfish advantages. The waters of the Gulf were kept free to the and waters of the Gull were kept free so the for the pennisus of all-hast, and moved troops navigation of the ships of all nations, and to enforce her suserainty over Kowett, the though Great Britain could have made any best portin the Persian Gulf and a possible territorial acquisitions she pleased she retained terminus of the Bagidad Ballway. Further possession of only the tiny station of Bassidn. to consolidate her interests, or to stake out a Left to herself Great Britain desired no other claim, Germany sent the heavily-subsidised

policy, but for a quarter of a century the Gulf was involved in European affairs. France sought to acquire a coaling station at Jissa, near Maskat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to "show the flag" in the Gulf, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas. This meaned declined after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Russian power following the Revolution. Then Turkey, either acting for herself, or as the aussi courser of Germany, under whose demination she had passed, began to stir. She threatened the Sheikh of Bahrein by the armed coupation of the peninsula of Al-Katr, and moved troops

ships of the Hamburg-America line to the Gulf. where they comported themselves as the inwhere they comported themselves as the instruments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wonkhaus, to acquire a territorial footing on the island of Shargah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures.

The first effective steps to counter these influences were taken during the vigorous Vicerovatty of Lerd Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the ment (with other Powers) or by neglect of the local commercial interests which now underlie political and military control, will imperil great Britain's naval position in the Farther East, her political position in India, her commercial interests in both, and the Imperial the begiveen herself and Australasia." The Imperial standpoint, endoused by both Parties in the State, was set out by Lord Lansdowne in words of great import—"We (i.s., His Majesty's Graverment) should regard the eath allshwent of Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake. But with the disappearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now, more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1928, pp. 178-183. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at the destination to 1932. Ye and duly arrived at its destination in 1932. is at the outset officered by Italians. The im-mediate reason for the new fleet is that an increase in the Persian Oustoms tariff for revenue purposes led to extensive smuggling. The fact is required to check it. The British Government in 1985 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm island, off the

Gulf, to Bahrein, on the Western, Arabian. This move is calculated to coast of the Gulf. remove causes of friction.

Maskat.

Maskat, which is reached in about fortyeight hours from Karachi, is outside the Persian
Gulf proper. It lies three hundred miles south
of Cape Musandim, which is the real entrance
to the Gulf, but its natural strength and historical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Maskat was effected, the Sheikh accepted a British subsidy in return for the suppression of the slave trade and in 1892 sealed his dependence upon us by and in 1892 sealed his dependence upon us occided a part of his territory without our consent. The Sheikh paid a State visit to New Delhi late in 1987 and thereafter to London, whither he journeyed via the Far Rast and America. On his return home via India the Sheikh concluded a new treaty with the Sheikh concluded a new treaty with the representatives of His Majesty's Government in 1988.

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs. The ill-name of this territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions. The pirates were the boldest of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 a series of engagements, beginning with 1808 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1878 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection. The commercial importance of the Pirate Coast is increasing through the rise of Debal. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debai. The Trucial

this traffic from Lingah to Debai. The Trucial Chiefs are—Debai, Abu Thabee, Shargah, Chiefs are—Debai, Abu Thabee, Shari Ajman, Um-al-Gawain and Res-el-Kheyma,

Bahrein,

North of the Pirate Coast lies the little Archi-pelago which forms the chiefship of the Sheikh of Bahrein. Of this group of islands only those Persian shere at the entrance of the Gulf, of Bahrein and Maharak are of any size; but which they held on lease from the Persian their importance is out of all proportion to

their extent. This is the great centre of the Guif pearl ashery, which, in a good year, may be worth half a million pounds sterling. The tachorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be landed on the donkeys for which Bahrein is famous. But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds. makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrein is the wast burying ground which has hitherto baffled archeologists. The generally accepted theory is that it is a relic of the Phoenicians, who are known to have traded in these waters.

The British Government as was mentioned earlier in this review announced in 1985 that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water, to Bahrein. The same place has since been utilised for the provision of a large aerodrome for the service of the British Imperial air line between London and Australia, which is thus enabled to take a route down the Western side of the Persian Gulf and thus avoid difficulties in Persia.

Koweit.

In the north-west corner of the Guif lies the port which has made more stir than any place of similar size in the world. The importance of Koweit lies solely in the fact that it is a possible Gulf terminus of the Baghdad failway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane-so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line. Nowhere else would Koweit be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds, and the clean thriving town is peopled by some 30,000 inhabitants; chiefly dependent on the sea; for the mariners of Koweit are noted far their boldness and hardibood.

Muhammerah.

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Sheikh Khazzal of Muhammerah. The town, favourably situated near the mouth of the ably situated near the mouth of the Karun River; has grown in importance also the opening of the Karun River route to trade through the enterprise of Means, Lynch Brothers. This route provides the shortest passage to Ispahan and the central tableland, and already competes with the older route by way of Bughire and Shiras. This importance has many since the Audio-Parsian Old Company grown since the Anglo-Persian Oil Company— now called the Anglo-Iran Oil Company blished refineries at Muhammerah for the off which they win in the rich fields which they have tapped near Alwaz. Its importance will of last year, after a lengthy archange of views, the rational to Khorremabad by way of Dixful. It was decided between the Governments of

Basra.

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the frontiers of India, yet they are so indissolubly associated with the politics of the Gulf that they must be considered in relation thereto. Basra is the present sea terminus of the Baghdad Railway. It stands on the Shatted-Arab, sixty miles from its mouth, favourably situated to receive the whole water-borne trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness of the date groves on either side of the Shattel-Arab is indescribable, there is a considerable entrepot trafile, whilst Basra is the port of entry for Baghdad and for the trade with Persia, which follows the caravan route via Kermanshah and Hamadan.

The political destinies of Basra are at present wrapped up with the destinies of the new Arab State which was set up in Mesopotamia under King Feisal and is now under the When the sovereignty of his son. When the war was over we found ourselves committed to immense, undefined and burdensome responsi-bilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad; then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Trans-Jordania. Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious. In these circumstances King Feisai was imported from the Hedjaz and installed on the throne under the aegis of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Feisal was to be a mere puppet, immense expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference.

Addressing the House of Lords on May 3rd he said-

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordston. This announcement was drawn up in consideration with King Feisal and his Government. has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows:-

His Britannic Majesty and His Majesty King Feisal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty, which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of substiliary Agreements which were to be made thereunder.

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

"Accordingly a protocol has now been signed by the parties in the following terms:—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty is all terminate upon Iraq becoming member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey. Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties; and negotiations for that object shall be entered into between them before the expiration of the above period."

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible. His Majesty's Government would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organic Law,

The Council of the League of Nations in January, 1982, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to greatment of minorities and the administration of justice. This meant the termination of the meandate when the next Assembly of the League section for the admission of Iraq to League gesenbership.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1933, it was agreed that the frontier between King Feisal's State and Turkey, the important frontier because the future of Mosul was in dispute, should be settled by the League of Nations, should Great Britain and Turkey be unable to come to agreement by direct negotiation. These direct negotiations were opened at Constantinople, but no agreement was reached, so the question was opened before the Council of the League in September 1924. Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in the Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed sone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties.

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a common sense recommendadevious paths to a common sense recommenda-tion. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefor the British Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government— then Mosul should be incorporated in Iraq; if British was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great British gave the necessary guarantee. The Turks thereupon challenged the whole compitence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remit-ted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. About this time competence or the Council. About this time there was published the raport of a distinguished Resthonian General, General Laindoner, who had been despatched by the Leagus to investigate allegations of brutality by the Turka, in deporting Christians from their own sane, and this report was of the most damning character. Great Britain having given the character, Great Britain having given the necessary assurance, that she was prepared to extend her mandate over Iraq for a further twenty-five years, thereupon the Council of the League allocated the whole of the area in dispute, right up to the temporary frontier—commonly called The Brussel Line—to Iraq. The Turks refused to accept the award and withdraw from Geneva threatening force. withdrew from Geneva threatening force. Later, wiser counsels prevailed and in 1926 Turkey accepted a frontier substantially as drawn by the League.

A New Treaty—A new Treaty regulating the relation of Iraq with Great Britain, the Mandatory Power, was negotiated in 1927, and signed towards the end of the year.

The Treaty declars that there shall be peace and friendship between His Britannic Majesty and His Majesty the King of Iraq. It states that "Provided the present rate of progress in Iraq is maintained and all goes well in the

Railway Position in the Middle Rast.

interval, His Britannic Majesty will support the British Government. If we are correct in the candidature of Iraq for admission to the League supposition that Basra is destined to be the of Nations in 1932." It stipulated that sepa- great port of the Middle East, then its future rate agreements superseding those of March 25, 1924, shall regulate the financial and military relations.

The King of Iraq undertook to secure the execution of all international obligations which His Britannic Majesty had undertaken to see carried out in respect of Iraq. He also undertook not to modify the existing provisions of Iraq's organic law so as adversely to affect the rights and interests of foreigners, and to constitute any difference in the rights before the law among Iraquis on the grounds of differences of race, religion, or language.

There was provision for full consultation between the high contracting parties in all matters of foreign policy which may affect their common interests. The King of Iraq undertook so soon as local conditions permit to accede to all general international agreements already existing, or which might be concluded the reafter, with the approval of the League of Nations, in respect of the slave trade, the traffic in drugs, arms and munitions, the traffic in women and children, transit navigation, aviation, and communications, and also to execute the provisions of the Covenant of the League of Nations, the Treaty of Lausanne, the Anglo-French Boundary Convention, and the San Remo Oil Agreement in so far as they apply to Iraq.

There was provision against discrimination in matters concerning taxation, commerce, or navigation against nationals or companies of any State which is a member of the Lesgue of Nations, or of any State to which the King of Iraq had agreed by Treaty that the same rights should be ensured as if it were a member of the League.

Any difference that might arise between the high contracting parties was to be referred to the Permanent Court of International Justice provided for by Article Fourteen of the Covenant of the League. The Treaty was made subjected to revision with the object of making all the modifications required by the circums-tances when Iraq entered the League of Nations.

It is important to remember that there is a considerable difference between the vilayet of Bassa and the other portions of the Iraq State. Basra has for long been in the closest commercial contact with India, and is in many respects a commercial apparage of Bombay. Its people have not much in common with those of the North. They took no part in the touch with India and through India with the institution of a Persian Navv.

under an Arab State, with no experience of administration in such conditions, is one of the greatest interest, which can hardly be regarded as settled by the policy underlying the declara-tion which is set out above.

The Persian Shore.

The Persian shore presents fewer points of permanent interest. The importance of Bushire is administrative rather than commercial. It is the headquarters of Persian authority, the residence of the British Resident, and the centre of many foreign consuls. It is also the main entrepot for the trade of Shiraz, and competes for that of Ispahan. But the anchorage is wretched and dangerous, the road to Shiras passes over the notorious kotals which preclude the idea of rail connection, and if ever a railway to the central tableland is opened, the commercial value of Bushire will dwindle to insignican value of number will dwindle to imaginistance. Further south lies Lingah, reputed to be the prettiest port on the Persian coast, but its trade is being diverted to Debai on the Pirate Coast. In the narrow channel which forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Gulf. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yezd. It is of still more importance as a possible naval base. To the west of the town, between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet toy are less than three miles in width, and yet con-tain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Guif. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, shore, under the shadow of Cape Musandim, lies another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate conditions are equally vile. But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas-loomed large in public discussions as the possible warm water port for which Russia was seeking. There was established a British Naval station at Henjam, a small island close to Kism, where the station was constructed. to Kism, where the station was constructed under agreement with the Persian authorities. Its evacuation by Great Britain in favour of Bahrein was decided upon by the British Government in 1935. On the Mekran coast, there is the cable station of Jask, and the possible Arab rising which followed the war, and they port of Chamber. An interesting development, ask nothing better than to remain in close in the Gulf within the past decade was the

II.—SEISTAN.

The concentration of public attention on the sea at Gwattur. It marches on its elitern Pensian Gulf was allowed to obscure the frontier border with Afghanistan and with Baluchistan, importance of Seistan. Yet it was for many it commands the valley of the Helmand, and years a serious preoccupation with the Govern-with its immense resources as a wheat-producing south between the point where the frontiers region have been only partly developed under of Eussia; Persia and Afghanistan meet at Persian misrule. It offers to an aggressive Eusting and that where the frontiers of Feusia rival, an admirable strategic base for future and be our ladian Empire meet on the open military operations; it is also midway athwart

the track of the shortest line which could be built to connect the Trans-Caspian Railway with the Indian Ocean, and if and when the tine from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North-West Frontier, and to possible lines of advance through Kandahar to Quetta, and through Kabul to Peshawar, there can be little doubt that Russian attention was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Seistan in the early years of the century. Having Russia ded Khorassan, her agents moved into Selstan and through the agency of the Belgian Customs officials, "scientific missions" and an irri-tating plague cordon, sought to establish in-fluence, and to stifle the British trade which Suence, and to stifle the British trade which gradually being built up by way of Nushki. These efforts died down before the presence of the McMahon mission, which, in presence of Treaty rights, was demercating the boundary between Persia and Afghanistan, with special reference to the distribution of the wasters of the Helmand. They finally securing British-Indian assistance in that ceased with the conclusion of the Angio-Russian Agreement. Since then the international importance of Saistan has waned.

this strategic importance persist. For a time, British influence increased in substance through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it was provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezand, on the Bolan Railway, to Nushki, so as to provide a better starting point for the caravans than Quetta. This line was extended to Duzdap (now called Zahidan) 54 miles on the Persian side of the Indo-Persian Frontier, during the war as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier. Negotiations for years dragged on to bring about a reasonable settlement in regard to the situation. The Persian Foreign Minister, Mons. B. Kazemi, paid a visit to New Delhi in has become apparent.

The natural conditions which give to Seistan

III.-IRAN.

From causes which only need to be very briefly set out, the Iran question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working eleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fail of Kut-al-Amars, when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The Seguth Persian Bildes. It was one of the first tasks of the British Government to regularise Sogish Persian Rities. It was one of the area and a superior to regularise in the north-west retired before the Bolsheviks, this position, and for this purpose an agreement the Iranians had no use for the Agreement area reached with the then Persian Government, it soonbecame a dead instrument. It was finally the main features of which were :-

To respect Persian integrity:

To supply experts for Persian administration;

To provide a loan for these purposes :

To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent. redocmable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position.—We have given the main points in the Angio-Iran agreement, because few documents have been more misunderstood. Those who desire to study it in greater detail will find it set out in the Indian Year Book for 1921, page 188 et sec. It has been explained that most Iranians construed tinto a guarantee of protection against all external enemies. When the British troops rejected and the advisers who were to have assist ed Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the War was that Great Britain must take an active hand in Iran To supply officers and equipment for a because she could not be a passive witness to Persian force for the maintenance of chaos in that country. The view always takes arder:

affairs of Iran were her own concern; if she, preferred chaos to order that was her own look-out, but laft alone she would hammer out some form of Government. That position has been out, but lets some soe wone manner our some form of Government. That position has been justified. The Sirdar Sipah, or commander-in-chief, a rough but energetic soldier, gradually took charge of Iranian affairs and established a thinly-veiled military dictatorship which made a timily-veited mintary doctorsing which made the Government feared and respected through-out the country for the first time since the assa-sination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millspaugh restored order to the chaotic finances. These two forces operating in unison gave Iran the best government she had known for a generation. But the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position re-gularised by the deposition of the absence gularised by the deposition of the absence shah and his own ascent of the throne. At first he was defeated by the opposition of the Mullahs, but in 1925 prevailed, and the Shah was formally deposed and the Shrar Sipah chosen monarch in his place under the title of Rega Shah Pahlavi. The change was made without disturbance, and I ran entered of passed and consolidation which made without disturbance, and fram entered progress was also made with gen on a period of peace and consolidation which that removed it from the disturbing forces in ments for an agreement covering all the post-war world. Since then considerable points of difficulty between them.

progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications, which is the greatest need of the land, such as which is the greatest need of the land, such as an air service to Teheran and railway construc-tion. The least reassuring episode was the departure of the American financial mission, which had done admirable work in the restoration of the finances. When their contract expired Dr. Millspaugh and his collesgues were offered a renewal of it on terms which gues were onered a renewal of it on terms wince they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdrew from the country, and have been replaced by other foreign advisers. The general situation was gravely disturbed in 1932 by the sudden termination by the Iran Government of the Angio-Iran Gill Co's concession as matter affecting one of the Iran Government of the American one of the biggest industrial undertakings in the model and millions starting of capital. The world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Govern-ment. While these were being settled some progress was also made with general negotia-tions between the British and Iran Governments for an agreement covering all outstanding

IV.—THE PRESENT FRONTIER PROBLEM.

There yet remains a small part of British over have utilised from time immemorial, the India where the King's writ does not run. Indian what is called the Durand Agreement with population of the Plains. The internal peace the Amir of Afghanistan, the boundary between enforced among them by British control has Indian and Afghanistan influence was settled, in late years led to an increase in their numbers the Amir of Afghanistan, the boundary between Indian and Afghanistan influence was settled, and it was delimited in 1903 except for a small section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomai Pass in the south, to Various the same of the contract of the cont to Kashmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of frontier policy for nearly half a contury.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan; Tartar, Turkoman, Persian, Indian, Arab and Jewisn intermingle. They had lived their own lives for centuries, with little Intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam." It is impossible to

and this has aggravated their economic problem.

Frontier Policy.

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of a Court of the control of t Russian invasion, and that coloured our tros-tier policy until the Anglo-Russian Agreement. This induced what was called Hit and Retire tactics. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought no permanent improvement in its train. The fruit that ever could unite them in common action was the bond of Islam." It is impossible to of the suspicion thus engendered was seen in understand the Frontier problem unless two 1897. Then the whole Frontier, from the facts are steadily bome in mind. The strong-tast are strong-tast are steadily bome in mind. The strong-tast are steadily both in the whole problem in the strong-tast are steadily before the form t

effect to this policy. The main foundations of his action were to exercise over the tribes the political influence requisite to secure our imperial interests, to pay them subsidies for the performance of specific duties, but to re-spect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance.

New Province.

As a first step Lord Curson took the control of the tribes under the direct control of the tribes under the direct supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so Lord Curson withdrew the regular troops so far as possible from the advanced poets, and placed these fortalices in charge of tribal levies, officered by a handful of British officers. The most successful of these was the Khyber Riffes, which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system. In pursuance of this policy frontier railways were run out to Dargal, and a narristy-gauge line, since converted to the broad-gauge, was constructed from Kushalgarh to Kobat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley. These railways were completed by lines to Tank and Bannu. By this means the striking power of the regular forces was greatly increased. Nor was the policy of economic development neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted fractious tribessuen into successful agriculturiats. Pass until 1919. At the same time the regular tions tribesmen into successful agriculturists. This policy of economic development is receiving a great development through the com-pletion of the Upper Swat Canal (q. w. Irri-gation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

A New Policy.

It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole broads. He will be the said of th border-line, with a bolt hole into Afghanistan

failed to give timely support to the advanced militia posts, some of these posts were to withdraw, the Militia collapsed ordered and the most serious fighting was with the tribesmen. The Southern Waziristan Militia inevitably broke and there was serious trouble throughout the Zhob district. The Afridia, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora. The Mahsuds and the broke into open hostilities. Their country ites within the belt bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dera Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent. armed with modern weapons of precision they constituted formidable weapons of precision they communicated for interests adversaries. They refused to make peace even when the Afghans caved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militis or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing; their losses were the heaviest in the long history of the Borderland and when the Mahsuda made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which the financial authorities regarded as of paramount importance was not attained. When the accounts were examined, it was seen that the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there was an indefinitely large, and seemingly unend-ing expenditure on Waxiristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual prac-tice the discussion was really focused on Waxiristan In recording the state of the second of t border-line, with a bolt hole into Afghaniatan when pressed from the British side. It endured through the Great War and did not break down until the Amir of Afghanistan sought crosses from his luternal troubles in a jehad cagalast India. In this iname enterprise the time to the front. In actual pracagalast India. In this iname enterprise the time to the front. In actual practice, which have never offered more than a centemptible resistance to the British forces system, namely, by occupying commanding justified, for the Indian Military authorities

WAZIRISTAN.

tribesmen but interfering little in their own affairs; or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions outside the tribal area, leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribesmen by expeditions when their raiding propensities become unbearable.

The Curzon Policy.—The Curzon policy, adopted in 1899, to clear up the aftermath or the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "cocupation" and the "close border" policies. It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontier posts, such as those in the Tochi at Wans and in the Khyber and Kurram were held by militia, recruited from amongst the tribesthe tribular reputed from amongst the tribular and the members. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid remoterent. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the final policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate-or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribes militia, on which it was based, could not, when left without the support of regular troops in the day of need, with-stand the wave of fanaticism and other conditions set up by the Afghan invasion of mounted, irregular force not territorially 1919. The Khyber militia faded away; the recruited, officered by British officers.

Wasiri militia either mutinied, as at Wana, or deserted. The pillar of the Curson system fell.

The Policy.—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Vicercy, in a speech which be addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waširistan; to open up the country by roads; to extend the main Indian railway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghantan and to take averable frontier of Afghanistan and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khaesadars and Scouts. The Khassadar is an irregular in the extreme. He has no British officers and no uniform, except a distinguishing kind of payri. In contradistinction the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the carvans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble, they love their pay but the Government loses no rifies, nor does it risk mutny or the lose of British and Indian officers. But the application of this polloy produced an acute controversy. It was one thing to say that commanding posts in Waxiristan should be retained; it was another to decide what these posts should be. We must therefore consider the special problem

V.—WAZIRISTAN.

We can now approach the real frontier question of the day, the future of Waziristan.

Geographically Waziristan is a rough paraltroograpmonary wasnistan is a rough paral-islogram averaging 60 miles from East to West and 160 from Morth to South. The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. On the east is the Indus. North is the watershed of the Kurram River running East and West about 30 miles north of Bannu separating Wastristan from the Kohat District. South is a signag political boundary from the Durand Line running between Wans and Fort Sande-man in Baluchistan with a turn southwards to the Indus.

Wana and Ladha some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Pesu.

Where irrigation or river water is obtainable sultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pesu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.-The inhabitants, unable to support existence on their meagre seil, make up the margin by armed robbery of to the Indus.

The western half is a rugged and inhospitable made originates according to tradition seeding of ridges and revines straggied and confrom one Wasir, two of whose grandsons were fused in hopeless disarray. The more inhabited the actual founders of the race. Of the four portions its well up the slope at heights of four main tribes Darweshtisel, Mahauds, Dawars in six thousand feet. Here are our outports of Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strike, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to malike or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could speak of any portion of them as his following.

Policy.—The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some \$5.000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan, in addition certain allowances were made to the tribes for good behaviour, prevention of valis and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wans was occupied in 1895 at the required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wans was occupied in 1895 at the required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wans was occupied in 1895 at the required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied. Wans was occupied in 1895 at the required; also for tribal escorts. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Compromise.—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the ocurse of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the ene plan nor the other remained within the bounds of reasonable argument.

within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly State of Afghanistan, and the so-called Independent Tarritory, this last being the belt of unsettled mountain country which lies between the boaders of British India and India. He proceeded specially to show that this belt is, in fact, within India "... It is boundary pillars that make of Washristan in India. We are apt to call Washristan in India. We are apt to call Washristan in the dapendent territory; and it is only from the trouble of wisw of our British districts that the

tribes are trans-frontier tribes. From the point of view of india, from the international point of view that is, they are dis-frontier tribesmen of India. If Waziristan and her tribes are India's scourge, they are also India's an international fact that we must never forget."

The settled policy of Government in Wasiriatan, Sir Denys showed, was the control of that country shrough a road system, of which about 140 miles would lie in Wasiristan itself and one hundred miles along the border of Derajat, and the maintenance of some 4.600 kregulats, miles at Razmak, 7,000 feet high and overbooking northern Wasiristan, there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through divilication, of the most backward and inaccessible, and therefore the most truenlent and aggressible, and therefore the most truenlent and aggressible mountains or we must may, civilization mountains or we must admit that there is no solution to the Wasiristan problem, and we must fold our hands while it grows inevitably worse."

The policy thus initiated for a period proceeded with results according to the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

The roads were policed by the Khassadars, who in the main, until the Tori Khel robellion of 1936-37 upset some of them, proved faithful to their trust. The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst, which at the outset

they showed by shooting up individuals India in pursuit of its efforts to bring political and small bodies of troops at every opportunity, pressure to bear upon the Government of India, faded away, and the people showed an above them, His Majesty's Government. understanding of the rule of law, and, under the control excused, as readiness to conform to it.

In various small but significant ways, methods
of civilization caught the imagination of
the people and won their approval. Thus, the safety of the roads was encouraged, and became buttressed by a considerable development of motor-bus traffic. The roads, as the King's Highway, are officially held to be sacrosanct. Highway, are officially held to be sacrosant, that is no shooting up or other pursuit of personal or trihal feeds permitted upon them. This permits villagers to proceed to and from the plains towns in safety. Under the influence of their women, the tribeamen applied that the ban against shooting upon the highway would be extended to all the country for three miles on atther side of the highway. or three miles on either side of the highway. Tentative efforts to introduce primary education proved possible and achieved as much auccess as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribescountry, attend to the wants of the tribespeople who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hespital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

Wans was occupied, following an encouraging petition from the local Wazirs, in 1929. A motor road had already been run out from Jhandole through Chagmalai and the Shahur Tangi to Sarwekai. A brigade of troops, hitherto stationed at Mansai, whereabouts the Tak-i-Zam, water flowing down its deep valley from northern Washistan, debouches on to the Dersjat, was accordingly ordered up to Wans in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wans, where it established itself in a favourably sited camp not far from the fort which was the earlier not far from the fort which was the earlier centre of British occupation. There it remains.

The area cultivated by the villagers of Wans plain doubled by the end of 1931 and the people declared their readiness to aurrender their greams if their neighbours also gave up theirs or were deprived of them. A road has been built commencing Fort Sandeman via Guikach, ounte commencing For sandeman wa Gullach, on the Gomal river, with Tanai, on the Sar-wekai-Wana road. A motor road has also been constructed from Rammak through Kaniguram, in the heart of the Mahaud country, to Wana. It was completed in 1938 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who sometimes fought one another to secure road-making contracts.

A startling new development upon the 1980. North West Frontier during 1980 was the descent

and above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. in particular, it avowedly set out "to make Government impossible." Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a stand-still, commenced all over India immediately after the Congress meetings. The settled districts of the N.W. F. P. were the scene of this, in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non-official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them, because its provisions in no way over-rule their religious law. navarin practice arect them, because as provisions in no way over-rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed in spite of their dissent, in a Legislature in which Muslims are, by themselves, a hopeless minority. They regarded its enactment as a grave illustration of that fear that made near a second trattory of that fear that made near a second trattory. tration of their fears that under any scheme of democratic self-government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930.— This Muslim apprehension, after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which mis-representation of the Act provided for stirring up anti-Government agritation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue wholly and fanatical Muslim province in the north can easily be understood. Grosely untrue propaganda was carried on; it was, for instance, alleged that under the Act all girls must be medically examined before marriage. An elaboration of this untruth was that the Government were recruiting a large body of Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. of were departed of them. A roun has been built commencing fort Sandeman size guilkach, on the Gomal river, with Tanai, on the Sar-weight of the most of the M.W. on the Gomal river, with Tanai, on the Sar-weight of the most of the Mahaud country, to Wana. The poison spread outwards from Feshawar into the same onnected from Raxmak through Kaniguram, in the heart of the Mahaud country, to Wana. The poison spread outwards from Feshawar into connected with its construction arose from the strike the propaganda. This was in March-April 1920. It was completed in 1933 and the only disputes connected with its construction arose from the river. The poison spread outwards from Feshawar into the propaganda. This was in March-April 1920. The poison spread outwards from Feshawar into the propaganda. This was in March-April 1920. The poison spread outwards from Feshawar into the propaganda. This was in March-April 1920. near the border and watch for an opportunity to join in. The Upper Toohi Wazirs simultaneously took to arms and shortly afterwards the Mahsud Wazirs, about Ladha, did the same, at this stage, the development of the Air arm in India proved of incalculable value. Aeroplanes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Oraksais of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and ground action crushed these efforts. The Tochi Yafra heavily attacked Datta Khel, but were speedily brought to order by force. The Mahsuds were similarly repulsed and punished when they assaulted Sorarogha, in the valley of the Tak-Lam.

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peehawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khul plain, and prevented from visiting Peshawar, their marketing centre, they came in an acceptade peace under the new conditions before the opening of the winter of 1931-32. The Afridis later asked for roads into Tirah but are not yet sufficiently agreed among themselves about the point for construction successfully to proceed.

Mohmand Outhereak in 1933.—
Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier polley and the need to keep it alive polley if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower attitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line to the Aghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Fresumptive.

never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campalgn, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands for raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimsai and other Assured clans. The attacked clans appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Aghan throne. He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afhanistan. This compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshawar-Shab-kadr road northwards through Glaisnai into the Halimsal country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details, were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkal in Upper Bajaur, which had given shelter to the Pretender, further serial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1887. It seemed likely that the Ghalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brought to bear upon them from Kabul, retired to their hills and after negotiations entered into books to keep the peace; and the Bajauris, while

maintaining on grounds of tribal custom their to order a fiag march of troops through their refusal to surrender the Pretender, nevertheless country so as to increase the credit of the expelled that person from their territory, loyalist element. This Government did. The probably into Afghanistan. Here, then, the troops were heavily fired upon and had to trouble ceased. The next result of it was the fight their way out. Efforts to round off the construction of the road through Ghalanai and the rapid development of bus services and other activities of civilization which speedily took place along it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the Upper Mohmands decided to fish in the troubled waters. Successful military operations ended in the Upper Mohmands sucing for peace—and in the Ghalanai road being carried forward over the Nahakki Pass and down beyond it on to the Main which extends to the natural road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

Tori Khel Rebellion .- The Warirs and Mahsuds in 1930 showed signs of rebelling against Mahsuds in 1930 showed signs of rebelling against Government in parallel with the Afridis. Congress party agents endeavoured to persuade them to do so. They were at the outset firmly dealt with and peace was thus assured almost without its having been broken. All went peacefully until the autumn of 1936 and then trouble was produced in North Wazirlstan by the facir of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name. place from which he took his best known name.

A Muslim lad was accused in 1936 of kidnapping

a Hindu girl of Bannu. Apparently, she eloped
with him. She was restored to her parents by erder of the Civil Court, on the ground that she was a minor. There was a good deal of communal excitement about the matter and the faqir started an agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was an interference with Islam. There was also, in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque. This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Waziristan. Their elders begged Government A.G.G. for the tribal areas.

croops were neavily nrea upon and had to fight their way out. Efforts to round off the matter before it developed into a major affair failed and there followed a war in which the Tork Khel were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gangs fighting the authorities and others connived at such acts. Not until the fall of winter towards the end of 1937 were the Tori Khel and the the end of 1937 were the TOTIALE and the bands of irreconcilables under during leaders whom the faqir inspired by his agitation, beaten by extensive military operations into asking for peace. The faqir has not been caught and continues a troublesome influence. The summer campaign in 1937 involved the employment of 50,000 troops. Before they were withdrawn in the following winter 106 miles withdrawn in the following winter and of new roads opening up some of the hitherto inaccessible country in and about the upper reaches of the Shaktu river were made. The faqir of Ipi, however, assisted by several notorious outlaws continued to keep Waziristan, particularly the North, in a disturbed condition throughout 1998 and on into 1939. It was, therefore, found necessary to keep an extra brigade in the territory and spasmodic operations against recalcitrant gangs proceeded by land and air and have not yet succeeded in restoring normal conditions. In the summer of 1938 a temporary complication was provided by the appearance amongst the Mahsuds of a Syrian called the Shami Pir who was only just prevented from leading a tribal incursion to support a rebellion against the Government of Kabul. The persistence and expense of the trouble in Waziristan, constituting as it does a heart-breaking set back to the "policy" which had seemed for fifteen years to be achieving material results, has provoked renewed discussion of Frontier policy especially in regard to military commitments which were examined by a Defence Committee under the chairmanship of Admiral mesque. This was settled in the Lahore High court in favour of the Sikhs and the Punjab on behalf of His Majesty's Government towards Muslims accepted the decision. The faqir on behalf of His Majesty's Government towards of Ipl lumped together the Bannu Girl Case shalf the end of 1938. Although hostile sections of Ipl lumped together the Bannu Girl Case shalf the end of 1938. Although hostile sections of Ipl lumped together the Bannu Girl Case shalf and Jeril 1939 to be sufficient justification for the upon them raised among the Waziristan Tribes hope that the period of major military operation the slogan, "Islam in Danger." His demand was over and Waziristan was in consequence for a holy war was only taken up by a sub-section of the Waziristof Northern Governor of the N.W.F.P., in his capacity as Wastricts. Their alters heaved Government is 4 G 6 for the tribla greas. of the Fleet Lord Chatfield when it visited India

VI.—AFGHANISTAN.

The relations of Afghanistan with the Indian | War of 1838 was fought—the most melancholy Empire were for long dominated by one main con- episode in Indian frontier history. It was he satisfaction—the relation of Afghanistan to a Russian cut of a Russian envoy was received at Kabi was tavasion of India. All other considerations whilst the British representative was turned three-quarters of a century the attitude of 1878 was waged. After that the whole and Great British toward successive Aprirs has been of British policy toward Afghanistan was

detailed by this one tactor. It was in order to build up a strong independent State, friendly by prevent. Afghanistan from coming under to Britain, which would act as a buffer against the influence of Russia that the first Afghan Russia, and so to order our frontier policy that

the conviction that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan.

It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushklinsky Post, where railway material to the Kushkilnsky Post, where railway material is collected for its immediate prolongation to Herat. Later, she connected the trans-Susteian railway with the trans-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with her European magazines. Nor has Great Britain been idle. A great military station has been created at Quetta. This is connected with the Indian railway system by lines of railway which climb to the Quetta Plateau by the Bolan Pass and through the Chapper Rift, lines which rank amongst the most picturesque and daring in the world. onst picturesque and daring in the world. From Quetta the line has been carried by the Rhojak tunnel through the Khwaja Amran Bange, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or by the direct route through Seistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1925 up the Khyber Pass to Landi Kotal and down up the Knyber Pass to Landi Kotal and dewn
the other side of the Pass to Landi Khans. A
first-class military road sometimes double,
sometimes treble, also threads the Pass to
our advanced post at Landi Kotal; and
then descends until it meets the Afghan
frontier at Landi Khans. Later, a commencement was made with the Loi Shimsan Railway, which starting from Peshawar was designed to passess the Mulicard countries and signed to penetrate the Mullagori country and provide an alternative advance to the Khyber for the movement of British troops for the defence of Kabul. For unexplained reasons, this line was suddenly stopped and is now thrust in the air: In this wise the two Powers prepared for the great conflict which was to be fought on the Kandahar-Chazni-Kabui line.

Relations with India.

we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression.

A knowledge of the trans-frontier geography realised his great qualities.

A knowledge of the trans-frontier geography realised his great qualities. Previously the of India brought home to her administrators the conviction that there were only two main gates to India—thryugh Afghanistan, the means into which it is not well closely to enter; he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furmish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Penjdeh episode in 1885.—determined the northern boundaries. The Pamirs Agreement delimited the borders amid those snowy heights. The Durand amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the con-clusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Heimand in Seistan. It estimated by competent authorities ĭīt" that about the time of Abdurrahaman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well-armed regular and irregular tsoops, together with two hundred thousand tribal levies, and to leave fifty thousand regulars and irre-gulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahaman Khan distrusted British policy up to the day of his death. All that can be said is that he disin the case of the same of the same of the same of the cocasion had arisen for him to make a bidioc, he would have opposed a Russian adding on the closed his country absolutely against all foreigners, except those who were necessary for the arrest same of the cocasion. the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs were entrusted to an Indian agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St. James.

Afghanistan and the War.—These re-lations were markedly improved during the reign of His Madesty the Amir Habbullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrah-Between the advanced posts on either side in an Khan had built up would persis with him, stands the Kingdom of Africanistan. The end for none was capable of maintaining it. Hebble 100 has been to make it strong ulta Khan more than maintained it. He said friendly. In the first particular it has visited India soon after his accession and coquired a vivid knowledge of the power and resources of the Empire. He strengthened and consolidated his authority in Afghanistan titself. At the outset of the war he made a Afghanistan with exaggerated accounts of declaration of his complete neutrality. It is believed—a considerable reticence is preserved converour relations with Afghanistan—that he over our relations with Afghanistan—that he is difficulties was to unite all the disturbing warned the Government of India that he might be forced into many equivocal acts, but that be forced into many equivous acus, but that they must trust him; certainly his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jehad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Afghanistan out of the war had adhead to the winning affect his war, he had adhered to the winning side; his authority in the kingdom and in Central Asia was at its senith.

Murder of the Amir.—It is believed that it he had lived Habibuliah Khan would have used this authority for a progressive policy in Aighanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reactionaries who had narrased him all neigh. Shees realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make head against him and with-drew. The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibulish had been dealt with ; the fanatical element was exasperated by the imprisonment of Nasrul-ish; and the Army was so incessed that it had to be removed from Kabul and given occupa-tion to divert its thoughts. A further element of

April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open in-trigue was started with the Frontier tribes, on whom the Afghans placed their chief reliance.

Speedy Defeat.—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was re-peatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated. On the 14th May they asked for an Armistice. With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp.

Post-War Relations.—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was

The main points of the Treaty are set out in the Indian Year Book, 1928, pp. 197, 198-199.

Afghanistan after the War.—Since the War the relations between Afghanistan and Great Britain have been good and improving. There were painful episodes in 1923 when a mur-der gang from the tribal territory in the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan. In course of time this gang was broken up. His Majesty the King of Afghanistan had troubles within his own borders which have made him glad of British help. The main object of his government was to strongto be removed from Kabul and given occupation the first limit that the between the first limit to divert its thoughts. A further element of the country and to the complexity was introduced by the political estimation in India. The agitation against the laws at the height. The disturbances in the Funjab and Gujarat had taken the opposition to a secular form of

administration and education. The direct result extension of the Orenberg-Tashkent railway to was a formidable rebellion of Mangals and Termes. That line has been constructed by Eadrans in the Southern Provinces, and serious the Bolaheviks. The Afghans have had their reverses to the regular troops sent against the eyes opened. but the rebels were not sufficiently united to develop their successes, and with the aid of acroplanes and other assistance afforded by the Government of India the insurrection was one doverment or india the insurrection was proken. Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty; he had to withdraw almost the whole of his adminis-trative code and to revert to the Mahomedan Law which was previously in force.

Bolshevik Penetration,-Taking a long Boisnevis renerration.—Issuing a long view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolaheviks. These astute propagandists have converted the former Trans-Caspian States of Taritt Russis into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what drastic and disruptive than was that of what was called the despotism of the Romanoffs. The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persa, of China and of Afghanistan. In Persia this policy was foiled by the vigeur of the Sipar Salah, Resa Khan, since declared Shah. In Chinese Turkestad it is pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Bolaheviks was to extend the Soviet Republics of Tailkistan. Usbelds and Turkmanistan of a of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afphanistan. Telegraph lines were erected all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was streated and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers It is very doubtful it the Amir and his activative were decelved by these practices, and whether they did not pursue the simple plan of taking all they could get without the slightest intention of handing themselves over to the Bolsheviks. But it is easier to let the Bolshevik in than to get him out; friends of the Afghans were asking themselves whether the Arithment was not recorded. themselves whether the Amir was not nourishing vipers in his bosom. Towards the end of 1925 and in the early part of 1926 there was a rude awakening. The Northern Frontier of the rude awakening. The Northern Frontier of the country has always been unsettled because of the shifting courses of the Oxus. In December the shifting courses of the Oxus. In December Bolshevik forces captured with violence the Bolshevik forces captured with violence the Afghan post of Darkshad, killing one seldier. These events aroused great indignation at Kabui and were demonated by the Amir covern publics.

On March 23rd there was also signed in Benjin the star of Bussian the aims of Bussian the shanged in Emsia the aims of Bussian agreement in Bussia the saims of Bussian agreement. A British Minister is established as well as the representatives of Afghanistan as well as the representatives of Afghanistan as

Russo-Afghan Treaty.—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concinded with Soviet Russia, which was signed on August Slat, but it provided that it should in no way interfere with the secret treaty signed in Moseow or February 28th, 1921. The principal classes of this treaty, as disclosed in the Aighan papers, are as follows :-

Clause 1 .- In the event of war or hostile action between one of the contracting parties and a third power or powers, the other con-tracting party will observe neutrality in res-pect of the first contracting party.

Clause 2.—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial also abstain from joining any boycott or financial or economic blookade organized against the other party. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3.—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Government. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the contracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions.

Clause 6.—This treaty will take effect from the date of its ratification, which should take place within three months of its signature. It will be valid for three years. After this

established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour.—In the closing months of 1927 His Majesty King Amanulla, accompanied by the Queen and a staff of officials, commenced a long tour to India and Europe. It is understood that this was one of the cherished ambitions of his father, King Habibullah, who was assassinated in 1919. King Amanulla, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities, who forgot the invasion of India in 1919. He then took ship to Europe. He was the guest of His Majesty King George V in London, and visited the principal European capitals. He made a State visit to Turkey, and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal.—King Amanulla returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pasha had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West. Edict after edict was issued, changing the whole structure of Afghan society. New codes and taxes were imposed: it was proposed that women should examps from their seclusion and doff the vell; the co-education of boys and girls was prescribed; in September Government officials were forbidden to practise polygamy; in October European dress was ordered for the people of Kabul. At the same time, the pay of the regular tarops fell into arrear.

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train. In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Glisai and Mangal clansmen of Khot. The Minilahs were openly sotive against the King sad His Majesty was equally frank in his hostility to them. Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by missionary effort and a long straggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world.

A change of Kings.—Events moved rapidly in 1929. A notorious north Aighan, hudmash, Bacha-Baqqao, raised the standard of revolt and infloted severe losses on the Aighan Regular Steps, discontented as they were by arrears of pay. Bay by day the Aighan representa-

tives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncement declared the withdrawal of all the reforms and decared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken. King Amanula and his family sed from Kabul to Kandshar, and then from Kandahar vis Quetta to Bombay and then from Kandahar vis Quetta to Bombey where they took ship to Europe. King Amanulla on his arrival at Home entered into pessession of the Afghan Legation, where he remained. Bacha-1-Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following, his throne was a thoray one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and of the British Nationals beleaguered in and around Kabul and in a series of brilliant dights executed all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, nauna-i-Saqqao was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom. He despatched members of his family to the principal Additional Addition his family to the principal Afghan Legations his family to the principal alguma Aspacania in Europe. A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion in Kohidaman, Bacha-l-Saqqao's country. in Kohidaman, Bacha-i-Saqqao's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan he help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £209,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He oc-operated effectively to prevent tribes on his oc-operated effectively to prevent tribes on this side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1980. The trade routes were re-opened and the new King again took up Amanullah's mante of reform but in a statemanike manner which carried the Mulishs along with him.

Murder of Nadir Shah.—This ordered march of progress was tragleally interrupted by the murder of His Majesty Nadir Shah on the atternoon of 8 November 1935. His Majesty was attending a football tournament princ-giving, when a young man among the gathering steeped forward and fired several revolver shorts into him at close range, killing him instantly. It have appeared that the assessin committed the crime

in revenge for the execution of a prominent Afgian who had been caught deeply involved in tresconable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State atood loyally by his hetr, his son, Muhammed Zahir. The latter was duly pisced on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new king started his reign with a high reputation for courage and steadiness. He early issued assurances to his

people that he would continue the policy of his father in affairs of State. No untoward events rather in agains or state. No untoward evenue have occurred in the years' that have since past and during them the new young King has by his asgactly and good government gradually attengthened his position on the throne and, by the development of communications and trade done much to encourage the establishment of settled conditions among his people. A mutual desire for close relations and particularly economic understanding led in 1928 to exploratory negotiations between India and Alghanistan with a view to seeking some form of trade agreement.

British Representative—Lt.-Col. Sir. A. Fracer Tytler, C.S.I., C.I.E.

VII.—TIBET.

Recent British policy in Tibet is really another: phase in the long-drawn-out duel between Great Britain and Russia in Central Asia. The erriest efforts to establish communication with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogle on a mission to the Tashi-Lama of Shigates,—the spiritual equal if not superior, of the Dalai Lama of Lhass—his desire was to establish facilities for trade, to open up friendly relations with a Power which was giving us trouble on the frontier, and gradually to pave the way to a good understanding between the two countries. After Warren Hastings' departure from India the Warren nassings topacture from another the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1886, under the inspiration of Colman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibetans, but it was abandoned in deference to the oppobut it was abandoned in deference to the opposition of the Chinese, whose suscrainty over Tibet was recognised and to whose view until the war with Japan, British statesmen were inclined to pay excessive deference. But the position on the Tibetan frontier continued to be most unsatisfactory. The Tibetans were aggressive and obstructive, and with a view to putting an end to an intolerable situation. a Communitary was preprieted between view to putting an end to an intolerable situation, a Convention was negotiated between Great Britain and China in 1890. This laid down the boundary between Sikkim and Tibet, it admitted a Britain protectorate over Sikkim, and paved the way for arrangements for the conduct of trade across the Sikkim-Thet frontier. These supplementary arrangements provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, to which Britain subjects should have the right of free access, and where there should be no

with the Tsar of Russia. His emissary was a Siberian Dorjieff, who had established a re-markable assandancy in the counsels of the Dalai Lama. After a few years residence at Lhasa Dorjieff went to Russia on a confidential Lhasa Dorjieff went to Russia on a confidential mission in 1899. At the end of 1900 he returned to Russia at the head of a Thetan mission of which the head was officially described in Russia as "the senior Tasnite Khomba attached to the Dalai Lama of Tibet." This mission arrived at Odessa in October 1900, and was received in audience by the Tsar at Livadia. Dorjieff returned to Lhasa to report progress, and in 1901 was at 8t Parachemeters. progress, and in 1901 was at St. Petersburg with a Tibetan mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by were escorted home through Central Asia by a Russian force to which several intelligence Officers were attached. At the time it was rumoured that Dorjieff had, on behalf of the Dalai Lama, concluded a treaty with Russia; which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards of the control of the protection of the control of the wards officially contradicted by the Russian Government,

The Expedition of 1984.

In view of these conditions the Government of India, treating the idea of Chinese sum-rainty over Thet as a constitutional fiction; proposed in 1908, to despatch a mission, with an armed escort, to Linas to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed, in conjunction with the Chinese Government, to a joint meeting at Khamba Jong, on the Tibetan adde of the frontier. Sir Francis Younghashand provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, of the frontier. Sir Francis Younghusband to which British subjects should have the right of free access, and where shere should be no restrictions on trade. The agreement proved had no intention of committing themselves useless in practice, because the Tibetans returned to recognise it, and dispite their establishs and no intention of committing themselves unable to secure respect for it.

Busism intervention.

This was the position when in 1999 Lord Curson, Vicercy of India, andeavoured to get has been addressed to the Dalai Lama was in direct intercourse indemnity of Recognisis to open which the Tibetans are the Dalai Lama was in direct intercourse indemnity of Recognition (Recognition of India).

time, but which have since been made clearer, the Home Government were unable to accept the full terms of this agreement. The indem-nity was reduced from seventy-five lakhs of rupees to twenty-five lakes, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Lhasa was withdrawn. Two years later (June 1906) a Convention was concluded between Great Britain and China regulating the position in Tibet. Under this Convention Great Britain agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Tibet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet. Great Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the and it was provided that the provisions of the Convention of 1890, and the Trade Begulations of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts and the establishment. ment of a British Trade Agent at Gyantse.

Chinese Action.

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fied to Urga, the sacred city of the Buddhists in Mongolia. He left the internal government of Tibet in confusion, and one of Sir Francis Younghusband's great difficulties was to find Tibetan officials who would undertake the responsibility of signing the Treaty. Now the suserainty of China over Tibet had been explicitly resfirmed. It was asserted that she would be held responsible for the foreign relations of Tibet. In the past this suzerainty, having been a "constitutional action," it was inevitable that China should take steps to see

rupees); the British to remain in occupation of the Dalai Lama and of the Chinese Government the Chumbi Valley until this indemnity men thad little in common. The Dalai Lama was paid off at the rate of a lakh of rupees a expected to resume the temporal and spiritual versar. In a separate instrument the Tibetans despotism which have the right to proceed to Lhasa to agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to fall temporal power and preserve him as a printial pope. The Tibetans had already been exapperated by the pressure of the Chinese soldiery. The report that a strong Chinese soldiery. The report that a strong Chinese soldiery. The report that a strong Chinese force was moving on Lhasa so alarmed the time, but which have since been made clearer, the trony of fate sought a refuge in India. He the irony of fate sought a refuge in India. He was chased to the frontier by Chinese troops, and took up his abode in Darjeeling, whilst Chinese troops overran Tibet.

Later Stages.

The British Government, acting on the re-The British Government, acting on the re-presentations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a country which was a neighbour, on intimate terms with other neighbouring States on our frontier, especially with Nepal, and pressed that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to ment was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of con-verting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him. Here the matter might have rested but for the results. compensed again to depose min. Let's the matter might have rested, but for the revolution in China. That revolution broke out in Szechuen, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India; by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhass, and in 1918. in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Parability arrived that Tiber corner with the Republic saying that Tibet came within the sphere of Chinese internal administration; and that Tibet was to be regarded as on an inevitable that China should take steps to see that she had the power to make her well respected at Linas. To this end she proceeded to convert Tibet from a vassal state into a province of China. In 1908 Chao Erh-leng, acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. Acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. Acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. The convention of Tibet, and the proceeded gradually to establish his authority, marching through eastern Tibet and treating the people with great severity. Mean this convention met at Simla when Sir Henry Light the Dalai Lama, finding his presence at McMahon, Foreign Secretary to the Government of India; Mr. Ivan Chen, representing intensions, had taken refuge in Si-ning. Thence China; and Mr. Long Chen Shatra, Prime he proceeded to Feking, where he arrived in 1908, was received by the Court, and despatched the resume his duties at Lhass. Moving by Jessered stages, he arrived there at Christmas, a Convention was initialled in June which respect to the court of the complete autonomy of Tibes

proper, with the right of China to maintain a Lhasa and India was established. The Chines Resident at Lhasa with a suitable guard. A semi-autonomous zone was to be constituted in Eastern Tibet, in which the Chinese position was to be relatively much stronger. But this was to be relatively much stronger. But this convention, it is understood, has not been ratified by the Chinese Government, owing to the difficulty of defining Outer and Inner Tibet, and in 1918 Tibet took the offensive and threw off the last vestiges of Chinese suzerainty. When the Chinese province of Szechnan went over to the South, the Central Government at Peth was unable to finance the frontier forces or to withstand the Tibetan decrease which was discattled for the contraction of the contraction advance, which was directed from Lhass and appeared to be ably managed. After the Tibetan army had occupied some towns on the confines of the Szechuan marshes, hostilities were suspended and an armistice was concluded.

From what has gone before, it will be seen that the importance which formerly attached to the political condition of Tibet was much less a local than an external question, and was influenced by our relations with Russia and China rather than with our relations with Tibet. Russia having relapsed into a state of considerable confusion, and Chiua having relapsed into as tate of absolute confusion, these external forces temporarily at any rate disappeared, and Tibet no longer loomed on the Indian political horizon. The veil was drawn afresh over Lhasa, and affairs in that country pursued an isolated course, with this considerable difference. Dalai Lama was now on terms of the greatest cordiality with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in Central Asia brought about by the Revolution in Russia and the collapse of Government in of India. China, and Mr. Bell, C.M.G., I.C.S., Political Officer in Sikkim, was deputed for this purpose. In 1922 telephonic communication between I.C.S.

have lately tried to increase their hold on Tibet but without persuading the Hibetans to accept closer association.

There followed in 1936 the death of the Dalai Lama and the Tibetans have ever since been trying to discover the babe in whose body, they believe, his reincarnation must simultaneously believe, his reincarnation must simultaneously have occurred. They have so far not succeeded. Meanwhile, the Tashi Lama, who occupies the spiritual chiefship in Tibet as the Dalai Lama does the chiefship in temporal affairs, went to live in China, having left Tibet during the lifetime of the late Dalai Lama, as a result, it is said, of disagreement with him. After prolonged negotiations, he set out to return to Lhasa in 1937. It was announced through Chinese avenues of communication that through his instrumentality the new Dalai through Chinese avenues of communication that through his instrumentality the new Dalsi Lama had been discovered in the extreme north of Tibet. But the Tashi Lama died while in the midst of his journey in the Chino-Tibetan borderland. Nothing has yet been heard of his successor nor any more about the New Dalai Lama. To all outward appearances events proceed from day to day in Tibet as before. A British Goodwill Mission visited Tibet in the winter of 1986-37, spent several months in Lhasa and there established or renewed highly friendly relationships with the chief Tibetan Government settablished or renewed mignly ritemary reasons.
ships with the chief Tibetan Government
officials and the Tibetan people. The Mission
was led by Mr. B. J. Gould, I.C.S., of the Political
Department, who has many personal friends
among the leading men of Tibet, and one of his
colleagues was left behind in Lhasa where he still remains to maintain the liaison between Lhasa and the headquarters of the Government

Political Officer in Sikkim: Mr. B. G. Gould.

VIII.—THE NORTH-EASTERN FRONTIER.

been considered as if the British line were contiguous with that of Tibet. This is not so, The real frontier States are Kashmir, Nepal, Sikkim, Blutan and Burms. From Chitral to Gligit now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal, that of the Mayors of the Prime Minister, right up to the confines of Tibet, for a distance of nearly fifteen hundred miles there is a narrow and the true frontier. The first of these from the States is Kashmir. The characteristics of regalist Chinese aggression through Tibet. The this States are considered under Indian States if riction between the Chinese and the Repalese been considered as if the British line were con- the internal administration. (e.e.); it is almost the only important Native State in India with frontier responsibilities; and it worthly discharges them through the agency of its efficient Indian State troops—four regiments of infantry and two Mountain Batteries, composed mainly of the Rapput Dogras, who make availant fighting material. One

Beyond Repal with the British Government. It is for all are the smaller States of Ehstam and Practical purposes independent; and the British Sikkim; whose rulers are Mongolian by ex-

traction and Buddhists by religion. In view of with a view to the frontier between Burma and Chinese aggressions in Tibet, the Government the Chinese province of Yunnan, where the of India in 1910 strengthened their relations seence of a defined boundary makes the with Bhutan by increasing their subsidy from maintenance of the peace difficult. A Delimitative thousand to a lakh of rupees a year, and taking a guarantee that Bhutan would be guided by them in its foreign relations. After wards China was officially notified that Great to the frontier region in November 1935, wards China was officially notified that Great to the frontier region in November 1935, of these States. At the request of the Nepalese is the distinguished Swiss engineer officer, Government a British rallway expert was deputed to visit the country and advise on the visit of the States. At the request of the Nepalese is the distinguished Swiss engineer officer, Colonel F. Iselin. It became obvious in April, 1936, that the Commission would be best means of improving communications with limit decided that the countries work before the end of the Government have decided to the frontier region in November 1935, where the special proving the work of the work before the end of the countries. Government have decided to construct a light railway from Bhichbakhort to Razaul. Great success has attended the orders passed by the Nepalese Government abolishing slavery.

Assam and Burma.

We then come to the Assam border tribesthe Dafias, the Miris, the Abors and the Mishmis. Excepting the Abors none of these tribes has recently given serious trouble. The murder of Mr. Williamson and Dr. Gregorson by the Minyong Abors in 1911 made necessary an expedition to the Dihang valley of the Abor country on the N. E. frontier. A force of 2,300 and about 400 milltary police was employed from October 1911 to April 1912 in subduing the tribe. After two or three small actions the murderers were delivered up. The cost of the expedition was Rs. 21,60,000. At the same time friendly missions were sent to the Mishmi and Miri countries. Close contact with these forest-clad and leech-infested hills has not encouraged any desire to establish more intimate relations with desire to establish more intimate relations with them. The area occupied by the Nagasares runs northwards from Manipur. The Nagasares, a Tibeto-Burman people, devoted to the practice of head hunting, which is still vigorous prosecuted by the independent tribes. The Chin Hills is a tract of mountainous country that the country of Mariany. to the south of Manipur. The corner of India the south of manipur. The corner of India from the Assam boundary to the northern boundary of the Shan States is for the most part included in the Myitkyina and Bhamo districts of Burma. Over the greater part of this area, a labyrinth of hills in the north, no direct administrative control is at present direct administrative control is at present than a control is at present than the development of recent years is the success, of the Kachina. Civilisation is said to be progressing and steps have been taken to prevent valley. In this remote place in the north-east encroachments from the Chinese side. Burma a mild system of slavery existed, but Regotiations between Britain and China on in response to the initiative and pressure of this subject were long in progress, particularly British officers they were all freed by April 1926.

tion Commission, consisting of British and Chinese decided that it should disperse and reassemble in November, 1936, to complete its task.

On re-assembling, according to this plan, the Commission spent several more months completformulasion spentseveral more months complete ing its inquiries and eventually, in the Spring of 1937, presented a unanimous report. This document, definitely laid down upon the map the frontier line between Burms and Yunnan as prescribed by the latest Anglo-Chinese agreement on the subject. It therefore provided both Governments with exact data for the pursuit of negotiations concerning frontier questions still unsettled between the military.

There is a considerable trade with China through Bhamo. On the Eastern frontier of Burma are the Shan States, with an area of fifty thousand square miles and a population of 1,300,000. These States are still administered by the Sawbwas or hereditary chiefs, subject to the guidance of Superintendents and Assistant Superintendents. The Northern Shan Rail-way to Lashic, opened in 1903, was meant to be a stage in the construction of a direct railway link with China, but this idea has been put aside, for it is seen that there can never be a trade which would justify the heavy expen-diture. The Southern Shan States are being of mountainous country diture. The Southern Shan States are being ar. The corner of India developed by railway connection. The five motary to the northern States is for the most Shan States is on the frontier south of the States is for the most Shan States. South of Karenni the frontier mystkyina and Bhamo runs between Siam and the Tenasserim Division of hills in the north, no control is at present States. The relations between the Indian Government and the progressive kingdom of control is at present the devalopment of recent were is the success of the state of the stat

NEPAL.

The small hilly independent Kingdom of Napel is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,580,000, chiefly Hindus. The greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29,002 feet) and others of slightly less slittude. The country before the Gurkha occupation was split up into several small kingdoms under Newar kings. The Gurkhas under Prithyl Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendants of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816 and subsequent agreements by which a re-presentative of the British Government is received at Kathmandu. By virtue of the same Treaty either Government maintained representative at the Court of the other and her treaty relations with Tibet allow her to keep a Resident at Lhasa of her own. Her relation with China is of a friendly nature. Ever since the conclusion of the treaty of 1816 the friendly relations with the British Government have steadily been maintained. During the rule of the late Prime Minister it has been at its height as is evidenced by the valuable friendly help in men and money which has been given and which was appreciatively mentioned in both the Houses of Parliament and by Mr. Asquith in his Guildhall speech in 1915. The message from His Majesty the King-Emperor to the Repalese Prime Minister sent on the termination of hostilities and published at the time as also Viceroy's valedictory address to the Nepalese contingent on the eve of their return home after having laudably fulfilled their mission in India eloquently and gratefully acknowledged the valuable help rendered by Nepal during the four and a half years of war. In recognition of this help Nepal receives an unconditional annual present of rupees ten lakhs from the British present of rupees ten mans from our printers.

Government to be paid in perpetuity. To further strengthen and cement the bonds of friendship that have subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

From the foregoing account of the history of Nepal it will be seen that the Government of the country has generally been in the hands of the Minister of the day. Since the time of Jung

Bahadur this system of government has been clearly laid down and defined. The sovereign, or Maharajadhiraja, as he is called, is but a dignified figure-head, whose position can best be likened to that of the Emperor of Japan during the Shogunate. The present King, His Majesty Maharajadhiraja Tribhubana Bir Bikram Jung Bahadur Shah Bahadur Shum Shere Jung Devs, ascended the throne on the death of his father in 1911. The real ruler of the country is the Minister who, while enjoying complete monopoly of power, couples with his official rank the exalted title of Maharaja. Next to him comes the Commander-in-Chief, who ordinarily succeeds to the office of Minister.

On the demise of H.H. Maharaja Bhim Shum

Shere Jung Bahadur Rana after only a short tenure of office his next brother Ojaswi Rajanya, Projiwala Nepal Tara, Ati Pravala Gorkha Dakshina Bahu Prithuladheesha His Highness Maharaja Joodha Shum Shere Jung Bahadur Manaraja Joodna Shum Shere Jung Banasuur Bana, G.C.L.H., G.C.L.G.C.S.I., G.C.SS.M.L., G.C.I.M., G.K.E.K., Yitang Paoting Shua Chiang Lind Chuan Shang Chiang, Honorary Lieutemant-General, British Army, Honorary Colonel of all the Gorkha Rifle Regiments, Indian Army, Prime Minister and Supreme Commander in Chief, Nepal, succeeded to the premiership on 1st September 1982. The rich experience he had earned in highly responsible offices as he rose step by step coupled with the broader outlook of affairs gained from the visit to England with his brother the late Maharaja Chandra Shum Shere enabled the present Maharaja fully to grasp the significance of the social, economic and political problems that held and still hold the world in their grip since the great war. A deep thinker, a close observer and a man with independent views he had after much and careful deliberation matured his plans and with the courage of his conviction set himself to the carrying out of his programme. A Nepalese Legation was established in London as much to bring still closer the ed in London as much to bring still closer the more than century old friendship with the British Government as also to fully implement the traditional treaty rights. The first Envoy Extraordinary and Minister Plenipotentiary (Commanding General Bahadur Shum Shere Jung Thandur No. 1067 Norshort head of Tradi-Commanding General Banadur Shum Shere's ung Bahadur Rana) left Nepal as the head of a Mission carrying the Insignia of the newly inaugurated Royal Order of "The Ojaswi Rajanya" for H.M. The King-Emperor. With grim determination the present Maharaja fought the ravages of the Great Earthquake—an unwelcomed understant of calculate the present of the control of the co ravages of the Great Earthquake—an unwelcome and undreamt of calamity at the very threshold of his regime—and has evolved a better and more beautiful Katmandu within a period not hoped for even by the most aanguine of the people. The political reorganisation in the country which had to be carried through to stabilise the existing Government gave ample indication of his clear foresight. The Eastern Terai district headquarters in the Kingdom extending to some 300 miles are now in telephonic connection with the capital on the most modern line as a preliminary to link up the Western and line as a preliminary to link up the Western and hill districts in course of time. The remotest suburbs can now be reached from the towns in the valley by fair motorable roads and the main

inoroughfare has been and is being daily im- of H.M. the King-Emperor. Thus the present proved. An up-to-date Firebrigade fulfilling an regime though still young, has been fruitful ingent and long felt want, a new and larger electinded and in many ways promises to become irie installation giving further impetus to home the turning point in the history of the country. regent and long felt want, a new and larger elec-ic installation giving further impetus to home industries, the first industrial exhibition of local manufacture and craft all proclaim his many sided activities. The postal union connection with the Government of India now offers a much needed facility to inter-correspondence between the Nepalese at home or abroad in India. with the permanancy in the tenure of army service and inauguration of a Savings Fund for the benefit of the units, the modernisation of Arsenal equipment and arrangement manufacture of up-to-date propellants the Military side of the country has been brought more in line with present day requirements. The first Bank in Nepal and the first Jute Mill in the Terai have already come during this short regime and are functioning to-day. Sugar, cotton, wool and other industrial ventures on a moderate scale are in active discussion. A second railway in the country which will shortly be working will link up Jayanagar on the B.N.W Railway with Janakpur, the capital of Rajarshi Janak of Ramayana fame. To further symbolise the friendship entertained for the British Government a second Mission carrying the Insignia of the Royal Order of Nepal went in charge of Commanding General Kaiser Shum Shere Jung Bahadur Rana and Lieutenant General Narayan Shum Shere Jung Bahadur Rana, the Maharaja's nephew and son, for H.M. King George VI who also represented the Plenipotent independent Kingdom of Nepal in the Coronation 0.1.E., M.O.

Rice, wheat and maize form the chief crops in Rice, wheat and maize form the clinic crops in the low-lands and in some parts of the hills too. Mineral wealth is supposed to exist but has not as yet been either prospected or developed. Communication in the hills is necessarily primitive owing to the difficult nature of the country but improvements are in evidence and progressive. Since 1920 the vehicular traffic from Amlekhganj to Bhimphedi, the base of a steep ridge in the main route to the capital of the country from British India-goes over a good and permanent well maintained road linking up with the ropeway of 18 miles which was opened in 1927 and a motor trolley service which was installed in 1934 joins up the Ropeway terminus with the Customs House for transport of goods traffic. The telephone from Katmandu to Birganj, shortly to be extended to Raxaul, now forms part of the 800 miles main line extending from Katmandu to Birathnager and Jhapa, the easternmost part of the Nepal Terrai. The revenue is about two crore of rupees per annum. The standing army is estimated at 45,000, the highest posts in it being filled by relations of the minister. The state is of considerable archeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by the remains on inscribed pillars. The British Envoy Extraordinary and Minister Plenipotentiary.-Lieut.-Col. G. L.

Railways to India.

The prospect of linking Europe and Asia by of Mosul. It has for some time been open as a railway running eastwards through Asia far as Kirkuk, 200 miles northward of Baghdad mon's minds for general and 112 miles southward of Mosul. Similarly, tions. The plans suggested have, owing to the Taurus railway has long been open east-the British connection with India, always ward of Aleppo as far as Tel Kochek, on the lain in the direction of lines approaching India.

More than 50 years ago a Select Committee
of the House of Commons sat for two years to consider the question of a Euphrates Valley rallway. The Shah of Persia applied to the railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Cairo and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway aystem. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Con-stantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting India, across Persia, with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to over-throw the British Empire. The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphrates to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system Consists of a metre-gauge line from Basra ste.
Nasarieh, on the Euphrates, thence north-wards to Baghdad, the line passing a considerable distance westward to Kut-l-Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the

Syrian frontier, a few hours' road motor run north-west from Mosul. Through passenger services between Iraq and Istambul are run, a road motor service linking the railway termini at Kirkuk and Tel Kochek. The gap in the railway is being filled. Through trains are expected to be running by the autumn of 1988. A line also runs westward from Baghdad to Feluja, on the Euphrates.

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the points likely to be the termini of a Trans-Persian line. The Russian system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south-east of Lake Urumia. The Indian railway system, on the borderland of India and Persia. was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

The Foreign Minister of Persia, or Iran as it is now called, visited New Delhi in November, 1935, for informal discussions with the Government of India with a view to enlisting British help in the development of rall communications in Eastern Persla. The development thus envisaged was of a new Perslan rallway system linked with the British line running from Quetta, through Nushki, towards the Baluchistan-Selstan frontier. The Quetta-Nushki line was extended across the Selstan border into Persia during the Great War. Its terminus was then at Duzdap (or Zahidan), in Persia. It has long ceased to be used further towards Persia than Nokkundi, in Baluchistan. The informal discussions did not crystallize into an agreement or formal undertaking on either side,

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Mery to Herat, on the northern frontier of Atghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the current situation in Central Asia and beyond the Indian North-West Frontier does not suggest the early removal of the strategic difficulties. The completion of a broad-gauge line extending the Indian railway system through the Khyber Pass pass through which the Persian road crosses to Landi Khana, at its western extremity, opens the frontier of that country. A line branches a prospect of further possible rail connections off in the neighbourhood of Kitri in the direction with Afghanistan.

Britain's special interests in regard to at the opening of the Karun Valley, where the Iranian communications have hitherto pri-Karun River runs into the Shat-el-Arab, just marily been associated with lines running below Basra, northwards into the rich highland inland from the Persian Guif, to supersede country of Western Persia, where the valuable the old mule routes. Special import-West Persian oilweils also lie, Britain has long ance has for many years been attached to the provision of a railway from Mohammerah, Valley and has a large trade there. Britain's special interests in

The Army.

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company; but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St. George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarious and the French under Dupleix were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European companies were developed into the Madras Fusiliers: similar companies in Beagal and Sombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in 1754.

Struggle with the French.—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Dupleix had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downlar or their rivals, and the power of England was established by the battle of Plassey in Bengal; and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the deciline of the Mughal Empire, some ruled by Mahratta Princes and others by Musaiman adventurers such as Hyder Ali of Mysore. A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Scringapatam in 1798.

Reorganization of 1796.—In 1796 the Indian atmics, which had been organized on the Presidency system, were reorganized. The Burepean treeps were 12,000 strong and the Indians numbered some 67,600, the infantry being generally formed into 75 regiments of two battalions each. In Bengai, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Doccan against that prince and the Eaja of Berar by an army under General Lake, and in the Cocan against that prince and the Eaja of Berar by an army under General Lake, and in the Doccan against that prince and the Eaja of Berar by an army under General Lake, and in the Chiefs was broken in the battles of Laswari and Assays. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas. Subsequently Holkar also was reduced, and British power established on a firm footing.

Mutiny at Vellore.—The Indian Army had been from time to time subject to incidente of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1869 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparks. The mutiny was suppressed by Colonel Gillespie, who galloped over from Areot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army a

Overseas Expeditions.—Several important overseas expeditions were undertaken in the early part of the nineteenth century, Bourbon was taken from the French; Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillispie, who had distinguished immed in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the Seld and all Issia was turned into a vast eamp. The Mahratta Chiefs of Poons, Nagpur, and Indore introduction of a new cartridge. The muskets rose in succession, and were beaten, respectively, of those days were supplied with a cartridge at Kirkee, Sitabaldi, and Mehidpur. This was in which the powder was enclosed in a paper the last war in Southern India. The tide of war rolled to the north never to return. In the Punjab, to which our frontier now extended, our army came into touch with the great militery community of the Sikhs,

In 1824, the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian infantry, 5 regiments of regular and 8 of irregular cavalry. The Madras and Bombay armies were constituted on similar lines, though of lesser strength,

First Afghan War and Sikh Wars.— In 1839, a British Army advanced into Afghanistan and occupied Cabul. There followed the murder of the British Envoys and the disastrous retreat in which the army perished. This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige. The people of the Punjab had witnessed these unfortunate of the runjab had witnesset these unfortents of operations, they had seen the lost legions which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe. Sikh aggression that be extilled a 1376, 6e. led to hostilities in 1845-46, when a large por-tion of the Bengal Army took the field under Sir Hugh Gough. The Sikhs were defeated after stubborn fights at Mudki and Feroseshahr. the opening battles, but did not Surrender until they had been overthrown at the battles of Aliwai and Sobraon. Two years later an outbreak at Multan caused the Second Sikh War when, after an indecisive action at Chilianwala. our brave enemies were finally overcome at Gujerat, and the Punjab was annexed. Other campaigns of this period were the conquest of Sind by Sir Charles Napier, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army.

To keep order on this border the Punjab Frontier Force was established, and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force em-ployed and involved much arduous work.

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops: in the Madras Army 8,000 British and 49,000 Indian troops: and in Bombay 9,000 British and 45,000 Indian troops. The proportion of Indian to British was therefore too large for safety. The causes of the mutiny were many and various. Among these were the annexa-tion policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn; interference with the pengal Army was drawn; interterence what it is a privileges of the sepoy with respect to certain allowances; and lack of power on the part of rison which was sent commanding officers either to punish or reward. If the final spark which fired the revolt was the ardword enterprises.

cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore unclean alike for Muhammadans and Hindus. This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skilful agitators exploited this grievance, which was not without foundation, and added reports that flour was mixed with bone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Berhampur and in an outbreak at Barrackpore where sepoy Mangal Pande attacked a European officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Meerut to take the obnoxious cartridge, These men were tried and sentenced to long terms of imprisonment, their fetters being rivetted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and nurriered many. The troops then went off to Delhi, Unfortunately there was in Mecrut no senior officer capable of dealing with the situation. The European troops in the place remained inactive, and the mutineers were allowed to depart unmolested to spread the flames of rebellion.

Delhi is the historic capital of India. time worn walls brood the prestige of a thousand years of Empire. It contained a great magazine of ammunition. Yet Delhi was held only by a few Indian battalions, who join-ed the mutineers. The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India, The capital constituted a nucleus to which the troops who mutinled in many places flocked to the standard of the Mughal. An army was assembled for the recovery of Delhi but the city was not captured until the middle of September. In the meantime mutiny had spread. The massacres of Cawnpore and Jhansi took place, and Lucknow was be-sleged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi.

Minor Campaigns.—During the period until 1879, when the Second Afghan War began, until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860, the Ambeyla Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts. There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged constitutions which led up to or ansued most the operations which led up to or ensued upon the annexation of Burms, several campaigns in Africa, and the expeditions to Lhasa. But until 1914, since the African War, the army of India, except that portion of the British gar-rison which was sent to South Africa in 1899, had little sewere fighting, although engaged in many Reorganisation after the Mutiny.—In 1857 the East India Company ceased to exist and their army was taken over by the Crown. At this time the army was organized into three armies, vis: Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organizations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies. In 1895 the next large reorganization took place. This was the abolition of the three Armies and the introduction of the command system. Four Commands were formed, viz: Punjab, Bengal,

Madras and Bombay.

Lord Kitchener's Scheme.—This system lasted until 1904 when under Lord Kitchener's re-organization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant-Generals of Commands led to delay in the despatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops, but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917, when both had practically the same functions as their predecessors. It was now realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details. To secure efficiency at A. H. Q., therefore, a certain measure of decentralisation of the designation "Army" to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands, and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, new principles of war.

The commands were increased to four in 1920, each under a General Officer Commanding-in-Chief. One of these, namely Western Command, has been abolished with effect from the 1st November 1938 and replaced by an Independent District.

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office.

The post is filled by a senior officer of the Indian Army with recent Indian experience. The Military Secretary is assisted by one fixed grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which had obtained for many years, a retired Indian Army officer of high rank used to have a seat upon the Secretary of State's Council, prior to its dissolution.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Vicercy's Executive Council exercise in respect of Defence administration the same authority and functions as they exercise in respect of other dej artments of the Government; in the first phase of the representative institutions conferred upon India by the Montaguchelmsford Reforms Scheme, Defence expenditure and the direction of Defence policy have been excluded from the control of the Indian Legislature.

The Commander-in-Chief.—The next authority in the chain of administrative arrangements is His Excellency the Commander-in-Chief, who by custom is also the Defence Member of the Viceroy's Executive Council. The appointment is held by His Excellency General Sir Robert A. Cassels, G.C.B., C.S.I., D.S.O., Indian Army, who succeeded Field-Marshal Sir Philip Chekwode. He is also a member of the Council of State. All the work connected with the administration of Defence, the formulation and execution of the Defence policy of the Government of India, the responsibility for maintaining every branch of the Army, combatant and non-combatant in a state of efficiency, and the supreme direction of any military operations based upon India are castred in one authority,—the Commander-in-Chief and Defence Member. In addition, he administers the Royal Indian Navy and the Air Forces in India. The Commander-in-Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, vis., the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of Ordance.

The Defence Department.—The Department is administered by a Secretary who, like other Secretaries in the civil departments, is a Secretary to the Government of India as a whole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Sub-section 4, Section 25 of the Regimental Debts Act, 1893 (56 Vicinot 5) and the Regulations made thereunder Secretary to the Government of India in the Military Department. He also exercises the powers vested in the Army Council by the Geneva Convention Act, 1911, so far as that Act applies to India under the Order in Council No 1561 of 1916. He is assisted by a Deputy Secretary, two Under Secretaries, a Director of Military Lands and Cantonments, a Revision Officer, a Deputy Assistant Adjutant General (Revision) and two Assistant Secretaries.

The Defence Department deals with all army services proper, and also the administration

of the Royal Indian Navy and the Air Porces in India, in so far as questions requir-ing the orders of the Government of India are concerned. It deals also with all questions connected with the administration of Ecclesias-tical Affairs. The Defence Department Secre-tarists has no direct relations with commanders of troops or the staffs of formations subordinate to Army Headquarters : it has continuous and intimate relations with Army Headquarters in all administration matters and is responsible for the administration of Cantonments, the estates of deceased officers and the compilation of the Indian Army List. The Army administration is represented in the Legislature by the Defence Member in the Council of State, and by the Defence Secretary in the Legislative Assembly.

The Military Council—Is composed of the Commander-in-Ohief as President, and the following members, namely: The Chief of the General Staff, as Vice-President, the Adjuthe Gueral, the Quartermaster-General, the Master-General of Ordnance, the Air Officer Com-manding the Air Forces in India, the Secretary to the Government of India in the Defence Department and the Financial Advisor, Military Finance, representing the Finance Department of the Government of India. An Under-Becretary in Defence Department, acts as its Secretary. It is mainly an advisory body, constituted for the surpose of assisting the Commander-in-Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander-in-Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference.
The heads of the minor independent branches of Army Headquarters and the directors technical services attend when required.

Military Territorial Areas.

Indian Territory is divided in three commands ach under a General Officer Commanding-in-Chief and the Western Independent District under a Commander. The details of the under a Commander. The details of the organisation are given in the table on the next page and it will be seen that Commands comprise 11 districts: 2 Independent Brigade Areas and 38 Brigades and Brigade Areas. The Northern Command, with its Areas. The Northern Command, with its headquarters at Murre, coincides roughly with the Funjab and North-West Frontier Province; the Southern Command, with headquarters at Pocca, coincides roughly with the Bombay and Madras Presidencies and part of the Central Provinces and Eagputans; the Eastern Command, with headquarters at Naini Tal. coincides roughly with the Bengal Presidency, the United Provinces, Bihar, Orissa and Assam; and the Western Independent District, whose headquartess are at Quetta, covers Sind and Baluchistan.

constituted as it is in peace. With this end in view, the Army in India is now regarded as comprising three categories of troops:

Covering Troops, The Field Army, $\binom{1}{2}$

(2) The Field Army,(3) Internal Security Troops.

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a screen behind which mobilisation can proceed undisturbed. The force consists of approximately 12 infantrybrigades with a due proportion of other arms.

The Field Army consists of 8 Divisions and 2 Cavalry Brigades. The Field Army is India's striking force in a major war.

Army Headquarters.

The organization of the Army Headquarters with the Commander-in-Chief as the head, is founded upon four Principal Staff Officeis charged with the administration of -

(a) The General Staff Branch:

b) The Adjutant-General's Branch;

(c) The Quartermaster-General's Branch; (d) The Master-General of Ordnance Branch.

General Staff Branch.

C. G. S .- Lieut .- General E. de Burgh, C.B. D.S.O., O.B.E., I.A.

D. C. G. S.—Maj.-Genl. F. P Nosworthy, C. B., D.S.O., M.C., Brit. Ser.

M. G., Cav.—Maj.-Genl. G. F. H. Brooke, C.B., D.S.O., M.C., Brit. Ser.

M.G., R. A.—Maj-Genl. R. H. Carrington, C.B., D.S.O., Brit. Ser.

S. O. in-C .- Brigr. E. N. F. Hitchins, D.S.O., M.C., Brit, Ser.

This Branch deals with military policy, with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external use in accordance with the policy of Government, with the collection and distribution of intelligence, with the supervision of the training of the army, with the use of the military forces of the army, with the use of the military forces in war, with war regulations, with the education of officers and other ranks, and with the intercommunication services

Adjutant-General's Branch.

4. G.-Lieut.-General Sir Roger C. Wilson. K.O.B., D.S.O., M.O., I.A.

D. A. G.-Maj.-Genl. N. M. C.B., D.S.O., C.B.B., I.A.

S .- Maj.-Genl. G. G. Tabuteau. D.S.O., Brit. Ser., K.H.S.

the United Provinces, Bihar, Orisea and Assam; and the Western Independent District, whese headquartess are at Quetta, covers Bind and Baluchistan.

The General Officer Commanding-is-Chief fresch command is responsible for the command. Administration, training and general efficiency of the troops stationed within his area, and also for all internal scourity arrangements.

The distribution of the troops allotted to the commands and districts has been determined by the principle that the striking force must be guesdy to function in war, commanded and the commanded in the distribution in war, commanded and the commanded in the present of the commander of the commander of the troops allotted to the line of the commander and th

Quarter-Master General's Branch.

- O. M. G .. Lt. Genl. Sir Bertrand R. Moberly. K.C.I.E., C.B., D.S.O., I.A.
- D. Q. M. G .- Maj. Genl. C. D. Noyes, C.B., O.I.E., M.O., I.A.
- D. S.&T .- Maj. Genl. C. E. Edward-Collins, C.B , C.I.E., I.A.

This Branch is concerned with the maintenance and issue of supplies, i.e., foodstuffs, forage, fuel, and animals and reserves of these articles with the services responsible for the transportation, movement and quartering of troops, with the supply and transport service, military works, with the remount and veterinary services, the farms department and with garrison and regi-mental institutes. Since the Great War the mental institutes. Since the Great War the responsibilities of the Quartermaster-General's Branch have increased to a very great extent. This is attributable specifically to the creation of new services such as Mechanical Transport units and to the fundamental change of policy by which, since the war, Indian troops are fed and mounted directly by Government, instead of under regimental arrangements.

Master General of the Ordnance Branch.

M. G. O .- Lt.-Genl. Sir C. Clement Armitage, K.C.B., C.M.G., D.S.O., Brit. Ser.

D. M. G. O .. - Maj.-Genl. W. H. Mc N. Verschoyle-Campbell, O.B.E., M.C., R.A.O.C.

This branch consists of four Directorates with duties that are interdependent. These are :-

- Ordnance Factories.
- (ii) Armaments and mechanisation.
- (iii) Ordnance Services.
- (iv) Contracts,
- (i) The Directorate of Ordnauce Factories administers the army factories in India and assists the development of manufacture in India by private manufacture.
- (ii) The Director of Armaments and Mechanisation deals with design, research experiment, patterns, and scales of all equipment of the Army including mechanically propelled vehicles and inspection of the same with the exception of clothing, footgear and general stores (dealt with by Director of Ordnance Services).
- He also deals with the provision and the maintenance of mechanical transport.
- (iii) The Director of Ordnance Services controls the Arsenals and Depots and the Indian Army Ordnance Corps and is responsible for the provision of all equipment (except Mechanical Transport) and clothing for the Army. He also deals with design, research, experiment, patterns and scales and inspection of clothing, footgear and general stores.
- (iv) The Contracts Directorate deals with the purchase of foodstuffs, coal, oil, petrol, paints, varnishes of 1000stuns, coal, on, petrol, paints, varnishes, etc., hardware, machinery, engineering stores, etc., also the disposal of surplus and obsolete and unserviceable stores, machinery, etc., pertaining to the Army in India, Air Forces in India and Royal Indian Navy. In matters relating to the wrester of the store of the

Royal Indian Army Service Corps stores, this Directorate is now responsible to the Quarter-Master General in India. Policy questions concerning the branch with particular reference to mobilisation and war, calculation of war maintenance reserves, and co-ordination of resources in peace to meet war requirements are dealt with by a section working directly under the Master General of the Ordnance.

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are:

(1) MILITARY SECRETARY'S BRANCH.

Mily. Secy .- Maj .- Genl. N. C. Bannatyne. C.B., C.I.E., I.A.

The Military Secretary deals with the appointment, promotion and retirement of officers holding the King's Commission, of officers of the Indian Land Forces, the selection of officers for staff appointments, and appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board.

(2) ENGINEER-IN-CHIEP'S BRANCH.

E.-in-C.-Maj.-Genl. H. S. Claskell, C.B., D.S.O., Brit. Ser.

The Engineer-in-Chief is the head of the Corps of Royal Engineers in India. He is responsible for Engineer operations and Engineer Services during war and peace, the preparedness for war of the Engineering services. The supply of Engineer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs.

In addition to the above, the Army Headquarters staff includes certain technical advisers. viz., the Major-General, Cavalry, the Major-General, Royal Artillery, the Signal Officer-in-Chief, the Inspector of the Army Educational Corps, India, and the Adviser and Secretary, Board of Examiners,

The duties of the Inspector of Physical Training are carried out by the Commandant of Army School of Physical Training, Ambala,

Regular British Forces in India.

The British cavalry and British infantry units of the army in India are units of the British or the army in india are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. In the case of British cavalry the same arrangement cannot be applied. as one unit only comprises the regiment.

In Great Britain, in In Great Britain, in peace-time, units are maintained at an establishment smaller in India and Royal Indian Navy. In matters than that required for war. In India, the peace relating to the purchase of foodstuffs and other establishments exceed the war establishments in

view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry.—There are 4 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

Three of the four British Cavalry regiments are now converting to British Cavalry light tank regiments. The remaining regiment is still a horsed regiment.

British Infantry.—The present number of British infantry battalions in India is 39, each with an establishment of 28 officers and 865 other ranks.

All battalions in India will eventually be rifle battalions. In the meantime, 24 have already been converted into rifle battalions, and the remainder are temporarily on interim establishment based on that of the rifle battalion.

Royal Artillery.—Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries.

Present Organisation.—Under a change introduced in 1924, the Royal Artillery, which formerly comprised two corps. viz., (i) The Royal Horse and Royal Field Artillery and (ii) The Royal Garrison Artillery, now consists of one only, though the Royal Horse Artillery retains its title as a section of the single corps, the Royal Artillery.

There are now in India 3 Batteries of Royal Horse Artillery, 10 Field Regiments including one Indian Regiment, 2 Medium Regiments, 2 Batteries of Heavy Artillery and one Anti-Aircraft Battery.

Artillery Training Contres .- One centre at Muttra, for Indian ranks of R. H. A. and of field batteries and medium and anti-air craft another centre at Ambala for Indian ranks of Light, Mountain and Heavy Artillery. These centres were created for the recruitment and training of Indian personnel. A training battery to recruit and train Indian ranks for the Indian Artillery has been formed from 1st April 1936 by expanding the Royal Artillery Training Centre at Muttra. There is also a R. A. Boys Depot at Bangalore.

Engineer Services.

responsible to His Excellency the Commanderin-Chief. The Engineer-in-Chief is not a

Staff Officer, but the technical admission of the Engineer in-Chief. Commander-in-Chief on all military engineering matters and is responsible for:

- (1) Engineer operations and engineer services during war and peace.
- (2) The preparedness for war of the engineering services.
- (3) The supply of engineer stores during war and peace.
- military works.

(5) The constructional efficiency, accuracy and economy of all projects and designs submitted by him.

The Organisation.—The Engineer organisation of the Army consists of two main branches, viz., the Sappers and Miners and the Military Engineer Services.

The composition of the Corps of Sappers and Miners is as follows:

Queen Victoria's Own Madras Sappers and Miners, with headquarters at Bangalore. King George's Own Bengal Sappers and Miners, with headquarters at Roorkee. Royal Bombay Sappers and Miners, with headquarters at Kirkee.

The personnel of the Corps consists of Royal Engineer officers, Indian Army officers from the late Pioneer Corps, Indian officers holding the Viceroy's commission, a certain number of British warrant and non-commissioned officers, Indian non-commissioned officers and Indian other ranks. Each Corps is commanded by a Lieut.-Colonel, who is assisted by a Superintendent of Instruction, an Officer-in-Charge. Workshops, an Adjutant, three Quartermasters, three Subadar-Majors, a Jemadar Adjutant and a Jemadar Quartermaster.

Field Troops are mounted units, trained to accompany cavalry, and are equipped to carry out hasty bridging, demolition and water supply work. Field Companies are trained to accompany infantry. Divisional Headquarters' Companies are small units containing highly qualified "tradesmen" and are trained to carry out technical work in connection with field workshops. Army Troops Companies are somewhat smaller units than field companies; they are required to carry out work behind divisions, under the orders of Chief Engineers, e.g., heavy bridging work, large water-supplies, electrical mechanical installation.

The Military Engineer Services control all military works in India, except in the case of a few small outlying military stations, which are in charge of Public Works Pepartment. They control all works for the Royal Air Force and all such works as are entrusted to them in respect of the Royal Indian Navy; and they are charged with all civil works in the North-West Frontier Province and Baluchistan under the orders. in each of these two areas, of the Governor

Engineer-in-Chief (Works) and a Deputy Engineer-in-Chief (Electrical and Mechanical). Engineer-in-Chief (Electrical and Mechanical). In each Command there is a Chief Engineer, while in the Northern Command a Deputy Chief Engineer administers Military and Civil works in the N. W. F. P. and is Secretary, P. W. D., to the Govt. of N. W. F. Province. The Chief Engineer, Western Independent District, is the Secretary, P. W. D., to the Agent to the Governor-General in Baluchistan. Both at Army Headquarters and in Commands there are (4) The execution and maintenance of all Army Headquarters and in Commands there are Staff Officers, R. E., and Technical Officers. At

the headquarters of each district there is a Commander, Royal Engineers, assisted in certain districts by A. Cs. R. E. Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of brigade areas and military stations, their charges being divided into sub-divisions under Sub-divisional Officers. The sub-divisions are Buildings and Roads, Electrical and Mechanical, and Furniture and Stores. There are sub-overseers for Buildings and Roads and the Barrack Department subordinates in charge of Furniture and Stores are assisted by store-keeners.

Air Forces in India.

The Air Forces in India are controlled by the Commander-in-Chief in India as part of the defence services of the Indian Empire. The Air Force budget is incorporated in the Defence Services Estimates. The Commander of the Air Force, the Air Officer Commanding, Air Forces in India, is an Air Marshal whose rank corresponds to that of a Lieut-General in the Army. The appointment is now held by Air Marshal Sir Philip B, Joubert de la Forté, K C B., C.M.G., D.S.O.

The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely, air staff, personnel, technical, stores, medical and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant-General's and Military Secretary's branches, the Quartermaster-General's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

The following are the units of the Air Forces in India:-

Headquarters, Air Forces in India.

Group headquarters.

- 2 Wing headquarters.
- 2 Station headquarters.
- 4 Bomber Squadrons, Royal Air Force.
- 3 Army co-operation squadrons, Royal Air Force.
- 1 Army co-operation squadron, Indian Air Force.
- 1 Bomber transport squadron, Royal Air Force,
- 1 Communication flight,
- 1 Aircraft depot.
- 1 Mechanical transport repair section.
- 1 Central wireless station.
- 1 Hill depot (open during the summer months only).

The duties and functions of these units are :-

The Headquarters, Air Forces, control the operation, training and administration of all the air forces in India.

The Group Headquarters command Nos. 1 and 2 (Indian) Wing Stations, No. 28 (Army Co-operation) squadron and No. 20 (Army Co-operation) squadron and exercise operational control and co-ordinate the work of these units.

The function of a Wing or Station Readquarters is to control the operation and training of the squadrons and to look after all administrative details in connection with the station. In the interest of economy, certain services such as transport, stores, etc., are centralised under Wing or Station control.

The Aircraft Depot receives all Air Forces stores from England, elects new acroplanes, overhauls and repairs engines and airframes, parachutes, armament and all sircraft equipment including instruments. It is the supply base for all units for all types of equipment with the exception of Mechanical Transport stores which are supplied from Mechanical Transport Repair Section.

Mechanical Transport Repair Section is responsible for the repair and overhaul of all Air Forces motor transport vehicles and the supply of M. T. spares, etc., to unitz.

Composition of Establishments.—The personnel of the Air Forces in India consists of officers, warrant officers, non-commissioned officers and men in the ranks of the B. A. F. of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps, Air Forces in India. The officers are employed on administration, flying and technical duttes but all with the exception of officers of the store and medical branches are required to be capable of flying an aeroplane. A proportion of airmen are also trained and employed as pilots for a period of five years, after which period, they revert to their technical trades. Apart from these airmen all warrant officers, non-commissioned officers and aircraftsmen are employed solely on technical duties. The only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

The warrant officers, non-commissioned units: The personnel of the Indian Technical and Followers Corps are employed as follows:—

- (a) Technical Section .. Aircraft Depot.
 (artificers)
- (b) M. T. Drivers Section . All Units.
- (c) Followers Section .. All Units.

The total establishment of the Royal
Air Force in India is as follows:—

Force in The Royal Air Medical the United ervices.-84 Kingdom, the Air Force has a medical service of its own. Flying is carried out under conditions which differ widely from those on the ground. the growth of seronautics therefore, it was found necessary to create a separate depart-ment of medical science whose functions, breadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects of different forms of illness and physical disability upon flying efficiency and to apply in practical form the results ascertained. The essential object in view is to save life by ensuring, so far as possible that those who fly are physically ar as possible that those who ny are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 10 officers and 27 airmen. The Medical Administration is controlled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the Air Forces in India.

Indian Air Force.—This force came into existence on 8th October 1932, the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained com-mission as Pilot Officers. These officers are new serving with the first squadron of the Indian Air Force. The training of cadets for the Indian Air Force cannot at present be undertaken in India, and arrangements have been made to continue their training at Cranwell.

Regular Indian Forces.

Indian Cavalry.—The present number of Indian cavalry regiments is 21.

The peace establishment of an Indian cavalry regiment comprises:

14 British officers.

19 Indian officers.

492 Indian non-commissioned officers and men. .

192 Followers .

81

Infantry.-The establishment of the Indian Infantry is constituted as follows: Battalions

18 Infantry Regiments consisting of 8 Regiments of Sappers and Miners .. я

10 Gurkha regiments consisting of 20

116 The normal strength of an active battalion

Ť	British Officers.	Indian Officers.	Indian other ranks
Infantry .	. 12	20	703
Gurkhas .	. 13	22	898

The strength of an infantry training battalion depends upon the number of battalions forming the regiment. The average is as follows :-

British Officers 10, Indian Officers 15, and Indian other ranks 780.

In 1982 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed. e.g., road-making, etc., were now generally per-formed by labour. The whole organization has therefore been disbanded, and the opportunity has been taken to make a much needed addition to the various Engineer units (Sappers and Miners).

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation.

Reserve.-The conditions of the reserve are as follows :-

The Indian Army Reserve consists of private soldiers or their equivalent. It is comprised of class 'C' reservists for Indian Cavalry Artillery, Sappers and Miners, Signals and Infantry and class 1 for Gurkha Riffes. The new class 'C' reserve was introduced for Indian class 'O' reserve was introduced for indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May 1932. There still remain a number of classes 'A' and 'B' reservists which count against the authorised establishment of the reserve but these are gradually wasting.

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially.

Reserve pay at certain specified rates is admissible from the date of transfer to, or enrolment, in the reserve. When called up for service or training, reservists receive pay and allowances, in lieu of reserve pay, at regular rates according to their arm of the service.

The establishment of reservists is fixed at present as follows :--

	Tot	al	• •	81,902
Indian Supp	lemente	ry Re	serve	255
Railway Nuc			••	650
Gurkhas	••	• •	••	2,000
Infantry	• •	• •	••	21,560
Indian Signa	l Corps	••	• •	675
Engineers	••	• •	• •	2,350

Cavalry	••	••	9-4	1,980

The Indian Signal Corps.—The Corps is organised on the same lines as a Sapper and Miner Corps, with headquarters for recruiting and training personnel, and detached field units for the various army formations. various army formations. the corps is the Signal head of the corps is The Officer-in-Chief in the General Staff Branch at Army Headquarters. He acts as a nical adviser on questions connected with signals, and is also responsible for the technical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command.
The British portion of the Corps has now been amalgamated with the Royal Corps of Signals.

The Signal Training Centre, India, is located at Jubbulpore, and is commanded by a Lieut-Colonel, assisted by a staff, British and Indian, organised on very much the same lines as the headquarters of a Corps of Sappers and Miners.

The various types of field units and the number maintained are :-

Corps Signals Headquarters including Line and Wireless Company 2 Cavalry Brigade Signal Troops 8 Divisional Signals ... District Signals 3 Experimental Wireless Section ... 1 Zhob Signal Section.

In addition, there is an Army Signal School which carries out the training of regimental signalling instructors.

The formation of the District signals units was effected in 1926 with the transfer of Communications on the North-West Frontier to the Posts and Telegraphs Department. This transfer of communications also made feasible the raising of the 'A' and 'O' troops of Cavalry Brigade Signals to include a Wireless Section each the formation of two Corps Signal Headquarters. The District Signals are located at Peshawar. Waziristan and Kohat.

The British personnel of the Indian Signal Corps are found by the Royal Corps of Signals and they are trained and maintained by Signal units of the Home establishment. While serving on the Indian establishment, personnel of the Royal Corps of Signals are on the Strength of "L" Company, Hoyal Corps of Signals which is a purely administrative unit.

The Indian ranks of the Indian Signal Corps are trained at the Signal Training Centre, India.

Royal Tank Corps.—The Royal Tank Corps was formed in 1917 in order to provide for the new arm introduced during the Great War. It comprises Tank battalions, Light Tank companies and Armoured Car companies. Light Tank companies were formed during 1933 on the re-equipment of Armoured Car companies with light tanks. Only Light Tank companies are borne on the Indian establishment.

Units of the Royal Tank Corps in India are being gradually disbanded in conjunction with the re-organisation of British Cavalry regiments.

A Royal Tank Corps Depot is at Kirkee.

The establishments of the Royal Tank Corps formations are shown below:—

_				British Officers.	British other ranks.	Followers.	Motor cars.	Motor cycles.	Armoured cars.	Lorries.

Medical Services.—The military medical services in India are composed of the following categories of personnel and subordinate organisations:

- (a) Officers and other ranks of the Royal Army Medical Corps serving in India;
- (b) Officers of the Indian Medical Service in military employment.
- (c) The Indian Medical Department, consisting of two branches, viz., (i) assistant surgeons and (ii) sub-assistant surgeons.
- (d) Queen Alexandra's Imperial Military Nursing Service.
- (e) The Queen Alexandra's Military Nursing Service for India.
 - (f) The Army Dental Corps.
 - (s) The Indian Military Nursing Service.
 - (A) The Indian Hospital Corps.
- Of these entegories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of

Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra's Military Nursing Service for India ATO primarily concerned with the medical care of British troops; while the officers of the indian Medical Service, the sub-assistant sur-geons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops. The Indian Hospital Corps serves both organisations.

Civilians of miscellaneous classes employed by the Army in Waziristan are given medical treatment in military hospitals, and arrange-ments have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy and diabetes.

Royal Indian Army Service Corps.-The the Royal Army Medical Corps and the Army Boyal Indian Army Service Corps is the coun-Dental Corps, the ameticant surgeons of terpart of the Royal Army Service Corps of the the Indian Medical Department and the British Army. It has developed from the Com1.443

.. 11,477

missariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Royal Indian Army Service Corps which is under the control of the Quartermaster-General, is constituted in three main branches, namely: (a) Supply, (b) Animal transport, and (e) Mechanical Transport. The latter is constituted upon a special basis, which is, generically, a sub-division of the Royal Army Service Corps organisation.

The strength of the establishment is shown by categories in the following table:—

SUPPLY.

There are also 2,838 reservists.

The mechanical transport establishment consists of the following:—

- (i) Load carrying units-
 - (a) Six mechanical transport companies equipped with 30 cwt, four or alxwhoshed lorries;

- (b) Four independent mechanical transport sections on the higher establishment, equipped with 3 ton sixwheeled lorries; and
- (c) Eight independent mechanical transport sections, equipped with 30 cwt. four or six-wheeled lorries.
- (ii) Six motor ambulance units.

Apart from units and vehicles employed in conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscellaneous purposes.

The mechanical transport was taken over by the Boyal Indian Army Service Corps in 1927. The officers of the service were mainly drawn from the Boyal Army Service Corps and by transfers from various British Service units. The establishment of officers includes, however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the service are drawn entirely from the Boyal Army Service Corps.

The Ordnance Services which are under the M.G.O. may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Arany and the Air Forces in India to the best advantage of the State.

Army Remount Department.—The following are among the most important duties for the remount service:—The provision of animals for the Army in India. The enumeration throughout India of all animals available for transport in war. The animal mobilisation of all units, services and departments of the army. A general responsibility for the efficiency of all the animals of the army both in peace and war. The administration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilisation. Breeding operations of a direct character.

The department is organised on lines corresponding to the remount service in the United Kingdom. Its composition is as follows:—The Remount Directorate at Army Headquarters consisting of one Director and an Assistant Director. 4 Remount officers, one attached to each Command Headquarters, and the Western Independent District, 6 Superintendents of Remount Depots, 5 District Remount officers of horse-breeding areas and the Ahmednagar Stud, 10 Assistant Remount officers and 8 Veterlaary officers.

Veterinary Services in India.—The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops, Indian cavairy and artillery, R. I. A.S.C. units, the remount department (excluding horse-breeding operations), etc. The veterinary services include: The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps

The organisation consists of 19 veterinary hospitals, Class I, 24 veterinary hospitals, Class II, 23 branch veterinary hospitals and 9 sick lines.

Military Farms Department.—This department, which is under the control of the Quartermaster-General consists of two branches:-

- (i) The military grass farms, which provide fodder for the army.
- (ii) The military dairy farms, for the provision of dairy produce for hospitals, troops and families.

Educational Services.—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as follows including training schools:—

British	Indian	в. о.	I. O.	Civilians
72	49	165	89	450

Terms of service in the Indian army are as follows:—

Cavalry, 7 years' service in army and 8 years in the reserve.

Artillery, 7 years' service in army and 8 in the reserve for gunners and drivers (horse); drivers (mechanical transport) 6 years in army and 9 years in the reserve; and 4 years' service in army for Heavy Artillery personnel.

S. & M. Corps, 7 years' service in army and 8 in the reserve.

Indian Signal Corps, 7 years' service in army and 8 in the reserve.

Infantry (except Gurkhas and trans-frontier personnel of the Infantry other than Oraksale), 7 years in army service and 8 years in the reserve.

Gurkhas and trans-frontier personnel of infantry, 4 years' service in army.

Indian Military establishments of the Indian Army Ordnance Corps, 4 years' service in the army.

Animal transport personnel of the Royal Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and 9 in the reserve.

All combatants in the Works Corps, 2 years' service in army.

Bandsmen, musicians, trumpeters, drummers, bugiers, fifers and pipers, 10 years' service in army.

Except in the case of those enrolled in the Works and of those who are non-combatants, all school-masters, clerks, artificers, armourers, engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army.

The period laid down for service in the army is the minimum and may be extended. Combatants may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force.

Frontier Militia and Levy Corps.—These forces are "Civil" troops, i.s., they are administered and paid by the Civil authorities and not by the Army. They are, however, officered by Officers of the Begular Indian Army. These forces were raised for duty on the North-West Frontier and at present consist of the following:—Kurram Militia, Tochi Scouts, South Waziristan Scouts. Chitral Scouts, Gilgit Scouts, Zhob militia and the Mekran Levy Corps.

The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency; and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a must ketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, asting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches of the service, cavalry, artillery, engineer, infantry—in which are included railway battalions,—machine gun companies, a Signal Company, and the Medical and Veterinary Corps. Units of the Auxiliary Force are under the command of the local military authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enrol in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

The duties connected with the Defence Light Sections at Calcutta, Rombay and Karachi are performed by the Field Companies R. E. (A. F. I.) at those stations, assisted by Indian ranks of Sapper and Miner Units.

Indian Territorial Force.

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst other things, for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the war. It has been modelled on the old militia in Ringland. The essence of its scheme of organisation consists in training men by means of annual embodiment for another period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of late of regular units in war.

The Indian Territorial Force consists at present of three main categories, provincial battalions, urban units and the university training corps units. The last are recruited from the staff and students of Indian universities. They are trained all the year round by means of weakly drills during terms and a period of 15 days in camp and are equipped with a permanent staff of British instructors. On ceasing to belong to a university, a member of the corps is discharged. In the case of the university training corps units there is no liability to perform the liability to render actual military service. Their purpose is mainly educative, to inscalcate discipline and form character. But inselicately, they are expected to be a source of supply of both officers and men for the provincial and urban units.

The members of the provincial battalions accept the full liability for service which has been mentioned. Seven such battalions were constituted in the first instance. The number is now seventeen and, though the unit establishment has not been completely filled in all cases, the movement has already achieved a greater degree of success than might have been anticipated at so early a stage. Although for the present the infantry army only has been created with the addition of the I.T.F. Medical Branch, the force by law may include every other army service.

Men enrol in the provincial battalions for a period of six years, the period being reduced to four years in certain cases. On the completion of the first period they can re-enrol voluntarily for further specified periods. During his first year, every man does preliminary training for one calendar month and during every year he receives one month's periodical training. Members of urban units have only a provincial liability, 4 such units were constituted in 1928 in Bombay, Madras, and the United Provinces, one of which has since been disbanded; but in 1937, a fifth one has been added for Bengal. Members enrolled for a period of 6 years and train all the year round. During his first year every man does 32 days' preliminary training, and in every subsequent year 16 days' periodical training.

The Indian State Forces.

The Indian State Forces, formerly designated "Imperial Service Troops," consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for State service. It has been the custom in emergency for State troops to be lent to the Government of India, and the Government of India have on many occasions received military assistance of great value from this source. But the rendering of such aid is entirely at the discretion of the Ruling Princes and Chiefs. Government, on the other hand, provide permanently a staff of British officers, termed "Military Advisors," to assist and advise the Ruling Princes in organising and training the troops of their States.

After the war had ended, the Indian States, like the Government of India, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three categories of troops, namely:

Class A.—Troops in this class are organised on the present-day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army.

Class B.—These troops consist of units which are, in most cases, little inferior in training and discipline to troops of Class A; but they are not organised on present-day Indian Army establishments. They have, as a rule, retained the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C.—These troops consist in the main of militia formations, which are not permanently embodied. The standard of training, discipline and armament, prescribed for this class, is generally lower than the standard prescribed for Class B troops.

The authorized and actual strength of the Indian State Forces on the 1st October 1938, amounted to—

	Authorized strength.	Actual strength.
Artillery Cavalry Infantry Camel Corps Motor Machine Gun Sections	1,410 9,027 87,724 466	1,375 8,420 33,797 464
Sappers Transport Corps	1,198 1,546	1,060 1,429
Grand total	51,551	46,637

Officers.

There are two main categories of officers in the Indian Army; those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of command, both of which are regulated by the Indian Army Act and the rules made thereunder. Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military Academy, Woolwich.

King's Commissioned officers for the Indian army are obtained from two main sources: from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment; the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurst. A third source is from among University candidates. When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, he is posted as a squadron or company officer to a regiment or battalion of the Indian Army. Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant duties, and acquire at first-hand an intimate knowledge of the requirements of the combatant serves.

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional examinations and test being successfully passed. The rank of Lieutenant-Colonel is in normal course attained at 26 years' service; promotion beyond this rank is determined by selection.

Indian Officers.-One of the momentous decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army. King's commissions commission in the army. King's commissions are obtainable by Indian gentlemen in three ways: (1) By qualifying as a cadet through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich, Examinations used to be held twice a year in India for the selection of suitable candidates for admission. (2) By the selection of specially capable and deserving Indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way. (3) By the bestowal of honorary King's commissions on Indian officers who have rendered distinguished service, but whose age and lack of education preclude their being granted the full King's com-mission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sandhurst or Woolwich. Until 1931, ten vacancies at Sandhurst and three at Woolwich were reserved annually for Indian cadets.

A further measure adopted by the Government was the establishment of the Prince of Wales' Boyal Indian Military College at Dehra Dun, a Government institution for the preliminary education of Indians who desire to qualify for the King's commission in the army through the Boyal Military College, Sandhurst or the Royal Military Academy, Woolwich. The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized. The units selected for Indianization were: 7th Light Cavalry; 16th Light Cavalry; 2nd Bn., Madras Ploneers; 4/19th Hyderabad Regiment; 5th Royal Battallon, 5th Mahratta Light Infantry; 1/7th Rajput Regiment (Q.V.O.L.I.); 1/14th Punjab Regiment; 2/1st Punjab Regiment; 2/1st Punjab Regiment

In 1932 a considerable advance in the Indianisation of the Army was made by the announcement that it was intended to Indianize a Division of all Arms and a Cavairy Brigade. In order to implement this decision, the following units are also in process of being Indianized: 3rd Cavairy, 5/2nd Punjab Regiment, 5/6th Rajputana Elies, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Bith Regiment, 4/12th Frontier Force Regiment, and 5th Royal Battation, 15th Frontier Force Riffus, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of an-ciliary sarvices, to make up a complete Division. The Indian Regiment of Artillery has been formed on the 15th January 1935 and the first unit of this new corps has been raised as a field artillery brigade. This brigade is designated "A" Field Regiment, Indian Artillery.

In order to train officers for the Indian Army of the future, the Indian Military Academy Army of the future, the Indian Minterly Academy at Dehra Dun was opened in October 1932. It provides officers for all arms cavalry, infantry, artillery and signals. The first batch officers passing out of the Academy received their commissions on the 1st February 1985.

Indian Military Academy.—How to improve the quality of candidates for the Indian Military Academy at Dehra Dun has recently Academy.-How been under consideration. A press note was issued by the Defence Department in October, 1936, in which the problem was examined in detail. It consisted of a memorandum which detail. It consisted of a memoral dum when had been prepared on the subject by a Committee consisting of members of both Houses of the Central Legislature, and of a careful reply to this memorandum by the Commander-in-Chief, Sir Robert Cassels. The Committee was constituted as a result of a debate which took place in the Council of State, during which the present difficulty in obtaining candidates of the right type for the Academy had been discussed.

The members of the Committee prefaced their memorandum by stating in general terms that they did not agree with the policy being followed with regard to the Indianization of the Army, since they thought that the process could be speeded up. They then made observations and suggestions on various points—as, for example, that the provision under certain conditions for a refund by parents of part of the cost of training young officers was too extensive; that more scholarships should be granted to cadets of the Academy by Local Government; that the fees charged by the Academy should be reduced; that passage of the final exmination of the Prince of Wales' Royal Indian Military College by students who did not gain admission to the Academy should entitle them to admission to the Universities; that the activities of the University Training Corps should be expanded; that more Indians should be admitted to the Staff College; and that the problems created by the disparities in age between British and Indian officers of similar rank should be favourably dealt with.

The Commander-in-Chief, in reply, expressed gratitude to the Committee for their work and of their recommendations. Some of these recommendations he accepted, and he under-took that others would be fully and sympathetically onesidered. He asked the Committee not took that others took that others would be fully and sympathetically onesidered. He asked the Committee not took processes the fully and sympathetically onesidered. He asked the Committee not took processes the fully and sympathetically onesidered the fully and sympathetically onesidered. ef certain of their recommendations, since the process of expanding the field of choice and improving the quality and quantity of the candidates for cadetahips must inevitably be gradual, and depend largely on public opinion.

Training Institutions.

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units:-

Staff College, Quetta.

Senior Officers' School, Belgaum.

School of Artillery, Kakul.

Equitation School, Saugor.

Small Arms School (India), Pachmarhi, Small Arms and Mechanization School (India). Ahmednagar.

Army School of Physical Training, Ambala. Army Signal School, Poona.

Army School of Education, Belgaum.

Chemical Warfare School, Belgaum,

Army School of Cookery, Poona.

Army Veterinary Schools, Ambala and Poons. Royal Indian Army Service Corps Training Establishment, Rawalpindi.

Indian Army Ordnance Corps School of Instruction, Jubbulpore,

The object of these Schools is to ensure to all the units throughout the army a constant supply of officers, warrant officers, non-commissioned officers and men, provided with a thorough up-todate knowledge of various technical subjects, and with the ability to pass on this knowledge.

The King George's Royal Indian Military Schools at Jhelum, Juliundur and Ajmere, and the Kitchener College, Nowgong, also exist for the education of the sons of Indian soldiers with a view to their finding a career in the Indian Army. The latter at present assists in the train-ing of Indian N.C.Os. for promotion to Viceroy's Commission. The Prince of Wales's Royal Indian Military College at Dehra Dun exists for the preliminary education of Indians who desire to qualify for the King's Commission in the Army through the Indian Military Academy.

Army in India Reserve of Officers.— Previous to the Great War there existed what was called the Indian Army Reserve of Officers, a body of trained officers available to replace casualties in the Indian Army. The war proved that for many reasons this reserve did not fully meet requirements and in 1922 the Army in India Reserve of Officers was constituted.

The revised Regulations for the A. I. R. O. published in 1934 provide that the following gentlemen may be granted commissions in the Reserve:-

- (1) Ex-Officers who, having held King's commission in anyBranch of His Majesty's British, Indian
- (2) Civil officials of gazetted status serving under the Government of India or a local Government, whose services can be spared in the event of general mobilization being ordered.
- (8) Private gentlemen who are resident in India, Burma or Ceylon.

Applicants for Category-Medical (includes Applicants for Category-Medical (nicinues Dental) must possess a qualification registrable in Great Britain and Ireland under the Medical Acts in force at the time of their appointment.

Dental applicants must possess a qualification registrable in Great Britain and Ireland under the Dentists Acts in force at the time of their appointment.

Applicants for Category-Veterinary must be in possession of the diploma M.R.C.V.S.

The strength of the Reserve on the 1st October 1938 was 1.058.

The Fighting Races. —The fighting classes that contribute to the composition of the Indian Army have hitherto been drawn mainly from the north of India, but the experiences of the great war have caused some modifica-tions in the opinions previously held as to the relative value of these and other fighting men. The numbers of the various castes and tribes enlisted in the Army have since the war un-dergone fluctuations, and it is not possible at present to give exact information as to their proportions. Previous to the war the Sikhs contributed very large numbers both to the cavalry and infantry, and the contribution of the Gurkhas was also large. The Sikhs, who inhabit the Punjab originated in a sect founded near Lahore by a peasant in the early part of the sixteenth century and in the course of a hundred years grew into a formidable militant power. Muhammadans of various races contribute a still larger proportion to both the cavalry and infantry. These are drawn both from the north and the south of India, as well as from beyond the Frontier. They are all excellent fighting men. hardy and warlike, who have turnished soldiers to all the great powers of India for many hundreds of years. As cavalry the Muhammadans are perhaps unequalled by any other race in the East. being good horsemen and expert men-at-arms.

Next in point of numbers are the Gurkhas of Nepal, of whom there are twenty complete battalions, which during the war were con-siderably increased. As fighters in the bills they are unsurpassed even by the Pathans in the North-West Frontier, but the Garhwalls and Kumaonis are equally good mountaineers.

The professional military caste of India from time immemorial has been the Rajput, inhabiting not only Rajputana but the United Provinces and Oudh. Of fine physique and martial bearing, these warriors of Hindustan formed the backbone of the old Bengal Army, and have sustained the English flag in every campaign in the East. Their high caste and consequent prejudices in no respect interfere with their martial instincts and efficiency in war. They furnish seas was 175,000.

Ceylon Government officials are not eligible for many battallons. The Garhwalis are Hill appointment to the Army in India Reserve of Rajputs, good and gallant soldiers, who have proved themselves equal to any other troops on the field of battle and have established an imperishable record in the war both in Europe and in the East. The two battalions which existed in 1914 have since been increased to four. The Jats are a fine and warlike race of Hindus found in the Delhi and Rohtak dis-tricts and adjoining territory. It was these people who held out so bravely at Bharatpur and repelled Lord Lake's army in 1805. They have proved themselves good soldiers on the battlefields of Europe. Dogras are good and steady soldiers found in the hilly districts of the Punjab. They fought well in Flanders and in Mesopctamia.

> Among those who have rendered signal and gallant service in the war are the Mahrattas of the Deccan and the Konkan, who have revived the reputation held by their race in the days of Shivaji, the founder of the Mahratta Empire. It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

> In addition to the castes that have been mentioned, other caste men from the south and other parts of India have filled the ranks of the Sappers and Miners, and done their duty well in every campaign in which they have been engaged.

During the war the Victoria Cross was awarded for conspicuous gallantry to 2 Indian officers, 4 non-commissioned officers and 6 other ranks of the Indian Army.

The Military Cross was awarded to 96 Indian Officers for distinguished service rendered during the Great War and to 8 Indian Officers for service in Waziristan.

A large number of Indian Officers and men were also granted Foreign decorations.

Summary of India's Effort in the War.— In a despatch by the Commander-in-Chief published in July, 1919, the whole operations published in July, 1919, the whole operations of the Indian Army during the war are reviewed. His Excellency gives in it the following figures showing the extent of India's contribution in terms of men. On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks; enlistments during the war for all branches of the service amounted to 791,000, making the war to the service amounted to 791,000, making the war for all branches of the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service amounted to 791,000, making the war for the service was the war for th ing a total combatant contribution of 985,000. Of this number, 552,000 were sent overseas. As regards non-combatants, the pre-war strength was 45,000; an additional 427,000 were enrolled during the war and 391,000 were sent over-seas. The total contribution of Indian personnel has thus been 1,457,000, of whom 948,000 have served overseas. Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent over-

Budget Expenditure on National Defence.

A part of the Defence expenditure on the Indian Budget is incurred in England, the nature of such expenditure being indicated in the detailed Tables of Army, Navy and Millitary Engineer Services expenditure. This expenditure is met by transfer of funds from India. From the 1st April, 1920, to the 31st March, 1927, the accounts were prepared on the basis of the rate of 2s. per rupee for the conversion of English sterling transaction into Tupoes. From the 1st April, 1927, the accounts

are being prepared at the standard rate of 1s. 6d, per rupes.

As a rule, the receipts collected by the various departments are not set off against expenditure as appropriations in aid, but are shown separately on the receipts side of the budget. This is especially the case with the receipts of the Military Departments, which amount to considerable sums.

The Provincial Governments incur on expenditure for Military purposes.

expenses in England of the British troops and airmen who serve for a part of their time in India. The Tribunal has also examined India's counterclaim to a contribution towards the cost of her defence expenditure.

The Tribunal was an advisory body which met in November with instructions to report to the Prime Minister. The Chairman was Sir Robert Garran, until recently Solicitor-General in the Commonwealth of Australia. Lord Tomlin and Lord Dunedin were nominated by His Majesty's Government, and Sir Shadi Lai, Chief Justice of the Punjab High Court, and Sir Muhammad Sulaiman, the Senior Puisae Judge of the High Court of Aliahabad, by the Government of India.

The matters on which the Tribunal will make recommendations have been subjects of controversy for many years, and, as was recognized in the Report of the Simon Commission, the issue bears upon the great constitutional problem now under consideration. One reason for the connexion is the heavy burden of the cost of defence upon India. Taking the Central and Provincial Governments together, it amounts to

Cost of the Army.—A Tribunal was set up a capitation rate of £10 on every British soldier in 1932 to investigate the amount of India's sent to India was fixed. This worked out at contribution towards the recruiting and training an average annual sum of, roughly, £631,060.

In 1870 objections were raised by both sides to the £10 rate, and until 1878 India made payments on account averaging £440,000 per annum. An Act of Parliament confirmed these amounts as full payment, with the effect of writing of outstanding War Office claims. In 1890 the capi-tation rate was fixed at £7 10s. Meanwhile the British forces in India had been substantially increased, and the altered rate represented an annual expenditure of about £754,000. A committee presided over by Lord Justice Romer was appointed in 1907. It held that the capitation charge was justified in principle. In the following year the Secretaries of State for India and War (Lord Morley and Lord Haldane) agreed to a compromise whereby the rate was raised to £11 8s., the annual charge on India being theraby increased by about on India being thereby increased by about \$300,000. During the War India met this liability as part of her normal military expenditure, and all extraordinary costs arising from the employment of Forces from India in the various theatres of War were met by the British Ex-chequer, in accordance with decisions of Parliament.

The great increases in rates of pay and cost central Government alone is considered it amounts to 54 per cent. These calculations take amounts to 54 per cent. These calculations take account of net receipts only from semi-commercial undertakings such as railways, posts, and telegraphs.

Capitation payments.—When, after the the provisional payments by about £300,000 and would still exceed for the provisional payments by about £300,000 and would still exceed were amalgamated with those of the Crown the bill. The great increases in rates of pay and cost

The Strength of the Army.

BRITISH TROOPS.

INDIAN SOLDIERS' BOARD.

The Indian Soldiers' Board is probably the most important and valuable non-official institution connected with the Indian Army. It was District as President and a serving soldier as most important and variable non-omeia mattu-tion connected with the Indian Army. It was constituted on 7 February 1919, in place of the Central Recruiting Board, the purpose of which was fulfilled with the end of the War. Its object was at the outset to deal with a number and developed.

The Board is composed of three members of H. E. the Viceroy's Executive Council nominated H. E. the Viceroy's Executive Council nominated by H. E. the Viceroy, of whom one is President, H. E. the Governor of the Punjab, the Defence Secretary, the Adjutant-General in India and the Financial Adviser, Military Finance, with the Auditor-General in India, as an additional member. An Under-Secretary in the Defence Department acts as Secretary to the Board, in addition to his other duties. The President and Members of the Board are as follows :-

PRESIDENT.—The Hon'ble Sir Abraham Raisman, Kt., C.S.I., C.I.E., I.C.S., Finance Member to the Government of India.

MEMBERS.—H. E. Sir Henry Duffield Craik, Bart., K.O.S.I., I.O.S., Governor of the Punjab; The Hon'ble Chaudhri Sir Zafrullah Khan, K.O.S.I., I.A. Member of the Government of India; Diwan Bahadur Sir A. Ramsswami Mudaliar, Commerce and Labour Member of the Government of India; Lieut-General Sir Roger Wilson, K.O.B., D.S.O., M.O.; Sir Ernest Burdon, K.O.I.E., O.S.I., I.O.S., Auditor-General, MR. C. Maci. G. Oglivie, O.B.E., I.O.S., Defence Secretary to the Government of India; Mr. E. T. Coates, O.LE., I.O.S. Financial Adviser, Military Finance.

SECRETARY.—Mr. W. G. Alexander, 1.C.S., Under-Secretary, Defence Department,

The Board has its seat at New Delhi/Simla and co-ordinates the activities of a large number of kindred organizations in the various areas from which the bulk of the Indian Army is recruited. Under the control of these Provincial Boards there exists throughout the country a network of subordinate organizations, includ-ing District Soldiers' Boards, Tebail or Taluka committees and other kindred bodies. There are Provincial Soldiers' Boards in Bihar, Bombay, Delhi, Kashmir, Mysore, North West Frontier Province, Punjab, Espputana and the United Province.

Military Vice-President. The latter was either a Recruiting Officer or an Indian Army Officer detailed by Army Headquarters—except in the North-West Frontier Province where the President was a soldier and the Vice-President a civilian. Five years' experience showed the object was at the outset to deal with a number of post-war problems—the finding of employment is of president was a soldier and the Vice-Presidents of rewards to those who had rendered distinguished service, the relief of the dependents of those who had lost their lives in the war and of those who had lost their lives in the war and of those who were incapacitated for further service, the education of soldiers of interests of stoped began to decline in value through isok the safeguarding of the general interests of soldiers and their dependents, all matters demanding immediate and close attention. As ploss the property of Boards, mostly drawn from active battandering immediate and close attention. As ploss the Board had gradually to adjust because of their frequent changes of station. Reorganization was therefore undertaken in decided to maintain it permanently for a series of duties which have from time to time expanded in the internal constitution of the Roards. To of duties which have from time to time expanded in the internal constitution of the Boards. To preserve continuity and provide constant supervipreserve continuity and provide constant supervision, it was decided to make Indian Infantry Training Battalions and similar units, which are not liable to changes of station, responsible for providing the Military Vice-Presidents for the District Soldiers' Boards in their neighbourhood. At the same time full advantage was taken of the experience and influence of Recruiting Officers, who were appointed additional Vice-Presidents of District Soldiers' Boards in their Recruiting areas. Funds were made available for the allotment of travelling allowances to Military Vice-Presidents of Boards in the Punjab, U. P., Delhi, Bombay and the Central Provinces, to tour their districts or to sanction allowances to members touring on Soldiers' Board business.

> The whole organization shortly after its revision improved out of all recognition. The District Soldiers' Boards revived and the greatest importance is attached to an indirect result of this improvement, namely, the increase in the prestige of the ex-soldier among his fellow citizens and its enhancement, a fact particularly gratifying in those areas where recruitment is not now being carried on.

The following are the objects and duties of the District Soldiers' Boards :---

- (a) Constantly to endeavour to promote and maintain a feeling of good-will between the civilian and military classes;
- (b) To give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the exsoldier or his family :
- (c) To demonstrate the benefit of and so promote the desire for mutual cooperation between ex-soldiers and civillan officials :

- (d) To represent and explain to the civil authorities all matters of particular moment to ex-soldiers that require the attention of the local administration ;
- (a) Generally to watch over the welfare of the ex-soldier and his family, and the interests of serving soldiers absent with their units.

As regards item (e), quoted above, the function of the Board and corresponding organizations cover a wide range and some of their main tasks are enumerated below :---

- (a) To circulate information regarding the educational concessions available for soldiers' children :
- (b) To communicate information regarding employment, facilities for training for civilian vocations and concessions open to discharged men, and to maintain registers of ex-soldiers desirous of obtaining employment;
- To ascertain and intimate the where-(c) abouts of an absent soldier to his dependents and to communicate to him news of all important matters affecting his family's welfares:
- (d) To procure legal advice in the case of a law suit against an absent soldier where there is no male member of his family capable of protecting his interests :
- (e) To assist an absent soldier's family in the event of disease or famine :
- (f) To assist ex-soldiers and their dependants in securing medals, pensions, arrears of pay, etc. :
- (g) To keep a watch on the adequacy of the number of pension-paying branch post offices, especially in hilly districts, and, if and when there is a need for more notice:

- them to the Provincial Branch of the Indian Red Cross Society for medical assistance :
- (f) To investigate applications for relief from the various military charitable funds.

Another leading development has been the institution of the "Welfare Scheme," the foundation of which is the network of District Soldiers' Boards, etc., acting under the orders of Provincial Soldiers' Boards, which have been created in all areas from which the Indian Army obtains recruits in any number, for the purpose of ensuring that the home interests of Indian soldiers and their dependents are specially looked after. The Board in 1986 allotted as an looked after. The Board in 1936 allotted as an experimental measure Rs. 106 a year for three years for the promotion of schemes of Rural Reconstruction in military villages in the Puniab.

One of the most important functions of the Provincial and District Soldiers' Boards is to find employment for ex-soldiers. The Government of India and Local Governments and Administrations have accepted the principle that preferential treatment should be accorded to ex-soldiers in this respect and as a result employment under Government was found for 76,639 individuals between the years 1922 and 1986. The Board especially appeals to private employers to assist as far as they can by engaging ex-soldiers. The Recruiting Officers at Delhi, Rawaipindi, Lahore, Juliunder, Lucknow, Ajmer, Poona, Peshawar and Kohat can supp saliable Indian ex-soldiers for most kinds of divilemployment, especially guards of all descriptions, motor drivers, peons, chaprasis, drill and physical training instructors, rough-riders and polo orderlies. (Personal servants cannot be supplied). Applications should be sent to any of the above officers. Employers should, when applying for labour, furnish particulars as to wages, quarters, etc., and state the length of time the appointment can be held open. The various district soldiers' boards also maintain lists of reliable ex-soldiers desirous of employment in their own districts. In their case reliable Indian ex-soldiers for most kinds of civil ment in their own districts. In their case applications should be sent to the Secretary of the Board.

The Board on 31 December 1922 had the residue of the war fund, known as the Imperial if and when there is a need for more Indian War Relief Fund, handed over to it, such offices, to bring the fact to This formed the nucleus of its finances. The latter have since been husbanded with great success. The face value of the securities consti-(h) To investigate cases of ex-soldiers invalided out of the Indian Army for chronic diseases such as tuberculosis, leprosy, diabetes, etc., and to report March 1936.

THE VICTORIA CROSS.

ed, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 1-39th Garhwal Rifics.—For great galiantry on the night of the 23rd-24th November, 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches, and, although wounded in two places in shielding him with his own body on the expessed the head, and also in the arm, being one of the side. He then under cover of darkness, went first to push round each successive traverse, in back for assistance and brought the officer into the face of severe fire from bombs and rifles at the closest range.

kept them under his command until the retirement vas ordered. Jamadar Mir Dast subsequently on this day displayed remarkable ocurage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 23rd Gurkha Rifles.-For most conspictous bravery during operations against the German traches south of Mauquissart. When highest wounded, on the 25th September 1915, he found a badly wounded soldier of the Augustanian Bermant helping the of the and Lolessterabire Beginnent behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying hith most of the way and being at most points under the enemy's fire.

The announcement, made at the Delhi Durbar on going out to his Adjutant, and offered to in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which this was not permitted, he stripped off his own was increased during the War and afterwards by clothing to keep the wounded officer warmer the award of that decoration to the following:— and stayed with him till just before dark when subadar (then Sepoy) Khudadad Khan, the first wounded officer back to the main 129th Baluchk,—On 31st October 1914, at trenches, and then, returning with a streetcher Hollebeke, Belgium, the British Officer in carried back his Adjustant. He set a magnicharge of the detachment having been wounded ficent grample of courage and devotion to his officers.

> Sepoy Chatta Singh, 9th Bhopal Infantry,-For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and kelpiess in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rife fire. For five hours until nightfall he remained beside the wounded officer safety.

Naick Shahamad Khan, 89th Punjabis.—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in Subadar (then Jamadar) Mir Dast, 55th Coke's Rifies.—For most conspicuous bravery. He was in charge of a 55th Coke's Rifies.—For most conspicuous bravery and great ability at Ypres on 26th front of and covering agap in our new line with April 1915, when he led his platon with great gallacty during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and except two belt-fillers, had become casualties. in 100 yarus of the cuciny's characters pos-tion. He best off three counter-attacks, and worked his gun single-handed after all his men; except two belt-fillers, had become casualties. For three bours he held the gap under very For three mours he send the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostils fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he there with street back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all semaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

> Lance-Dafeder Govind Singh, 28th Caval-ry.—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade head-quarters, a distance of 1; miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in deli-vering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Havildar (then Lance-Naick) Lala. Rifes.—For complexous overey and feesource alst Dogras.—Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary abalter a lew other men succeeded under intense fire, which he himself had made, and in which is had already bandaged fear wounded then. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The Ko. 10 the Lewis gun narry opened fire and was example were not more than one hundred yeards shot immediately. Without a moment's hesionshal, and it seemed earthin death to go estimated of the gun, and in spite of hombs thrown at hims that direction, but Lance-Naick Lala insisted off the gun, and in spite of hombs thrown at hims Rifleman Karan Bahadur Rana, 23rd Gurkha

and heavy fire from both flanks, he opened fire machine guns and infantry had surrendered and knocked out the enemy machine gun crew, to him before he died. His valour and initiative Then switching his fire on the enemy bombers and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had greacest coolness in removing detects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Laucers, attached 29th Laucers.—For most conspicuous aveaged 29th Lancers.—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron devotion and bravery "quite beyond all charged a strong enemy position on the west bank of the River Jordan, between the river received a severe gunshot wound in the chest and Kh. es Samariveh Village. On nearing the position Ressaldar Badiu Singh realised avoidants had been killed or disabled he strugthat the squadron was suffering casualties that the squadron was suffering casualties gled to his feet, called to his assistance two men, from a small hill on the left front occupied by and charged and recovered the gun, restoring machine guns and 200 infantry. Without it action. He refused medical attention, the slightest hesitation he collected six other insisting first on pointing out where the other ranks and with the greatest dash and an entire wounded were and on carrying water to them. disregard of danger charged and captured the White the medical man was attending to position, thereby saving very heavy exauatives where these wounded he shielded them with his body to the squadron. He was mortally wounded on the very top of the hill when capturing one only after he was exhauted through three hours' of the machine guns single-handed, but all the

were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles.—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

gled to his feet, called to his assistance two men, and charged and recovered the gun, restoring

THE EAST INDIES SQUADRON.

Since 1908 a squadron of the Boyal Navy, Gulf. By 1913 the position of the East Indies known as the East Indies Squadron, has been maintained in Indian waters. It has naturally building the squadron consisted of one second class cruiser which had been a flagship, In 1903 the squadron consisted of one second class cruiser which had been a flagship, In 1903 the squadron consisted of one second class cruiser which had been a flagship, In 1903 the squadron consisted of one second class cruiser which had been a flagship. or gunboats. In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910: when one second class cruiser was withdrawn and two smaller vessels substituted, and three cruisers were lent from the Mediterranean to assist in the suppression of the arms traffic in the "Bideford," "Fowey," and "Deptford."

India's Naval Expenditure.

From 1869 onwards India paid a contribution of varying amounts to the Imperial Govern-From 1866 onwards indis paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy. Under arrangements which dates from 1898-7 the subsidy of £100,000 a year was paid towards the upkeep of certain ships of the Rast India Squadron, which were not to be employed beyond prescribed limits, except with the consent of the Government of India. India's total naval expediture is under half a million pounds annually. In 1938 India's contribution to the British Government was droped on the understanding that the Royal India Navy would maints in six modern Escort vessels and be responsible for India's coast defence. The contribution was added to India's Naval budgest.

The question of a new distribution of the burden of the cost of Imperial Navai Defence was discussed at the Imperial Conference in London in October—November 1926. The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed.

The Royal Indian Navy consists of a Depot Ship, 4 Escort vessels, 2 Patrol vessels and a Survey vessel.

ROYAL INDIAN NAVY.

The Royal Indian Navy traces its origin to first two ships, the Dragon and Hoseander so far back as 1012 when the East India (or Oslander), were despatched from England Company stationed at Surat found that it was in accessary to provide themselve with armed vessels to protect their commerce and settle-days under slightly varying titles and of various ments from the Dutch or Portuguess and from strengths the Government in India have always the pirates which infested the Indian cossts.

The periods and titles have	been	as follows:
Hon. E. I. Co.'s Marine		1612-1686
Bombay ;;		1686-1830
Indian Navy ;;		1830-1863
Bombay Marine	••	1863-1877
H. M. Indian Marine		18771892
Royal Indian Marine		1892.
Royal Indian Navy		1934.
India's Naval Force has	-	haen most

India's Naval Force has always been most closely connected with Bombay, and in 1668 when the E. India Co. took over Bombay, Captain Young of the Marine was appointed Deputy Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into au Imperial Marine under the Government of India, Bombay has continued to be the headquarters and the official residence of the Flag Officer Commanding.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties. Royal Indian Marine Ships.
"DUFFERIN," "HARDINGE," "NORTHEROOK,"
"LAWRENCE," "DALHOUSIE" and "MINTO" had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean North Sea, North Red Sea and Caspian Sea Ficets.

In addition to transport duties in Indian Ports, Officers were sent to Marseilles, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and line Act and this had to be passed through the Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary Officers warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties.

Reorganisation Schemes.—After the War the Government of India asked Admiral of the the Service. His valuable suggestions were unfortunately too ambitious for Indian finances and could not be accepted.

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the B.I.M. was not included in their terms of reference, they strongly recommended that the R. I. M. should be reorganised as a combatant service. The Government of India in 1920 obtained from the Admiralty the services of Rear-Admiral Mawby as Director, R.I.M., to draw up a scheme of reorganisation within limited lines. His scheme, however, was not adopted, and Admiral Mawby resigned his appointment.

the working of the Montagu-Chelmsford reforms the Royal resulted in the Local Governments having to Squadron.

defray the cost of the work of R. I. M. ships on their various stations, on lighthouse duties, transport work, carrying of officials, etc. The Local Governments were naturally inclined to think that if they had to pay they would like to have a say in the management, and that if the work could be done chearer locally, they should arrange to carry out the duties them-selves. Further, the incheaps Committee selves. Further, the incheape Committee recommended that the three large troopships should be scrapped and all trooping carried out under contract, which would have left the Marin; with only the Survey Department and the Bombay Dockyard.

A Combatant Service.—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Raw-linson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisation of the Service as a combatant force. This Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian Navy, with a strength in the first instance of 4 armed sloops, 2 patrol vessels, 4 mine-aweeping trawlers, 2 surveying ships and a depot ship, the Service in the first instance to be commanded by a Rear-Admiral on the active list in the Boyal Navy. The scheme was accepted by the Indian and Home Government of the state of the state of the state of the scheme was accepted by the Indian and Home Government of the state of the st ments, and the necessary Act to permit India to maintain a Navy was passed through both Houses of Parliament.

To effect this change in the title, it was necessary to draw up a new Indian Naval Discip-Assembly and Council of State in India.

In February 1928, the Bill was introduced but failed to pass in the Assembly by a narrow margin of one vote. In February 1934, the Bill was re-introduced to the As-Fleet, Lord Jellicoe, who was visiting India, sembly with certain minor amendments but in to draw up a scheme for the reorganisation of response to a plea for circulation, the Government circulated the Bill.

> In August, the Bill was re-introduced and passed by the Assembly and Council of State. On 2nd October 1934 the Royal Indian Navy was inaugurated, the historic ceremony taking place in Bombay.

> The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and war then ceased to exist.

The Boyal Indian Navy which has been evolved from the late Royal Indian Marine is one of the Empire's Naval Forces and is under the command of a Flag Officer of the Royal Navy. Its work in addition to training its The R.I.M. then fell upon hard times; money communications, etc., includes fishery prowas soarce, the report of the Inchcape Communications, etc., includes fishery promittee necessitated drastic retrenchments, and duties. A close Halson is maintained between the Royal Indian Navy and the East Indies

KARACHI.

Principal Officer, Mercantile Marine Department, Karachi District.

ADER.

Port Officer.

CHITTAGONG.

Nautical Surveyor and Engineer and Ship Surveyor.

PORT BLAIR,

Engineer and Harbour Master.

Agriculture.

The agriculture of the sub-continent of India, with its wide range of physical and climatological conditions, varies considerably in character and scope. There is scarcely any cultivated crop of the temperate, sub-temperate or tropical sones which cannot be grown in some part of this vast country from the warm, humid coastlands to the perennially temperate altitudes of its mountain ranges. Even in the plains, the cultivation of the common crops of temperate countries is practised during the cold weather season while more truly tropical crops are grown in the same areas during summer. Further variations in agricultural practice are to be found in the irrigated and non-irrigated tracts.

The total area of culturable land in India. excluding a forest area of 89 million acres, is about 435 million acres. The total gross cropped area, sown annually, approximates to 298 million acres. Of this vast area of cultiva-tion, no less than 267 million acres are under cereal and pulse crops of all kinds, which supply food and fodder for India's human population of 852 million and her animal population of 310 million head of cattle, sheep and goats.

In Indian agriculture, the dominant climatological factor is the monsoon and, in most parts of the country, the total annual rainfall is precipitated between the months of June and October. The winter and early summer months are generally dry and high temperatures prevail in the months of March to June, prior to the break of the monsoon rains. Thus the agricultural season is naturally divided into two main subdivisions, the Kharif season of the monsoon and the Rabi season of the cold weather. Each of these seasons has its own distinctive grops. The greater part of the Indo-Gangetic plain and the northern tracts of the Peninsula are served by the main monsoon which falls between June and October. During these months the average rainfall for the whole of India is about 40 inches, varying from 15 (or less) to 50 inches in the main cultivated tracts, to 50 inches in the main cultivated traces.

Rainfall in the cold weather aeason between December and March is generally not more than 2 to 4 inches. In the south of India, which includes most of the Madras Province and the bulk of the territories of the two large Indian States of Hyderabad and Mysore, the climatic and rainfall conditions are different. The bulk of the rainfall in this area is received from the North-East monsoon and falls during the period October to February. Conditions are more truly tropical, especially on the West coast and the sub-division of the agricultural season into Kharif and Rabi can hardly be said

In South India, rice and millets are the main food crops. Rice, millets, mains, hot weather pulses and oliseeds are the principal food crops of the monsoon season, in the northern parts of the Peninsula, with cotton, jute and groundnuts as the main cash crops. Sugarcane is grown as a whole year crop in both North and South India,

Soils.-Four main soil groups can be recognised in India, viz., (1) the red soils derived from rocks of the Archwan system which charac terise Madras, Mysore and the South-East of Bombay and extend through the East of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal (2) The black cotton or regur soils which over-lie the Deccan trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundel khand. The Madras regur soils though less typical are also important. (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive mainly the Indo-Gangetic Plain embracing Sind northern Rajputana, most of the Punjab, the plains of the United Provinces, most o lithar and Bengal and half of Assam. (4) The laterite soils which form a belt round the Peninsula and extend through East Benga into Assam and Burma.

The great alluvial plains are characterised by ease of cultivation and rapid response to irriga tion and manuring; broadly speaking ther are few soils in the world more suited to inten sive agriculture so long as the water supply i assured. The other soils are less tractable and call for greater skill in management and are less adapted to small holdings; of these th regur soils are the most valuable.

In addition to the four main groups of India: soils mentioned above, the desert soils of Indi occupy a large tract in Eastern Sind extending over the whole length of that Province, along the edge of the Indus alluvium, Rajputana and the South Punish of which the Thar a Rajputan desert alone occupies an area of 6,0,000 squar miles. The sands of these deserts are maini derived, according to Blandford, from the ol-sea coast and the transport of the sand int the interior of the country is due to the South west wind. Alkali soils also form an importangroup of Indian solis which are known as re or user in the United Provinces, keler in Sinc or Mar in the United Provinces, seem in our raktar and thur in the Punjah and chopen c kari in Bombay Province. Such soils a characterised by a high degree of impermeabilit and "stickiness" together with high alkalinit and frequent presence of large excess of firstly are susually poor is nitrogen an humus and unsuitable for crop growing without praylous realismation. previous reclamation.

AGRICULTURAL EQUIPMENT.

Finance.—In India, farming is carried a with the minimum of capital and there is pratically no outlay on buildings, fencing ar agricultural machinery. The cultivators are fitne most part illitarate and agricultural indebte ness is high and rates of interest on loans a heavy. During the past twenty years, we much progress has been made by the co-operatic credit movement in many Provinces. In receivers of depressed agricultural prices however it has been found necessary to supplement to operative credit by the development

non-credit activities, s.g., purchase and sale societies, "better-farming" societies, etc. Such societies have proved of great value to the cultivators and, in combination with measures for debt redemption, etc., will contribute largely to improvement in the economic condition of the agriculturists.

Livestock.—Practically all cultivation in India is done by bullocks and the efficiency and capacity of these in different districts varies considerably. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe. Bullock power is also used for raising water from wells for field irrigation, for driving the chafficutter and the sugarcane crusher and for treading out the grain in the treshing yard. Although in many districts the bullock cart is rapidly being supplanted by the motor-bus as the commonest means of human transport, the great bulk of agricultural produce is still taken to market in bullock carts. In general, the Indian cultivator cares well for his draught bullocks which, in most cases, constitute the most important part of his moveable property.

Implements—In general, cultivating implements are few and simple and remarkably well suited for the tiliage operations for which they have been evolved. The ploughs are usually of wood, tipped with an iron or steel point, and stir rather than invert the soil. Iron ploughs are also extensively used in some districts but the demand has decreased on account of recent agricultural depression and the consequent decline in the prices of agricultural consequent decime in the prices of agricultural produce. A heavy wooden beam is commonly employed to serve the combined purposes of roller, clod-crusher and soil-compactor. In the black cotton soil areas, the bakhar, a simple type of broad-baded harrow, is in general use. In many Provinces, seed drills or seed tubes are utilised for drilling the crope in rows to facilitate infer-emitivation. In less advanced tracts the utilised for drilling the crops in rows to facilitate inter-cultivation. In less advanced tracts, the seed is merely broadcast and ploughed into the soil. There is a great variety of hand implements to be found throughout the country, most of which are simple, cheap and efficient under local conditions. Practically no harvesting machinery is in use, the crops being cut or gathered by hand and threshed—in the case of grain crops—under the feet of bullocks. Cereal crops are winnowed by the agency of the wind although cheap mechanical winnowing machines, designed by agricultural engineers. machines, designed by agricultural engineers, are receiving attention from the more advanced cultivators. With reference to the introduction of improved agricultural implements, it is calculated that the Agricultural Departments aold 28,655 improved ploughs, 32,385 fodder cutters, 3,614 iron cane mills and about 15,000 other types of better implements to the cultiva-turs in 1935-36. Work on mechanical cultivation is still largely in an experimental stage though tractor ploughing has proved very effective in the eradication of deep-rooted weeds in the United Provinces. Bombay and certain ladian States. One notable development of recent years in connection with agricultural implements is the large extent to which improved types are now being manufactured and sold by village critimas.

Cultivation and Tillage.—The improvement of the ordinary cultivation and tillage methods in common use in India offers by far the widest field for increasing the yields of field crops and, consequently, the profits of the agriculturists. In many parts of India, cultivation is decidedly good but, particularly in the non-irrigated tracts and in areas liable to failure of rainfall, there is much room for improvement. In this connection, the research work on dry-farming methods, which is being conducted in Bombay, Madras and Hyderabad under the auspices of the Imperial Council of Agricultural Research, is of very great importance.

Two economic factors which tend to keep down the standard of cultivation in many Provinces of India are the fragmentation and sub-division of holdings, resulting from Indian laws of inheritance, and certain systems of land tenure whereby the cultivator, as a tenant, has no interest in permanent improvement of his holding. In addition, the agriculturists rarely live on their lands but congregate in villages for mutual protection. Efforts are now being made in many Provinces to eliminate these factors, which contribute to a low standard of cultivation, but progress in this direction must necessarily be slow.

The main object of tillage methods for rabi, i.e., cold-weather, crops is the conservation of soil moisture and the preparation of a good seed-bed to ensure germination of seed. To achieve these objects, the land is given repeated shallow ploughings or harrowings, which produce a surface mulch over a moist sub-soil. For kharif, i.e., hot-weather, crops, the preliminary cultivation of the fields is usually much less thorough as sowings must commence as soon as the rains break. The practice of drilling the crops in rows is rapidly supplanting the old method of broadcasting in many tracts. The former method permits the intercultivation of the crops by bullock implements and greatly reduces the cost of weeding. Harvesting is generally done by hand implements, e.g., the sickle, and very little wastage occurs in the processes. The work of the Agricultural bepartments in India in connection with the improvement of cultivation and tillage is largely concentrated upon (a) the demonstration of better methods on the actual lands of the cultivators and (b) research work on the improvement of indigenous agricultural implements and the distribution and extension of such improved types in the rural areas. The use of tractor outifits for mechanical cultivation is still largely limited to large estates and, in certain tracts, to such specific purposes as the eradication of deep-rooted weeds, where the work is done on a contract basis by private agencies.

Irrifation.—The chief characteristics of the Indian rainfall are its unequal distribution throughout the country, seasonal irregularity of precipitation and liability to failure or partial deficiency in many tracts. The average annual rainfall for the whole country is about 45 inches and there is little variation from this average from year to year. But, within individual tracts, remarkably wide variations in total annual rainfall are found. At many recording stations, annual rainfall of less than half the average precipitation are not uncommon, and in cases of extreme draught, less than one quarter of average rainfall has been recorded in precarious tracts. Such tracts include practically the whole of the Punjab and North West Frontier Province, the United Provinces except the sub-montane regions, Sind, a large portion of Bihar, most of Madras and the Bombay Province, omitting the coastal belts and portions of the Central Provinces. The concentration of the principal rainfall in less than a third of the year, which is not the sowing period of the rabi crops, places a very definite limit on the yield which can be obtained from the principal cereal which can be obtained from the principal cereai-crops. Some other crops, e.g., surgarcane, can hardly be grown indeed without supplementary watering. With adequate irrigation the yield-from the principal grain crops in Northern India is doubled even in areas where the monsoon is generous, whilst in the great canal colonies and in Sind barren desert has become fertile land. The Indian canal system is by far the largest in the world. Of the total cilityated largest in the world. Of the total cultivated iargest in the world. Of the total cultivated area of 280 million acres, no less than 60 million are annually irrigated from one source or another. Of this area, 30 million acres are irrigated from canals, 15 million from wells and 15 million from tanks and other sources. In 1932-33 the total length of the main and branch canals and distributaries amounted to some 75,000 miles irigating an area of 33 million acros, and the value of crops irrigated from Government works was estimated at about 87 crores. The protective effect of the canals in many areas is no loss important than the enhanced yield. Protective irrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great perennial canals in the North of India draw their supply from snow-fed rivers; the inundation canals run only when the rivers rise with the melting of the snow in April-May and must close when supplies fall at the end and must close when supplies fall at the end
of the monsoon. Other canals depend for their
supply during the dry part of the year on
water stored behind great dams thrown across
suitable garges and are in consequence less
dependable than the larger snow-fed systems.
Water rates are levied on the area of irrigated
crops matured so that Government bears part
of the risk of failure of crops. Different rates
are charged for different crops and vary aumaare charged for different crops and vary some-what in different parts of India; rates are also lower when the water has to be lifted than when flow irrigation is given.

The Madras, Bombay and Sind Provinces possess some of the most spectacular irrigation schemes in the world. The Canvery-Mettur irri-gation system inaugurated in 1934 is considered gation system inaugurated in 1934 is considered to be the biggreat in the British Empire and the largust single block masonry reservoir in the world, with a storage capacity of 93,500 million cubic feet. This project, together with the Eanniambadi project is Mysore, 's field to England to irrigated areas and the planting industries.

Rice.—Rice is the most extensively grown crop in India, and on an average, occupies about bring into productive we about 80 per cent.

St. of the total cultivated area. It preponds the flow of the Causery river besides in the wetter parts of the country, etc., in see a great moderator of fiscods. The Wilson Dam as Bhandardara, impossibility 272 feet of water,

is far and away the highest dam in India, whilst the Sukkur Barrage in Sind across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers.

About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All agricultural departments are now giving increased attention to the better utilisation of underground water supplies, existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery. Efficient types of water lifts are rapidly replacing the old-fashioned mhotea.

Tank irrigation is common in Central and Southern India, Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year. Often the indirect effect of the tank in main-taining the sub-soll water level is as important as the direct irrigation.

Manures and Manuring.—The great bulk of Indian soils are deficient in organic matter. In other agricultural countries of the world, this want is usually met by the return of farmyard manure to the land or by the use of composts made from crop residues and similar waste organic materials. In India, however, cattle dung is largely utilised for village fuel and the practice of composting is only being slowly developed. The cultivation of green manure crops is making headway, especially in the irrigated tracts, and many Provincial dovernments allow concessions to encourage their extension. The use of certain oil-cakes, especially castor cake, is on the increase and this method of manuring is now common with valuable crops such as sugarcane and tobacco. With regard to artificial fertilisers, nitrogenous organic manures, e.g., ammonium suiphate and nitrate of soda, are being extended in use through the efforts of departmental and private agencies. The approximate consumption of ammonium sulphate in 1936-37 was 61,288 tons as compared with 57,164 tons in 1935-36. as compared with 57,164 tons in 1935-39. Imports of phosphatic manures amount to about 16,000 tons annually and of potash manures, 4,000 tons, in addition, quite appreciable quantities of such fertilisers are produced and used in India, The general fall in the prices of all arricultural commodities since 1929 has undoubtedly hindred the wider use of artificial fertilisers which are mostly confined to irrigated areas and the planting

acres and the yield is about 30 million tons. In 1936-37, total area under rice was 84 million acres with a total yield of approximately 33 million tons. The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an intimate acquaintance with those grown in their own localities. The better qualities are sown in seed beds and transplanted in the monsoon. Broadcasted rice is grown generally in low-lying areas and is sown before the monsoon as it must make a good start before the floods arrive. Deep water rices grow quickly and to a great height and are generally able to keep pace with the rise in water level.

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are transplanted. The land is laid out into small areas with raised partitions to regulate the distribution of the water supply. The seedlings are planted either singly or in small bunches containing from 4 to 6 plants each and are simply pushed into the mud at distances of 6 to 12 inches apart. Either by bunding to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are kept more or less under water until the crop shows signs of ripening. The area under improved varieties of rice distributed by the agricultural departments is now approximately 4 million acres. A scheme for the intensification of research on rice in all the principal rice-growing provinces financed by the Imperial Council of Agricultural Research and the Empire Marketing Board is in progress. A Standing Committee on Rice, consisting of forty-five members, has been constituted by the Imperial Council of Agricultural Research on the lines recommended by the Crop Planning Conference, 1934.

India (excluding Burma) consumes more rice than she produces, the balance in the past having been provided almost entirely by Burma. Imports in 1936-37 were 85,782 tons, mainly from Siam and French Indo-Chins.

Wheat.—Wheat is grown widely throughout Mrthern India as a winter erop, the United Provinces and the Punjab supplying about two-thirds of the total area, and probably three-quarters of the total outturn is India. This crop occupies, on an average, about 10 per cent. of the total cultivated area in the country. The majority of the varieties grown belong to the species Triticism culgare. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extrancous matter due to the method of threshing employed. Wheat for export is well-cleaned and there has been great improvement in this respect of recent years. Most of the Indian wheats are soft weak wheats but there are some well known Maccaroni wheats amongst them.

that of 1933-34, namely, 36 million access, but the yield did not come up to the record harvest of 1980 which exceeded 104 million tons. Becent crops have averaged 94 million tons per annum which is only slightly, if anything, above internal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 after which year, they were nominal for some time but, owing to savourable world parity, and the protection afforded by the import daty on foreign wheats, have recommenced. In 1935-36, 29,000 tons were exported from India and, in 1936-37, this figure increased to 2,31,505 tons. With the development of irrigation from the Libyd Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is practically certain and, although the internal consumption of wheat will increase with the growth of population, there is likely to be a greater exportable surplus in the not distant future. The crop is generally grown after a summer fallow and, except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. Rains in January and February are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now over? million acres. The Imperial Council of Agricultural Research has recently appointed two Standing Committees to advise on problems connected with rice and wheat.

The Millets.—These constitute one of the most important groups of crops in the country, supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are Jowar (Sorphams vulgars) the great millet, and Bajra the Bulrush millet (Penniscium typhoideum) which, between them, occupy about 50 million acres annually. In 1936-37, the total area under jowar and bajra in India was 52.5 million acres. Generally speaking the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Neither for jowar nor bajra is manure usually applied though jowar responds hand-somely to high manuring and cultivation is not so thorough as for wheat. The crop is generally sown in the beginning of the monsoon and so it requires to be thoroughly weeded. It is often grown mixed with the summer pulses especially Arbar (Cojenus indicus—pigeon pes) and other crops, and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces rabi juar is also an important crop. The produce is consumed in the country.

Palses.—Pulses are commonly grown throughout India in great variety and form at once the backbone of the agriculture, since even the present moderate degree of soil fartility serid not be maintained without leguminous retations, and a primary necessity in the food of a vegetarian population. The yelids on the whole are fairly good, mixed cropping is common. The principal pulses are Arkar (Cajanus indicate), gram (Oter aristinum), various species of Phaseolus and Pisum.

Cotton.—Is one of the most important commercial crops in India and, despite the recent fall in prices, it still retains a most prominent position in the list of exports. The average area under cotton in the quinquennium ending 1931-32 was 25.1 million acres and the average yield 5.2 million bales of 400 lbs.
cach. During the five-year period ending
1936-27, the average annual acreage has decreased to about 24.8 million acres while the average yield has increased to 5.4 million bales. 1937-38 the estimated area and yield were 25.6 million acres and 5.7 million bales respectively. The ascertained area under improved varieties of cottom in 1937-38 was about 5.5 million acres. The consumption of Indian cotton in mills in India amounted to 2,094,000 bales in mus in mais amounted to 2,000 Dates in 1937-88. The principal export is of short staple cotton below \$\frac{x}{2}\$ in staple but there is also in normal years an export of medium and long staple indian cotton, of staple length \$\frac{x}{2}\$ to \$1-\frac{x}{2}\$, such as Punjab-American. There is no Indian cotton helt; Bombay Province, the Punjab, the Central Provinces and Berar, Madras Province, Sind and the United Provinces and Province, Sind and the United Provinces and the Indian States of Hyderabad and Baroda, all have important cotton tracts producing distinct types. Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly; in the best irrigated tracts the normal yield is about 200 libra of ginned cotton per acre. and yields runch lbs. of ginned cotton per acre, and yields much above this have been recorded, whilst in the poorest unirrigated tracts 60 lbs, per acre is a good crop. Of recent years, as the result of the work of the Agricultural Departments and the Indian Central Cotton Committee, the quality and yield of staple cottons have improved and also the yield and cleanliness of the short staple tracts.

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Markets Act, the C. P. Cotton Markets Act and the Madras (commercial crops) Market Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing. In certain provinces igeniation has been enacted, or is under consideration, with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural Departments have continued their campaign of cotton improvement apart from improvements in methods of entity at the continued their campaign of cotton improvement and continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement and continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton improvement entity at the continued their campaign of cotton entity at the continued the continued the continued the continued the continued the contin

Exports.—The figures for exports by sea of Indian cotton from British India to foreign countries for the four fiscal years (ending 31st March) 1984-36 and for 6 months of 1938-39 are shown in the next column >— (In thousand bales of 400 lbs. each).

Countries	193 4- 35.	1935- 36.	1936- 37.	1937- 88.	1938- 39 8 mon- ths end- ing Nov. 1938.

N.B.—From 1st April 1937 the above figures exclude exports from Burma.

 Included under 'Other countries,' separate figures not being available.

Japan is the most important buyer, and by virtue of an agreement between the Governments of India and Japan which will have effect up to the 31st March 1940, for a million bales of raw cotton taken by Japan, British India will import 283 million yards of Japanese piecegoods.

Sugarcane .-- India, until recently a large importer of sugar, is now one of the most important sugarcane growing countries in the world. The area in 1937-38 is 3,815,000 acres as against a quinquennial average of 3,426,000 acres for the preceding five years ending 1936-37. crop is mostly grown in the submontane tracts of Northern India, more than half the area being in the United Provinces. The indigenous hard, thin, lowsucrose canes have now largely been replaced by seedling cames of high quality mainly the productions of the Imperial Sugar-cane Breeding Station, Coimbators. The total area under improved varieties of cane in India in 1936-37 was estimated to be 3,473,100 acres representing 75-39 per cent. of the total area as compared with 74 per cent. in the previous year (1935-36). In the United Provinces and Bihar and Orissa improved cames occupy mon than 80 per cent. of the area. The effect of the improved varieties is clear from the fact that while the area under cane in India in 1936-3; (4.44 million acres) represents only an advance of 29.5 per cent, over the quinquennial average the yield (about 6.5 million tons expressed as gur) represent an increase of \$4.7 per cent. The protection afforded by the Sugar Industry. Protection Act of 1932 has given a stimulus to the production of sugar by modern methods

The production of sugar direct from cane in The production of sugar direct from cane in Table Crediterous Unisecus form an India during the essaon 1936-37 totalled 1,128,600 important group of crope in Northern India tons against 932,100 tons in 1935-36. The average extraction for the whole of India shows a very substantial increase, the figure being 9-50 in unstand, including an estimated figure for the per cent. for 1936-37 as against 9-29 ar cent. per cent, for 1936-37 as against 9.29 er cent, for 1935-36. The number of factories working has increased from 137 to 140. Imports of sugar of all sorts during 1936-87 was 23,075 tons as compared with 2,012,000 tons in 1935-86 and 901,200 tons in 1980-31. It is expected that within a few years India will not only provide her own requirements of sugar but will have a surplus for export.

The Government of India increased the rate of excise duty on sugar produced in factories in British India to Re. 1 per cwt. (from annas 10 per cwt.), on khandsari, to Rs. 2 per cwt. (from Rc. 1-5-0 per cwt.) on all other sugars except palmyras sugar.

Oilseeds.—The crops classified under the heading are chiefly groundnuts, linseed, sesamum and the cruciferous oilseeds (rape, mustard, etc.). Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature, they cover an immense area.

Groundnut, though of modern introduction, is aiready an important crop particularly in Madras, Bombay, Burms and Hyderabad. The area has not however achieved stability. The area has not however scheets stables. It rose steadily from 1.5 million acres in the pre-war period to 8.23 millions in 1933-34. There have been successive drops in the past two years, the acresge for 1936-37 being 7.72 million acres. The yield in 1936-37 was about 2.8 million tons of which 7.39,483 tons were a million tons of which 7.39,483 tons were exported as compared with a pre-war average export of 212,000 tons.

Linseed requires a deep and moist soil and is grown chiefly in the Central Provinces, Bihar and Orissa and the United Provinces. crops is grown for seed and not for fibre and the common varieties are of a much shorter habit of growth than those of Europe. The yield or growth than those of Europe. The yield varies greatly from practically nothing up to 500 to 600 lbs. of seed per acre. It is grown largely for export. At the beginning of the century India supplied practically the whole of the world's demand for lineed, the area having gone as high as 5 million acres with a yield of 630,000 tons. Area in 1936-37 was approxima-tely 3,594,000 acres and yield 418,000 tons. In recent years foreign competition, mainly from the Argentine, has contracted the market for Indian linseed and with it the area under the crop. Exports in 1936-87 amounted to 296,000 tons as compared with the pre-war average of 379,000 tons. The preference granted to Indian linseed in the United Kingdom under the Ottawa Agreement, combined with successive short barvests in the Argentine, helped India to regain her pre-war position in the British market in 1933-34 when Britain took 174,000 tons out of a total of 879,000 tons. In 1986-87 exports to Great Britain amounted to 242,890

Secamen (Gingelly) is grown mostly in Penhaular India as an autumn or winter crop. In 1986-87, it occupied an area of 5,570,000 acres with a yield of 684,000 tons. Export amounted to 14,216 tons.

The Cruciferous Oilseeds 6) to 7 million acres annually. Production in 1936-37 was estimated at 976,007 tons of which 40,252 tons were exported as compared with 26,138 tons in 1935-36 and 115,000 tons in 1932-33. Several species are grown and there are numerous local varieties. A large portion of the crop is crushed locally for domestic consum.ption.

Jute.-Jute fibre is obtained from two varieties of plants called Corchorus Olitorius and Corchorus Capsularis. The plant requires a rich moist soil and its cultivation is confined almost entirely to Bengal, Assam, Bihar and Orissa where the Ganges, the Brahmaputra and their tributaries form new alluvial soil every year. The plants are rather delicate when young but once established require little attention and grow to a height of 5 to 15 ft. Before the plants are dead ripe they are cut and retted under water. The fibre is then separated from the stalk, washed and dried.

The annual world consumption of the fibre varies from 80 to 120 lacs of bales of 400 lbs. each. The area and production during 1938 were forecast at 3,074,100 acres and 6,695,550 bales respectively as against 2,888,600 acres and 8,680,500 bales during 1937. The lower yield during 1938 is attributed to the damage done by the floods.

A Central Jute Committee was established in 1936 to undertake research and enquiry into the Agriculture, the technology and the economics of the jute industry in India. The activities of the Committee at present comprise of (a) Enquiry into marketing and transport of jute and its products, (b) Agricultural research, (c) Supply of jute seeds of improved varieties, (d) Technological Research on jute, (s) Improvement of the jute forecast and (f) Collection and distribution of statistics and information on jute.

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varie-ties cultivated Nicotians Tabacum is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The crop is only suited to small holdings where labour is plentiful as the attenholdings where labour is plentiful as the attention necessary for its proper cultivation is very great. The seed is germinated in seed beds and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun. The crop is very carefully weeded and hood. It is topped after attaining a height of say, £ ft., and all suckers are removed. The crop ripens from February onwards and is out just before the leaves become brittle. The greater part of the tobacco grown in India is intended for Heeksh smoking and is coarse and heavy in Eavour. Lighter kinds are also produced for cigar and cigarette manufacture. Of recent years there has been important development in the production, in commercial quantities, of better quality cigarette

tobacco both in Madras and in Bihar. Exports; breeds are the Murra buffaloes of the Punjab. in 1936-37 amounted to 28.5 million pounds of which the United Kingdom took 18:25 million pounds. The area in 1936-37 was 1,233,000 acres, as compared with 1,357,000 acres in 1935-86 and the total yield of dried leaf amounted to 544,000 tons in 1936-37 as against 651,000 tons in 1935-36. The production in India of bright flue-cured tobacco suitable for cigarette making has increased considerably, particularly in the Guntur District of the Madras Province and several thousands of flue-curing barns have been installed in recent years.

Livestock Census .- The report on the 4th quinquennial Census of Livestock in India. taken in January 1935, shows that there were then in British India, excluding Bengal and Bihar and Orissa, 113 million heads of bovine cattle, made up roughly of about 84 million heads of oxen and 29 million heads of buffaloes. The total figure for this census is over 5 millions (or about 5 per cent.) higher than that recorded at the preceding census in 1930. The next livestock consus is due in 1940 when the figures given above will require revision. The details shown bereunder refer to the 1935 census.

Oxen accounted for an increase of 2.7 millions and buffaloes for an increase of 2.5 millions. In the case of oxen, there was an increase of a little over 3 millions in young stock, but bulls and bullocks showed a decrease of about half a million, the reduction occurring mainly in Madras.

Cows recorded a decrease of over a lakh (1,00,000), the decline occurring mainly in the Contral Provinces and Berar.

Both male and cow buffaloes increased in number, the former by nearly a quarter of a million and the latter by little over half a million, the variations occurring mainly in the United Provinces and the Punjab.

Sheep declined in number by over 11 million to a total of 22 millions, the notable decreases being in Madras, the United Provinces, the Central Provinces, and Borar.

Goats numbered 26 millions, showing an increase of over one million as compared with the previous census—the chief increases being in the United Provinces and the Puniab.

There were no appreciable variations in the total number of horses and ponies, which amounted to nearly 14,000,000, but donkeys increased by about a lakh. Mules numbered 65,000 and camels a little over half a million.

Ploughs and carts gave a return of 17 and 5 millions respectively, showing a slight increase (mainly in the United Provinces) as compared quantry in the United Provinces) as compared with the previous census figures. For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and damper parts of the country. Horses and appear to the country. mules are practically never and from a commercial standard at present is low from a commercial mules are practically never and for point of view owing to neglect and sheer careless-tended in the composition of the composit

the Jaffershadi buffaloes of Kathiawar, and the the Jaffershadi buffaloes of Kathiawar, and the Surti buffaloes of the Bombay Province. The cattle and buffalo population in India is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill-fed and inefficient. Neverthelessia has been studied by the best foliation of the contraction of the cattle are small, ill-fed and inefficient. Neverthelessia has been studied by the cattle and the cattle are small to the cattle are small. the best Indian breeds have many merits. the draught types the best known breeds are the Hissar Nellore, Amrit Mahal, Gujerat (Kankrej), Kangayam, Kherigarh and Maivithe Sahiwai (Pimjab), Gir (Kathawar), Scindi and Hansi are amongst the best milking breeds. On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude 'scrub' bulls and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior buils for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts. H. E. the Viceroy's "Gift" Bull Scheme has II. B. the very soft our concur use given very considerable impetus to cattle improvement in all Provinces and States of India and this branch of animal husbandry is now receiving much close attention. Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued effort and persistent endeavour are essential. There is no branch of agricultural improvement where the land-owners of India could render greater service.

Cattle Imprevement.—India possesses some very fine breeds of cattle, each breed being peculiarly suited to the area to which it is indigenous. To mention some, there is the heavy fast Kankrej breed in Gujerat, admirably suited to the sandy deep rutted roads found in this part. Then we have the Danzi or Kala Kheri born and bred in the hilly, heavy rainfall area of the western ghats. Rain and water logged conditions do not affect this breed; indeed, the more the rain, the better it thrives. On the plateau of the Central Deccan, we have the Khillar, a light fast draught animal which thrives on very meagre pastures and is essentially suited to the hard stony country in which it is reared. Then we have the many types of buffalo; the buffalo is at present, and will be for many years to come, the dairy animal of the country. The buffalo which yields fair quantities of milk with a fat percentage of from 7 to 9 per cent. of butter fat cannot be beaten as a butter and ghee producer.

A large proportion of the cattle of this country depend entirely on grazing for their total food depend entirely on grazing for their sonal food and nourishment, and considering that such grazing is only of value for about 5 months of the year, India has the material to breed very fine and profitable animals. The standard at present is low from a commercial mical proposition to grow cattle on better land.

A good deal has been done for the improvement of cattle. The various Provinces have farms on which pedigree bulls are bred and reared. These are placed out in suitable villages on a premium system. In the Province of Bombay, lierd Registers are maintained for 8 of the breeds of the Province, shows are held annually and progress although slow, is to be noticed in those areas in which such work has been undertaken. More money and staff is essential to accelerate this work in the interests of the farmer. It is now a generally accepted fact that the farmer who mixes his farming with cattle-breeding has been better able to stand the depression now prevalent.

Dairying.—India is still far behind other countries in the matter of dairy farming and in the retail dairy business. This is mainly due to the climatic conditions of the country and the vast distances to be covered in transporting milk. The only solution seems to be Co-operative dairy produce, handling and sale societies. Dairy farming in India is at present, and will be for many years, a cottage industry, each household producing a few pounds of milk; at present this milk is converted by very wasteful methods into products that can be stored and transported long distances, such as ghee, (clarified butter), country butter, and Khawa, a desiccated whole milk produced by boiling milk and evaporating the water contents until a solid mass is obtained.

These products could, of course, be produced by un-to-date methods, leaving the pure sweet skim milk for either home consumption or to be utilised for making casein, skim milk powder and the like, thus giving the farmer a better return. The trade, however, has been purely a cottage industry, and co-operative societies would appear to be the only solution. Each Province has its Agricultural College where Dairying in all its aspects is taught, and for higher training in this subject, there is the Imperial Institute of Animal Husbandry and Dairying. A good deal of research is still necessary.

The butter trade has improved considerably of late years. In India the sale of good quality butter in cartons is on the increase. In cities pasteurizing plants for the retail milk trade are gradually increasing. Milk is now sold in sealed bottles; this trade, however, is small. The Indian milk consumer in large cities still demands his milk just prior to consumption, he has not learned to look after his milk. Consequently the producer has to be prepared to meet the customer's demand at any time of the day. Unlike the two deliveries of milk in other countries, the milk producer in our large cities has to deliver milk about 5 times a day; this naturally makes milk more expensive. The naturally makes milk more expensive. The consumer must be educated into the habit of the two-delivery methods if any progress is to be made in the organizing of milk to be

and large subsidies from Government will be experiencing the same difficulties as other necessary for many years to bring the standard countries when milk was produced in the ofties of cattle up to a point when it will be an econo- (i.e.) the destruction of cows and calves in the cities when dry.

> The Government of Ladia maintain an Institute of Animal Husbandry and Dairying at Bangalore where students are given 2 year courses for the Indian Dairy Diploma but little provision has hitherto been made for the extensive industrial research into the handling and processing of milk and dairy products under Indian conditions, which is essential for the development of dairying as a village industry. This matter is now receiving the attention of the Imperial Council of Agricultural Research. The report prepared by Dr. Wright on the dairying industry of India is a most useful and comprehensive publication and indicates clearly many avenues whereby improvement can be effected.

It is sufficient here to say that there is a growing recognition of the fact that as India's economic development proceeds a better balance between crop production and animal industry is needed and that the raising of crops for the feeding of dairy stock, instead of for sale as such, will be of increasing importance.

Animal Husbandry.—Details of the steps taken and progress made in the control of disease and improvement of stock are given in a blennial review of animal husbandry in India.

The control of contagious diseases of livestock in India is carried out by the Civil Veterinary Departments in the Provinces and major Indian States. The staffs of these departments are, for the most part, recruited from among the graduates of Indian Veterinary Colleges of which there are five, viz. one each at Lahore, Patna, Calcutta, Bombay and Madras. The chief research centre is the Imperial Veterinary Research Institute at Mukteswar in the United Provinces and its branch at Izatnagar, near Bareilly. This institute is maintained by the Government of India and has recently been considerably expanded, the latest additions being a poultry research station and a nutrition institute. A certain amount of research is also conducted at the Provincial Colleges.

In addition to research, the Imperial Veterinary Research Institute also manufactures large quantities of sera and vaccines for the use of the Provincial Departments in their fight against disease and until recently was the only manu-facturing centre for these products. Serum institutes have, however, been opened in recent years at Madras and Bangalore, mainly for the manufacture of biological products for the use of the Madras and Mysore Civil Veterinary Departments respectively.

The chief diseases that the Civil Veterinary Departments have to deal with are glanders and Surra in equines, and rinderpest, foot and mouth disease, haemorrhagic Septicaemia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and Surra are both scheduled produced in the organizing or man to be past, Uninters and Surra are not sometimen produced in the country under natural conditions diseases under the glanders and fracy act. rather than the present watered method of Glanders is incursible but surra can now be milk production in large cities. India is successfully treated with Naganol. This disease and in recent years its importance as a bovine | diseases. disease has been more widely recognised.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by the inoculation of protective sers or by vaccination. Rinderpest is by far the most important and is responsible is by far the most important and is responsible for the major portion of the mortality among bovines in India. The discovery at Mukteswar that it was possible to attenuate rinderpest virus by "passage" through goats and that the attenuated virus produces only a milk form of the discase in cattle has led to the almost universal use of the goat virus as a prophylatdic against the discase. Experiments carried out indicate that the immunity conferred by this method may last for at least flay versus. by this method may last for at least five years.

The successful manufacture of anthrax "spore" vaccine at Mukteswar is another advance of great importance in the fight against livestock disease in India.

Indian poultry are also subject to several contagious diseases. The dreaded "Rankhet" "In addition to their duties in connection with disease is fairly widespread and its ravages have seriously interfered with the poultry also conduct the treatment of animals in industry. So far no treatment, either curative or prophylactic has proved successful and the application of strict hygienic measures still Boards with financial assistance from Governments, the chief method of controlling it. Fowl pox and Fowl choicra vaccines are available

(surra) also affects camels, cattle and dogs for the protection of poultry against those

The Live stock of India are also subject to infection by a large number of parasitic disease such as parasitic gastritis, liver fluke disease Amphistomiasis, schistosomiasis, etc. Of the external parasites ticks are important and the Imperial Council of Agricultural Research have recently started a scheme in the Bombay Presidency to test the possibility of regularly dipping or spraying cattle, its effect on the growth and health of cattle and on the tick population in village areas

The castration of scrub bulls is an important feature of cattle improvement. The method most commonly used by the Departments is the Burdizzo method and it is quickly replacing the indigenous mulling operation.

The introduction of disease into India is controlled by the application of the "Live Stock Importation Act" at all ports at which the landing of animals is permitted.

AGRICULTURAL PROGRESS.

Agricultural Progress.-The historical aspect ; Agricultural Progress.—The historical aspect of agricultural development in India has been fully dealt with in the report of the Limitingow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but ittle resulted except the collection of agricul-tural statistics and other data with the object of throwing light on famine problems. The of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr. J. A. Voelker Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book "Improvement of India Agricultural Society, was invited to visit India and his still a valuable reterence book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural attainties but experiments farms were spende as fieldapet in 1871, Poons in 1880, Cawapore in 1881 and Nagpur in 1883; there were various appendic attempts at agricultural imprevenent but no real beginning was made until socialization of the serilest were Molison in Bombay (subsequently Inspector General of Agriculture). Barber and Bonson in Madras, Hayman in the United Provinces and Miligan in the Punjab.

In 1901, the first Inspector-General of Agricul-In 1801, the inst inspector-denoral of Agriculture was appointed and in the same year an imperial Mycologist was added followed by an imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the loresight and energy of Lord Ourson whose famous despatch of 1908 marked the commandament of the Carson whose ismous despacen of two marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Puss, completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. To the establishimportant agricultural recent in the imperial Agricultural Research Institute at Pusa, Lord Curson devoted the greater part of a generous donation of £30,000 greater part of a generous donation of \$50,000 given by Mr. Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1010 a networking has man preferably the present of the preferably continuous. and continuous. With the advent of the reforms of 1919, agriculture became a provincial transfer red subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and peats of plants and animals. The addition of the Imperial Institute of Animal Hubbandry and Dalrying (with a branch farm at Wellington), the Imperial Cattle-breeding Farm et Karmaland the Anand Creamery canbled livestock work to be carried out on a scale not

possible at Pusa. The Imperial Sugarcane-preeding station at Colmbatore is yet another branch of the Imperial Agricultural Research Institute. The Bihar Earthquake of 1934 caused considerable damage to the Pusa Institute and Provincial Governments have assadily developed and strengthened their agricultural departments. The Institute was moved to New Delhi and the new buildings erocted for the purpose were formally reopened there in September 1936.

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General. The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Mukteear Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress.—As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes -at the other colleges and research institutes—at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough. The latest available figure regarding the area under improved varieties of crops in British India was approximately 21 4 million acres in 1935-36, as compared with 18.6 million acres in 1934-35. In other words, the recorded area under improved crops has increased by 14 per cent, in twelve in collaboration with the special mar months. These figures by no means represent staff appointed in the various provinces.

the whole extent to which improved strains have replaced old varieties as it is almost impossible to gauge the full extent of the "natural spread" of improved varieties.

Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs. The position was authoritatively reviewed by the Royal Commission on Agriculture which reported in 1928. Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural de-partments having shown that the application of partments naving snown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his methods improved, the problem is now to develop and intensity such work so that a general advance in agricultural practice will result. The recent reports submitted by Sir John Russell and Dr. Wright, who recently renewed the progress of agricultural research work in India, carried out under the auspices of the Imperial Council of Agricultural Research, contain valuable and important recommendations for breaching the gap between the research worker and the cultivator. These recommendations are being carefully examined by a special Sub-Committee of the Imperial Council of Agricultural Research. At no time has there been a greater need for co-ordinated effort directed towards the solution of agricultural problems. Only by increased efficiency can India meet the situation caused by low prices for all agricultural commodities and the intense competition in world markets arising from production in excess of effective demand.

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial Council of Agricultural Research. It works in collaboration with the special marketing

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise. They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial elepartments but also between the provincial elepartments themselves. After describing the way in which similar difficulties

had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an Imperial Council of Agricultural Bossarch.

The primary function of the Council would be to promote, guide and co-ordinate agricultural, including veterinary, research in India and to link it with agricultural research in other parts of the British Empire and in foreign countries.

It would make arrangements for the training | India, one representative of the Indian business of research workers, would not as a clearing house of information in regard not only to mouse of information in regard not only to research but also to agricultural and veterinary masters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrasted with the administration of a non-lepsing fund of Rs. 50 lakins to which additions about the made from time to time as financial conditions exemit. The Chartman should be a conditions permit. Its Chairman should be an emperionced administrator with a knowledge, if possible, of Indian conditions and, in addition. there should be two other whole-time members of the Council for agriculture and animal husbandry respectively. The Commission suggested that the Council should consist of thirty-six members, in addition to the Chairman and the two whole-time members, Of these, eight would be mominated by the Government of India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton would represent the Indian Central Cotton Committee and the planting community respect-ively and five would be nominated by the Council for the approval of the Government of India. The Council would largely work through a Stand-ing Finance Committee and sub-committees. A provincial committee and sub-committees. A provincial committee and sub-committees, as of major province to work in close co-operation with it. The advisory duties of the Agricultural Adviser to the Government of India would be Adviser to the Government of India would be taken over by the Chairman and whole-time members of the Research Council, his administrative duties being taken over by a whole-time Director of the Pusa Institute.

Constitution of the Council. -In a Resolution issued on May 23, 1929, the Government of India stated that whilet they were of opinion that the proposals of the Royal (tummission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India. They had, therefore, decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to the control of funds which is mentioned below and an Advisory Board the functions of which and an Advisory District the Inductions on minima would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body, to report on their feasibility and to advise on any other questions referred to it by the Governing Body. The Governing Body would consist of the Member of the Governor-General's Council of the Member of the Governor-General's Council.

community elected by the Federation of Indian Chambers of Commerce and Industry, the Provincial Ministers of Agriculture, two repre-sentatives elected by the Advisory Board and such other persons as the Governor-General in Council might from time to time appoint.

The Advisory Board would consist of all these whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities, who, under the indian commercial communities, who, under the modified scheme, would be members of the floverning Body. In view of their exclusion from the Advisory Board, the university representation would be increased from three to four and the scientific representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association. A representative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be ex-officio Chairman of the Advisory Roard

The Government of India further announced that for the lump grant of Rs. 50 lakhs recommended by the Royal Commission, they had decided to substitute an initial lump grant of Rs. 25 lakhs, of which Rs. 15 lakhs would be paid in 1929-30, supplemented by a fixed minimum grant annually. The annual grant would be its. 7-25 lakhs, of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2-25 lakhs to the cost of its staff and secretariat, The Council would have an entirely free hand in regard to the expenditure of the grants made to it for scientific purposes subject to the condition that no liability in respect of such matters as leave or pension contributions after the research for which the grant had been given would be incurred.

The Government of India also stated their decision that the Council should not be constituted under an Act of the Imperial Legislature as recommended by the Royal Commission but should be registered under the Registration of Societies Act, XXI of 1860. In pursuance of this decision, a meeting of those who would constitute the Society was held at Simla in June, 1929, to consider the terms of a memorandum of association and the Rules and Regulations. At that meeting, it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs. 2 lakhs to the funds of the Council. This offer was gratefully accepted and the Revenue Member of the Nizam's Government has been added to the Governing Body, the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board. Since then donations of one lakh each, psyable in 20 equal annual instalments, of the Member of the Governor-General's council advisory nource, since the nonations of one in the charge of the portfolio of Agriculture, who would be es-affece Chairman, the Principal Administrative Officer of the Council, who would be es-affece Vior-Chairman, one representative of the Council of State, two representative of the Council of State, two representative in the Legislative Assembly, one representative to the Governing of the Legislative Assembly, one representative to the Council and two technical members of the European Business community elected by the Associated Chambers of Commerce of the Council on payment of a donation of Rs. 50,000 in 20 equal annual instalments and has been allowed the same representation on

By a Resolution of August 4, 1987, the Secre-tariat of the Imperial Council of Agricultural Research was constituted a Department of the Government of India. This arrangement was ended by a Resolution of January 15, 1939. and connection between the Government of India and the Council Secretariat is now through the Department of Education, Health and Lands. In the same Resolution it was announced that the two Expert Officers of the Council would henceforth be designated Agricultural Commissioners with the Government of India and Animal Husbandry Commissioner with the Government of India, respectively.

Personnel.—In addition to the 20 ex-officio members the Governing Body included at the commencement of 1939 the following gentlemen :-

The Hon'ble Mr. Husain Imam, elected by the Council of State; Pt. Sri Krishna Dutta Paliwal, M.L.A., and Mr. Mohamed Azhar Ali, M.L.A., elected by the Legislative Assembly; Mr. R. Scherer and Mr. D. P. Kaltan representing the business community: Messrs. B. K. Badami and D. R. Sethi elected by the Advisory Board, and Diwan Bahadur Sir T. Vijayaraghavacharys, additional member appointed by the Statistician;
Governor-General in Council. The Chairman M.A., L.T., F.S.

of the Council is the Hon'ble Member of the Council of His Excellency the Governor-General the Council as has been granted to the other for the time being in charge of the portfolio of constituent States.

Agriculture, the Hon'ble Kunwar Sir Jagdish Prasad, K.C.S.I., C.I Y., O.B.E.

> Vice-Chairman and Principal Officiating Vice-Chairman and Principal Administrative Officer:—Six Beyce Burt, 0.1.2., M.B.E., I.A.S.

Secretary '-Mr. S. Basu, 1.0.8.

Animal Husbandry Commissioner with the Government of India:—Mr. F. Ware, C.I.E., F.R.O.V.S., I.V.S. (on leave).—(Mr. P. J. Kerr, M.E.O.Y.S., I.V.S. Officiating).

Officiating Agricultural Commissioner with the Government of India :- Dr. W. Burns, D.Sc. (Edin.), C.I.E., I.A.S.

Agricultural Marketina Advisor :- Major A. M. Livingstone, M.C., M.A., B.Sc.

Assistant Agricultural Expert :-- Ral Bahadur R. L. Sethi, M.Sc., B.Sc. (Agri.), M.R.A.S., I.A.S.

Assistant Animal Husbandry Expert :- Mr. H. B. Shahi, M.Sc., M.R.C.V.S., D.T.V.M.

Director, Imperial Institute of Sugar Technology, Campore :- Mr. R. C. Brivastava, O.B.K.,

Locust Research Entomologist :- Rao Bahadur Y. Ramachandra Rao Garu, M.A., F.E.S.

Statistician :- Rao Bahadur M. Vaidyanathan,

SCHEME FOR THE IMPROVEMENT OF AGRICULTURAL MARKETING IN INDIA.

In view of the importance of agricultural marketing as an aid to the general economic recovery of the country the Government of India decided to give effect to the recommendations of the Royal Commission on Agriculture and generally endorsed by the Central Banking Enquiry Committee regarding marketing surveys. After consultation with provincial governments it was decided that the first step should be the appointment of a highly qualified and experienced marketing expert with practical knowledge of agricultural marketing in other countries.

In accordance with this decision the Office of the Agricultural Marketing Adviser to the Government of India was constituted with effect from the 1st January 1935 at Delhi and now consists of Mr. A. M. Livingstone as the Agricultural Marketing Advisor and three Senior Marketing Officers, two Marketing Officers, one Supervising Officer for Experimental Grading and Packing Stations and twelve Assistant and Facing Stations and twelve Assistant Marketing Officers. A list of the Senior Marketing Officers in the Provinces and the States is given at the end; in Provinces and States for which no Senior Marketing Officer is shown the Director of Agriculture supervises the work of the Marketing Officers. In addition to the full time Marketing staffs in the Provinces and water Walketing staffs in the Provinces and ruit une marketing stans in the Provinces and major Indian States many smaller States have nominated officers to deal with marketing questions. During the year the States of Gwaller and Bahawalpur have also appointed full time Marketing Officers.

The Central Marketing Staff are responsible for the survey work in a large number of States which do not have staffs of their own. They also have to advise and assist the local marketing staffs in carrying out their work.

During the year under review marketing surveys were in progress in all Provinces and States in regard to oranges, apples, mangoes and certain other fruits, and on barley, gram, maize, brassics oilseeds, coconuts, potatoes, wool and hair, sheep and goats, ghee and butter, markets and fairs, fish and cashewnuts. Special staff were also engaged on the survey of Jute, Coffee, Lac and Sugar, particularly with un-refined sugars.

The Report on the Marketing of Wheat in India (with its abridged editions in English, Urdu and Hindi) and the Report on the Cold Storage and Transport of Perishable Produce in Delhi Province have been followed by the All-India Reports on Linseed and Eggs. Besed on the same model as the Wheat Report, these on the same model as the Wheat Report, these reports deal exhaustively with the present system of marketing of these commodities and are priced at Rs. 1-4 per copy. The reports on tobacco and grapes are in the final stage of printing and are expected to be out shortly. The popularity of the vernacular editions of the wheat report has encouraged the Agricultural Marketing Adviser to continue the practice in the case of all reports and the Hindi, Marsthi, Urdu and Bengall editions of the Linseed report are under preparation. Apart from this survey work the Marketing During the tobacco season 1938, the Indian Staffs all over India paid increasing attention Tobacco Association, Guntur, exported to the to the problem of standardisation of the commodities under survey. As a preliminary to this, market samples of the commodities were collected from all over India and were analysed for their physical and chemical characteristics. During the year under review special attention was paid to the analysis of sugar, lac and butter.

The investigations carried out during the course of the survey and the results of the analyses referred to above revealed the necessity for immediate action in the matter of grading and standardisation. Hence, in February 1937 the Central Government passed the Agricultural Produce (Grading and Marking) Act, 1937, providing for the fixation of grade designations providing for the master of knace testimations to indicate the quality of any scheduled article of agricultural produce for defining standards of quality and specifying grade designation marks. Under the General Rules the Agricultural Marketing Advisor is empowered to issue who are prepared to grade and mark their produce in accordance with the rules made under the Act. Since the passing of the Act, rules regarding eggs, tobacco, hides, skins, ghee, grapes, oranges, apples, mangoes and plums have been published. The question of adding other commodities, s.g., rice, ata, cotton and fruit products to the Schedule annexed to the Act is under consideration.

To give a practical lead to all concerned the Central Marketing Staff initiated the grading and marking of different commodities at several important producing areas; 20 grading stations for eggs, 5 for hides, 2 for ata, 18 for fruits and 18 for ghee were established during the course of the last two years.

These grading stations have shown, partieularly in the case of fruits and eggs, that producers can, in this way, secure enhanced prices for graded produce amounting in some cases to over 25 per cent, more than for the same products ungraded, even after allowing for discarding that part of the produce which is defective and not worth sending to distant markets. So far about 20 lakhs worth of graded produce of all kinds have been put on the market. During the year special attention was given to hand-grading experiments in the case of eggs and fruits so as to reduce the incidence of grading cost as much as possible.

The scheme for the grading and marking of The someme for the grading and marking of the proved to be the most popular of all these grading experiments. Up to November 1933, 10 firms had graded about 22,000 maunds of the worth about Ra 11 lakhs. For the purpose of the control of the quality of ghes, the melt samples sent from merchants' laboratories are samples sont from merchants indostations analysed at the Central Ghee Control Laboratory established for the purpose at Cawnpore. With a view to having a further check on the quality of AGMARK gines, a system of check analysis has also been introduced,

Apart from the grading of commodities internally traded, attention was also paid to Tobacco Association, Guntur, exported to the United Kingdom 483 bales of graded tobacco valued at Rs. 81,000. Reference may also be made here to the fact that in conjunction with the Department of Agriculture, Bombay, commercial consignments of graded mangoes bearing the AGMARK amounting to about 9 tons were despatched to London during the first half of 1937 and the results were found to be moderately encouraging.

As a result of meetings between the Central Marketing Staff and the trading interests concerned, the standard contract terms for white wheat were drawn up and adopted by the principal associations of traders and millers. The contract terms for "small" and "bold".

linseed have also been prepared and adopted by the leading associations at Bombay and Calcutta. The terms of the standard contract for groundnuts are still under discussion and a decision is expected to be arrived at shortly.

Apart from the above, during the year 1938. three conferences were held in connection with ghee, hides and coffee, At the first, held in Bombay, the claims for special consideration put forward by the Kathiawar ghee interests were examined and special standards for Kathiawar were adopted. The Tanners' Conference, held in Cawnpore, discussed the methods for improving flaying and it was decided to start a hide improvement fund which would be utilised towards the payment of small premiums for well flayed hides. The Coffee Conference held in Bangalore considered the question of the adoption of uniform grade specifications for raw beans as well as ground coffee and the matter is still under correspondence with the trade.

In addition to the activities detailed above, efforts are being made to give legislative effect to many recommendations contained in the marketing survey reports, particularly to the question of regulation of markets and market charges and the enactment of necessary legislation is under consideration in several provinces and States like the Punjab, United Provinces, Sind, North West Frontier Province, Mysore, etc. The question of passing legislation similar to that of the Agricultural Produce (Grading and Marking) Act, 1937, is also under consideration in several States.

Weekly broadcasts from Delhi in English and vernacular regarding prices, stocks and movements of wheat, linseed and rice were continued during the year. The daily closing rates at Hapur market in respect of wheat, rates at mapur market in respect or wheat, barley, gram, peas and arhar are also continued to be broadcasted from Delhi. Besides this, the latest available prices of jute bags are being sent twice a week to the Delhi Broadcasting Station for broadcasting along with the Hapur rates. A scheme of market intelligence service, designed to keep the declers at exporting centres informed of the prices of cows and buffsloss at important consuming centres like Bombay and Caloutta is under consideration.

The marketing staffs continued their efforts the export of Guntur tobacco to England, to educate the cultivators in modern methods of marketing by participating in the various exhibitions and agricultural shows held in different parts of the country.

The important problem of transport facilities also engaged the attention of the scarketing particularly staff. Experiments were conducted to find out a suitable type of light container for eggs and fruits. The commercial possibilities of cold storage transport were studied in collaboration with the Imperial Council of Agricultural Research and the Army authorities in the course of a trial run on the North-Western consideration.

Bailway refrigerator van from Peshawar to Bombay with a load of peaches and grapes. The commercial branches of several railways have been very helpful in arranging for special freight rates from a large number of centres, particularly on perishable commodities such as eggs and fruits.

The working of the marketing scheme since its inception has been recently reviewed at a Conference of Ministers of Provinces and States held in Delhi in November 1988 and further lines of active development are under consideration.

List of the Central Marketing Officers and the Senior Marketing Officers in Provinces and Indian States:—

As-Central Marketing Staff.

Agricultural Marketing Adviser to the Government of India.—Major A. McD. Livingstone, M.C., M.A., B.Sc.

Senior Marketing Officers.—A. M. Thomson, H. C. Javaraya, L.Ag., F.L.S., F.R.H.S.; D. N. Khurody, I.D.D. (Hons.)

Marketing Officers.—B. P. Bhargava, B.Sc., A.M. Inst. B.E.; Dr. T. G. Shirname, B.Ag., Ph.D., F.S.S., F.R. ECON. 8.

Supervisor for Experimental Grading and Packing Stations.—P. L. Tandon, B.Sc. (Wales), F.R.Econ. S. (Lond.)

Assistant Marketing Officers.—Hukmat Khan, B.Sc. (Agrl.), A.I.B.O.; K. C. Chetty, B.Sc. (Edin.); S. C. Chakravarti, B.Ag. (Bombay); E. M. Bee; K. Gopalan, M.A., Dip. Reon. C.H.D., B.Com. (Manchr.); Shashikant, N.D.D. (Scot.); Fazal Haq, B.A., M.Sc. (Reading); Nural Islam; Y. T. Desai, B.Ag., M.Sc. (Econ.) London, F.E. Econ.s.; Dr. T. G. Menou, D.Sc. (Agri.) Munich; S. K. Bedekar, B.Ag., M.Sc. (Wales), F.S.S.; F. A. Shah, B.A.

B .- Provincial Marketing Officers.

Madras.-K. Gopalakrishan Raju, L.Ag.

Bombay.—Dr. M. B. Ghatge, B.Ag., Ph.D., F.S.S. (Lond.).

Bengal.—A. B. Malik, M.A., B.Sc. Punjeb.—Kartar Singh, L.Ag., B.Sc. (Agri.) Bilar and Orissa.—B. N. Sarkar, L.Ag. Central Provinces .- R. H. Hill, M.A. (Cantab.)

Assam.-L. K. Handique, B.Sc. (Agri.) (Edin.).

North-West Frontier Province.—Chaudhri Ghulam Qadir, G.P.V.S. (Hon.), P.V.S.

Sind.—K. H. Advani, B.Ag. (Bom.), M.8c. (Tex. U.S.A.), M. O., Cereals; Dr. L. M. Hira, G.B.v.C., A.B.San.I. (Lond.), M. O., Livestock; M. A. Memon, B.Ag. (Bom.), M. O., Special Crop.)

Burma.-F. D. Odell, M.A., I.A.S.

C.-Minor Administrations.

Baluchistan,-H. B. Kidwai, M.Sc.

D.-Indian States Marketing Officers.

Hyderabad.—Dr. Hashim Amir Ali Khan, Ph.D.

Mysore.—V. Venkatachar, M.A., B.Com., also Superintendent of Commercial Intelligence.

Patisla.-Harchand Singh, L.Ag.

Bhopal .- K. F. Haider.

Baroda.—Dr. M. D. Patel, Dip. Ag., M.Sc. (Cornell), Ph.D. Wisconrin).

Bahawalpur .- A. S. Walid, M.A., LL.B.

Gualior.—B. S. Arora, B.sc.; V. S. Apte, L.Ag.; N. D. Gupta.

Travancore.—S. Rangaswamy Alyanger, B.A., B.Ag., M. O., Livestock; G. I. Kovoor, B.sc. (Wales), M. O., Crops.

Kashmir.—President, Jammu and Kashmir Marketing Board, Srinagar,

IMPERIAL INSTITUTE OF SUGAR TECHNOLOGY.

The Indian Sugar Committee of 1920 recom- The institute is, in other words, intended mended inter alia the establishment of a Central to furnish assistance of a scientific and technical Research Institute as necessary for the proper nature to alliactories which may need it. Besides development of the sugar industry in this carrying on research on fundamental problems country. The necessity for such an institute of sugar chemistry it acts as the medium for was greatly emphasised since the date of the harmonising the latest developments in the Report by the rapid expansion of the industry sugar industry abroad with the conditions during the past few years.

The Government of India accepted the recommendation of the Sugar Committee and started with effect from 1st October 1936, for a period of vested in the Imperial Council of Agricultural with effect from 1st October 1930, for a period of Research Department, Government of India. five years the Imperial Institute of Sugar Technology at Cawnpore. It was decided to take notice with the concurrence of the Government of the United Provinces the Sugar Section of the United Provinces the Sugar Section of Research, was appointed the first Director of

It is decided that the Institute should undertake research on-

- (6) Problems of Sugar Technology in general of study : -and those of the sugar factories in
- India in particular;
 (b) The utilisation of the by-products of the industry:
- (c) Detailed testing of new varieties of cane under factory conditions; and
- General problems of sugar engineering

for the training of students in all branches of Sugar Technology and arranges for short refresher courses for men already employed in the industry. It is also responsible for the collection, tabulation and analysis of scientific control returns from factories and making the results of detailed study of these returns available to factories in the shape of technical reports.

prevailing in this country.

The administration of the Institute was over with the concurrence of the United Provinces the Sugar Section of the United Provinces the Sugar Section of the Institute. A representative body was constituted to advise from time on the develop it into the Imperial Institute of Sugar problems to be investigated at the Institute and problems to be investigated at the Institute and problems to be investigated at the Institute and problems. to undertake periodic reviews of its activities.

The Institute provides the following courses

- 1. Fellowship in Sugar Technology.
- 2, Engineering. Associateship. 3. Technology.
- Engineering. Sugar Bollers' Certificate Course.

Short courses are also provided in the following and chemistry.

and chemistry.

subjects for men employed in factories and possessing suitable technical and academic than the latest that the latest the second subjects for men employed in factories and possessing suitable technical and academic

- (a) Chemical Control.
- (b) Pan Boiling.
- (c) Fuel and Boiler Control,
- Bacteriology. (d)
- (.) Statistics. (f) Dutch language.
- (y) German language.

Irrigation.

ciency. The normal annual rainfall varies from non-storage systems are found. 460 inches at Cherrapunji in the Assam hills to less than three inches in Upper Sind. The greatest rainfall actually measured at says greatest rainfall actually measured at says station in any one year was 905 inches, recorded has been practised in India from time immersal. at Cherrapunji in 1861, while at stations in Upper Sind it has been nil. There are thus portions of the country which suffer as much from excessive rainfall as others do from

south-west monsoon, between June and October. wise be dry and useless. During the winter months the rainfall is comparatively small the normal amount varying from half an inch to two inches, while the hot weather, from March to May or June, is practically rainless. Consequently it happens failure or serious deficiency. The average annual rainfail over the whole country is about 45 inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But tailure or serious deficiency. The average tailure or serious deficiency. The average tailure or serious deficiency. The average tailure of construction, produce sufficient to the some tailure of construction, produce sufficient tailure and the tailure of construction, produce sufficient tailure and the tailure of construction, produce sufficient tailure and the tailure of cover its working expenses and the tailure traces are considered, extraordinary to the productive class. The total capital variations are found. At many stations annual outlay direct and indirect on irrigation and rainfalls of less than half the average are not inavigation works, including works under uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought. of extreme drought.

Scarcity.-Classing a year in which the deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought, the examination of past statistics

two main clauses, those provided with artificial in order to tide over a period of severe drought) storage, and those dependent throughout the with the cost of such protection. year on the natural supplies of the rivers from which they have their origin. In actual fact, Practically one-eighth of the whole area irrigated practically every irrigation work depends upon in India from Government works is effected storage of one kind or another but, in many by minor works for which no capital account cases, this is provided by nature without man's is kept.

The chief characteristics of the Indian rainfall assistance. In Northern India, upon the are its unequal distribution over the country, Himalayan rivers, and in Madras, where the its irregular distribution throughout the sea-cold weather rains are even heavier than sons and its liability to failure or serious defi-those of the south-west monsoon, the principal

morial. In their simplest form, such storage works consist of an earthen embankment constructed across a valley or depression, behind constructed across a valley or depression, behind from excessive rainfall as others do from which the water collects, and those under Government control range from small tanks. The second important characteristic of the reservoirs recently completed in the Decean rainfall is its unequal distribution throughout which are capable of storing over 20,000 the seasons. Except in the south-east of the peninsula, where the heaviest precipitation is received from Cotober to December, by far is supply can be maintained long after the rivet the greater portion of the rainfalls during the convenience of the

The Three Classes.—Previously all irriga-tion works were divided into three classes Productive, Protective and Minor, but during the triennium 1921-24 the method of deteror India is deluged with rain and is the scene construction of Government works was proof the most wonderful and rapid growth of vided was changed, and now all works, whevegetation; in another period the same tract ther major or minor, for which capital accounts
becomes a dreary, sun-burnt waste. The lare kept, have been re-classified under two
transition from the latter to the former stage heads, Productive and Unproductive, with a
often occurs in a few days. From the agricultural point of view the most unsatisfactory capital works. The main criterion to be satisfeature of the India raunfall is it liability to
failure or serious deficiency. The average is that it and the source from which the funds for the
onstruction of Government works was proconstruction of Govern

Unproductive works are constructed primarily on productive worse are consistenced praises with a view to the protection of precarious tracts and to guard against the necessity for periodical expenditure on the relief of the population in times of famine. They are financed from the current revenues of India, generally the examination of past statistics ton in three war revenues of India, generally shows that, over the precarious area, one year from the current revenues of India, generally shows that your content or remove the menace of these years that the great irrigation systems of India have been constructed.

Government Works.—The Government irrigation works of India may be divided into another than the great irrigation works of India may be divided into another than the great irrigation works of India may be divided into another than the great irrigation works of India may be divided into another than the great irrigation works of India may be divided into another than the great irrigation works of India may be divided into

annually irrigated rose to 19½ million acres at the beginning of the century and to 31.85 million acres in 1935-36.

The main increase has been in the class of productive works, which irrigated 41 million acres in 1878-79 and rose to 20,756,209 acres in 1926-27. During the year 1936-36 the areas system, is in force in parts of Bengal and the irrigated by productive and unproductive central Provinces, under which the cultivators works amounted to 24.95 acres and 8.88 acres, respectively.

The area irrigated in 1985-36 was largest in the Punjab, in which province 11.19 million acres were irrigated during the year. In addition about 661,347 acres were irrigated from chanels which although drawing their supplies from British canals, lie wholly in the Indian States, The Madras Presidency came next with an area of 7.55 million acres, followed by Sind with an area of 4.81 million acres.

Capital and Revenue.—The total capital invested in the works has risen from Rs. 42,36 lakhs in 1900-01 to Rs. 153,18 crores in 1935-36 The gross revenue for the year was Rs. 1.378 lakbs and the working expenses Rs. 502 lakbs, the net return on capital being, therefore, 5.7 per cent.

Charges for Water.—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different as in parts of Madras and Bombay, durerent rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may however be regarded as exceptional. Over the greeter part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by "lift", that is to saw where the land is too high for the water to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have verticus constructions of assessment have been tried, such as by renting outlets for an assaul sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully under-stands the principle of "No creps, po charge" seamed the principle of "No creps, no consign which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his erop.

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single and often upon the several canals in a single province. Thus in the Funjab, they very from irrigated in British ladis by Government works Bs. 7-8-0 to Bs. 12 per acre for sugarcane, from 30-97 million acres.

Growth of Irrigation.—There has, during Rs. 3-4-0 to Rs. 5-4-0 per acre for wheat, from the last fifty years, been a steady growth in the Rs. 3 to Rs. 4-4-0 per acre for cotton and from area irrigated by Government Irrigation works. Rs. 2 to Rs. 3-4-0 per acre for milities and pulses. From 104 million acres in 1678-79 the srea annually irrigated rose to 194 million acres at Practically speaking, Government guarantees the beginning of the century and to 31.85 sufficient water for the crop and gives it as available. If the crop fails to mature, or if its vield is much below normal, either the whole or part of the irrigation assessment is remitted.

> A somewhat different system, the long lease pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply. paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season.

> Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

> Central Bureau of Irrigation.—An important event of the triennium 1930-33 was the establishment of a Central Bureau of Irrigation as an essential adjunct of the Central Board of Irrigation. This organization satisfles a want long felt by irrigation officers and has great potentialities in connection with the development of Indian irrigation. The Bureau came into being in May 1931. Its main objects are to ensure the free exchange of information and experience on irrigation and allie i subjects between the engineer officers of the various provinces; to co-ordinate research in irrigation matters throughout India and to disseminate the results achieved; to convene at intervals general congresses at which selected irrigation matters will be discussed by officers from various provinose; and to establish contact with similar bureaux in other countries with a view to the exchange of publications and information. These objects necessitate among other things the maintenance of a comprehensive library of irriga-tion publications both Indian and foreign, and the expenditure on the establishment and on the library is considerable. The bureau was financed during the year 1931-32 by the Government of India, but local Governments have since consented to contribute towards its support, and it has thus achieved an independent existence under the Central Board of Irrigation, the Government of India contributing in the same manner as provincial Governments.

The results obtained in each province are given in the table below :--

		Provi	nces.				Average area irrigated in triennium 1930-33.	d Average area irrigated in triennium 1933–36.

In addition 661,347 acres were irrigated on the Indian State channels of the Western Jumna canal, the Sirhind and the Ghaggar canals.

tional importance are the Lloyd Barrage and Canals in Sind, the Cauvery (Mettur) project in Madras, and the Sutlej Valley Canals in the Punjab. The Lloyd Barrage, which was opened by His Excellency the Vicercy early in 1932, is the greatest work of its kind in the world, measuring 4,725 feet between the faces of the regulators on The canals construction scheme has been completed, and the revenue account of the scheme was opened with effect from the financial year 1932-33.

Providing for the frigation of a total anticlipated area of approximately 51 million acres on attainment of full development the main leatures of the scheme are a Barrage approxi-mately a mile long across the river indus near Sukkur, three large canals taking off from above the Barrage on the right bank of the River and four canals on the left bank of the River with a separate head-regulator for each canal. The total expenditure (excluding interest charges) incurred on the project to the end of March 1985 amounted to Rs. 20.08 crores. The construction estimate of the project was closed on the 80th September 1933. The year under review was the fourth year of operation of the Barrage canals and their general working was satisfactory. The important construction work carried out during the year under review consisted of the excavation of main and branch watercourses and the construction of modules and hume pipe culverts.

The Satlej Valley Works which reached completion by the end of 1932-33 received the sanction of the Secretary of State for India

New Works.—The major works of exceptional importance are the Lloyd Barrage and spanis in Sind, the Cauvery (Mettur) project in addrag, and the Sutlej Valley Canals in the Punding 1932-83 all the State Canals taking ending 1932-83 all the State Canals taking off from the first three headworks, namely the Bikaner, Fordwah, Eastern Sadiqia, Bahawalpur and Qaimpur Canals were handed over to the States. The remaining two Canals, namely the Abbasia and Panjnad Canals taking off from the Paninad Headworks, were also handed over to the Bahawalpur State during the year. The total expenditure on the Project to the end of 1932-83 amounted to Re. 33.31 crores. The total area to be irrigated is 5,108,000 acres, or nearly 8,000 square miles. Of this, 2,075,000 acres are personial and 3.033,000 acres nonperennial irrigation. 1,942,000 acres are in British territory, 2,825,000 scree in Bahawaipur and 841,009 acres in Bikaner.

The Cauvery Mettur Project is the most important project completed during the triennium, under review and its inauguration ceremony was performed on the 21st August 1934. The project was sanctioned in 1925 and its sanctioned eatimate amounts to Rs. 787 lakhs. It has been framed with two main objects in view, first, to improve the existing fluctuating water supplies for the Cauvery delta irrigation of over a million acres and, secondly, to extend irrigation to a new area of 301,000 acres. The project involved:-

(i) the construction of a large dam on the Cauvery at Mettur, the object of the dam being to store the flood waters of the river and to pass them down to the delta as and when required

[†] Includes Rs. 219 lakhs on Hydro-Electric works and 46 lakhs on State tube wells.

- (ii) the construction of an irrigation canal irrigation to new areas (271,000 acres on t (the Grand Aniout canal) taking off on the Grand Aniout canal and 30,000 acres on t right bank of the Cauvery; and Vadavar canal) second crop cultivation is expe

WELLS AND TANKS.

So far we have dealt only with the great irrigation schemes. They are essentially exotic, the products of British rule; the real eastern instrument is the well. The most recent figures give thirty per cent, of the irrigated area in India as being under wells. Moreover the well is an extremely efficient instrument of irrigation. When the cultivator has to raise every drop of water which he uses from a varying depth, he is more careful in the use of it; well water exerts at least three times as much duty as canal water. Again, owing to the cost of lifting. it is generally used for high grade crops. It is estimated that well-irrigated lands produce at least one-third more than canal-watered lands. Although the huge areas brought under cultivation by a single canal scheme tend to reduce the disproportion between the two systems, it must be remembered that the spread of canals in-creases the possibilities of well irrigation by adding, through seepage, to the store of subsoli water and raising the level.

Varieties of Wells .- Wells in India are of every description. They may be just holes in the ground, sunk to subsoil level, used for a year or two and then allowed to fall into decay. These are temporary or kacha wells. Or they may be lined with timber, or with brick or stone. They vary from the kacha well coating a few grounds as the manner well, while will rule. few rupees so the masonry well, which will run into thousands, or in the sandy wastes of Bikaner, where the water level is three hundred feet below the surface, to still more. The means below the surrace, to still more. The means of raising the water vary in equal degree. There is the pécottal, or weighted lever, raising a bucket at the end of a pivoted pole, just as is done on the banks of the Nile. This is rarely used for litts beyond fitteen feet. For greater lifts bullock power is invariably used. This is generally harnessed to the mot, or leather bag, which is passed over a pulley overhanging the well, then raised by bullocks who walk down a samp of a length approximating to the depth of the well. Sometimes the mot is just a leather bag, more often it is a self-acting arrangement, which discharges the water into a sump automatically on reaching the surface. By this means from thirty to forty gallons of water are raised at a time, and in its simplicity, and the raised at a time, and in its simplicity, and the extremely precarious. So far from tanks being ease with which the apparatus can be construct- a refuge in famine they are often quits uscless ad and repaired by village labour, the mot is insamuch as the rainful does not suffice to all unsurpassed in efficiency. There is also the them and they remain dry throughout the Persian wheel, an endless chain of earthen ware 'season.

pots running round a wheel. Recently attemp have been made, particularly in Madras, substitute mechanical power, furnished by c engines, for the bullock. This has been four economical where the water supply is sufficient large, especially where two or three wells ca be linked. Government have systematical encouraged well irrigation by advancing funds for the purpose and exempting well watered lan from extra assessment due to improvemen These advances, termed takavi, are freely mad to approved applicants, the general rate of interest theing 6t per cent. In Madras an Bombay ryots who construct wells, or othe works of agricultural improvement, are exemp from enhanced assessment on that account. other provinces the exemption lasts for specifi periods, the term generally being long enoug to recoup the owner the capital sunk.

Tanks.—Next to the well, the indigenou instrument of irrigation is the tank. The villagor the roadside tank is one of the most conspicu ous features in the Indian scene. The India: ous features in the Indian scene. The Indian tank may be any site, It may vary from a grea work like Lakes Fife and Whiting in the Bombay Presidency or the Perlyar Lake it Travancore, holding up from four to sever billion cubic feet of water, and spreading their waters through great chains of canal, to the little village tank irrigating ten agree. They date back to a very early stage in Indian civiliation. Some of these works in Medica read. sation. Some of these works in Madras are of great size, holding from three to four billion cubic feet, with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still irrigate from two to four thousand acres are said to be over 1,100 years old. Tank irrigation is practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces, including Burms, and finds its highest development in Madras. In the ryotwari tracts of Bombay and Madras all but the smallest tanks are controlled by Government. In the semindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is

Meteorology.

The meteorology of India like that of other this period of generally settled conditions, is countries is largely a result of its geographical North-west India. This region during January, position. The great land area of Asia to the Rebrunyr and part of March is traversed by northward and the enormous sea expanse of a succession of shallow storms from the westthe Indian Ocean to the southward are ward. The number and character of these determining factors in settling its principal storms vary very largely from year to year meteorological features. When the Northern Hemisphere is turned away from the sun, in normal years, however, in Northern India to the northern states of the sun, in normal years, however, in Northern India in the northern winter, Central Asia becomes an area of intense cold. The meteorological conditions of the temperate zone are pushed southward and we have over the northern proward moving cyclonic storms of temperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia becomes a super-heated region drawing towards comes a super-nested region drawing towards it an immense current of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean, so that at one season of the year parts of India are deluged with rain and at another persistent dry weather prevails.

Monageme. - The all-important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, dry, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in the pro-vinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather con-ditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian and and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are :- Westerly winds of the temperate zone over the extreme north of India: to the south of these the north-east winds of iand and sea area. Two exceptions to these fine weather conditions exist during this period, viz.; the Madras coast and the north-west of India. In the former region the north-east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon, which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year, for while the total rainfall for the four months June to September, i.e., the summer monson, at the Madras Ob-servatory amounts to 15.46 inches the total rainfall for the three months October to De-cember amounts to 31.78 inches. The other

In normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months, December to March, amounts to 5.75 inches while the total fall for the four months, June to September, is 4.65 inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer monsoon. These two periods of subsidiary "rains" are of the greatest economic importance. The fall in Madras is, as shown above, of considerable actual amount, while that of North-west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months.—March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period there occurs a steady transference northward of the area of greatest heat. In March the maximum temperatures, slightly exceeding 100° occur in the Deccan; in April the area of maximum temperature, between 100° and 105° literans the court of the or maximum temperature, between 100° and 105°, lies over the south of the Central Provinces and Gujarat; in May maximum temperatures, varying between 105° and 110°, prevail over the greater part of the interior of the country while in June the highest mean of the country while in June the highest mean maximum temperatures, exceeding, 110°, occur in the Indus Valley near Jacobabad. Temperatures exceeding 120° have been recorded over a wide area including Sind, Rajputana, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 127° registered at Jacobabad on June 12th, 1919. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India, including the disappearance of the north-past winds the winter moneous or perhaps more properly barometric pressure, great alterations take the north-east Trades and a gradually extending area of fine weather which, as the season ing the disappearance of the morth-east winds progresses, finally embraces the whole Indian of the winter meason, and the air circulation of the winter mensoon, and the air circulation over India and its adjacent seas, becomes a local circulation; characterised by strong bot winds down the river valleys of Northern India and increasing land and sea winds in the coast regions. These land and sea winds, as they become stronger and more extensive, inkinte large contrasts of temperature and humidity which result in the production of violent local storms. These take the forms of dust storms in the dry plains of Morthern India and of thunder and hallstorms in regions where there is inter-action between damp sea winds and dry winds from the interior. These storms are frequently accompanied with winds of excesrainfall for the three months October to De-swaber amounts to 31.78 inches. The other are no that account very destructive being region is which the weather is questiled, during income as "Forwesters" in Bengal.

been established over North-west India, in the last week of May or first of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole of the succeeding two weeks spreads over the remervery to the adjacent sees and the whole character of the weather changes. During the hot weather period, discussed above, the winds and weather are mainly determined by local conditions. Between the Equator and Lat. 30° or 35° south the wind circulation is that of the south-east trades, that is to say from about Lat, 800-850 south a wind from south-east blows over the surface of the sea up to about the equator. Here the air rises up to about the equator. Here the air rise into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, i.e., between the Equator and Lat. 20° to 25° North, there exists a light unsteady circula-North, there exists a light tion the remains of the north-east trades, that is to say about Lat. 20° North there is a north-east wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere. Still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment of the south-west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic. Hence the thermal equator is also progressing northward and with it the area of ascent of the south-east trades circulation. Thus the south-east trade winds cross the equator and advance further and further northward, as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air metric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trades circulation extending northward and the local land and sea diroulation extending southward until about the beginning of fune the light unsteady interfering circulation over the Arabian See finally breaks up, the immease chreniation of the South-east Trades, with its cool, moisture lades winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions— the south-west memsoon proper. This is the most important season of the year as upon it depends the prosperity of at least five-sixths of the people of India.

When this current is fully established a conwhen was current is raily established a coc-tinuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat. 30° N. the southern half being the south-east trades and the north-ern half the south-west monacon. The most orn han the south-west monsoon. The most important fact about it is that it is a continuous borizontal air movement passing over an excessive occamb area where steady evaporations is constantly in progress so that where these is constantly in progress so that where the current enters the Indian seas and flows. Bay current and to the north of the westerly

By the time the area of greatest heat has lover the Indian land it is highly charged with

of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea surrent blows on to the west coast and sweep-ing over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion curves to south at the head of the Bay and over Bengal, and then meeting with the barrier of the Himalayas curves still further and blows as a south-easterly and easterly wind right up the Gangetic plain. The south-west monsoon continues for three and a half to four soon commues for three and a hair to four months, vir., from the beginning of Fune to the middle or end of September. During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall india, the principal reactives of the rainfail distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current. blows directly on to the west coast districts. Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coast districts and to the billy range, the total averaging about 100 inches most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab, Eastern Rajputans and the North-west Himalayas. In this region the current meets and mixes with the monsoon current from the Bay.

The monacon current over the southern half of the Bay of Bengal blows from southern west and is thus directed towards the Tenasserim hills and up the valley of the Tenseerim bills and up the valley of the trawady to which it gives very heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advance to the southern race or three name. The re-maining portion of the Bay current advance from the southward over Bengal, is then directed westward by the barrier of the Himalays and gives general rain over the Gangetic plain and fairly frequent rain over the

wind of the Arabian Sea current there exists a debatable area running roughly from Hussar in the Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where neither current of the moneous prevails. In this area the rainfall is uncertain and would probably be light, but that the storms from the Bay of Bengal exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain.

The total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes eastward, is below 20 inches over a large part of ward, is below 20 inones over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma; it is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of India is:-

May		8.1	inches.
June	••	7.9	,,
July	••	11.2	,,
August	••	10.8	,.
Septemb		7.0	,,
October		3.3	

Cyclonic storms and cyclones are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, viz., May and November, but in the Bay they form a constantly recurring feature of the monsoon season. The following gives the total number of storms recorded during the period 1877 to 1901 and shows the monthly distribution:—

Jan. Feb. Mar. Api. May June Bay of Benga! ... 18 28 July Aug. Sep. Oct. Nov. Dec. Bay of Bengal 41 36 45 84 22

(For monsoon of 1938, see page 871).

after year.

INDIA METEOROLOGICAL DEPARTMENT.

provincial meteorological services which had mittee of Enquiry into the causes of famine sprung up before that date. The various duties in India. which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed, may be briefly summarised as follows:—

- (a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms.
- meteorological data from ships. International recommendations on these subjects are contained in Appendix IV.
- (c) The maintenance of systematic records of meteorological data and the publication of cilmatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease. Government authorities.

Jan. Feb. Mar. Apl. May June Arabian Sea • 15 ٠. July Aug. Sep. Oct. Nov. Dec. Arabian Sea

The preceding paragraphs give an account of the normal procession of the seasons through-out India during the year, but it must be re-membered, that every year produces varia-tions from the mermal and that in some years these variations are very large. This is more particularly the case with the discontinuous element rainfall. The most important varistions in this element which may occur are :-

- (1) Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North-west India.
- (2) A prolonged break in July or August or botb.
- (3) Early termination of the rains, which may occur in any part of the country.
- (4) The determination throughout the monsoon period of more rain than usual to one part and less than usual to another part of the country. Examples of this occur every year.

About the middle of September fine and fresh weather begins to appear in the extreme north-west of India. This area of fine weather and dry winds extends eastward and southward

the area of rainy weather at the same time contracting till by the end of October the rainy area has retreated to Madras and the south of the Peninula and by the end of Docember has disappeared from the Indian region; fine

clear weather prevailing throughout. This procession with the numerous variations and modifications which are inseparable from

meteorological conditions repeats itself year

Functions of the Department.—The India (d) The issue to the public of up-to-date Meteorological Department was instituted in weather reports and of rainfall forecasts. These 1875, to combine and extend the work of various duties were originally recommended by a Com-

- (e) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall.
 - (f) The issue of seasonal rainfall forecasts.
- (g) The issue of telegraphic warnings of heavy rainfall and frost (cold wave) mainly to (b) The issue of storm warnings by wireless engineers, Collectors, Directors of Agriculture, to ships in the India seas, and the collection of etc.) and through the newspapers to the public in general.
 - (h) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals.
 - (i) Technical supervision of rainfall registration carried out under the control of provincial

- conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons, and regular compilation of statistics of upper air data.
- (k) The issue of weather reports and warnings to aircraft, civil and military, the latter being in collaboration with the Boyal Air Force. International recommendations on this subject are contained in Appendix III.
- (1) The training and examination in meteorology of candidates for air pilot's licences.
- (m) Study of meteorology in relation to Agriculture, on which the Royal Commission on Agriculture in India made the recommendations contained in Appendix V.
- Broadcast of weather data for the benefit of ships at sea, both naval and mercantile and of other meteorological offices in neighbouring countries as well as in India. In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as-
- Determination of time in India and the issue of time-signals, also the determination of errors of chronometers for the Royal Indian Navy.
- (p) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poons.
- (q) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal.
- (r) Maintenance of seismological instruments at various centres.

ORGANISATION.

Requirements for weather forecasts.—It is necessary to note that practical meteorology implies a meteorological organisation, not merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the co-operation of some hundreds of persons. First of all, it presumes that instruments have been indented according to special specifications, tested thoroughly on receipt from the makers and distributed to observers all over the country. The mere distribution of the instruments does not see the end of the preliminary work. Sites for instruments have to be selected with care and observers everywhere have to be instructed how to read the instruments, record the observa-tions, and prepare weather telegrams in code. In India some 400 observers co-operate daily take simultaneous observations at about 300 separate places, and hand in their reports late to serve as the "public memory" of the to telegraphists, who transmit them to forecast centres, where, for rapid assimilation, clerks involve the proper statistical arrangement of descode them and chart them on maps: meteorolic descode them and chart them on the conclusion logical experts then drew therefrom the conclusions on which their forecasts are based. There and yearly reports as well as occasional papers

The study of temperature and moisture are other observatories which take observations for climatological purposes but do not telegraph them.

> An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Tele-Communication Convention, from which extracts of the most recent regulations relating to meteorological messages are given in Appendix VI.

> Service to public-to ports and shipping. Whereas the public, in general, are served mostly through the newspapers which daily publish extracts from the latest official weather reports and also print the heavy rainfall warnings and storm warnings, special arrangements are necessary to meet the needs of most of the individual interests concerned. Reports for shipping and to ports are issued from the meteorological offices at Poona and Calcutta. The messages to ports include advice or instructions for the hoisting of signals of varying degrees of danger. these signals being understood by men in charge of local craft as well as of the larger shins. Bengal heavy damage is frequently caused by storms and nor'westers, particularly to small river craft and there is a special arrangement for warning river ports, river stations and police stations. When storms threaten, ships at sea can receive bulletins in clear language at least twice a day and also messages containing synoptic data which are issued as regional messages from Karachi and Calcutta, and as an all-India rocesage from Bombay. For the prompt issue of all these reports to ships at sea, the department is dependent upon the wireless services of the Indian Navy and the Government Telegraph Department. It is hoped soon to be able to arrange additional synoptic messages from Poona and later on a regional message from Delhi. These synoptic reports are also welcomed by meteorological offices in neighbouring countries which use the data to extend their own daily weather charts.

Service to agriculturists and engineers.— Those engineers in charge of railroads, telegraph lines, and irrigation works who are on the warning lists receive their warnings of heavy rainfall or high winds by special telegrams. To agriculturists in general no weather service of any real adequacy can be provided until there are wireless receiving sets in all the villages. Meanwhile frost warnings and heavy rainfall warnings are sent by telegram to collectors or chief agricultural officers at the headquarters of many districts. The difficulty then is to get that information disseminated rapidly through a large district. In areas where certain interests are localised, as in the grape-growing district at Nasik, these telegrams are of the sceatest value.

Meteorological statistics.—The department has to organise itself not only for forecasting but also to serve as the "public memory" of the weather and climate of India. These duties

dealing with long-term averages. These reports are used by, or in reply to enquiries from, industrialists, engineers, medical men and others.

investigations and development.—Investigations on instruments, on geophysics, on the physics of the weather from day to day and month to month have to be undertaken, partly in response to the ever increasing demands on the service and partly in response to enquiries from outside as well as inside the department. It is to be noted that outside the government agencies dealing with meteorology there are few in the world and none in India working on research problems in meteorology. The result is that practically all development and new lines of work must be evolved from within the official departments.

Requirements of airmen.—Of all the major practical applications of meteorology, its service to aviation is the most recent, and has developed into a specialised and particularly designed organisation. For these reasons the service to aviators is described here in somewhat greater detail than the service to others. Aviators require detailed information about the weather; they wish to know winds at different levels aloft, have information about visibility, fogs, dust-storms, thunderstorms, height of low clouds, etc. along with forecasts of changes in these elements. Many of these are local, short-lived and rapidly changing phenomena.

Recommendations regarding the nature of information to be supplied to alreraft, the exhibition of current information at aerodromes and the meteorological organisation of international airways have been embodied in Annexe. G of the International Convention of Air Navigation (see Appendix III). In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and dorecasts of weather conditions along the routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main aerodrome along aerial routes and forecasts prepared at such centres should be transmitted to the other aerodromes for the information of pilots. Other recommendations refer to hours and kind of observations and manner of codifying them.

Service for avistica.—In India, the meteorological service for avisation is, for financial reasons, not able to attain the standard recommended in Annexe. G of the International Convention. The net-work of observatories in India is much sparser than that in Europe and America and the frequency of observations taken at each of them much smaller. The 3000-mile air route between Sharjah and Akyab is served by two forecasting centres at Karachi and Calcutta, which prepare two synoptic charts at observatories reporting to them. The sole forecasting centre in southern India is at Poona, which also prepares two synoptic charts dispensed in the content of the conten

The opening of a chain of wireless stations and fuller development of ground organisation along the main trans-India route has enabled the Meteorological Department to place the meteorological arrangements on a 'routine' basis. Under the routine system, the trans-India Air Route is divided into four sections with terminal points at Karachi, Jodhpur, Allahabad, Calcutta and Akyab. Forecasts for each section of the route are issued twice daily, at 13-00 and 21-00 hrs., I. S. T., and are distributed by wireless to aircraft in flight and to the aerodromes principally concerned. The dissemination of the latest news about winds aloft and the latest "current weather" reports atolt and the latest "current weather" reports relating to cloud, visibility, rain, ground wind, etc., has been similarly placed on a routine basis. There are also arrangements for the supply of special reports of current weather at any time to aircraft in flight on request, as well as for voluntary reports regarding dangerous weather phenomena and their improvement, The work starts each day some hours before dawn, when pilot balloons with lanterns attached are released and observed through theodolites for the computation of the upper winds. The watch on the weather continues all through the water on the weather continues at through the day, Saturdays and holidays included well on to midnight. The stations taking part in the scheme are Karachi, Barmer (through Karachi Radlo), Jodhpur, Delhi, Cawnpore (through Delhi Radlo), Allahabad, daya, Asansol (through Calcutta Radlo), Calcutta and Chittagong. On the Bahrein-Karachi route, the distribution of upper wind and current weather reports by W/T takes place on days of flight of the Imperial Airway's planes.

On other routes, the method of supplying weather reports either in person or by landline or W/T, telegram to each individual aircraft separately is still in vogue, as wireless traffic with aeropianes in flight is not yet fully organised on these routes. On the establishment of seronautical wireless stations on the Karachi-Madras route, the routine system has, however, been partially introduced there, upper wind reports as well as current weather observations taken at fixed hours being exchanged by W/T daily as a routine measure between aerodromes. The routine system has been extended, though in a very limited form, on the Madras-Colombo route. On the Karachi-Colombo, Karachiand Trivandrum. Lahore, Bombay-Delhi Trichinopoly routes, landline, telegrams, containing news of current weather are exchanged between aerodromes and so to supplement the reports supplied by the forecasting centres and pilot balloon stations.

The abovementioned arrangements for issue of current weather and pilot reports make it possible for aircraft to have the latest weather news from important points on the air route. The principal aerodromes on the route get copies of these messages and display them on weather notice boards.

General erganisation of the department.— In order to fulfil the various duties described in the preceding paragraphs the department is organised into a central office, 7 sub-offices, warnings for practically the whole country, 34 pilot balloon observatories and 306 weather and the issue of warnings for storms in the observatories of various classes* distributed Arabian Sea. It issues through the Navy W/T observatories including the responsibility for scruting of records and for checking and computation of data received from them is divided between the offices at Poona, Calcutta and Karachi, Forecasting for aviation is divided between these three offices and the offices at Penawar and Quetta; the last two forecast for military flying and do not serve civil aviation. The Upper Air Office at Agra is in charge of all pilot balloon observatories in India and the Persian Gulf and therefore in immediate executive charge of much of the meteorological service for aviation. It will also be responsible for adequate liaison with other departments conoerned, when the location of the office is moved from Agra to Delhi. The Bombay and Alibag observatories specialise in the study of Geophysics, particularly terrestrial magnetism and seismology, while the observatory at Kodaikanal logy, while the observatory at Roussian specialises in the study of solar physics. Section are somewhat greater detail the general duties of these different offices and Appendix II shows the number of posts as on

On the separation of Burma from India on On the separation of Burma from mans on and computes for the International Aerotogical 1st April. 1937, the Government of Burma (Commission the upper air data in respect of started an independent meteorological service in fluids. Burma, Ceylon, Siam, Indo-China, Malaya for that country, with its headquarters at an open the Burma Meteorological Department of the Burma Meteorological Department has assumed control over all the surface international commissions on technical questions and control over the surface in Burma and control over the surface international commissions on technical questions. and pilot balloon observatories in Burma and and supplies meteorological data and certain has taken over with effect from 1st July, 1937, periodical returns to the international bodies, the responsibility of issuing weather reports. The programme of work of the Agricultural has taken over with effect from 1st July, 1937, the responsibility of issuing weather reports and forecasts relating to the Burma area to the

GENERAL DUTIES OF THE MAIN OBSERVATORIES AND OFFICES.

Headquarters Office, Peens (F. U. W.1)— The general administration of the department, including co-ordination of technical work and administrative and financial questions relating to aviation, is carried on by the headquarters office at Poons. In addition it is in immediate omce at room. In addition it is in immediate and complete charge of second, third, fourth and fifth class observatories in central and southern India. It publishes the Indian Dally Weather Report, Weekly and Monthly Weather Beports and the annual volumes entitled the India Weather Review and also issues two annual

over a region stretching from the Persian Gulf Station, Bombay, twice daily synoptic data of on the west to Burma on the east. The central selected land stations and ships for the benefit of the department. The control over weather in respect of aerial flights, either routine or occasional, over the Peninsula and the central parts of the country are issued from this office. Weather Charts are prepared twice daily and a telegraphic weather summary covering the whole of India is issued daily to the press, and two regional telegraphic weather summaries covering the Peninsula and the central parts of the country respectively to other subscribers. The headquarters office is responsible for practically all climatological work in India, including the preparation of normals of rainfall, temperature, humidity, etc. for all observatories. It issues a limited number of long-range seasonal forecasts for the country. It collects and analyses weather logs from ships in the Arabian Sea. It is responsible for the design, specification, test and repairs of all meteorological instruments used in the department, for supply of instruments and stores to the different observatories and for maintaining stocks of instruments.

It maintains an upper air observatory and a first class weather observatory. It has facilities 1st December 1938, under each category in the for research in theoretical and practical main offices and observatories of the department. meteorology. Sounding balloon work in the Peninsula is directed from this office. It collects and compiles for the International Aerological and forecasts relating to the Burma area to the general public and also to aviators flying over mental work on microelimatology, standardi-Burma. It has also taken over with effect from aution of methods of observations under field lat April, 1939, the duties of issuing storm warnings to the ports in Burma and to shipping in ments for the purpose as well as statistical Burman waters, which hitherto was done by the Calcutta Meteorological Office. Meteorology Section of the office includes experi-

> The Headquarters Office is divided into eight sections, namely, General (including Aviation sub-section), Weather, Observatories, Upper Air Instruments, Marine, Agricultural Meteorology, Statistics and Library, for the execution of the above-mentioned work.

Upper Air Office, Agra (U. W. 1 S.).—This office is the headquarters of upper air work in India and maintains more than 30 pilot balloon stations scattered over India and up the Persian Gulf. Many of these stations are on aerodromes and the Agra Office is therefore in direct administrative charge of much of the weather service for aviation and for the efficient working of a large volumes containing rainfall data of about 3,000 part of that organisation. It manufactures and stations in India. It undertakes the issue of supplies hydrogen to all departmental pilot heavy rain warnings, frost and untimely rain balloon stations and to those in Burma as well.

Classified into various classes, the number as it stood on 31st March 1939 was distributed as follows :--

Class	 1	n	m	IV	v	VI	Total.
Number	 14	196	30	18	23	16	306

It is responsible for the design, specification, It issues twice daily through the short-wave test, repairs, storage and supply of all instru-aeronautical W/T stations at Karachi synoptic ments and stores required for the observation data of salected stations in its area of of winds aloft. Its workshop makes the meteo-rographs used in determining the temperature, pressure and humidity of the upper air. It is a principal centre of aerological research work and collects and scrutinises the data of all pilot balloon observatories and also the sounding balloon data of northern and central India. There is a seismological observatory attached to the office.

Msteorelogical Office, Calcutta (F. P. W. 15. T.).—The Alipore Office is responsible for the publication of a Daily Weather Report for north-east India, for storm warning in the Bay of Bengal, heavy rainfall warning in north-east India and for squall warnings in Bengal. It gives time signals by time-ball to the Port of Calcutta, by wireless to shipping at sea and by telegraphic signals through the Indian telegraphic warther a regional elegraphic weather. graph system. A regional telegraphic weather summary for north-east India is issued daily from this office. It prepares two weather charts daily and issues forecasts to airmen flying in north-east India east of Allahabad. It is in charge of the auxiliary centre at Dum Dum and second, third, fourth and fifth class observatories in north-east India, and checks, and computes observations and data for stations in this area. It issues twice daily through the short-wave aeronautical W/T station at Calcutta synoptic data of selected stations in its area. It maintains a first class observatory and also a seismological observatory.

Karachi (F. W.1 Meteorological Office, Karachi (F. W.¹ P.A.)—This office was established primarily as a property of the vest of the section the east, and also all feeder routes in north-west Juhu (Bombay). The Professional or Meteoro-India. This office prepares two weather charts logical Assistant stationed at each of these daily and a daily weather report; it also issues centres is authorised to add to the weather report a telegraphic weather summary for north-west received from the forecasting centres his own India. It is in charge of all auxiliary centres, conclusions about the local weather situation, current weather stations and second, third, The latest information available regarding the fourth and fifth class observatories in north-west local surface conditions and upper winds can India (excluding Kashmir), Iran and Arabia, also be obtained from him.

data of selected stations in its area of responsibility.

Colaba and Alibag Observatories (W.15. T.M.).-These observatories specialise in Geophysics, particularly terrestrial magnetism. selsmology and atmospheric electricity. The Colaba observatory maintains a large number of self-recording meteorological instruments and is responsible for the time-ball service in the Bombay harbour and the rating of chronometers belonging to the Royal Navy. It publishes an annual volume of the magnetic, meteorological and seismographic observations and issues a daily weather report during the months May to November every year. It is in administrative charge of the auxiliary centre at Juhu (Bombay).

Kodaikanal Observatory (Sp. W.1S.),—This observatory specialises in the study of the physics of the sun and is specially equipped for spectroscopic observations and research. It is also a seismological station and a first class weather observatory. The observatory issues bulletins from time to time describing the results of its observations of the surface of the sun and of special investigations on the subject.

Meteorological Offices at Peshawar and Quetta (F. W. 1 P. A.).—Officers-in-charge of these stations are responsible for the issue of weather reports and forecasts to the Royal Air Force pilots flying over routes in Baluchistan, Waziristan, the North West Frontier Province, Sind and the Punjab generally and detailed local forecasts and warnings each for his own immediate neighbourhood. As a result of the earthquake damage in 1935, the Quetta Office has been temporarily shifted to Karachi.

The Auxiliary centres (C) are situated at Jodhpur, New Delhi, Allahabad, Dum Dum and

MONSOON OF 1938.

The southwest monsoon period, June to United Provinces during the third week, result-september, was marked by spells of heavy in heavy floods in the Brahmaputra and its rains which resulted in floods in the Brahma tributaries. According to press reports large putra valley in July and in the United Provinces in August. The total rainfall of the period was above the average in the east United Provinces, Bilar, the Central Provinces, the Deccan, Mysore and east Madras. There was, however, less rain than usual in northwest India, particularly in and near the triangle—Delhi, Lahore, Airmer Attended over the values of India the Aimer. Averaged over the plains of India, the season's rainfall was in excess by 6 per cent.

During the retreating southwest monsoon period. October to December, the season's rainfall was generally scanty except over the region from Gujarat and the Konkan to east Central India and the east Central Provinces and in Orissa and Assam. Averaged over the plains of India, the rainfall was in deficit by 10 per cent during the period.

Taking the year as a whole, the rainfall over the country was 24 per cent. or more in excess in the east United Provinces, Berar, the Bombay, Deccan and north Hyderabad, and 21 per cent or more in deficit in the Punjab, Sind and Rajputana. Over the rest of the country, it was within 20 per cent of the normal.

The month of June was rainier than usual, the monsoon having set in early in most of the provinces. In the beginning of the month, a deep depression over the east Arabian Sea caused an extension of the Arabian Sea current up to Gujarat. Subsequently, the passage of a low pressure area from the Bay of Bengal, through the central parts of the country, into east Rajputan, resulted in a general strengthening of the monsoon over the country, especially in Gujarat, and its extension right up to the northwest frontier. Several stations in northern India and on the west coast recorded heavy rain. After the middle of the month, another low pressure area travelled from the north Bay of Bengal to the Central Provinces causing a fresh revival of the monsoon over most of the country. Raver in east Khandesh recorded 8" of rain on the 19th and Khargone in west Central India 16" on the 20th, while a sporadic fall of 20" recorded at Ratnagiri on the 18th-19th. Yet another marked revival of the monsoon took place between the 28rd and the 25th, this time over the belt from east Gujarat to the east and

tributaries. According to press reports large areas were submerged and breaches in railway lines caused serious dislocation of traffic between Assam and Bengal.

The monsoon continued active during August. About the middle of the month a depression from the Bay of Bengal crossed through Burdwan and Jhansi and merged into the seasonal low. In association with it the monsoon became vigorous in the United Provinces and the hills of the Punjab, causing severe floods. During the rest of the month the monsoon was fairly active over most of the country outside northwest India, where it temporarily revived during the last week; in the south Deccan and Mysore, rainfall was in large excess.

During the first week of September, two shallow lows appeared over Bengal one after the other and the monsoon remained more or less active. Afterwards, there was a general weakening of the monsoon, and thunderstorm activity characteristic of the retreating monsoon gradually grew and covered most of the country excluding northwest India. In the last week a cyclonic storm from the Bay of Bengal crossed the coast near Masulipatam and, weakening into a depression, was over the Deccan at the end of the month. The associated rainfall was fairly widespread over the Peninsula and the adjoining areas to the north.

Low temperatures prevailed in and around the central parts of the country during June. Weather was much warmer than usual over the region from east Rajputana to the North-West Frontier Province between the 3rd and the 5th July. A spell of cool weather appeared over southeast Madras and the Madras Deccan on the 21st August, and extended northwards up to Berar and Gujarat by the 27th. Temperatures were higher than usual over northwest India outside Kashmir, in Central India and the United Provinces during the second half of September, and in the east and north Punjab during the whole month.

The depression over the Deccan at the end of September passed out into the Arabian Sea in the beginning of October and, after intensifying again into a cyclonic storm, recurved and moved north Punjab and in and near Mysore. During the month, there were two western disturbances, the first of which caused widespread thunderstorms in northern and central India.

(about 30 miles south of Surat). It was responsitude for widespread and locally heavy rainfall thunderstorms in northern and central India. In July though the depressions were few and shallow, the normal activity of the monsoon rather than the normal rather than the norm

The total rainfall for the season—June to September—averaged over the plains of India was 33.9 inches, 6 per cent more than the normal. The following table gives detailed information of the seasonal rainfall of the period:

	RAINF	ALL, JUNE TO	September, 1	938.
DIVISION.	Actual.	Normal.	Departure from normal.	Percentage departure from normal.
Burma	Inches. 56.1	Inches. 62.2	Inches. — 6.1	10
Assam	70.3	66.1	+ 4.2	+ 6
Bengal	57.6	54.9	+ 2.7	+ 5
Orissa	38.8	43.6	- 4.8	11
Bihar	46.1	41.9	+ 4.2	+ 10
United Provinces	37.6	33 ,5	+ 4.1	+ 12
Punjab	10.9	15.3	- 4.4	- 29
North-West Frontier Province	7.0	8.0	- 1.0	13
Sind	3.2	5.2	- 2.0	- 33
Rajputana	15.5	19.1	- 3.6	19
Bombay	41.8	89.8	+ 2.5	+ 6
Central India	35 .1	33.1	+ 2.0	+ 6
Central Provinces and Berar	48.1	40.5	+ 7.6	+ 19
Hyderabad	34.7	25.9	+ 8.8	+ 34
Mysore	25.6	22 .4	+ 3.2	+ 14
Madras	31.0	28.5	+ 2.5	+ 9
Mean of India (excluding Burma)	33.9	32.1	+ 1.8	+ 6

and near its track. Rainfall was deficient over northwest India, the four western disturbances that affected the area during the month having been all feeble. The rainfall was in deficit in the south of the Peninsula also, as the northeast monsoon did not arrive until the fourth week of October.

During November, there were three cyclonic storms in the sea areas. The first of these developed in the Bay of Bengal, weakened into a depression while approaching the Chittagong coast on the 12th and filled up by the following day after causing fairly widespread rain in Bengal and Assam. The second formed in the Arabian Sea at the eastern extremity of a trough of low pressure which had appeared off the Malabar-Kanara coast on the 6th. It became severe, and then filled up by the 9th, causing nearly general rain in and near the Konkan. The third resulted from the intensification of unsettled conditions which had appeared over the south Andaman Sea on the 20th; it passed inland near Masulipatam on the 26th and filled up by the next day, the associated rainfalled up by the next day.

Madras coast, where, according to press reports, many casualties and considerable damage to property occurred. Six western disturbances passed through northwest India and the northeast monsoon was active in the south of the Peninsula for half the month; the total precipitation for the month in each of these regions was in large deficit.

During December, the western disturbances, though 8 in number, were often feeble, and the northeast monsoon was also generally weak except for brief spells of activity induced by (1) a trough of low pressure to the southeast of Ceylon in the first week and (2) the development of unsettled conditions in the neighbourhood of Ceylon in the fourth week.

the Malabar-Kanara coast on the 6th. It became severe, and then filled up by the 9th, causing nearly general rain in and near the Konkan. The third resulted from the intensification of unsettled conditions which had appeared over the south Andaman Sea on the 20th; it passed inland near Masulipatam on the 26th and filled up by the next day, the associated rainfull being widespread and locally heavy on the north

Famine.

nothing is more remarkable than the manner in which great problems arise, produce a corresponding outburst of official activity to meet them and then fall into the background. This general truth is illustrated by a study of the history of famine in Iudia. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry. Nearly three-quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence. Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfall. The rainy season is short and if for any natural reason there is a weakness, or absence, of the rain-bearing currents, then there is either a poor harvest or no harvest at all. In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade In the old days there were no railways to distribute the surplus of one part of India to the districts where the crop had failed. There were often no roads. The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. The people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died. Commencing with the Orises famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises. After the famine of 1899-1900 this responsibility was also shouldered by the Indian States. Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relier covering the whole field. But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of India is covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas nuch less dependent on the monsoon rainfall, At the same time the scientific study of the problems of Indian agriculture has raised the capacity of even the "dry" sones. The peasantry has accumulated a certain reserve against the rainless days from the prosperity which accom-panied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit.

To the student of Indian administration lightened the pressure on the soil. The relation thing is more remarkable than the manner of famine to the question of Indian administration of the soil of th

Famine under Native Rule.

Famines were frequent under Native rule, and frightful when they came. "In 1630," says Sir William Hunter, in the History of British India, "a calamity fell upon Guiarst which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants." In 1631 a Dutch merchant reported that only eleven of the 260 families at Swally survived. He found the road families at Swally survived. He found the road thence to Surat covered with bodies decaying on the highway where they died, there being on the lightway where they died, there being none to bury them. In Surat, that great and crowded city, he could hardly see any living persons; but "the corpses at the corner of the atreets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone, Pestilence followed famine." Further burying addition. ther historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India. It has come to be seen that whilst railways have checked the old-fushioned practice of storing grain in the villages they have made the reserves, where they exist, a vailable for the whole of India. In India there is now no such thing as a food famine; the country always produces enough food for the whole of the population; famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved,

History of Recent Famines.

Stage by stage this responsibility was expressed in the evolution of a remarkable system of fain the evolution of a remarkable system of fain the evolution of a remarkable system of faint machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of Indias covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas much less dependent on the monsoon rainfall, at the same time the scientifies total yof the problems of Indias agriculture has raised the capacity of even the "dry" sones. The peasantry has accumulated a certain reserve against the rainless days from the prosperity which accompanied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit. The spread of manufacturing enterprise has familion amigrated. There was familion amigrated.

South Indian Famine of 1876-78. This affected Provinces, Berar, Bombay, Ajmer, and the Madras, Mysore, Hyderabad and Bombay for Hissar district of the Punjab famine was acute: two years and in the second year extended to large stress of the Central and United Provinces and india, Hyderabad and Kathlawar. It was marked by several distinctive features. The affected was 257,000 square miles and the popular of the whole of India was in extreme parts of the Central and United Provinces and to a small tract in the Punjab. The total area affected was 257,000 square miles and the popu-lation 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Throughout British India 700,000 000 units were relieved at a cost of Rs. 81 crores. Charitable contri-butions from Great Britain and the Colonies aggregated Rs. 84 lakhs

The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Bichard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommend-ed (1) that employment should be given on the relief works to the abie-bodied, at a wage sufficlent for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to main-hala health under given circumstances. Whilst tain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort." Provincial sodes were drawn up, and were tested by the famine of 1886-97. In that 807,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 49,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs. 7‡ crores, revenue was remitted to the extent of Rs. 1‡ crore, and loans given aggregating Rs. 1‡ crore. The charitable relief fund amounted to about Rs. 1‡ crore, of which Rs. 1‡ crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experience of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, stresser than had ever been recorded in famines, men, incomparable with it in severity, and that the case of able-somparable with it in severity, and that the case of able-sepses was moderate. But before the Local recommended; and proposals were made the proposals of this Commission or the people to recover from the stock, the great famine of 1892-1800 supervened.

The Famine of 1899-1900.

defect, being eleven inches below the mean.
In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late scope of the relief works when it was too late to save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Bs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The familier was estimated at Rs. 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme by the Government of Inola atone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs. 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India. Although actual deaths from starvation were insignificant, the extensive outbreaks of cholers, and the devastating epidemic of malaris which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this famine a million. The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the neces-aty of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official help. The wage scale was revised; the minimum of the preparations of the minimum of the preparations of the preparations.

The Government of India are now in posses-The Famine of 1899-1900.

This famine affected 475,000 square miles with effects of drought. In ordinary times Govern-population of 59,500,000. In the Central ment is kept informed of the meteorological conditions and the state of the crops; programmes of suitable relief works are kept upto-date, the county is mapped into relief circles, reserves of tools and plant are stocked. If the rains fail, policy is at once declared, non-officials are enlisted, revenue suspended and loans for agricultural purposes made. Test works are then opened, and if labour in considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe, the few remaining works are gradually closed and gratuitous relief cesses. All this time the medical staff is kept in readiness to deal with cholera which so often accompanies famine, and malaria, which generally supervenes when the rains break.

Famine Protection.

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are rallways and irrigation. These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans; protective works, which do not pay, directly from revenue. In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1870. It was decided to set apart from the general revenues Rs. 1½ crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective rallways is now practically complete. Great progress is being made with protective irrigation. Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine-susceptible district in India—and in the Central Provinces.

Under the Statutory Rules framed under the Government of India Act of 1919. Provincial Governments (except Burma and Assam) are required to contribute from their resources a fixed sum every year for expenditure on famine. These annual assignments can be expended on relief of famine only, the sum not required for this purpose is utilised in building up a Famine Relief Fund. The Fund provides, as its main and primary object, for expenditure on Famine Relief proper, the word "Famine" being held to cover famine due to drought or other natural calamities. The balance at the credit of the Fund is regarded as invested with the Governor-General in Council and is available for expenditure on famine, when necessary and, under certain restrictions, on protective and other works for relief of famine.

The Outlook.

Such in brief is the official programme and organisation which has been built up out of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be wanted in the future on the colossal scale of former times, even so recently as 1899-1900. Each succeeding failure of the rains indicates that there has been in silent progress an economic revolution in India. In the year 1918 the rains failed more seriously and over a wider area than during any monsoon in the resent history of India. The deficiency in the rainfall was more marked than in the great famine of 1899. Yet such was the increased resisting power of the people that instead of a demand for State relief from over five millions, the maximum number at any time in receipt of public assistance was never so large as six hundred thousand. The shock to the social life of the community was insignificant; the effects of the drought completely disappeared with the good rains of the following year.

Increased Resisting Power.

The causes of this economic change in the conditions of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rainsfailed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he girds up his loins and goes in search of employ-ment in one of the industrial centres, where the supply of labour is, when general economic conditions are normal, rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often mistermed a hoard. The balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, re-present small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one-third of the land in the Punjab is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Deccan, irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by plague population was not some years reduced by paging and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This prevented the increase of congestion, but brought some areas particularly in the Indian States, below their populations among the property of the prop former population-upporting capacity. (The 1931 census showed an increase of over 30 million in the population since 1921.) The increase of railways distributes the resources of the country with ease; the spread of the country with ease; the spread of the country with ease;

of the co-operative credit movement has General of India, is the Secretary & Treasurer of improved rural credit. Finally, there is the Trust. The endowment of Rs. 32,78,400 considerable development of manufacturing above mentioned is permanently invested and industry, which is generally short of labour and beips to absorb the surplus of a famine year. Income from it is utilised for relief work as Whilst the Government is completely equipped necessary and unexpended balances are temwith a famine code, there is no reason to suppose porarily invested, so as to make available in that there will ever recur such an emergency as years of trouble savings accumulated when that of 1899. Famine can now be efficiently expenditure is not necessary. The temporary met by the liberal distribution of tagavi, the investments—in Government Securities—at the suppension and remission of the land revenue and of 1937 stood at Rs. 3,200 and the cash demand, the relief of the aged and others balance at the same time was Rs. 1,07,482-11-8,

The increased resisting power of the people was effectively demonstrated during the famine was enecurely demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1930 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevalled also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0.45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust.

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept ginable. Famine in the old terrible sense of the Government ald, and in assisting in the rehabiterm has in fact ceased to occur. This was well litation of the cultivators when the rains break. illustrated by the events of 1919, when the land At every great famine large sums have been subscribed, particularly in the United Kingdom, for this purpose, and in 1899-1900 the people previously recorded by the Meteorological De-of the United States gave generous help. With partment but the crisis was borne with a miniof the United States gave generous help. With the idea of providing a permanent famine fund, the Maharaja of Jaipur gave in 1900 a the idea of providing a permanent famine fund, the Maharaja of Jaipur gave in 1900 at Famine Trust have consequently so greatly sum of Rs. 15 lakhs, in Government securities diffinished in their original sense that hardly to be held in trust for the purposes of charitable relief in seasons of general distress.

the invested balances of the United Provinces famine in the old sense was only Rs. 50,000 Famine Orphans' fund being transferred to the from the fund being transferred to the from the fund being transferred to the from the fund to the fund Trust, and was constituted under the Charitable RS. 50,000 were expended on relief of distress Endowment Act. 1860. The income of the E

who cannot work, the provision of cheap fodder so that the total available for expenditure at the for the cattle, with possibly some assistance commencement of 1938 was Rs. 1,10,682-11-8. In 1937 relief was granted to the extent of famine-sffected tract to the industrial centres. Rs. 35,000 as compared with Rs. 1:15 lakhs granted during 1936.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Govern-ment in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport, communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practice and Government help its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the people makes them able to meet temporary periods of stress in a manner formerly unimasuffered from a failure of the rains more general throughout India and worse in degree than any relief of famine in the proper sense of the word, This Trust Fund in a few years increased to mainly become grants of assistance to sufferers Rs. 28,10,000. During 1934 it increased further from floods. The total expenditure upon real

Hydro-Electric Development.

only specially lends itself to projects of the kind, but peremptorily demands them. Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circum-stances of the war have compelled Government to direct towards the scientific of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Cosi supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the rower are he rendered in all next the course are her rendered in all next transmissions. which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords high encouragement for the future. Further, hydro-electric schemes can frequently be associated with important irrigation projects, the water being first used to drive the turbines at the generating stations, and then distributed over the fields. and then distributed over the fields.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India. On this recommendation the Government On this recommendation the Government of India in 1918 appointed the late Mr. G. T. Barlow, C.I.E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr. J. W. Meares, M.I.O.E., Electrical Adviser to the Government of India, Mr. Barlow died, but Mr. Meares issued a preliminary report in September, 1919, summarising the state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr. Meares showed that industries in India absorbed over a million horain India absorbed over a million horse Electric Power Supply Company are situated power, of which only some 285,000 h. p. is supplied by electricity from steam, oil or water The monsoon rainfall is stored in three lakes,

India promises to be one of the leading coun- the water power so far actually in sight amounts tries of the world in regard to the development to 1½ million horse-power, but this excludes of hydro-electric power and great strides in this practically all the great rivers, which are at predirection have already been made. India not sent uninvestigated. Thus the minimum flow of India not sent uninvestigated. Thus the minimum flow of tem. Cheap is stated to be capable of giving not less than if successful three million horse-power for every thousand favourable feet of fall from the Himalayas, while war, the similar considerations apply to rivers in other parts. Some doubt is expressed as to the ed Indians, estimate of seven million horse-power in the Jovernment in the state of the London Conjoint Board of Scientific Studies.

The Report points out that the Bombay The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavia, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro-Electric Works.

The greatest Hydro-Electric undertakings in India are the three schemes developed and brought into operation by Tata Sons, Ltd., and continued under their management until 1929, when they were transferred to the management of the Tata Hydro-Electric Agencies, Ltd., in which Mesers. Tata Sons retained a substantial interest. These undertakings are :-

- (a) The Tata Hydro-Electric Power Supply .. Started in 1915. Company, Ltd.
- The Andhra Valley Power Supply Company, Ltd. ,, 1922.
- (c) The Tata Power Company, Ltd. ,, 1927. These Hydro-Electric schemes have a com-

bined normal capacity of 246,000 H.P. and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Greater Poons.

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India. Its population including suburbs at the 1931 census was 1,326,313 with a total population of approximately 1,600,000 in all of the areas served by these companies. Its cotton mills and other factories consume about 150,000 H.P., which until these Hydro-Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances.

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above sea-level within a few miles of Bombay City, situated on the shores of the Arabian sea with their heavy rainfalls was taken full advan-tage of for providing Bombay City and vicinity with an adequate and economical power supply.

The hydraulic works of the Tata Hydro-

namely, Lonavia, Walwan and Shirawta, from which it is conveyed in open masonry canals to the Forebay at Khandals and thence through steel pipes to the Power House at Khopoli the foot of the Ghats, where the head at turbine nozzles is 1,750 feet or approximately 750 lbs. per sq. inch. The normal capacity of the Power Station at Khopoli is 48,000 KW or 64,300 KP. This scheme was formally opened by H.E. The Governor of Bombay on the 8th of February 1915.

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro-Electric Supply Company's lakes, where an additional 48,000 KW (or 64,300 H.P.) could be developed. These investigations resulted in the formation of the andhra Valley Power Supply Co. and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhitypuri. The head of water at turbine nozzles is 1,750 feet or approximately 750 lbs. per sq. inch. The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli.

The Tata Power Company's scheme on the Mila-Mula River to the South-East of Bombay was investigated and developed along lines similar to the Andra Valley scheme and has a normal installed capacity of 87,500 KW or 117,000 HP. The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Tata Hydro-Electric Power Supply Co., The Andhra Valley Power Supply Co., and the Tata Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co. Ltd., the majority of the milis and industries in Bombay City, the B. B. & C. I. Railway for their suburban electrification the whole of the energy required by the G. I. P. Railway in Bombay City and for their main line traction up to Kalyan, the whole of the electrical energy required by the Poona Electric Supply Company and the distributing licensees in Thana, Kalyan and the Bombay suburbs.

These three schemes operating as a unit under one management provide an adequate and economical power supply in the areas mentioned above for all purposes. The rate for energy delivered to the Mills, Factories and Railways has, for several years, shown a steady decrease and now averages 0.45 of an anna per unit, which downward trend will continue as industries develop and individual consumptions increase. This power supply greatly enhances the natural advantages Bombay has as a great manufacturing, trading and shipping centre.

The fact that the Bombay Electric Supply and will brim and Tramways Company has shut down its Hydro-electr steam-driven generating plant and now takes i Horsepower.

its supply in bulk from the various Tata companies is of note, and it is of more than passing interest to note that the Poona Electric Supply Company has recently adopted a similar course. This is a phase of hydro-electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts or double the pressure commonly employed in India for overhead long-distance transmission.

Mysore Hydro-Electric Works.

The first Hydro Electric Scheme of any magnitude undertaken in India or indeed in the East, was that on the Cauvery River in Mysore State, which with its generating station, transmission line and distributing system was inaugurated in 1902.

The Cauvery River rises in the district of Coorg in the Western Ghats and flows across Mysore State. The principal object of this scheme was the supply of power to the Mining companies on the Kolar Gold Fields about 92 miles from Sivasamudram, the site of the generating station. This transmission line was for a number of years the longest line in Asia. Since 1902 the supply of electrical energy from Sivasamudram has been provided for Bangalore and Mysore cities and about 200 other towns and villages in the South-Eastern Half of the State.

The initial undertaking has constantly been expanded so that its total capacity now stands at 46,000 E.H.P. This is the maximum obtainable from the water available. This great increase has been made possible by the construction of the Krishnarajassagar reservoir near Mysore City, which has a capacity of 44,000 million cubic feet of storage above the minimum draw off.

The number of the consumers of all classes continues to increase rapidly every year with greatly increased demands. The Government of Mysore have encouraged this growth in the use of electrical energy and have made survey of Hydro Power resources of the State and prepared plans for the construction of a second generating station at the most economical site.

The number of lighting and power consumers of all classes in about 250 towns and villages within the Mysore State has increased to approximately 40,000. Demands for very large additional blocks of power have arisen making it necessary for Government, in continuing its policies for the industrial development of the State, to sanction the construction of a Power Station at the Shimsha Falls for the production of 23,000 H.P. and the construction of a Power Station at the Jog Falls for the production of 20,000 H.P. The construction of these projects are to be completed in the shortest time possible and will bring the total capacity of Government's Hydro-electric Generating Stations to 89,000 Horsepower.

The Transmission System consists of 555 route-miles of 78,000 and 37,500 volt lines with a total of 850 miles of circuits. The transmission system is now being extended into every District within the State which together with the appropriate distribution systems will supply hydroelectric power to more than 350 towns and villages within the next 2 to 3 years.

Works in Madras.

The Pykara Hydro-Electric Scheme an undertaking of the Madras Government, was commenced at the end of 1929, the first stage of the project being completed at the end of 1932. The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Nilgiri Plateau having a catchment area of nearly 38 sq. miles.

The Scheme utilizes a fall of about 3,100 feet available in the passage of the Pykara river in the Nilgiri District. The flow, though persennial, is very irregular and often drops to values around 20 cusecs during the dry season. The topography, however, embraces a number of feasible storage sites which could be developed according to the growth of power demand. The estimated potential capacity of the full development is around 40,000 KW. continuous. The initial development tutilizes the regulated flow of the river with small storages of 85 million cubic feet in the forebay and 26 million cubic feet in the Glen Morgan Reservoir which is the first storage site.

Civil Works.—Water from the intake of the river is led by a flume to the forebay from whence it is led through a single 78" diameter steel pipe 1,000 feet long to a surge tank at the head of the penstock consisting of two pipes, each in three sections of 27 inches 24 inches and 21 inches in diameter and a total of about 9,300 feet in length.

Power Station.—At present three 6,250 KW., 3-phase, 600 R.P.M. alternator, coupled to 11,000 H.P. petton wheels, are installed. Power is generated at 11,000 Volts, 50 cycles and stepped upto 66,000 Volts by means of three 7,810 KVA., 3-phase, 11 KV./66-110 KV. transformers. The supply to Nilgiri District is at 11 KV. from a 1,000 KVA. 11 KV./11 KV. transformer at the power station.

Transmission & Distribution.—Power is transmitted to Coimbatore which is the main receiving station as also the chief load centre, by means of a 50 mile double circuit 66/110 KV. line, 66 KV. lines have also been extended to Erode, Trichianopoly and Negapatam a distance of nearly 200 miles from Coimbatore. But the loads at the latter places have recently been transferred to the Mettur Scheme, which came into operation in June 1987. Also the 66 KV. system has been extended to Udumalpet, Sembatti, Madura, Virudhungar, etc., a distance of about 150 miles. A 66 KV. line from Virudhungar to Kollpatti is under construction.

In addition to the above main transmission lines, considerable lengths of 11, 22 and 88 KV, distribution lines have been constructed or are under construction particularly in the Colmbatore, Madura and Ramnad Districts. At all load centres step-down substations have been constructed with the necessary transformers and

switchgear. At Madura which is an important station two 3,000 KVA synchronous condensers are installed for ensuring proper voltage regulation.

Pykara Scheme Extensions.—To provide for the rapidly increasing demand in the existing area and also the extensions to Madura and Ramnad Districts, two 12,500 KVA., 600 R.P.M., 11 K.V. generators and two 12,500 KVA., 11 KV./110 KV. transformers have already been ordered, as also an additional penetock. The Pykara-Colmbatore transmission line section is being changed over to 110 KV. operation to suit the increased load demand. These are expected to be completed by the end of April 1930. Provision is also made for installing at a later date two additional generating units of the same capacity.

The rapid growth of the Pykara load in 1934 necessitated the early construction of the Mukurti Dam, which is the first large storage contemplated in the original scheme. This was sanctioned in January 1985. The work was commenced in February 1985 and completed in March 1988. The Dam as completed with open spill way stores 1,400 million cubic feet of water but the capacity can be increased to 1,800 million cubic feet when required later.

The financial position of the Pykara System is most satisfactory. The third year revenue was more than that expected in the tenth year of the forecast and the system has proved a splendid investment to the state. The peak load on the system was 18,500 KW. during 1937-38. The revenue was approximately 25.5 lakhs. The industrial development at Coimbatore accounts for more than 50 per cent. of the total load and also the high load factor of the station.

The Mettur Hydro-Electric Scheme.—The engineering features of the Mettur Hydro-Electric Scheme provide an interesting contrast to the Pykara Hydro Electric Scheme. The Mettur Stanley Dam, one of the largest structures of its kind in the world, is 176 feet high and can impound a total of 93,500 million cubic feet of water. This storage is primarily for irrigation purposes, but part of the water let down for irrigation is utilised to the best advantage for the generation of hydro-electric power.

During the construction of the dam four castiron pipes 8'-6' in diameter were built into the structure and equipped with the necessary valves, gates, screens and other fittings. Each pipe is designed to discharge a maximum of 1,250 cusees for power purposes.

The first stage of development providing 3 units of 10,000 K.W. each was sanctioned in 1935 and the power station construction commenced in the latter part of 1935. The station commenced operation in June 1937.

The operating head will vary from 160 feet at full reservoir level to a minimum of 60 feet. The average head will be 135 feet.

As the potential out-put of the Mettur station is very variable due to the wide variations in head and discharge it is proposed to generate and sell three classes of load, viz.,

- Primary power available at all times,
- (2) Secondary power subject to restricted use in dry months but which could be made into

primary power by the assistance of the existing Pykara station (and later Madras steam-station).

(3) Tertiary power generally available for eight months in the year.

The scheme is designed to supply power initially to the districts of Salem, Trichinopoly, Tanjore, North Arcot, South Arcot and Chittoor.

Power House.—The power house is situated immediately below the Mettur Dam and in it are now installed three 10,000 KW., 250 R.P.M. generators coupled to overhung type twin horizontal Francis Turbines one on each side. The turbines operate under a variable head of from 60 to 160 feet developing a maximum of 16,000 H.P. each. Power is generated at 11,000 volts, 50 cycles, 3 phase and stepped upto 66,000 volts (110,000 volts later) for transmission to various load centres.

Transmission and Distribution System.—Power is transmitted to Singarappet in the north and Erode in the south by means of two 66/110 KV. trunk lines (a total mileage of 100 miles) taking off from the power station. At Erode the Mettur System is linked with Pykars net work and both stations can work in parallel as and when operating conditions demand. 66KV lines have also been extended to Vellore, Tiruvannamalai and Villupuram a distance of about 140 miles.

Considerable lengths of 11, 22 and 33 KV. lines have also been constructed or are under construction for extending power to Conjeevaram, Arni, Arkonam, Tirupathi, etc.

At all important load centres out-door transformer stations are provided for stepping down the voltage to 11 or 22 KV. as required. At Trichinopoly which is an important station in

the southern area, two $\frac{+2,500}{-2,000}$ KVA. synchronous condensers are installed for ensuring proper voltage regulation.

Mettur Scheme Extensions.—The peak load at the Mettur power house has already risen to about 10,000 kW. and is expected to reach 17,000 kW. by the end of 1940-41 when the several extensions now under construction commence operation.

Installation of 4th generating unit and the 3rd 12,500 KVA. transformer is under consideration for increasing the capacity of the station to meet the load demands successfully even during periods of low heads in the reservoir and to afford greater relief to Pykara in emergencies.

It is expected that these will commence operation by the end of 1941,

Papanasam Hydro-Electric Scheme.—This is the third hydro-electric scheme to be undertaken by the Madras Government. The scheme was sanctioned in 1938 and is expected to commence operation by the end of 1941.

The scheme utilizes the fall of about 330 feet in the passage of the Tambraparni river in the Tinnevelly District. It is proposed to provide a storage et 5,500 million cubic feet by constructing a dam across the Tambraparni river in the foot hills of the Western Ghats above Papanasam in the Tinnevelly district.

The following are the main features of the scheme:

- (a) A masonry dam 176 feet high to be constructed on the Tambraparni river just below where it is joined by Kariar. The reservoir so formed will have a storage of 5,500 million cubic feet and water will be drawn therefrom by means of two 8½ feet pipes embedded in the dam and fitted with valves to control flow.
- (b) A diversion weir to be located lower down on the river near the Head of the Papanasam Falls, which would provide a small storage of 28 million cubic feet for daily regulation.
- (c) Two 9 feet diameter steel pipes leading water from the diversion weir to the headworks about 3,500 feet long. Only one pipe to be installed in the first stage.
- (d) Four 66 inches penstock pipes, each 520 feet long leading the water down the hill slope from the headworks to the power station below. Only three penstocks will be erected in the first stage.
- (e) Power House to be situated near the Agastya temple at the foot of the Papanasam Falls. The gross head to be developed is 330 feet. Three 600 R.P.M. 7000 KW. 11 KV. 50 cycle, 3 phase vertical generating sets each coupled to a vertical type Francis re-action turbine of 9,850 B.H.P. will be installed initially and one more unit later.
- (f) A transmission system extending to Tinnevelly, Koilpatti and Madura and to Tenkasi and Rajapalayam. It will incorporate the existing lines in the area. The system will be linked to Pykara at Madura.

Works in Kashmir.

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. four pipes 600 feet long lead from the forebay to the power house, and from forebay to water-wheel there is an effective head of 895 feet. when there is an enective near or loss reco.
There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k.w.,
3-phase, 2,300 volt, 25-period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent. overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 k,w. generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulia originally utilised for three floating dredgers

and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinsgar, the line terminates at the State slik factory, where current is supplied not only for driving machinery and for lighting, but for heating. The greater part of Srinsgar city is now electrically lighted.

United Provinces Works.

The Ganges Canal Hydro-electric Grid supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of the province and to Shahdara in Delhi province. Seven of the ten falls available for electrification have been developed and a stand-by steam power station at Chandausi of 9,000 kilowatts has been constructed. During 1938 no less than 29,700 kilowatts in all will be available. Besides supplying some 75 towns with current for light and fans and minor industries, the grid provides energy for irrigation pumping from rivers and open and tube wells. The Ganges Valley State Well Scheme comprises about 1,500 tube-wells, covering the districts of Moradabad, Bijnor, Budaun, Muzaffarnagar, Meerut, Bulandshahr and Aligarh, introducing irrigation on the volumetric system over approximately one million acres hitherto without any source of irrigation. This supply of cheap power from some 2,000 sub-stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres.

The steam power house at Sohwal is capable of supplying 1800 kilowatts. The energy will be used to electrify Fyzabad and Ajodyha and to pump 160 cusecs from the Gogra into the Fyzabad canal system 120 miles in length.

Investigations into the electrical and financial possibilities of a Grid Project for the eastern districts of the province have been completed and the recommendations of an expert committee, appointed in November 1937, are under consideration.

Punjab's Hydro-Electric Project.

The Uhl River Scheme.—Perched on hill-tops 6,000 and 4,000 feet above sea-level, connected by means of a tunnel 15,000 feet long, are the headworks of the Uhl River hydro-electric project, supplying electricity to 19 towns in the Punjab, including important industrial centres like Amritsar, Lahore, and Ludhiana, and to the vast workshops of the North-Western Railway at Moghalpura.

A power house equipped with three alternators each of 12,000 k.w. capacity driven by 16,000 horse-power turbines operating under a head of 1,800 feet of water which are carried along the 3 mile long tunnel, convert the snow-fed waters of the Uhi River and its tributary into electric energy, supplying as much as 108,000 units of electric current to the consumers in the Funjab.

The tunnel is one of the longest in India, and the first steel mantled tunnel to be built in Asia. It measures about 28 miles in total length and has a diameter of 9.25 feet.

The Uhl River hydro-electric project owes its origin to the need which had begun to be felt for conserving fuel resources in the Punjab some years ago.

The site was chosen in 1922, a detailed project prepared by 1923, and sanction given in 1926. Construction began in 1928 and was not completed until 1933. Though the cost of the scheme was originally estimated at Rs. 450 lakhs it finally amounted to Rs. 600 lakhs on 31st March 1934.

From the power station at Jogendernagar current produced at 11 kv. is "stepped-up" to 132 kv. for transmission—the highest voltage adopted for this purpose in India, and is conveyed 173 miles to Lahore by a trunk line supported on steel towers 80 feet high, set 1,000 feet apart in the plains and over 3,360 feet apart in the hills.

There are also four travel lines totalling 232 miles in length on 50-foot towers carrying current at lesser voltage from Lahore to Ferozepore, Amritsar to Kartarpore, Kartarpore to Ludhlana, and Lahore to Lyalipur.

Provision has been made for the expansion of the scheme in two stages according to requirements. The first of these contemplates the building of a dam about 270 feet high in the vicinity of the headworks, increasing the storage there. The quantity of water conveyed by the tunnel will then be doubled, four more generating sets installed in the power house, and the output also practically doubled. It will then be possible to cater for the needs of another half a dozen large towns.

The next stage of development would be effected on different lines, for it is not possible to increase the capacity of the tunnel any further. This stage, therefore, envisages the constructon of a second power house lower down, to which water from the tail race of the existing power house will be led by means of an open duct about 3 miles long with a fail of 1,200 feet.

The new power house will generate another 48,000 kw., giving a total output of 118,600 kw. a quantity more than sufficient to meet the needs. of the present generation in an area extending from Delhi in the north to Sialkot and Lyalipur in the north. In this stage over 50 towns in all will be served.

The possibility of electrifying some of the railways in the Punjab, and, more important, of introducing tube-well irrigation adds to the interest of this project.

The former would cheapen and quicken the transportation of passengers and goods. The latter would enable some 24 million acres of uncommanded land to be brought under cultivation, greatly increasing the food supply of the Province.

So much machinery had to be used in the construction that it was found both convenient and economic to build two small temporary hydro-electric power stations, one at Dholu near Shanan and the other at Thuj near the head-works on the Uhl. These stations were linked up by a 11,000-volt transmissions line and their combined total output amounted to 1,060 kw.

Local Self-Government.

A field of the administration of India (The village site is owned by the proprietary body, profoundly affected by the Reforms of 1919 was who allow residences to the tenantry, artisans, that of local government. This was one of the traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is under their leadership considerable developments partitioned among the shareholders. The village have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation —the devolution of authority from the Govern-ment to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles-tabsils, sub-divisions, and districts.

"The typical Indian village has !ts central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting... The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and govern-ment, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, e.g., in the greater pars of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads."-- (Gazetteer of India.)

The villages above described fall under two main classes, vir.-

Types of Villages.—"(1) The 'severalty' or raiyatwari village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers. though some of the non-cultivated lands may be set apart for a common purpose, such as graz-ing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. The village government vests in a heroditary headman, known by an old vernacular name, such as potal or reddi, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type revalent in the United Provinces, the Punjab between the circumstances of different villages: and the Frontier Province. Here the revenue and there is a considerable consensus of opinion was formerly assessed on the village as a whole, that this new departure should be made under the included province as a whole that this new departure should be made under the included province. This is, however, still mainly a question of collective responsibility still, as a rule, remains.

government was originally by the punchayet or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the arti-ficial character of this appointment, as compared with that which obtains in a raiyatwari village is evidenced by the title of its holder, which is generally lambardar, a vernacular derivative from the English word 'number.' Itis this type of village to which the well-known description in Sir H. Maine's Village Communities is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynastics and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of com-munications, the growth of individualism, and the operation of the individual raivatwari system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village func-tionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or Punchayet and the Decentralisation Commission of 1908 made the following special recommendations:

"While, therefore, we desire the development of a punchayet system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to Punchayets in those villages in which circumstances are most fa yourable by reason of homogeneity, natural intelli-gence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination

is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councilors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments have taken steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at nuncipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much pro-gress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, Medical, charity, and local public works. New municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully in-troduced. In 1881-2 Lord Bipon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1888-4 that greatly altered the constitution, powers, and functions of muni-cipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of pro-vincial revenue suited to and capable of deve-lopment under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position.—There are some nearly 800 municipalities in British India, with something over 21 million people resident within their limits. Of these municipalities, roughly 710 haves population of test than 60,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident

within municipal limits is largest in Bombay, and is smallest in Assam.

Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex-officio members are only 7 per cent. and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipally income of over Rs. 14 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities small, the four criticise of Calcutta, Bombay, Madras and Rangoon together providing over 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent. and 13 per cent. respectively, "Water-supply" comes to 18 per cent., "Drainage" to 4 per cent. in some localities the expenditure on education is considerably in excess of the average. In the Bombay Province, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar it is over 17 per cent.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees.

As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent. in Bombay and in the N. W. F. Province to 68 per cent. in Bihar and Orissa. The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges. Reddical relief is also sharing with education though in a less degree the lion's share of the available revenue.

Improvement Trust.—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay. Calcutts, Lucknow, Allahabad, Rangoon and Cawnpore the Improvement Trusts developed important activities which are described in a separate chapter (q.v.). (In Bombay the work of the Improvement Trust is carried forward

by the Bombay Municipality). Other cities are official president has been extended both to beginning to follow the examples of these great district and sub-district boards, and a large number of the Government of India in 1937 ber of non-officials have also been appointed established an Improvement Trust to attend presidents of sub-districts (taluka) boards. In to slum clearance in old Delhi City and to the general expansion of their Winter Capital.

Provincial Progress.—There was passed in Bengal in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. In 1930-31 the number of Union Boards rose to 4,510. There are also 12 Union Committees. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their own affairs.

In Bombay the development of village selfgovernment has also proceeded, as the result of an Act for constituting, or increasing the power of village committees which was passed in 1920 by the Legislative Council. In this presi-dency, some 145 cut of 155 municipalities had a pal bodies. The policy of appointing a non- relaxation of official control.

Madras also the institutions of local self-gov-Artarda also the institutions of ices searger-ernment continued to progress in an encourag-ing manner. In the United Provinces the new District Boards, which consist of non-official members only with elected non-official Chairman, were plunged straight-way into financial difficulties. In the Puniab municipal administration has shown improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. In the Central Provinces, the year 1920 witnessed the passing of a Local Self-Government Act intended to guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman, and the wider powers of control given to local bodies have been an incentive to the development of local self-government, leading to an increased sense of public duty and respon-1920 by the Legislative Council. In this presi-1920 by the Legislative Council. In this presi-dency, some 145 cut of 155 municipalities had a regulating municipalities was passed into law in two-thirds elected majority of councillors in the 1922. Its chief features are the extension of year 1980-81; and a distinct step forward has been projected by the administration in the direc-tion of liberalising the constitution of all municipalities. The extension of the powers of Municipal Committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of all municipal committees and the relative transfer of the constitution of

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instituted by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up con-gested areas, laying out or altering streets, providing open spaces for purposes of ventiprovining open spaces for purposes of venti-lation or recreation, demolishing or construct-lag buildings and re-housing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for way to a large extent modelled, no looked to in a medical enquiry which was instituted into the sanitary condition of the town in 1386, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 648,095 in 1801 and increased to 2012 of the 648,995 in 1891, and increased to 801,251, or by 25 per cent., by 1901. The corresponding figure according to the 1921 Census was 993,508 and this had increased by 1931 to 1,196,784.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. It also provided for the appointment of a wholetime chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1938;—Mr. C. W. Gurner, 1.0.8., Chairman; Mr. J. C. Mukerjes, Barat-Law, Chief Executive Officer, Calcutta Corporation (ex-officio); Mr. D. J. Cohen, elected by the Corporation of Calcutta under Section 7 (1) (a) of the Calcutta Improvement Act, 1911 up to 19th August 1937, and thereafter Mr. Indra Bhusan Beed; Kumar Biswanath Roy, elected by the elected Councillors, Corporation of Calcutta, under Section 7 (1) (b) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Sudhansu Kumar Mitter, elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (c) of the of Calcutta, under Section 7 (1) (c) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. F. Rooney,

elected by the Bengal Chamber of Commerce; Sir Hari Sankar Paul, Kt., elected by the Bengal National Chamber of Commerce; Khan Bahadur Muhammad Abdul Momin, C.I.E., Sir Badridas Goenka, Kt., C.I.E., Rai Bahadur Dr. Haridhan Dutt, Mr. A. J. Thompson, D.S.O., M.O., F.R.I.B.A., P.A.S.I., upto 8th February 1938 and thereafter Mr. Bernard Mathews, F.R.I., B.A., M.T.P.I., appointed by the Local Government.

During the 26 years that it has now been at work, the Trust have carried through many improvement schemes both in the city proper and the suburban areas which have changed the face of Calcutta wholly and beyond recognition.

In Central Calcutta many highly insanitary busies have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue, 100 ft. wide, which at present extends from Chowringhee past Shambazar to Baja Raj Ballav Street, a stretch of 3 miles. It is intended ultimately to extend it up to the Chitpur Bridge. The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is expected to gain increased importance by being linked up with Dalhousie Square on the West by means of a new road 84 feet wide which the Trust have constructed between Mission Row and Mangoe Lane. A further extension of this road from Chittaranjan Avenue to Wellington Street on the east and the clearing-up of an adjacent area in Chandur chak by the construction of a 40-feet road are nearing completion. The most important element in the present programme of the Trust is the approach road to the New Howrah Bridge from Dalhousie Square, the nett cost of which as a whole carried out in two schemes is estimated to approach a crore and a half. The first section of this project from St. Andrew's Church to Canning Street had received the approval of Government and the stage of land acquisition, with the attendant negotiations for exemption in certain cases was well advanced. The second stage for the same project covering the area between Canning Street to Strand Road is now in the preliminary stage.

In the north of the City, two large and sixteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossipore-Chitpore open space measuring 53 bighas and 156 bighas respectively. The Cossipore-Chitpore Park has a small artificial lake and the layout of the area surrounding the lake has been completed. Four football grounds have been provided for schools and clubs of North Calcutta. Some tannis courts are also being made. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been driven through this highly congested area. The approaches to the City have also been adequately widened.

to the City have also been adequately widened.
Good progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. This Scheme is known as Maydapati, Scheme No. XXVII.

The new 84 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been completed so that there is now a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east. An interesting small work is the extension of a storm water sewer from Jagannath Ghat Road to Strand Bank Road carrying with it the construction of a 60-ft. roadway. Another, important scheme which is now complete is the new 60 ft. road between Darpanarayan Tagore Street and Pathuriaghat Street which, with the side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahiritollah. The completion of the widening of Kalakar Street represents the most important effort yet made to penetrate the inner recesses of Burrabazar and provides a new 60 feet road from Harrison Road to Jagannath Ghat Road with short lengths of widening of cross roads in accordance with existing alignments. Running, as it does, through an area with a population of over 200 to the acre and closely built up with four or five storeyed houses, the gross cost of acquisition of land is exceptionally high. Demolition was of greater difficulty than usual owing to the lanes.

The passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties has made it financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazsar and other costly and thickly-populated commercial areas.

The Suburban Areas to the south and southeast of Calcutta required greater attention and extensive development sohemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores e.ft. of earth have been filled up. Russa Boad which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft. for a length of another mile. It now gives a most pleasant drive from Chowringhase to Tollygunge. To improve the drainage of this area a 100 ft. wide East to West road, from Ballygunge Railway Station to Chetia Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds have been constructed. In the south of the town the most important of the older schemes approaching completion was the first section of the Southern Avenue, including the extension of the Dakuria Lake and Park and the lay-out of the area round the park to the west of Junction of Lansdowne Road Extension. This scheme, which is essentially one for residential development, has been practically completed; almost the whole of the first section of surplus lands have been sold and is being rapidly built up.

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake. The road round the main lake has been surfaced with aerbaik and lighted with electricity and is much frequented in the evenings. Sites for club houses adjoining the main lake have been stilotted to several clubs. Excavation has been continued in a new section of the lake which is to be attractively laid out with an island to which the public will have access by means of a footbridge. The two lakes have been linked up by a concrete bridge constructed before the joining canal was excavated. The Calcutta Tramway Co., Ltd., have now extended tram tracks from Russa Road along Rash Behary Avenue to Ballygunge Station. The "Lake Area," as it is now commonly known, consisting of land originally acquired for the provision of earth and partly for a statutory open space in scheme No. XXXIII, assumes more and more the nature of a Model Park, and comprises well laid out football grounds in addition to its natural amenties. The Trust continues the policy of planting and embellishing it as a place of public recreation for south Calcutta and finds scope here for various experiments in Park technique, of which the most interesting was a Children's Pool properly designed for the purpose and believed to be the first of its kind in the Indian city. The Swimming Pool, the origin of which the main lake continues to grow in popularity to such an extent that the large crowds frequenting it in mid summer, tend occasionally to be a cause of some anxiety, and considerable expenditure has had to be met on security precautions.

In the out-lying area an important juncture in the history of Trust's operations had been reached in the decision to swing over from the south to the north section of the eastern part of Calcutta and to take up Maniktala on the completion of southern avenue.

The central section of the eastern part of Calcutta has already been developed by the Trust into a beautiful residential area with the amenty of a large park near Park Circus known as Eastern Park, measuring 65 bighas, with large playing fields for football, tennis, etc. The Gorachand Road Scheme providing for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally is nearing completion.

The public squares vested in the Calcutta Corporation in 1911 had a total area of about 95 acres. In 1912, Mr. Bompas, the first Chairman of the Trust, pointed out that in the ratio, etc., about 9 per cent. of its public open spaces which measured about 1,250 acres (including the Maidan, the Horticultural and the Boological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardens while its percentage exceeded that of New York, Berlin and Birmingham. But about 1,060 acres of Calcutta's 1,250 was accounted for in the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date the Tunt had added (Including the new lake at Bhakuria)—another 250 acres.

Lastly for the housing of the displaced population the Trust has undertaken on a large scale the following schemes:—

In the early stages three blocks of three storied tenement buildings containing 252 lettable rooms were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect basis of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, s.g., school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in those chawls, these buildings, including land, cost Rs. 2,44,368 and are let at very low rents—ground floor rooms at Rs. 5 per mensem, each room measuring 12"×12" with a 4 ft. verandah in front opening on to a central passage 7 ft. wide. The total collection of rent during the year 1937-38 including previous year's arrears was Rs. 14,194.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-housing Scheme.—In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the 31st March 1927.

Bow Street Re-housing Scheme.—Seven blocks of buildings containing one-roomed, two-roomed and three-roomed suites have been constructed to re-house Anglo-Indians displaced by the operations of the Trust. This scheme has proved a striking success. There are 132 suites for letting and the rent received from these suites during the year 1937-35, amounted to Rs. 25,071.

Paikpara Re-housing Scheme.—This scheme has an area of 80 bighas well laid out in 96 building sites. A new re-housing scheme has been undertaken by the Board, as already stated, at Ohristopher Road for the bustee population to be displaced by the execution of scheme No. XXXV (Eastern Park to Gorachand Road). A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers. Special facilities are offered to dishoused persons for securing land in various improved areas for reinstatement purposes.

Bridges. - The old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, have almost all of them replaced by modern and up-to-date bridges to suit the growing traffic requirements. The new bridges of the city have traffic capacity comparing favourably with those of London. The new Bridges at Maniktala, Beliaghata and яt. Shambasar have roadways of 87 feet, with two footpaths each 10 feet in width. The Chitpore Bridge reconstruction of which has been completed has been redesigned as a reinforced concrete bridge capable of accommodating four lines of fast traffic and two lines of slow traffic. The Alipore Bridge, the reconstruction of which has been completed, has a roadway of 30 feet (8 traffic widths) and 2 footpaths of 6 feet

The Tollygunge Bridge across Tolly's Nullah has been completed and transferred to the Irrigation Department during the year and the next to be taken up was the Barackpore Bridge and good progress has been made.

Financial.—Capital charges during the year 1937-38 amounted to Rs. 98.46 lakhs which included Rs. 88.10 lakhs spent on land acquisition and Rs. 7.98 lakhs one engineering work. The gross expenditure of the Trust on Capital The gross expenditure of the Trast on Capital Works up to the end of the year 1937-88 was Rs. 17,79,79,000. To meet this large expenditure, the Trust has borrowed Rs. 3,97,50,000 other Capital receipts (mainly from the sale of land and buildings) have yielded Rs. 9,03,76,000 and the revenue fund from its annual surplus (after providing for the service of loans) has contributed Rs. 4.79 crores to Capital Works.

The Indian Ports.

The administration of the affairs of the larger ports (Calcutta, Rombay, Madras, Karachi, Rangoon and Chittagong) is vested by law in bodies specially constituted for the purpose. Stitute the majority and the Board for Calcutta They have wide powers, but their proceedings

Figures for 1936-37 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table:—

			-			Income.	Expenditure,	Capital Debt.
		************				Rs.	Rs.	Rs.
Calcutta				• •	• • •	3,10,34,124	8,10,99,830	28,52,64,198
Bombay		• •	• •	• •	••	2,67,96,918	2,58,22,420	19,09,97,783
Madras		• •	• •	• •	•••	30,40,918	31,66,500	1,48,58,793

were:-

TRADE.

Imports -Salt, mineral oil, machinery, tea estate stores, rice, coal and railway material.

Exports -Wax, jute, tea, hides, cotton, capas, rice, paddy, eggs, poultry and live-stock.

Accommodation —Vessels of any size can proceed 9 miles up the Karnafuli to Chittagong at H.W.O.S. draught of 22 ft. to 26 ft.

There are 5 berths for ocean-going vessels at the Assam-Bengal Railway jetties, also two sets of fixed moorings.

Jetties are 2.100 ft. long, provided with hydraulic cranes 17 to lift 35 cwts. and 4 to lift 10 tons, ample shed accommodation, and jettles are in direct rail communication with the Assam-Bengal Railway system, cargo in bulk being dealt with direct into wagons. Depth at jettles about 26 feet at L. W. S. T.

Provisions.—Fresh provisions, good drinking

water and coal obtainable.

Navigation .- There are three river bars, two of which have been permanently improved by training works, and the third is being similarly treated. The necessity for dredging has been very greatly reduced.

Night pilotage is in force except during the S.W. monsoon.

Charges.—Port dues 4 annas 6 pies per reg. ton. Hospital dues 2 pies per reg. ton. Harbour Master's fre Rs. 32. Mooring and unmooring in fixed berths Rs. 32, swinging berths Rs. 10. Berth alongside jettles Rs. 40, per day, night work and holidays extra.

COCHIN.

The importance of Cochin harbour lies in year 1986, the Bibby Line took more passengers the fact that it would lead to the develop- from Cochin than from either Rangoon or ment of a valuable hinterland and provide a leady outlet for agricultural and other produce. The scheme involved cutting a passage through the bar, which previously blocked the entrance from the sea, to an extensive backwater; and then, by dredging and reclamation, forming a sheltered harbour, giving full protection and facilities at all seasons of the year. An agreement was reached in 1925 between the Governments of Madras, Travancore and Cochin indicating how the work was to be carried out and outlining the fluancial arrangements necessary. A trial cut was made in 1922-23 and the effects of the monsoon thereon was observed. The results recorded were examined by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 321 feet deep was completed on 30th March 1928. The channel through the outer bar is now 3 miles long by 450 feet wide and a minimum depth of 30 feet at L. W. O. S. T. is maintained throughout the year. Since 1930 the Harbour has been in constant and regular use by all ships, and regular passenger services have been inaugurated by the P. & O. Co., the Bibby Line, and the B. I. S. N. Co. To facilitate night navigation, the channels have been lighted. A powerful tug has been provided and ships can enter and leave the harbour at all states of the tide. A hotel on modern lines has been constructed to provide accommodation for passengers calling at the port. During the

Colombo.

Cochin was declared a major port under the control of the Government of India with effect from 1st August 1986, and the execution of the 4th stage works has been sanctioned and is now in rapid progress. These include the construction of deep water wharves with railway connections, construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities. These improvenents are being made on the new reclamation (Willingdon Island) of which about 775 acres have been formed already by dredgings from the harbour. This Island will be connected to the mainland by a rail and road bridge across the backwater, and by a road bridge to Mattancherri (Cochin). The Shoranu-Ernakulam railway line has been converted from metre to broad gauge and opened for traffic. The line will be extended to the wharves at the Willingdon Island. These developments, which are expected to be finished by the beginning of 1940, will greatly enhance the utility of the port to the planting and agricultural areas in that part of the Presidency.

The Principal Officers are :-Administrative Officer and Harbour Engineerin Chief.—R. C. Bristow, C.I.E., M. Inst. C.E., M.I. Mech. E.

Executive Engineer, Cochin Harbour Division.—A. G. Milne, M. Inst. C.B., M. I. Mech. B. Port Officer .- H. G. Fletcher.

Harbour Master .- H. A. Sheppard.

VIZAGAPATAM HARBOUR PROJECT.

The question of creating a harbour at Vizaga- days of the East India Company. That the patam to supply an outlet for a large area of creation of such a port would have beneficial fortile country adjacent to the east coast of influence on this area was unquestioned. fortile country adjacent to the east coast of influence on this area was unquestioned. India hitherto undeveloped, with considerable Viragapatam lies in front of the only practicable mineral resources and without suitable access gap in the barrier of the Eastern Ghate; to the outside world, was first formulated in the formed by nature to be the outside of the

Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications littherto available. A necessary complement of the scheme was the construction of the proposed railway from Parvatipuram to Raipur now completed which, with the existing coastline of the Bengal-Nagpur Bailway would make a large and rich area tributary to the proposed port and obviate the long and expensive circuit by Calcutta. A link has also been supplied in the most directroute to Bangoon from Europe by way of Bombay, while, from an imperial point of view, the provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting headland of the Dolphin's Nose would ofer facilities for this purpose.

The Government of India with the approval of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Raipur to Parvatipuram. The work is completed and the line opened to traffic. They also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major l'ort.

The work was carried out by a staff of Engineers under the direct charge of an Engineer-in-Chief who comes under the administrative charge of an Administrative Officer for the development scheme a post which is held ex-officio by the Agent of the B. N. Railway.

The scheme for the construction and development of the Harbour will be carried out in stages according to the demand of trade. The first stage is now complete. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Viceroy took place on 19th December 1933.

The present provision includes a 1,000 ft. diameter Turning Basin together with access to the steamer Berths and an Entrance Channel dredged out to afford a passage 300 ft. wide at the bottom. Vessels of 28 ft. 6 ins. draft and 550 ft. length are admitted at present.

A quay wall comprising three 500 ft. Berths has been completed and equipped with 3-ton electric oranes. Storage accommodation aggregating 140,000 sq. ft. of covered area, in three single storied sheds, has been provided in the vicinity of the quay, equipped with full railway and ror? facilities. Two sheds with lighter berths have been completed for export cargo. Special facilities have been provided for the storage and shipment of manganese ore. In addition to the quays, four Mooring Berths and one coal bunkering Jetty have been installed around the Basin and additional facilities provided for dealing with lightered cargo.

A large area of land has been reclaimed in the course of the dredging operations and it has been laid out in blocks served by broad roadways. Plots are available for office sites and for industrial concerns. Water supply and electric lighting have been arranged for

The floating equipment of the Harbour comprises five tugs of 1,500, 600, 450, 120 and 100 H. P. respectively and 27 lighters.

A graving dock with an entrance 60 ft. 6 in. broad has been provided; but though adapted for future extension and for use by vessels larger than the dredging craft which now use it, length of ships is at present restricted to 300 feet.

The port is at present capable of dealing with lifts of 50 tons on the quays but cannot lift more than 3 tons into and out of vessels.

The sea entrance channel is protected on the South side by the provision of a sand trap and protecting Breakwater.

At present ships enter and leave the Harbour during day time only and pilotage is compulsory. The Port is administered by the Government of India through the Agent of the Bengal-Nagpur Railway who is represented at Vizagapatam by a Deputy Administrative Officer.

The principal officers are:—
Administrative Officer.—A. Duncan, Calcutta.
Deputy Administrative Officer & Traffic
Manager.—W. O. Lilles

Manager.—E. G. Lilley, Vizagapatam.
Port Engineer.—S. Nanjundiah.
Hurbour Master.—J. W. Day.
Supdt. of Machinery.—F. H. McD. Wilson,
Vizagapatam.

PRINCIPAL PORTS AND TRADE CENTRES IN INDIA AND BURMA.

Indian education is unintelligible except western secular learning. The new institution trough its history. Seen thus, it affords the was distrusted both by Christian missionaries through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose sim has been to guide a people alien in senti-ments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education. rather than to cultivating a dealer for education, where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the intelligentsia are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed.
As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. In recent years, however, strenuous efforts have been made to remedy these defects. Primary Education Acts have been passed in the several provinces in favour of the expansion of primary education among the masses. On the other hand, the numbers of students in colleges and universities have grown apace; and, especially during the period of financial depression, the volume of middle class unemployment has reached alarming proportions. A movement has therefore set in with the object of stemming the drift of unsuitable students to universities by means of a radical reconstruction of the school system of education. The inauguration of provincial autonomy in 1937 has given a further impetus to educational reconstruction.

The Introduction of Western Learning
—in the early days of its dominion in India,
the East India Company had little inclination
for the doubtful experiment of introducing
western learning into India. Warren Hastings,
the dominating figure of the time, was a genuine admirer of the laws and literature of the East, His policy was to enable the ancient learning to sevive and flourish under the protection of a sta-ble government, and to interfere as little as pos-sible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance."

It was from sources other than Government that the desire for western knewledge arose in India. In 1816, David Hare, an Eng-lish watchmaker in Osleuta, Joned hands with the enlightened Erahmin, Mohan Roy, to insti-

and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Commit-tee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice." medical science in still accordance of the calcutta and the contraction of the calcutta was the case of the calcutta and the calcutta and the calcutta was the case of the calcutta was the calcutt practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time enward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impetus to the introduction of western learning was the devotion of Christian missionaries. The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818; and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta, In Madras, the missionaries had been still earlier in the field; for as early as in 1787 a small group of missionary schools were being directed by Mr. Schwarz, The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in

Lord William Bentinck's minute of 1885 (based upon Macaulay's famous minute) marks of somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected; still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835; English was substituted for Persian as the language of the Courts in 1887; and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new Jearning took firm root in India: and, though the Muhammadans still held aloot, the demand for English schools orderipped the means of Government for providing them. Fortunately there has been of late a marked appearance among Muslim leaders of the need of improving the instructional level of their co-valigionists; and in many of the previous of diadis: a great impulse towards educational advance among the Muhammadan community in many motives his. In the following decade the new learning took

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance the emphasis which it isld on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which "to compar the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instruction were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available publie funds had been expended upon a few Government schools and colleges, and instituted a ment soncors and colleges, and instituted a policy of grants-in-aid to private institutions. "Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people." tansion of its benefits to all classes of people." Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its results of the contraction of the cont It enabled Government to select recruits for its service on an impartial basis; it did much, shrough the agency of its Colleges to develop backward piaces; it accelerated the conversion of Indians to a seal for western education; and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars but corporations of scholars in the corporations of scholars. new universities were not corporations or sono-ara, but corporations of administrators; they did not deal directly with the training of men, but with the examination of candidates; they were not concerned with learning, except in so far as learning can be tested by examination. so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses; their teachers were dealed that freedom which teachers should enjoy and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not solitowed. The Directors did not intend that the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions; they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too library course of instruction; they hoped that the system of education would rouse the people of India to davelop the west resources of their country ...and gradually, but certainly, confer upon them all the davelops which accompany the healthy increase of wealth and commerce. The

advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being re-moved gradually by the establishment of independent Boards of Intermediate and Secondary Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902-4.

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent. of the ordinary members of the Senates and to approve the election of the remainder: the Goapprove the election of the remainder, the overment retained the power of cancelling any appointment and all university resolutions and proposals for the affiliation of colleges were to e subject to Government sauction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects but their sope was in practice limited to post-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connex-ion with institutions lying outside those bounion with institutions lying outside those boundaries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and the descriptions. of the departments. They assumed the per-manent validity of the existing system, in its main features, and set themselves only &

Recent Developments.

Government of India Resolutions on institutions maintained by the Governor-Genera Indian Educational Policy.—The Indian Universities Act of 1904 was followed by two important resolutions of the Government of India on Indian Educational Policy—one in 1904 and the other in 1913. The resolution of 1904 was comprehensive in character and reviewed the state of education in all its departments. The following passage from it summarises the intentions of Government :-"The progressive secondary and o devolution of primary. secondary and collegiate education upon private enterprise and the continuous with-drawal of Government therewith was recommended by the Education Commission in 1883 and the advice has generally been acted upon. But while accepting this policy, the Government of India at the same time recognise the extreme importance of the principle that in each branch of education Government should maintain a limited number of institutions, both as models for private enter-prise to follow and in order to uphold a high standard of education. In withdrawing from direct management it is further essential that Government should retain a general control, by means of efficient inspection, over all public educational institutions." The comprehensive instructions contained in this comprehensive instructions contained in the resolution were followed in the next few years by the assignment to the provinces of largo Imperial grants, mainly for University, technical and elementary education. The resolution of 1913 advocated, inter alia, the establishment of additional but smaller Universities of the teaching type; it reaffirmed the policy of reliance on private effort in secondary education; it recommended an increase in the salaries of teachers and an improvement in the amounts of grants-in-aid; and it insisted on proper attention being paid to the formation of character in the education given to scholars of all grades. It further discussed the desirability of imparting manual instructions and instruction in hygione; the necessity for medical inspection; the provision of facilities for inspection; the provision of facilities for research; the need for the staffing of the girls' schools by women teachers and the expansion of facilities for the training of teachers. The policy outlined in 1913 materially accelerated progress in the provinces, but the educational developments foreshadowed were in many cases delayed owing to the effects of the Great War.

The Reforms Act.—The Reforms Act of 1919 attered the conditions of educational administration in India. Education became a provincial 'transferred' subject in the Goverprovinces under the charge of a Minister, but the education of Europeans was made a provincial 'reserved' subject, i.e., it was not within the charge of the Minister of Education. The introduction of the provincial autonomy under the Government of India Act, 1935, has brought education in these provinces under the full control of their Ministers of Education.

The Government of India still deal with matters relating to Universities like Aligarh, Benares, and Delhi, and certain other Universities which function in more than one province. The

in Council for the benefit of members of His Majesty's Forces or of other public servents or of the children of such members or servants. The Chiefs' Colleges are now the concern of the Crown Representative.

Administration.—The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Assembly, of which he himself is an elected member, has brought the subject directly under popular control in the cloven major provinces. Generally speaking, edu-cation, is not however, under the charge of a single Minister in all the provinces of India. of education have Certain forms transferred to the technical departments concorned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruc-tion is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the provincial government for the administration of education. The authority of Government, in controlling the system of public instruction, is in part shared with and in part delegated to Universities as regards higher education and to local bodies as regards elementary and verna-cular education. In some provinces, boards of secondary, or of secondary and intermediate, education have also been set up and have to some extent relieved the Universities in those provinces of their responsibilities in connection with intermediate education and with entrance to a University course of studies. Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and by local bodies.

Department of Education, Health and Lands of the Government of India
—In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Buller. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. The Hon'ble Kunwar Sir Jagdish Prasad and Inc. non one Aunwar sir usgaish Frasad and Sir Girja Shankar Isajuat are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner with the Government of India. The present Educational Commissioner is Mrs. John Sargert 4. Mr. John Sargent, M.A., who is an eminent educationist of wide experience,

Central Advisory Board of Education.— In 1920, a Central Advisory Board of Education was created in India under the chairmanship of the Educational Commissioner with the Government of India. This Board served a very useful purpose in offering expert advice on important aducational matters. But as a result of the recommendations of the Indian Retrenchment Government of India are also in charge of the Committee, which was presided over by Lord

incheste, it was abolished in 1923 in the interests of economy. This Board was revived in 1985. Its main functions are to serve as a clearing house of ideas and a reservoir of information.
The constitution of the Board is as follows:—
The Hon'ble Member in charge of the Depart-

ment of Education, Health and Lands (Chairman)

The Educational Commissioner with the Government of India.

Ten nominees of the Government of India. One member elected by the Council of State. Two members elected by the Legislative Assembly.

Three members nominated by the Inter-University Board, India.

One representative of each provincial Government (sither the Minister for Education or his deputy or the Director of Public Instruction or his deputy).

There is also a Secretary to the Board, who

is appointed by the Government of India.
In 1985, the Board passed a series of important resolutions suggesting a radical reform of the present system of education so that apart from providing instruction which would lead to universities and to professional colleges, the system might have stages at the end of which students could branch off either to occupation or to vocational schools. All the provinces have reviewed their system of education in the light of these resolutions and several are considering the possibilities of reconstruction of that system on lines approximating to those suggested by the Board. The main subject of deliberation at the Board. The main subject of deliberation at its meeting held in 1936 was that of primary education. The Board referred this question to its Vernacular Education Committee with definite suggestions in regard to the nature of administration and control of primary education.

The sub-committee reported that there was need of more efficient administration and control of primary education and recommended, inter alia, that Government should take over the control from local bodies. The Board considered the report at its third annual meeting and decided that a copy of it should be forwarded to Provincial Governments for consideration and such action as they might consider necessary. The report of the Women's Education Committee of the Board on the curriculum of girls' primary schools was also considered. The report first deals with certain conditions which are essential before any curriculum can work smoothly and seauxe any curriculum can work smoothly and then proceeds to the actual curriculum which would be suitable for girls' primary schools. The suggestions made in the report were generally accepted and the Board decided that a copy of this report should also be forwarded to Provincial Governments for consideration and such action as they might consider necessary.

Several provinces have taken action on the lines suggested in the report of the Vernacular Education Committee whilst others have appointed committees of their own to report on these questions. In view of the importance of this matter, the Educational Commissioner with the Government of India has been asked to watch any further development in the provinces and report again to the Board. The provincial Governments are also generally implementing the recommendations of the Women's Education Committee of the Board on the curriculum of Committee of the Board on the Committee of the Board on the Committee of the Board on the Committee of the Com girls' primary schools in India mentioned above.

Another subject of considerable importance that was considered at the third annual meeting of the Board in January 1938 was the report on Vocational Education in India by Mr. A. Abbott, C.B.E., formerly H.M. Chief Inspector of Technical Schools, Board of Education, England, with a section on General Education and Administration by Mr. S. H. Wood, M.C., Director of Intelligence, Board of Education, England. During the discussion on this report, what is popularly known as the Wardha educa-tion scheme was referred to. The basic idea of this scheme is that education should be imparted through some craft or productive work which should be the centre of all the other instruction provided in the school and by the sale of the produce make the school self-supporting. The Board felt that a further examination was desirable and appointed a special committee to examine the scheme of educational reconstruc-tion incorporated in the Wardha scheme in the light of the Wood-Abbott Report and other relevent documents. This committee met in June 1938 and submitted its report to the Board in December 1938. The recommendation made in the report were generally accepted by the Board at the meeting referred to above, and the Board decided that copies of the report should be forwarded to provincial Governments for consideration and such action as they might consider necessary.

During the consideration of this report issues arose which did not come within the terms of reference of the Committee e.g. the question of financing the Wardha Scheme and its co-ordination with the existing forms of higher education. The Board accordingly has appointed another committee to examine these and other questions arising out of this scheme.

Another subject of considerable importance that engaged the attention of the Board at its fourth annual meeting was the problem of adult education and illiteracy in India. Realising that a survey on an all-India basis would be useful. the Board has appointed a committee to examine

this problem and submit a report.

The Board has also decided that it should act as a National Centre of Educational Information for India.

Bureau of Education in India.—As a measure of retreachment, the Bureau of Edu-cation was abolished in 1923, but accepting the advice of the Central Advisory Board of Education in India, the Government of India revived it in 1937 under the control of the Educational Commissioner with the Government of India for dealing specially with the collection and dissemination of literature relating to educational problems in the various provinces. The Secretary of the Board is the Curator of this Bureau.

Educational Services.—Until recently, the educational organisation in India consisted mainly of three services—(6) the Indian Educational Service, (ii) the Provincial Educational Service, and (iii) the Subordinate Educational Service. The Indian Educational Service. came into existence as a result of the recommendations made by the Public Services Commission of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent, than the pay of the Indian recruit. Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islington Commission of 1912-16, the Indian Educational Service was formed into a superior educational service and all posts were thrown open to Indian recruitment. The Provincial Educational Service was simultaneously reorganised and a number of posts, generally with their Indian incumbents, were transferred to the superior educational service. This reorganisation resulted in a considerable Indianisation of the superior educational services in India. It was then laid down that the proportion of Indians in this service should on an average be 50 per cent. of the

In 1924, all recruitment to the Indian Educational Service was stopped as a result of the recommendations of the Royal Commission on the superior services in India. The Commis-sion recommended that "for the purposes of local Governments no further recruitment should be made to the all-indis services which operate in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments." The Commission further recommended in regard to the question of the future recruitment of Europeans that "it will rest entirely with the local Governments to determine the number of Europeans who may in future be recruited. In this matter the discretion of local Government must be unfettered but we express the hope that Ministers on the one hand will still seek to obtain the co-operation of Europeans in these technical departments and that quali-fied Europeans on the other hand may be no less willing to take service under local Governments than they were in the past to take service under the Secretary of State," As a result of the acceptance of these recommendations, the Indian Educational Service is dying out and with the gradual retirement of its existing members, the history of the service which has had a brief but fine record will be brought to an end. The present organisation of education in the provinces is largely the work of members of this service; while in the sphere of higher education, it has trained many men of more than ordinary attainments.

The new Provincial Educational Services which function under provincial control as the superior educational services, have been constituted in most provinces. These schemes vary from province to province, but it may be generally remarked that, while the rates of pay are not uniform, they consist of two main classes—class I into which the existing Indian Educational Services have been merged for the time being, and class II which may be said to represent the old Provincial Educational Service.

The arising Provincial and Subordinate

The existing Provincial and Subordinate Educational Services in the provinces have been affected, more in some provinces than others, by the changes which have taken place since 1919. Communal interests have influence recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service contentment. But these results are the natural consequences of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departments in the provinces.

Hartog Committee on Education.—The Auxiliary Committee of the Indian Statutory Commission was appointed in 1928 under the Chairmanship of Sir Philip Hartog, to report on the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document for India.

Lindsay Commission.—Another Commission. which deserves mention, was appointed in 1929 by the International Missionary Council to investigate the various problems connected with the higher education provided by the various Missionary bodies working in India. If was presided over by Dr. A. D. Lindsay, Master of Balliol College, Oxford. The Commission visited India in 1930-31 and its report was published in 1931.

Unemployment Committee, United Provinces—This committee known popularly as the Sapru Committee from the name of its distinguised chairman the Right Hon'ble Sir Tej Bahadur Sapru was appointed by the Government of the United Provinces in 1984 to investigate the question of unemployment among educated young men and to suggest practical ways and means for reducing the same. The report of the committee, which was published in 1996, constitutes a valuable document not only for the United Provinces but for the whole of India

Statistical Progress.

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

986-87	• •					• •		16,70,84,782	28,05,69 374

In 1936-37 the total expenditure on education : in British India amounted to Rs.28,05,69,374 of which 43.1 per cent, came from Government funds, 16.5 per cent from District Board and Municipal funds, 25 3 per cent from fees and 15.1 per cent, from endowments and benefactions, etc.

The average annual cost per scholar in all institutions, down from a university to a lower primary school, amounted to Rs. 20-14-2 as follows: to Government funds Rs 8-15-10, to local funds Rs. 3-7-2, to fees Rs 5-4-8 and to other sources Rs. 3-2-6.

During the yea. 1936-37, 51.7 per cent. boys and 17.9 per cent girls of school going age were at school. Out of a total of 10,070,764 boys in primary and secondary classes, 3,703,537 were enrolled in the lowest primary class alone The corresponding figures for girls were 2,960,217 and 1,587,209. Of the boys enrolled in the primary classes (I-V), no less than 42.6 per cent

following table:

in the 2nd class, 16 2 per cent in the 3rd and only 12 3 per cent and 7 8 per cent in the 4th and 5th classes respectively 56 3 per cent of the girls enrolled in the primary classes were studying in (lass I, 19 3 per cent in Class II, 12 7 per cent in Class III, 7 6 per cent in Class IV and 4 1 per cent in Class V. There is thus There is thus very uneven distribution of pupils in primary classes

The wastage in primary education still utinues. This wastage in the whole of British India calculated on the number of boys and girls who reached Class IV in 1986-37 comes to 72 per cent. and 86 per cent, respectively. But a comparison of the figures with the last five years shows that the wastage percentage has fallen from 79 per cent. in 1931-32 to 72 per cent in 1936-37 in the case of boys. The corresponding figures for girls are 90 per cent, and 86 per Thus there are hopeful signs that even if this steady, though slow, progress is mainwere reading in the 1st class, 21.1 per cent. | tained the situation will greatly improve.

The different types of institutions with the scholars in attendance at them are shown in the

The number of scholars in Universities represents the research students in the affiliating Universities or the number of students under the direct control of teaching or unitary Universities

eight provincial legislatures have introduction of compulsory education by local option. All the Acts are drafted on very similar lines. If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from Government. Ordinarily the age limits of compulsion are from six to ten years though provision is made for prolonging, the period. Provision is also made in all the Acts for the exemp- in availing themselves of the opportunity affordtion of particular classes and communities and for special exemption from attendance in cases

Primary Education.—The primary schools of bodily infirmity. Walking distance to a are mainly under the direction of the local school is generally defined as one mile from the boards and municipalities. In recent years, child's home. The employment of children, t years, child's home. The employment of children, passed who should be at school, is strictly forbidden Education Acts authorising the and a small fine is imposed for non-compliance with an attendance order. The Acts generally provide that, subject to the sanction of the provincial Government, education where com-pulsory shall be free. The Madras Elementary Education Act of 1920 contained such provision. but it has recently been amended so as to allow fees to be charged in schools under private management situated in areas where education is compulsory, reserving however a number of free places for poor pupils in such schools in areas where there are no free schools. Such in brief are the ordinary provisions of the various provincial Education Acts. Local bodies have not however shown as yet any great alsority ed them by these Acts.

Compulsory Primary Education .- The following tables shows the urban and rural areas in which compulsion had been introduced by the year 1936-37:-

	1	Areas u	ınder " Com	pulsion.''

N.B.—This table does not include areas for which schemes of compulsory primary education e under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

^{*} In 357 selected areas of 25 districts.

Due to the indifferent attitude of the local bodies, compulsion has not proved as fruitful as it was intended to be. The mere passing of a Compulsory Education Act even in those areas where compulsion is considered desirable does not in itself either bring children to school or keep them there. The effective administration of the Act is necessary. Difficulties arise in the administration which tend to make the Act inoperative. The lack of attendance officers, the difficulty of deciding who is to prosecute, in many cases the indifference of magistrates, the law's long delays, the absence of up-60-date local census records are instances of weaknesses in the administration of Compulsory Education Acts. These difficulties are, however, surmountable and in some provinces, steps are being taken to improve the situation.

The provinces now appear to realise the danger of the transference of the control of primary education to local bodies without retaining sufficient powers of control. In some provinces, there is a move to take over control of primary education from local bodies. For example, the Government of Madras amended their Primary Education Act during the year 1935-36 to enable them to exercise more powers in the control of primary education.

Secondary and High School Education,-Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools, 'one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non-literary pursuits." Some years later, what were called B and C classes were started in some schools in Bengal but, as they did not lead to a university course, they have not been successful. In more recent years the Government of India have advocated the institution of a school fined examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination, which was placed under the direction of a Board representative of the University Government, proved somewhat and of cumbrous and certain modifications were made. In the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose. Similarly, the Administration of Delhi has established a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer, for Rajputana, Central India and Gwalior. In the Punjab the school leaving examination is conducted by a Board. But the main difficulty has not yet been touched. The University which recognises the schools has no money where-with to improve them; and the Department of Public Instruction, which allots the Government grants, has no responsibility for the reogni-tion of schools, and no connexion whatever with the private unsided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matri-culates are often unable to benefit by the col-

lege courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State. In Bombay, the gravity of the situation created by the dual control of secondary education was realised and consequently in 1935 negotiations began between the university and the Education Department which resulted in the passing of a number of new University Statute governing the inspection and affiliation of high schools by the university. These Statutes are expected to remove all causes for friction between the University and the Department in the matter of inspection and affiliation of high schools. Machinery has also been devised whereby any difference of opinion between the University and the Department as to the eligibility of a school to receive recognition will be decided by a joint inspection of the University and the Department.

As has already been stated, there is now a widespread desire to cure these evils by a radical reconstruction of the school system of education. The main defect of the present system is that all pupils, even those in the primary stages, are educated on the assumption that they will ultimately proceed to a university. In consequence, very many pupils drift on to a university and prolong unduly their purely literary studies. In order to counteract this tendency, the school system should be divided into separate stages, each with a clearly defined objective released from the trammels of a university. On the successful completion of each stage, pupils should be encouraged either to join the humbler occupation of life or to proceed to separate vocational institutions, which should be provided in more ample measure than at present.

Reconstruction along these general lines was first proposed by the Punjab University Committee, and was subsequently endorsed by University the Universities Conference which met in Delhi in 1934. Its details were worked out in greater detail in an important Resolution of the Government of the United Provinces later in the same year. The matter was also considered by the Central Advisory Board of Education, which generally endorsed the views expressed by the Universities' conference and suggested that expert aid should be obtained to work out the scheme of school reconstruction in the provinces. The Government of India, in consultation with the provincial Governments. accepted this suggestion and the services of two experts—Mr. A. Abbott, C.B.E., formerly Chief Inspector of Technical Schools, Board of Education, England, and Mr. S. H. Wood, Director of Intelligence, Board of Education, England, were obtained for this purpose. As these experts considered that an intensive study of a limited area would be more profitable than a necessarily cursory survey of the greater part of British India, they limited their investigation mainly to three provinces, viz., the United Provinces, the Punjab, and Delhi, although they discussed their problems with administrators, teachers and others concerned with education from practi-cally every province. Their recommendations are contained in their report commonly called the Wood-Abbott Report on Vocational Educa-tion in India of which mention has been made

Mention may be made here of the United Provinces Primary and Secondary Education Reorganisation Committee, which was appointed by the Provincial Government to suggest changes in the educational system of the Province in the light of the Wood-Abbott Report and the Wardha Education Scheme. The Committee has now submitted its report to the Provincial Government. Its main recommendations are that there should be a uniform system of free and compulsory primary education for all children both in rural and urban areas extending over seven years beginning from the age of seven, the medium of instruction being "Hindustani" taught in both the scripts (Devanagri and Persian), that throughout this period education should, as far as possible, be carried on through concrete life-situations and should be correlated with one or more forms of manual and productive work, and that the system of secondary education should be a complete and integrated whole and the courses should be selfsufficient and constitute a unit by themselves.

Anglo-Indian and European Education. There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India. But efforts are being made to bring these schools more into tine with the ordinary schools, and Indian Universities generally are affording special facilities for Anglo-Indian boys who may proceed for higher education in Indian colleges.

Recently, as a result of the recommendations made by the Irwin Sub-Committee of the Third Indian Round Table Conference, Provincial Boards for Anglo-Indian and European Education have been constituted in almost all Provinces; and an Inter-Provincial Board has also been constituted, the first meeting of which was held in January 1935 under the auspices of the Government of India. The office of the Inter-Provincial Board has been located in Delhi. The present Scoretary of the Board is Mr. F. F. C. Edmonds, M.A. B.Sc., late Inspector of Schools. Coorg and Bangalore. He is ols othe Chief Inspector of Anglo-Indian and European Schools in India, The Provincial and Inter-Provincial Boards of Anglo-Indian and European Education are functioning satisfactorily and will, it is hoped, lead to an improvement in the courses of study and to higher standard of education for the Anglo-Indian and European Communities

Medium of instruction in public schools. The position of English as a toreign language and as a medium of instruction in public schools was discussed by a representative con-ference which met at Simis in 1917 under the Chairmanhip of Sir Sankaran Nair, the then Education Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understrongs a menium wanter was impercedly indef-stood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive. Some of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects. There seems to be no doubt that the use of the vernacular as the medium of instruction and examination is

gradually increasing all over India.

The main difficulty, however, is that school classes have often to be split up at considerable expense into a number of language sections. The problem needs further investigation, especially in the direction of evolving a common script for at least a single province, if not for the whole of India. In this connexion, Mr. A. Latifi, I.c.s., has done good ploneer work in respect to the Romanised Urdu Script. Some members of the Committee of the Central Revi-sory Board of Education appointed to consider the Wardha Education Scheme also felt that the adoption of Roman script might prove a solution to the language difficulty and greatly minimise the work of both scholar and teacher.

Boy Scout Movement.—A happy develop-ment in recent years has been the spread of the boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline.

It is gratifying that intimate contact is being established between the Boy Scout Move-ment and the Junior Red Cross and St. John's Ambulance Associations, as well as with move-ments for social uplift and improvement of village conditions

Girl Guide Movement.—This movement is making steady progress. There is, however, a lack of those competent and willing to give instruction.

Medical Inspection .- Arrangements have been made for medical inspection of students but progress has been hampered owing to the shortage of funds and the continued apathy of parents. In Madras, with effect from the beginning of the year 1932-33, Government directed the discontinuance of grants from Provincial Funds towards the cost of medical inspection of pupils as a measure of retrenchment. Government have, however, been considering for some time past the question of adopting as early as possible an intensive scheme of medical inspection with provision for follow-up work, though a satisfactory and practicable scheme has yet to be framed. In Bombay, a regular medical inspection is not held in every Government secondary school or in every aided school. The expense involved in such regular inspection has prevented it being introduced as yet. In Bengal very little has been done for any organised scheme of medical examination and supervision of the health of pupils. The Government has approved the scheme for the medical examina-tion and supervision of pupils in Government High Schools and high madrasahs outside Calcutta but it has not so far been able to find funds for it. In the United Provinces schools are inspected by School Health Officers who are under the control of the Public Health Department. These officers pay regular periodical inspection visits and the health of the students has been generally satisfactory. In the Punjab has been generally satisfactory. In the Funjan the important question of medical inspection and treatment of school children has received attention and much useful work is being done in this direction. A beginning has also been made in introducing regular medical statements. local authorities have since then approved and treatment in Government Girect

In Minar, there is a school medical officer and an assistant school medical officer for all the high schools of each division. In Assam, almost all Government High Schools and some sided high schools are inspected by medical some medical inspection of all boys once a year and of recording the results of their examination in "Health Cards" is conducted in Government on this account is admitted for grants-in-aid in schools maintained by other bodies. Private on this account is admitted for grants-in-aid in schools have also begun to follow this system in that province.

The activities of Junior Red Cross and St. John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in

the health of others.

Professional and Technical Education.—
A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Its buildings were seriously damaged by the Bihar earthquake in 1934. The Institute has therefore been transferred to New Delhi, where new buildings have been constructed for it. Conferences have been constructed for it. Conferences have been object of providing a suitable training in agriculture. The Royal Commission on Agriculture submitted its report in 1928 and council of Agricultural Research has been destablished by the Government of India

College of Commerce and Economics in Bombay. Industrial institutions are dotted about India. some maintained by Government, others by municipalities or local boards, and others by private bodies. The most important are the Victoria Jubilee Technical Institute in Bombay and the Indian Institute of Science at Bangalore the product of generous donations by the Tata family. The tendency in recent years has been to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Sibpur, Poona, Guindy (Madras), Mughalpura, Patna and Benares each of which except that at Roorkee is affiliated to a university. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the and a Technical Institute is in existence at Campore and a Mining School at Dhanbad Mining and metallurgy are also taught at the "I.M.M.T.S. Duffer in " has been stationed for

The following table shows in summary from the number of such institutions and of students attending them:—

		193	6.	19	37.

ures against training college include those of the training colleges attached to the typicalise at Benares and Aligarh and of the teaching department of Rangoon University.

I.M. M. T. S. Dufferin. On the recommenda- (Walchand Hirachand, C.I.E., (Indian tions of the Indian Mercantile Marine Committee in 1923 and Capt. Sayer's Report, the Govern-ment of India, in the Department of Commerce, started the Indian Mercantile Marine Training Ship "Dufferin" in Bombay waters. His Excellency, the Vicercy, Lord Irwin, formally opened the Ship on 1st November 1927 with an opening batch of 30 cadets, Capt. H. Digby-Beste, R.I.N., being the first Captain-Superintendent.

Since its establishment 11 years ago, the "Dufferin" has trained 332 Indian cadets, of whom 13 are officers in the Royal Indian Navy, and 100 are in the Mercantile Marine; 29 are serving as officers in the ancillary or other services and 130 are at present apprentices either at sea or in workshops ashore. At present there are 123 cadets in training.

The affairs of the Ship are managed by a Governing Body composed of the following:-

Chairman,-The Hon'ble Diwan Bahadur Sir A. Ramaswami Mudaliar, (Commerce Member to the Government of India) (ex-officio).

Members .- W. Grieve, M.A., B.Sc., C.I.E., I.E.S., Director of Public Instruction (ex-officio);

Watchand Hirschand, C.L.E., (Indian Shipping); The Hon'ble Maulvi Sir Mohammad Yakub, (Non-maritime Provinces); Sir Abdul Halim Ghuznavi, M.L.A. (Central), (Bengal Province); Basheer Ahmed Sayeed; M.A., B.L., M.L.A. (Madras), (Madras Province); A. K. G. Hogg, (British Shipping); R. P. Masani, M.A., (University of Bombay); Gordhandas Goculdas Morarji, (Bombay Port Trust); Captain R. C. G. McClement, R.I.N., J.P. (Secretarn).

The present Captain-Superintendent is Capt. R. C. G. McClement, R.I.N., J.P., who is assisted by 3 Executive Officers, 2 Engineer Officers, 1 Head Master and 5 Assistant Masters.

The age limit for admission is between 18 years 8 months and 16 years on 15th January of the year of entry. Annually 50 Cadets—25 for the Executive and 25 for the Engineering Branch—are admitted for a 3-year course, terminating in the Final Passing Out Examination of the Ship, which is recognised as equivalent to Matriculation in India,

The total cost to the parent of training a boy is about Rs. 1,800 for the 3-year course. A number of scholarships are available for M. A. Master, B.A., Ll.D. (Indian Merchants cadets of deserving parents or of those who are Chamber); K. C. Dinshaw, J.P., (Indian Shipping); in straitened circumstances.

Indian School of Mines.

School of Mines at Dhanbad for high grade in-struction in Mining Engineering and Geology, A Diploma (A.I.S.M.) is granted and certain the period of practical mining experience nor-statutory privileges are enjoyed by Diplomaholders in respect of the examinations of the Department of Mines for the Coal Mine Managers' Certificates of Competency. There are three-year Certificate Courses but the full Diploma Course occupies four years. The and the University—has agreed to the holding Secretary for Mines, Great Britain, has approved of its Intermediate and Final Examinations for the school in respect of its Diploma of Associate-that degree in the premises of the School at ship in Mining Engineering under Section 9(b) Dhanbad.

The Government of India maintains the Indian | of the British Coal Mines Act, 1911. A holder class certificates of competency prescribed by the Act. The Diploma has also been recognised by the University of London for the purpose of its B.Sc. degree in Engineering (Mining)

Universities.

The first University in India, that of Calcutta, was founded in 1857. Between 1857 and 1887 four new Universities, at Bombay Madras, Lahore and Allahabad were added. These five universities were all of the affiliat-ing type. The Government of India had recognised in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the existing affiliating universities. The development of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the establishment of a number of teaching universities. The new type of universities has since been strongly advocated by the Calcutta University Commision which has offered constructive proposals as to the lines to be followed in university reform.

Calcutta University Commission.—The report of the Calcutta University Commission was published in August 1919.

The Commission gave detailed suggestions for the reorganisation of the Calcuttta University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Dacea. These measures concerned only Bengal but it was generally recognised that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Madras, Bombay, Patna and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to prepare a scheme for a unitary ed, one to prepare as successful, the acting University at Lucknow, the acting to consider measures for the reorganisation of the Aliahabad University and the creation or a Board to control secondary and interes aducation.

* The Punish University Esquiry Committee was appointed in 1932 and submitted its report in the following year. The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever-increasing number of its students many of whom are illisted for such education." The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education.

There are now 19 Universities in India, (including Burma) of which three are situated in Indian States. The last University in India Was established in Travancore in 1937. The following table gives the latest available figures and certain other particulars about all these Statistics of Universities-1936-37. Universities except Travancore:-

Intermediate Colleges.—One important pert of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow and Dacca and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of high schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Education, Such a Board was constituted for the Dacca University area by a notification of the Government of Bengal in 1921.

The United Provinces Board was constituted by an Act passed in the same year. The Aligarh Muslim University has, however, reverted to the old system under which the Intermediate classes form part of the University, and the separate Intermediate College has been abolished. In Ajmer-Merwara, the Intermediate classes are under a separate Board which operates in Kajputana, Central India and Gwallor. Intermediate Colleges of the new type have also been established in the Punjab, but they are affiliated to the Punjab University.

Inter-University Board.—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925. All the Universities in India are now members of the Board. Its functions are:—

- (s) to act as an inter-university organisation and a bureau of information :
 - (b) to facilitate the exchange of professors;
- (c) to serve as an authorised channel of communication and facilitate the co-ordination of university work;
- (d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries;
- (s) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education:
- (f) to act as an appointments bureau for Indian universities;
- (g) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

The Inter-University Board also functions as a National Committee of Intellectual Co-operation in India so far as questions of high education are concerned.

The Board has not yet had much influence on University policy in India but it has done a considerable amount of useful work in collecting information and in atimulating thought regarding current University problems. Education of Indian Women and Girls.—
The female education continues to progress. It has now been recognised that the education of girls is necessary for happiness and progress in town and village with the result that the forces of conservatism have weakened. Customs and prejudices which were for long detrimental to the advancement of female education are now disappearing. In some provinces, co-education is regarded as a solution of many difficulties in the way of girls' education. For example, Madras and Assam have more girls under instruction in boys' institutions than in those for girls. There is, however, much leeway still to make up as only 17-9 per cent, girls of school-going age were enrolled in the primary classes during the year 1936-37.

For the higher education of women, there are colleges specially meant for them, e.g., there were 31 arts colleges with 2,892 women students, 8 training colleges with 301 women students, and one medical college with 138 women students during the year 1936-37. In addition, women are also admitted to certain arts and professional colleges for men In 1936-37, 3,149 women were reading in arts colleges for men, 147 in training colleges for men and 369 in other professional colleges for men The Lady Hardinge Medical College for Women at New Delhi continues to retain its all-India character by attracting students from all over India. It provides a full medical course for women students leading to the M.B.B.S. Degree and is affiliated to the Punjab University, The Women's Christian Medical College, Ludhiana, has also been affiliated to the University of the Punjab for the First Professional M.B.B.S. (Anatomy and Physiology) Examination.

The Shreemati Nathibal Damodher Thackersey Indian Women's University, which was started at Poona by Professor Karve in 1916, was transferred to Bombay in 1936. It is a private institution and is doing much useful work

The All-India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All-India Women's Education Fund Association has also been established in connection with this Conference. This association appointed in 1930 a special committee to enquire into the feasibility of establishing a central Teachers' Training College of a specialised Home Science character. This committee recommended the establishment of such a college "on absolutely new lines which would synthesise the work of existing provincial colleges by psychological research." The proposal was adopted by the Association and a college, called the Lady Irwin College, has since been established in New Delhi. The college provides a three years' Teachers' course for those who wish to quality as High School Teachers of Home Science. Others take the Home course of two vears.

is to be effective, and his future, after his service is ended, depends upon his standard of education and his trustworthiness. In short, the army aims to make him an intelligent soldier and a good citizen. Education in the Indian Army. - The Army soldiers are under instruction as an integral part of their training. Their school knowledge, if any, is revived and extended: the non-India has a system of education whereby all any, is revived and extended: the nonettered recruits are taught to read and to

The objective is twofold: a modern soldier requires knowledge and initiative, if his training are available in every unit.

write and the certificates awarded range from elementary to advanced certificates of the

order of matriculation. The army has a school or the training of its own teachers and these

Specialised schools are maintained according to English public school tradition, some pupils

Army is growing: standards are rising con-tinuously and the number of candidates for the higher certificates steadily increases. The annual number who take the highest Indian The demand for education in the Indian of which become commissioned officers.

Army certificate is 634 (1938). The soldier receives instruction in Rural Reconstruction and Citizenship and he is provided with an excellent newspaper printed in Urdu, Hindi, Gurmukhi and English.

Doon School.—The efforts of the Indian Public Schools Society, which owes its origin to the initiative and enthusiasm of the late is attempting to develop, in an atmosphere of Indian culture and social environment, the Mr. S. R. Das, have culminated in the establishment of a school at Dehra Dun. The school best features of English Public Schools.

was opened by His Excellency the Viceroy Willingdon) in October, 1985. The School is located on the two estates known as Chandbagh (on rent from the Government of India) and the adjoining estate, known as Skinner's, which has been purchased by the Society. There are at present about 255 pupils who are distributed in four houses. Mr. A. E. Foot continues to be the Headmaster. He is assisted by nineteen masters, of whom six have been appointed from England. The School prepares candidates for the Senior Cambridge Examination and thereafter for the United Provinces Intermediate Examination, subsequently for entrance to the Indian Military Academy and Medical and Engineering Colleges, or for English Universities. The age of admission is between 11 and 13 years, and the age of leaving is about 18 years. The oldest boys at present were born in 1921. The Board of Governors of the Society, which maintains the School, includes the Hon'ble Kunwar Sir Jagdish School, includes the Hon Die Kunwar Sir Jagoish Prasad (Chairman), Sir B. L., Mitter (Vice-Chairman), Mr. J. G. Laithwaite, Mr. John Sargent, Mr. M. S. A. Hydari, Rai Bahadur Amarnath Atal, Rai Bahadur Chuttan Ial, Dr. Syama Prasad Mookerjee, and Mr. B. M. Staig (Honorary Treasurer). His Excellency the Vicercy is President.

Indigenous Education.—Of the 14,146,088 scholars being educated in India 711,656 are classed as attending 'private' or 'unrecognised' institutions. Some of these institutions are of importance: The Gurukula near Hardwar and Sir Rabindra Nath Tagore's School at Bolpur have attained some fame. There is also an Indian Women's University at Bombay, to which reference has been made under the education of Indian women and girls. This University provides instruction through the medium of vernacular, English being, however, a compulsory subject. Four colleges are affiliated to the University which are situated at Bombay, Poona, Ahmedabad and Baroda. Connected with every big mosque in northern India there is some educational organisation and the schools attached to the Fatchpuri and Golden Mosques at Delhi and the Dar-ul-Ulm, Deoband, are noted, These institutions generally have a religious or 'national' atmosphere.

The Ayurvedic and Unani Tibbia College, Delhi, founded by the late Hakim Ajmai Khan, is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also gives some training in surgery.

BOY SCOUTS.

The Boy Scouts movement initiated in England by Lord Baden-Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians, The Viceroy is Chief Scout of India and the heads of Provinces and States are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves. The Association is now directly affiliated with the Boy Scouts International Bureau.

INDIAN HEADQUARTERS.

Chief Scout for India.—His Excellency The Most Honourable the Marquess of Linlithgow, K.T., G.M.S.I., G.M.I.E.

Chief Commissioner.—Lt.-Col. Nawab Sir Muhammad Ahmad Said Khan, K.O.S.I., K.O.I.E., M.B.E., LL.D., of Chhatari.

The Co-operative Movement.

Rural Poverty.-The outstanding feature of Indian rural economy that is bound to arrest the attention of any observer is the appalling poverty of the rural population. The various estimates, official and non-official, that have been made of the income per head of population in India at various times leave the matter absolutely in no doubt. The Central Banking Enquiry Committee estimates that the average income of an agriculurist in British India does not work out at a higher figure than Rs. 42 a year. The vast magnitude of this evil will be better realised when we take into account the predominance of the agricultural population in India. In 1891, 61 per cent. of the total population of the country lived on agriculture; this percentage rose to 66 in 1901 and to 78 per cent. in 1921; in 1931, the percentage has fallen a little to 67. The poverty of the agriculturist may be due to a variety of causes, but we cannot ignore the fact that agriculture has in a large measure ceased to be an industry worked for profit; the cultivator labours not for a net return but for sub-The extent of an average holding which works out at about 6 acres for an agriculwhich works out at about a acres for an agreun-tural family of 5 persons is too inadequate to maintain it in ordinary comfort even with the low atandard of living which is so characteristic of the rural population of India. Moreover the Indian cultivation is in a large measure exposed to the vicissitudes of seasons and the regaries of the monsoon. In every 5 years there is but one good year, one bad year and three indifferent years. These unfavourable sonditions might be mitigated to some extent by a well conceived policy of irrigation by the State; but so far, of the total cultivated area in the country, shout 16 per cont. only has irrigation facilities from rivers, tanks or wells while the remaining 24 per cent. depends merely on rainfall. Thus the frequency of failure of crops, owing to drought and floods, frost and pests coupled with the low vitality and high pests, coupled with the low vitality and high mortality of the live-stock, render the economic position of the cultivator worse still. inadequacy of the subsidiary occupations to supplement the slender income from agriculture contributes further to his extreme economic weakness. He has sufficient spare time on his hands to devote himself to subsidiary occupations but he has been exposed to the full blast of competition of forces from the rest of the world and many of the industries on which he relied in the past have suffered largely from or been wiped out by the competition of machine-made articles. The recent fall in the world prices of agricultural produce has affected him powerfully for he is now being drawn steadily into the sphere of influence of markets both national and international and he has neither the organisation nor the credit facilities to help him as in countries like the United States of America and Canada and several European countries. In addition to these numerous difficulties, the Indian agriculturist has another serious handicap in this that

he is largely illiterate. The percentage of literacy in India is still very low being only 8 per cent. and any progress in agriculture is well nigh impossible without the background of general education. All these factors lead to the most outstanding feature of Indian rural economythe chronic and almost hopeless indebtedness of the cultivator. The Central Banking Enquiry Committee has estimated that the total rural indebtedness in India is about Rs. 900 crores. Though indebtedness of the agricultural population has been there from old times, it is acknow-ledged that the indebtedness has risen considerably during the last century and more especially during the last 50 years. This colossal burden of debt is the root problem which has got to be faced in any attempt towards the economic regeneration of the masses. Numerous causes have been advanced to account for rural indebtedness and we already have pointed out some of the general causes which give rise to it. A peculiarity, however, that we notice is that the debt which remains unpaid during the lifetime of the cultivator who contracted it passes on as a burden to his heirs so that many agriculturists start their career with a heavy burden of ancestral debt which they in their turn pass on with some further increase to their successors. Ignorance and improvidence, extravagance and conservatism have further been held forth as the reasons for the continued growth of this heavy load. marriage festival in the family tempts him to launch out into extravagance while funeral feasts prove no less costly. All these factors—the uneconomic nature of the agricultural industry, chronic and heavy indebtedness and illiteracy form a thoroughly depressive background of Indian rural economy.

Genesis of the Movement .- It is no wonder under the circumstances detailed above to find that the Indian agriculturist has constant recourse to borrowing and that too not only for any land improvement that he may contemplate but for his current agricultural needs as also for periodical unproductive purposes such as weddings and funeral feasts. The absence of any banking organisation in the country-side has driven him into the arms of the sowcar or the mahajan who, while proving a very accommodating person, has exercised a grip on him from which it has been found almost impossible to extricate him. usurious rates of interest charged, coupled with various devices which increase still further the actual rate of interest, and the numerous services which the sowcar performs as a retail tradesman and the buyer of his produce, make him the dominant force in the village, reducing the agriculturist to the position of a serf, toiling for generation after generation, without ever hoping for a release from his clutches, getting bare subsistence as a reward for all the trouble that he might take and therefore becoming listless, fatalistic and absolutely unprogressive. In 1883 the Land Improvements Loans Act was passed and this was followed in the next year

by the Agriculturists Loan Act enabling number of societies from 1910 to 1915 was about Government to advance loans repayable by 1,100. The pace of growth still further quickened easy instalments and at low rates of interest and now there are 96,209 agricultural on the possibility of introducing land and agricultural banks and the discussion thus initiated by him was continued by Mr. Dupernex of the U. P., in his "Peoples Banks for Northern India". The caste system of the Hindus and the ideas of common brotherhood among the Moslems were evidences of the peoples' natural aptitude for co-operation and the nidhis of Southern India furnished a practical proof of this aptitude. The Government of India in 1901 appointed a committee to consider the question of the establishment of agricultural banks in India and the report of this committee resulted in the passing of the Co-operative Credit Societies' Act of 1904. The co-operative movement was thus launched in India on the 25th March, 1904. The Act aimed at encouraging March, 1904. self-help and co-operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sums only. Knowledge of and confidence in their fellow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same tribe, class or caste. In order to provide facili-ties in urban areas for the small man, urban ties in uroan areas for the small man, urban societies were also permitted. The Act introduced the principle of unlimited liability for rural societies following the Raiffelsen system in Germany, though it permitted urban societies to choose the Schulze-Delitzch model. The local Governments were empowered to appoint special officers called Registrars of Co-operative Societies, whose duty it would be to register societies formed under the Act to to register societies formed under the Act. to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well. The seed thus sown has grown to-day in the course of 30 years into a fine tree with twigs and branches, spread out in many directions. In spite of several weak-nesses in the co-operative movement in India to-day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country-side and has led to a steady improvement in various directions of the schools for political and civic education. Since the launching of the movement in 1904, there have been amendments of the cooperative law and committees and commissions of enquiry to remedy defects and to suggest further lines of action. These we shall note later on.

for improvements and also for current agriculsocieties and about 13,426 non-agricultural ones,
tural needs. In 1892 Sir Frederick Nicholson Table 1 shows the distribution of these societies
submitted a report to the Madras Government by provinces. It will appear from the table by provinces. It will appear from the table that progress in different parts of India has not been uniform. Bengal, the Punjab and Madras have the largest number of Societies—while the other major provinces like Bombay, Bihar, the United Provinces and the Central Provinces, Burma and Assam show distinctly smaller figures. The Punjab with 23,129 societies stands first in the number of societies (91) per one lakh inhabitants, while Bengal which has a larger number of societies than the Punjab stands second in that respect with 46. The progress in smaller areas, like Coorg and Ajmer-Merwara, must be regarded as very satisfactory in view of their small population, since the number of societies per one lakh inhabitants works out in their case at 146 and 180 respectively. It is satisfactory to note that the co-operative movement has spread not only among the British Indian Provinces but also in Indian States and compared to the total popula-tion, Bhopal and Gwalior lead in this matter though the premier States of Kashmir, Mysore, Baroda and Hyderabad have also made considetable progress. Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1937 at 47 lakhs. Taking the normal family at a little under 5, it is clear, therefore, that about two and a half cores of the people of India are being served by this movement. There is no single movement in the country fraucht with such tremendous possibilities for the upilit of masses as the co-operative movement and there is no single movement with such a large percentage of the population affected by it. Though the Punjab leads in the number of members of societies 32.6 per one thousand inhabitants, Bombay comes next with 29.7, while Madras, Sind and Bengal rank thereafter. This shows that the size of societies thereafter. This shows that the size of societies varies in different provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society as compared with the other provinces of British India. Of the smaller areas, Coorg takes a india. Of the smaller areas, coorg takes a leading place with 93.7 members per one thousand inhabitants, while Travancore has an average of 35.6. Membership is a much better test in many respects of progress than the number of societies and from this point of view, steady improvement in various directions of the different properties and from this point of view, ille of the Indian cultivator. Moreover, the use it he progress in Bombay, the Punjab, Coorg, of the vote, the elective system, self-help, self-reliance, compromises, gives and takes, work on an organized plan, rounding of angularities third aspect also of the growth of the movement. are great items in the training up of a citizen Merely the number of societies, or the member and the co-operative societies have been great ship in the societies is not an index of the work schools for political and civic education. Since being conferred by the movement on the popula-tion affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their working capital than from merely the number of members. In Growth of Co-operation.—In the first few progress so far achieved by the movement years of the movement the number of societies. From about Rs. 66 lakhs, which was the average grew up very slowly but the growth was consi-up to 1910, the working capital has advanced detable accelerated from 1910 and the average very rapidly and stands to-day at more than 101

this large sum has been derived mostly from non-Government sources. The share from capital, the reserve fund and the deposits from members together contribute more than Rs. 41 crores and this is really owned capital or the members' own money. The provincial or central banks and other societies contribute a little less-29 crores while the non-members or the outside public contribute about 30 crores. This latter Item shows to a remarkable extent the growth of public confidence in co-operative institutions and speaks well in general of the management of the societies and the very useful purpose of the societies and the very useful purpose they serve in the banking organisation of the country. The distribution of the working capital by provinces and States gives us a further insight into the progress made in this direction by the co-operative movement in different parts of India. Bombay and Sind lead in this respect with 127 and 130 annas per head of population respectively. The Punjab is a close second with 115. Madras and Bengai fail behind with 87 and 58 respectively. second with 115. Madras and Bengai fail behind with 57 and 53 respectively. Among the smaller areas, Ajmer-Merwara comes out first with 153 annas per head of population while Coorg follows with 149. Of the Indian States, Indore takes the first place with 101, while Mysore, Baroda and Bhopal follow with 56, 53, 37 reapectively. Bombay stands an easy first in the matter of deposits from members which amount to over three crores out of a total working capital of 15 crores and this is one of the beat tests of the success of a working capital of 15 crores and this is one of the best tests of the success of a co-operative society. It is obvious from a glance at the figures in the tables that there has been very rapid progress in the number of societies, in their membership and in the working capital of these societies. The Punjab, generally speaking, leads in many respects with Bombay coming close behind. The smaller areas and the Indian States have also achieved considerable progress though the movement there started comparatively later. The agricultural societies predominate in all the provinces and States while non-agricultural, that is, urban societies show a much slower development. While there is much room for satisfaction at the phenomenal growth of the movement in rural and urban areas, it must be admitted, however, that merely the figures of the number, membership and working capital are not enough to base conclusions upon. But before we proceed further, we must now explain the chief component parts of the structure, as it has now been built up, of the co-operative movement in the country.

Financial Structure of the Movement:--Apart from the comparatively few co-operative societies at present working in India for non-credit purposes, it must be recognised that whether in urban or rural areas, a co-operative society largely means a small bank or a credit matitution for providing financial accommodation to its members on a co-operative basis. Of these credit institutions, by far the greater proportion is rural. The rural credit society bas, for its main purpose, the financing of the agriculturist and as such it needs funds. The agricultural state of co-operative credit lies in making available to the needy the surplus of the well-to-de brethren through the medium of the society but in Indian villages, the well-to-do and the societies.

It is pleasing to note from Table 3 that ge sum has been derived mostly from playing or trying to play the sowcar. Thus rernment sources. The share from capital, or trying to play the sowcar. Thus instead of comprising more or less all sections of the population of the village, the society ether contribute more than Rs. 41 crores any rate, very largely. Even otherwise, the slender savings of the well-to-do would not be enough to meet the wants of the needy and each village society is not, therefore, able to be selfsufficient, making available the deposits of its well-to-do members as loans for the needy ones. The heavy load of unproductive debt of the average indian farmer, his habit of investing his savings, if any, in lands and ornaments, and his liliteracy and consequent lack of the banking habit, soon made it apparent that the rural credit societies could not be expected to raise the required funds in deposits either from members or locally. The question of funds for the working of a rural co-operative Society thus becomes a vital question indeed. Central banks have therefore been brought into existence at the district headquarters in order to raise money from towns and make them available to the primary rural societies. Following up the idea further, it has been found necessary to have a provincial bank at the provincial headquarters to serve as a balancing centre for the central banks and to make available larger funds for the primary societies through the central banking institutions. The financial central banking institutions. The financial structure of the co-operative movement is thus largely composed of three parts—(i) the Agricultural Credit Society, (ii) the central financing agencies, and (iii) the provincial banks. Obviously one more part in the structure seems possible and desirable, namely, an Apex All-India Co-operative Bank. So far, however, such an All-India Bank has not been started and the provincial banks have been content with an All-India Provincial Co-operative Bank. an All-India Provincial Co-operative Banks Association.

Agricultural Credit Societies.—The success of these societies is closely related to their very peculiar constitution. In an ordinary their very peculiar consistence.

joint stock company, a member is liable only to the extent of the value of his share holding and his liability is therefore limited; but in the case of agricultural credit societies, the liability is unlimited, that is to say, members are jointly is unlimited, that is to say, members are jointly in the case of the project of the context of the c and severally liable to the creditors of the society for the full amount of the debts incurred by it. Such a liability would never be acceptable to any person, unless he was imbued with the broader vision of brotherhood between members and unless he himself had an active volce in the management of the society and had a more or less full knowledge of the character and antecedents of his fellow members. Co-operative credit is the capitalisation of character and unlimited liability is the great instrument to secure the admission into a society as members of these persons only, who by their character and antecedents deserve to be taken into that brotherhood which imposes such an obligation when in process and an obligation as unlimited liability on all, so that they either swim or sink together. To secure success, thursfore, the proper selection of members is the throat importance; and it has been unfortunate that in India this has not been in process. been in practice as well kept in view as it should have been in the eager desire to promote the formation of more and yet inore

T- 44----

Credit is a blessing only if turned to productive of rupees. Their financial position as on the account; it used up for unproductive purposes, 30th of June 1937 stood thus:—
it is a curse. It would enrich the producer
but it would only impoverish the consumer.
It is capable of fruitful employment by the
intelligent but it leads the illiterate and the ignorant towards perdition. The Indian agriculturist needs money for productive purposes, such as his current agricultural needs, land improvement, purchase of stock and implements, manures and seeds as also for unproductive purposes, such as repayment of old debts, weddings and funerals. He thus requires weddings and funerals. He thus requires credit not only as a producer but also as a consumer-a producer who hardly makes profits from his industry and a consumer who has no past savings to enable him to tide over a bad period, but who is a perpetual borrower ready to live for to-day and letting the to-morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need or scope for improvements in his methods. Under such circumstances, it is imperative for the management of the rural co-operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose. And yet, it is in this respect that there is considerable scope for Improvement.

The funds of an agricultural credit society are raised from entrance fees, share capital deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund. The income from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inepired and the soundness and the stability of its fine position. The ideal placed before these societies is the development of members' deposits to the extent of making the society financially selfsufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them, and are, therefore, eminently desirable. Attempts are every-where made to encourage them, but the response has been small, except in the province of Bombay, where they form one tenth of the total working Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present.

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of the profits of these societies to reserve funds, and thereby provide against unforescen losses, bad debts and tosses on the realisation of certain assets such as by investment depreciation.
The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working

	of rupees
Share capital	4,31,68
Reserve and other Funds	9,87,77
Deposits	2,81,28
Loans	17,58,03
Total Working Capital	84.58.72

The figures show that these tiny agricultural societies in India work with about Rs. 17 crores of their own capital (including members' deposits in this head) as against their outside borrowed capital of about Rs. 18 crores. The owned capital was thus about 49 per cent. of their total working capital, and this proportion is rising steadily as years pass by.

Central Financing Agencies .- The formation of banks in urban areas on co-operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co-operative Act of 1904 was amended in 1912 and the Co-operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies. Soon thereafter the number of central financing agencies grew rapidly all over the country, especially in the United Provinces. The func-tion of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from: a deficiency of funds and to provide proper guidance and inspection ever them. On the 80th June 1937 the number of central banks was 611.

There are four main sources from which a central bank derives its working capital which stood in 1936-37 at 29.5 crores: (a) Share capital, (b) Reserve, (c) Deposits, (d) Loaus.

The paid up share capital and reserves of central banks constitute the owned resources of these banks as distinguished from borrowed resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans. It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8. Deposits from members and non-members constitute the bulk of the borrowed capital of central banks. The total amount capital of central banks. The total amoust of deposits held by central banks in the year 1936-37 from individuals and other sources amounted to Ra. 17-0 corres, and from primary societies to Ra. 8 corres. Deposits in central banks are mainly of two kinds, vis., savings and fixed. Current deposits are not universal but confined only to selected central banks in selected seets such as by investment depreciation, the general practice in regard to the use of the reserve fund in the business of the principle usually observed by these pointies in that it is used as ordinary working deficiently. The funds collected by the agricultural to the periods of deposits are also comparatively long. In addition to funds obtained by deposits, are the principle of the periods of deposits are also comparatively long. In addition to funds obtained by deposits, are later to over 34 areas.

operative banks and from the provincial banks 8 crores and from Government Rs. 37 lakhs. Excepting in Burma, central banks in other provinces of British India directly not borrow loans from Government; the central banks of Indian States, excepting Mysore Cochin do and to a greater or less extent hold loans from Government, while in Gwallor, loans from Government constitute the most important item of the total working capital. Borrowings from outside banks are generally confined to accommodation obtained from the Imperial accommodation obtained from the imposes
Bank of India against Government Securities
or Promissory Notes executed by societies in
favour of the central bank and endorsed by the
infavour of the Imperial Bank. This latter in favour of the Imperial Bank. This accommodation is, however, limited and advances from other joint stock banks are also now The main source of loans is, therefore, the rare. The main source of loans is, therefore, the provincial bank and where a provincial bank exists, the central banks are generally prohibited from having any direct dealings with either the Imperial Bank or any other joint stock bank or with one another. This rule is however not or with one another. This rule is however not rigidly observed in the Punjab and Madras. Several central banks in the country, due to their long standing, now possess sufficient resources to be independent of any outside financial assistance but they all continue credit arrangements mainly with the provincial bank on which they rely for emergencies.

In the initial stages, several central banks developed from ordinary urban societies which granted advances to individual shareholders. A few of such central banks have continued the practice and the amount advanced by central banks to individual members during the year 1986-37 was Rs. 1,25 lakhschiefly in the Punjab, Bombay and Madras. This practice, however, is gradually being abandoned as the chief function of a central bank is to finance societies and to serve as their balancing centre. The total advances made by central banks to societies at the end of the year 1936-37 amounted to over Rs. 7.9 crores.

After meeting management expenses the profits of central banks are distributed as allocations to reserves and dividends to shareholders. The combined net profits of the 611 central banks of the country during the year 1936-37 amounted to Rs. 41 lakhs on the total working capital of Rs. 294 crores; the rate of dividend paid varied from 3 to 6 per cent. in different parts of the country but the most usual rate paid was 6 per cent. per annum.

Provincial Co-operative Banks.—In India, at present, all the major provinces except the United Provinces have apex banks functioning in them. There are apex institutions in two of the Indian States, Mysore and Hyderabad, though in the others also there are institutions corresponding to the apex bank or functioning as such. The Bank in Burma being in liquidation, there are 11 such institutions in all out of which, 9 are in British India and two in the States. The constitutions of these institutions vary considerably; but the functions of all these institutions are more or less the same,

provincial bank or from Government. The total central banks and provincialization of finance amount of loans held by the central banks in in them. It is found that in a large majority 1936-37 from outside banks, from other co- of the apex banks, the constitution is a mixed of the apex banks, the constitution is a mixed one, that is, both in the general body of the banks as well as in the directorate, there are individual shareholders as well as representatives of co-operative societies and central banks.

> All apex banks both in British India and in the Indian States depend for their working capital largely on deposits from the affiliated co-operative societies as also from the public. It is, therefore, thought necessary to insist upon the maintenance of fluid resources on a certain scale and in some provinces the Government of the province has prescribed definite reise with regard to the maintenance of fluid resources. The period for which deposits are accepted determine the maximum period for which they can lend out these borrowed funds to their clients, and in every province the apex bank has fixed for itself a maximum term, beyond which no loans are, in general, sanctioned to the borrowing client. The sanctioned to the borrowing client. The following figures will clearly show the position and transactions of the apex banks in 1936-37:-

While accepting deposits from co-operative banks and the general public, most of the apex banks have also dealings in current account with the latter. The Punjab bank does not encourage such accounts with individual non-members, as it does not wish to enter into competition with central banks. Apex banks competition with central banks. Apex banks also generally carry on ordinary banking business, such as collecting hundis and dividends from companies and collecting the pay and pensions of public servants. The provincial banks of Bombay, Madras and the Punjab have feater than the punjab have hear the server debentures. The Bombay have hear far issued debentures. bank has so far issued debentures of the value of Rs. 9.8 lakes and these debentures are recognised as a trustee security. The bank at Madras has floated debentures of the value of 2.18 lakhs on the security of a floating charge of the general assets of the bank, while the Punjab bank has namely, the co-ordination of the work of the issued debentures of the value of 5 lakhs. As

in every banking institution, these banks also India, the societies have not attained any very are frequently troubled with surpluses and great measure of success. On the 30th June are frequently troubled with surpluses and deficits, though at different times in the different deficts, though at different times in the different 1937, the overtue loans in agricultural societies institutions. There is therefore interlending amounted to Rs. 11,57,23,325 the year before; the and during the period of shortage of funds, working capital of the agricultural societies deposits are accepted from surplusing banks, was Rs. \$4,68,72,371; the loans due by and some of them call for special season deposits in agricultural societies with the control of the agricultural societies with the control of the second season deposits are accepted from surplusing banks, was Rs. \$4,68,72,371; the loans due by and some of them call for special season deposits are accepted from surplusing banks, was Rs. \$2,68,72,371; the loans due by allowing favourable rates of interest to tide over the period of shortage. The All-India Provincial Co-operative Banks' Association enables the member banks to ascertain which of them are surplusing in the period and by correspondence to arrange for inter-provincial borrowings.

Overdues .- Among the most important tests of the success or otherwise of a co-operative credit society is undoubtedly the promptness in repayment of loans by members and it is in this respect that one has to recognise that in 30th June 1937.

1937, the overdue loans in agricultural societies overdue loans were therefore 33 per cent. of the working capital and 44 per cent. of the total loans due by individuals. The position is however rendered more serious when one realises that the figures are considerably obscured by book entries and extensions of the date of repayment and in some cases, by the farmers' borrowing from the sowcar to pay the society's dues and that the procentages represent merely an average for all-India. The following table shows the position by different provinces on the

Overdue Loans in Agricultural Societies, 1936-37,

(in lakhs of rupees.)

serious, since the fall of prices of agricultural repaying capacity of the borrowing member produce and the world crisis and trade depres-in sanctioning loans for unproductive though sion have reduced the repaying capacity of perhaps necessary social or domestic purposes the agricultural borrower considerably and or for the redemption of old debts and generally sion have reduced the repaying capacity of the agricultural borrower considerably and increased the terrible load of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the cooperative structure. The loans having been based on the basis of the assets of members, the nitimate solvency of the societies is beyond dispute: but severe pressure on members and the consequent wholesale liquidation of societies would react very seriously both politically and connomically. The causes that have led to this henomenon, which menaces the entire existence of the co-operative movement are chiefly to be growth of this menace of excessive overduce.

The position has since June 1933 grown more found in not basing the loans sanctioned on the in the uneconomic nature of the agricultural industry. The loose scrutiny of the purposes stated in the loan applications and the absence of a careful watch on the way the loan is spent by the members, which must be the case, where almost every member is a borrower or a surety to other borrowers and where the societies are composed almost wholly of the needy section of the village, the well-to-do standing aloof, the remissuess in exerting pressure and in taking action against the defaulter, even when he is wilfully defaulting, add considerably to the The central financing agencies are more con-ting those who have already given up all their are the security for their lendings and, with more funds than they could use, are more eager even than the Registrar himself for organising new credit societies.

Land Mortgage Banks.—The loans advanced by co-operative societies to their members and by the central financing agencies to their consti-tuent societies are, from the very nature of the source from which they derive the bulk of their finance, for short or intermediate terms only. By concentrating upon the growth and multi-plication of rural credit societies and thus upon facilities for short and intermediate term loans, the co-operative movement did not provide for the redemption of old debts or for increasing the earnings of agriculturists which alone would prevent any further increase in their debts and pave the way for the paying off of the old ones. It does not seem to have been adequately realised that the removal or the lightening of the heav load of indebtedness does not depend so much upon the easy terms on which co-operative inance can be made available, as upon the ascertainment of the amount of individual indebtedness to the sowcar, upon so fully financing the agriculturists that they could be prevented from resorting to the sowcar any more, and above all on making agriculture an industry sufficiently paying to leave a little saving after all legitimate current expenditure on agriculture and the household has been met, so that this saving could be applied to the liquidation of old debts. The mistaken notion associated with the start of the movement that co-operative credit could serve this purpose and which has olung more or less till now as evidenced by permitting this purpose to be regarded as a legitimate purpose for loans is largely responsible for increasing the load yet further. Short or for increasing the load yet further. intermediate term loans can, if judiciously employed, prevent any further increase in the burden, though even that in the present state of uneconomic agriculture seems scarcely possibie; but it cannot leave any adequate margin of saving which could be employed to redeem past follies or misfortune. The sowcar, it is often forgotten, is the village retailer as also the purchaser of the villagers' produce and what he cannot recover from the borrower by way of interest or the part payment of the principal of the loans, he can more than make good on the threshing floor or in his shop. The co-operative movement by concentration on the credit side has attacked him on one front only, so that the risks of non-payment are saddled on the society while the profits of the merchant and the retail shop-keeper are still enjoyed by the concur; the attack ought to have been on all fronts. However, under the dircumstances, the clarifica-tion of the situation of indebtedness is most desirable as a preliminary towards tackling the important questions of the redemption of old desira. The Indian Central Banking Enquiry dests. The Indian Central Banking Buyun, Committee has wisely emphasised the need for a vigorous policy of debt conciliation on a volun-lary basis and for exploding the possibility of sundenshing legislation to secure, if need be, the settlement of debts on a compulsory basis. A moderaking legislation to secure, if need be, the insistence in the case of the unlimited statement of debts on a compulsory basis. A jumple Bural Incolvency Act as recommended by the Royal Commission on Agriculture and of the directorate, in order to ensure sound also be an important step towards liberacould be a liberacould

cerned with the assets that in the last resort assets, from the incubus of ancestral and old debts, so that at least they and their heirs could start with a clean slate. In any case, the need for long term loans to the agriculturists for land improvement and for the redemption of old debts seems obvious, and it has now been recognised that the time has come for the provision of this facility by the starting of land mortgage banks.

> There are three main types of such banks. The strictly co-operative type is an association of borrowers who raise credit by the issue of mortgage bonds bearing interest and made payable to bearer and is well illustrated in the German Landschaften. The commercial type is represented by the Credit Foncier of France, which works for profit and declares dividends. The third type—the quasi co-operative has a mixed membership of borrowers and nonborrowers, operating over fairly large areas and formed with share capital and on a limited liability basis. The banks organised so far in India are in a sense of the co-operative type, though strictly speaking they belong to the quasi co-operative variety, admitting as they do to the membership a few non-borrowing individuals for attracting initial capital as well as business talent, organising capacity and efficient management.
>
> At present there are 12 co-operative land

mortgage banks in the Punjab. Two of these operate over whole districts, the rest confine their operations to a single tehsil. Bombay has 15 land mortgage societies, which have only recently started their operations. Bengal has two, Assam has five, while Madras has 38 primary land mortgage banks and a central land mortgage bank has been started recently. too early to pronounce on the success or otherwise of these few banks. Among the objects for which these banks advance loans are the redemp-tion of old debts, improvement of land and method of cultivation and the purchase of land in special cases. The Central Banking Com-mittee think however that for a long time to come the resources of these institutions will be mainly required for enabling the cultivator to redeem his land and his house from mortgage and to pay off his old debts. One feels, however extremely doubtful whether the emphasis should not be laid on the intensive and extensive development of agriculture, since as pointed out above, unless agriculture becomes a paying industry, the redemption is impracticable and illusory. The bulk of the funds of these banks will have to be raised by debentures and for these purposes, there will have to be in the provinces central land mortgage banks as in Madras and in Bombay. Government will have also to render assistance to these institutions for the success of the debenture issue, and its guaranteeing the interest as in the Punjab ought to meet all reasonable needs, though in special cases there would not be much harm in the Govern-ment purchasing debentures of a certain value. While mutual knowledge of and a certain control over one another among members is the

titles, correct assessment of borrower's credit; In Bombay, the Institute has created a special and repaying capacity and on the efficient education board which maintains co-operative management of affairs.

Propaganda, Education and Training.—
In the initial stages of the movement, it fell on the Registrar to carry on propagands and organize co-operative societies. For this purpose the assistance of non-official honorary workers was imperative and in the various provinces a band of such workers was brought into existence, who as honorary organisers of the district or talukas actively co-operated with the officials or talures actively co-operaton when the continuous in carrying on propaganda, organising new societies as a result thereof and looking after the societies as attarted in some measure. With the societies so started in some measure. the rapid growth of co-operative societies, however, it was felt that for the further propagation of the movement it was desirable to carry on work by the non-officials in a more organised manner and for that purpose co-operaorganised manner and to that papers co-pera-tive institutes were started in the various pro-vinces. In some provinces, like Bombay, these institutions are mixed institutions with a membership of individual sympathisers and workers and of co-operative societies. In others, like Madras and the United Provinces, individuals were not admitted as members and the institutions became provincial unions of co-operative societies. In some provinces, like Bihar and Orissa, they became federations of co-operative societies, while in others, like Bengal and Assam, they are known as co-operative organisation societies. Whatever the exact form assumed by these provincial institutions, their functions were more or less the same in all provinces, comprising propagands and the focussing of non-official co-operative opinion on the various problems that confranted the movement from time to time. They the movement from time to time. They have come to be regarded in an ever increasing measure as the third arm of the movement, the Registrar and his staff representing the administrative side performing more or less the functions assigned to them under the statute, the provincial bank with the central banks and banking unions representing the functional side and a such concerned more with financial side and as such concerned more with the financing of the movement and the institutes, unions, federations or organisation societies representing the propagandist side and as such concerned more with educating pepular opinion and representing non-official views to the authorities. A few years back, the All-India Co-operative Institutes' Association was established, with a view to co-ordinate the activities of the provincial institutes, to formulate son-official co-operative opinion on important co-operative problems from time to time and to encourage the growth of co-operative literature.

It was soon perceived that one of the serious handicaps to the successful working of co-operative societies was the ignorance of the members and the absence of trained men as office-bearers of societies. Historacy of the rural population, however, has been found too big a problem for these institutes and they have, therefore, atsupted only to spread knowledge of co-operation

schools at different centres and conducts periodically training classes suitable for different types of workers and employees of co-operative societies. In the Punjab, however, co-operative education has been organised by the Co-operative Department, though the Punjab Co-operative Union renders active assistance therein. In Biliar and Orissa a permanent Co-operative Training Institute has been established at Sabour in the Bhagalpur Division which is controlled by a governing body which includes the Registrar, and a few representatives of the Co-operative Federation. Madras has organised 6 training institutes In the United Provinces, Bengal and the Central Provinces, arrangements for co-operative training and education have not yet been properly made, though there also it is the Department assisted by the provincial union which organises the training classes. The need for proper co-opera-tive training and education has been felt in an linerasing degree in recent years and the Central Banking Enquiry Committee has recommended very strongly the establishment of provincial co-operative colleges and an All-India Co-opera-tive College for the higher training of mere important officials in the Department, banks or societies. No action apparently has been taken till now on these recommendations, but there is no doubt whatever that any serious attempt at improvement of the co-operative secieties in the country must include a proper organisation of co-operative education not only for the officebearers of societies or the managers and inspec-tors of central and provincial banks but also for the inspectors, auditors and assistant regis-trars of the co-operative departments. The Government of India have for the last two years have placed at the disposal of each of the Provincial Governments about one lakh of rupees which were being devoted to a better organisation of co-operative training education for the staff of the co-operative departments as also of other institutions.

In some provinces, like the Punjab and Bihar and Orissa, the provincial union or federation has been actively associated in discharging the Registrar's statutory function of the audit of societies and the Second All-India Co-operative Institutes' Conference held at Hyderabad (Deccan) in 1931 also expressed an opinion that the Registrar's statutory obligation in this matter could be discharged by a system of licensing and that audit should be a function entrusted to the provincial unions or federation If this idea of a uniform system of audit through the provincial unions be accepted, it will nat the provincial unions be accepted, it will have rally follow that they will also have to assume the responsibility for supervision of the oc-operative societies. The departmental audit or inspection by the central banks cannot dispense with the need of careful supervision, which to be effective must be from within and which to be elective must be from wearn south provincely federation or union is obviously the best agency for this friendly and efficient supervision. The combination of the functions of audit and of supervision as suggested by the AB-India Conference and endersed by the Central Translate Conference and endersed by the Central Conference and Conference and Conference Conf and co-operative principles to the members of Banking Enquiry Committee would mean societies and to team up the office-bearers in improved efficiency in the working of the move-various ways. Education has thus developed ment while do-officialting it considerably and into an important function of these institutes, giving it the popular touch it lacks.

Non-Credit Agricultural Co-operation.— but the complexities of the non-credit forms of For some years past increasing attention has co-operation have induced the authorities to been directed on other forms of co-operation for avoid the multiple-purpose or general society the benefit of the rural population. Credit is but one of the needs of the cultivator; its organisation through co-operation touches but the fringe of the problem; and different provinces have been experimenting upon the application of co-operative organisation to meet his different non-credit needs. The problems of irrigation, consolidation of holdings, improved sanitation, fencing, cattle insurance, dairying and supply of agricultural requisites and above all the marketing of agricultural produce have been therefore engaging the attention of co-operators yet accepted the wisdom of this and yet believes and societies for these purposes have been in the theory of almost water-tight compartestablished here and there and have been working ments. The agricultural non-credit societies with varying success. In a land of ignorant and in India on the 30th June 1937 were 5.150 distriilliterate agriculturists, it would appear wiser buted as under:—to adopt the rule of one village, one society;

and to favour the single purpose society, and we have the curious spectacle of an agriculturist being viewed as one person with a bundle of needs, each one of which it is proposed to meet separately. A single society trying to meet all the needs of the agriculturist would attack the sowcar on all fronts and would become a live force in the village which would tend to promote the ideal embodied in the famous phrase: Better living, better farming and better business. However, co-operative opinion in India has not

Of these the important are the marketing sale societies in Bombay should arrest attention societies, particularly for the sale of cotton in Bombay, and the consolidation holdings and better living societies in the Punjab.

Marketing Societies.—Marketing of Agricultural produce is the real crux of the whole question of rural prosperity and betterment and as group marketing is always more effective than individual marketing especially in India where an individual producer is illiterate and constitutes a small unit, co-operative marketing has been accepted now as one of the most desirable ideals to work for. It is only the complexity of the working of co-operative sale societies, the difficulty of providing for marketing finance, the lack of expert knowledge on the part of so-operative officials and the lack of godown and storage facilities that have prevented the rapid multiplication of sale societies and their afficient working. It is really in the development of this form of co-operative effort that mitimate success must be sought for in India,

and invite concentration on the co-operative organisation of agricultural marketing. The jute and paddy sale societies of Bengal have not met with success, it is true; but the cotton grower in Gujarat and the Bombay Karnatak has reaped considerable benefit from the cotton sale societies. Absence of fraud in weighment, adequate and high prices, insurance of the produce against risks of fire, prompt payment of sale proceeds, financial accommodation till the produce is sold, information of daily price fluctuations in the Bombay market, supply of gunnies and genuine and certified seed, bonus and a dividend are no small gains to the agriculturist, who was otherwise at the mercy of the adatya or worse still of his village sowcar. The cotton sale societies of Surat have recently combined in a federation which has taken over the co-operative ginning factory already started by the members. A few societies for the sale of other articles have also been organised in Bombay, such as jaggery, tobacco, Against attending the sound never bring comfort. Chillies, paddy, onlone and arecs nut. Bengal Wisers it has been tried with success, the results has several jute sale societies with a Jute Wholebaye been extremely estimatory to the members. The tremendous beadway made in European with a sale depot in Calcutta. The Puniab countries likeDenmark and in the United States has several commission shops which provide of America in co-operative marketing organisa-isorage facilities so that the grower could wait tion and the successful examples of the cotton for better prices, but which sell to local merorganises in Johnson and arece nut. Bengal has saveral jute sale societies with a Jute Wholssale at Calcutta and several paddy sale societies with a sale adopt in Calcutta. The Puniab

chants yet, rather than to the merchants at the and passed the Central Provinces Consolidation port. Madras has a number of sale societies, of Holdings Act in 1928. Any two or more but their transactions are small and they have not yet made much progress.

Consolidation of Holdings.—The law of Consolidation or modelings.—Inc law or primogeniture, by which the eldest son alone succeeds to the property of his ancestor and which is in force in some European countries does not obtain in India. Each heir is given a proportionate share of each item of the inherited property and not a share of the whole, quivalent to his portion. The result is that successive generations descending from a common ancestor inherit not only smaller and smaller shares of his land but inherit that land broken up into smaller and smaller plots. This continuous partition of each field amongst heirs leads to iragmentation, which is accentuated by the expansion of cultivation, irregularly over the waste, by purchase and sales, by the extinction of families in default of direct heirs and the division of their property amongst a large number of distant relatives, and by the break up of the joint family system and the custom of cultivation in common.

The disadvantages of fragmentation are obvious. A part of land is wasted owing to fragmentation being so excessive as to prevent any agricultural operations, and another part is lost in boundaries. Fragmentation involves endless waste of time, money and effort; it res-trains the cultivator from attempting improvement; it prevents him from adopting scientific methods of cultivation; it discourages him from carrying out intensive cultivation; it enforces uniformity of cropping, and especially restricts the growing of fodder crops in the period during which cattle are usually sent out to grase on the fields. The economic loss due to this system can be easily imagined, and the only solution is consolidation of holdings. This most difficult, important and interesting experiment originated in the Punjab in the year 1920. The procedure adopted in establishing a Co-operative Consolidation of Holdings Society is to call together all persons directly interested in land in a given village, persuade them to accept the by-laws whereby a majority in a general meeting might approve a method of repartition, and then carry out actual adjustment of fields and holdings in such a manner that no single individual might have any grievance. As the result of patient work which has now extended over ten years, some very striking results have been achieved and the movement for consolidation in the Punjab has assumed the dimensions of an important agricultural reform. It is steadily gaining in popularity, and, as more staff is trained and the people become better educated to the and he people become week cuttained to sue advantage of the system, the figures for the area consolidated are mounting up year by year. This work began in 1920-21 and in the 10 year that have clapsed since then, 2,63,462 acres have been consolidated by the end of July 1980, out of the whole cultivable area of about 30 millions, at an average cost of Re, 2-5 per

In the Central Provinces some success in consolidation has been achieved in the Chattisand Division where scattered holdings are considerable in petun imported attended y common and it is not rare to see 10 rural reconstruction in India, once inclus a late 40 plots. The Local Govern- Sir Frederick Sykes, the the state of the

of Holdings Act in 1928. Any two or more permanent holders in a village holding together not less than L certain minimum prescribed area not less than I certain minimum prescribed area of land, may apply for the consolidation of their holdings, but the outstanding feature of the Act is that it gives power to a proportion, not less than one-half of the permanent right-holders, holding not less than two-thirds of the occupied area in a village, to agree to the preparation of a scheme of consolidation, which scheme, when confirmed, becomes binding on all the permanent right-holders in the village and their successors in interest.

In Bombay a Bill was introduced in the Legislative Council in 1928 to deal with certain features of the problem. When this Bill was introduced a good deal of opposition was created and it had to be ultimately dropped.

There are 11 societies for consolidation of holdings in the United Provinces, and 11 in the Baroda State based on the Punjab model.

Rural Reconstruction .-- One of the main reasons why the achievements of the co-operative movement fall so short of the expectations of the promoters and workers lies in the extreme backwardness of the rural population and is is not too much to state that the ultimate success or otherwise of the co-operative movement lies or otherwise of the co-operative movement nee bound up with general, rural development and progress. So long as agriculturists remain steeped in illiteracy and ignorance, are heavily and almost hopelessly indebted, have a fatalistic and listless outlook on life and have an extremely low standard of living, carrying on agricultury with simple tools and implements in more or less a primitive fashion, no great approach to the ideals and the goal of the co-operative and all other rural movements is possible. co-operative movement itself is indeed a great experiment in rural reconstruction aiming to protect the agriculturist from exploitation of the usurer, the middleman, dalal and the merchant; but concentration on the credit side of the movement with but half-hearted attempts of the movement with but half-hearted attempts for the co-operative organisation of supply and marketing, a growing multiplicity of institutions for various purposes and above all the neglect of the educational, sanitary, medical and the social sides of village life explain very clearly why the achievements of the movement during the last 35 years have fallen far short of its objective. Rural reconstruction has, however, of late years claimed am increasing amount of attention; but so far attempts on a mass scale have not been made; what has been done has been individual effort—the efforts of individuals fired by the impulse of social service and moved by enthusiasm to utilize their opportunities to the best advantage by contributing tunities to the best advantage by contributing to the welfare of the humble village folk. The best known of such centres is at Gurgaon in the Punjab. The work done there covers education, sanitation, medical relief, improvement of agriculture, female education and materials

In the Central Provinces and Berar the local Government carried on similar work from November 1929. The later part of 1928 say a considerable in petun impacted to the cause of rural reconstruction in India. His Investment Sir Prederick Sykes, the thing deverage of Village

and carried on an intensive propaganda in that behalf which has led to the formulation of a scheme whereby the work is being carried on earnestly by District Committee under the guidance of the District Collectors, the work being co-ordinated by Divisional officers. The Punjab has appointed Mr. Brayne of Gurgaon fame as Commissioner for Eural Reconstruction and Bengal has made a similar appointment, and it appears that all Provincial Governments are devoting considerable thought to this very important work.

Better Living Societies.—The Punjab has been responsible for introducing this very desirable type of co-operative society to promote better living among its members. There are about 300 such societies in that province and they have been doing quite important work in their own way. The societies do not collect any levy from their members, except the small entrance fee and they lay down a programme of work and make rules for carrying it out from year to year, violation of which is punishable with fine under the by-laws. Though these societies in the first instance have for their object the curtailment of ruinous expenditure on marriages and other social occasions, they have also helped in various other matters; so that apart from saving to their members thousands of rupees each year, they are contributing to the general village uplift in some measure. Some of these societies have levelled and paved and swept the village lands, some have promoted sanitation, some have induced the villagers to improve ventilation in their houses, some have repaired and roofed the village drinking well, some have arranged that all manure should be pitted, some have discouraged expenditure on jewellery, and some have stopped waste on farms.
Thus in a variety of ways these societies generally have been great factors in the improvement of conditions in the life of the village. It is earnestly hoped that such better living societies will be started in large numbers in the various provinces of India or better still that the cooperative credit societies would take upon operative credit societies would take upon themselves the function performed by these societies and that the term better living be given as wide a connotation as possible so that the co-operative movement would be doing good to itself and the nation by carrying on the general work of village uplift, as well as its own soonomic objective of strengthening the position of the agriculturist.

Urban Credit Societies.—While the chief objective of the co-operative movement was from the first to do service to the rural population, it must be remembered that the Act of 1904 permitted two classes of societies,—rural and urban, recognising thus the suitability of the co-operative method for solving the problems of urban population also. At present there are in all 13,417 non-agricultural societies with a membership of 15,47,071. Of these, 5,938 are credit societies, the rest being societies for other purposes.

An important class of the urban population is that of the merchants and traders, and though the joint-stock banking system that has so far developed in India is quite well suited in many respects for them, from the point of view of the

small trader, it is co-operative banking that is obviously wanted. The importance of People's Co-operative Bank promoted for the benefit of urban people without any distinction of caste or creed is, therefore, very great, for the finance of small merchants, artisans and craftsmen for the stimulation of trade and industries in and around district and taluka towns. The principal business of these banks is short-term credit and in this respect they resemble the ordinary commercial banks. In the absence of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialists and help the development of cottage industries, which still play a very considerable part in the industrial economy of India. Another very important function which falls to peoples' banks is the financing of the marketing of the produce of the land from the field to the port or to the principal market centres and thus assist in the development of the internal trade of the country. It is only, however, in the Bombay and Bengal Presidencies that we meet with some good institutions functioning as peoples' banks. In Madras there are 1,055 non-agricultural credit societies but most of these are not real peoples' banks. The Punjab has 1,030 unlimited liability societies and only 162 with limited liability. Even here we hardly find any develop-ment of real peoples' banks. In Bengal the limited liability urban credit societies number 527 and though these societies seem to have won public confidence the more important of them are salary earners' credit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, warking on sound lines. The question of starting Peoples' Banks in Bihar and Orissa has not yet been seriously taken in hand. In the Bombay Presidency, institutions with a working capital Presidency, institutions with a working capital of Rs. 50,000 and more are classed as urban banks. Since 1922 co-operators in this Presidency have been very keen on having a full-fledged pooples' bank in every taluka town, for it has been realised that with the proper development of urban co-operative banking, there is no doubt that the warious units will come into touch with one another and that mutual settlement of terms and co-ordinated and harmonious work will greatly sasts the and harmonious work will greatly saist the development of inland trading agencies; Peoples' banks are a repository of peoples savings, a nucleus for co-operative activity and an institution giving facilities for internal remittance and it is quite necessary therefore that their share capital must be posity layer. In their share capital must be pretty large. In the Bombay Presidency on the 30th June 1937 there were 127 urban banks most of which are fairly successful. The total membership was 1,85,829, the working capital was Rs. 4,88,22,694 1,85,829, the working capital was no. 4,00,22,004 and the reserve fund amounted to Rs. 59,34,604. It can be said without exaggration that the development of urban banking has been a distinct contribution of Bombay to the cooperative movement in India and other provinces might well follow Bombay's example in this direction.

An important variant of the urban co-operative society is the Thrift Seciety. The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the

end of the term with interest. In many societies, and his staff, paid or honorary, and it was loans are advanced also but not exceeding a certain fixed proportion, usually \$ of the deposits. The Punjab has about 1,000 such societies and the bulk of the members are school masters. There are about 125 thrift societies for women only having a membership of about 2,000. Madras has also more than 100 thrift societies and Bombay has half a dozen. Recently however, Life Insurance Societies have been started in Bombay, Bengal and Madras. The Bombay society was started in July 1930 and for a few months worked as a provident society only, issuing policies of Rs. 150 to Rs. 500 and that too without medical examination, the idea being to bring life insurance within easy reach of the small man in the village as in the town. no share capital and works on a mutual basis. It has now, however, widened its scope and has been writing policies for larger amounts under its ordinary branch, while under the rural branch, besides the ordinary small policies, it has recently issued a scheme for decreasing term insurance, which will, it is hoped, meet the needs of the primary societies and their borrowing members much better. It has by now written a business of over Rs. 60 lacs. The Bengal society is yet a provident society issuing small policies, while the Madras society—the South India Co-operative Insurance Society has started vigorously as a full fledged life insurance society with share capital and comparatively low rates of premia, and has already written a large business of about Rs. 60 lacs.

Review.—The Co-operative Societies Act of 1904 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the Co-operative Societies Act of 1912. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than credit, substituted a scientific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks.

In 1914 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co-operative Societies and be weaned from the sowcars. In 1914, the Maclagan Committee on Co-operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co-operation. Punctual repayment of loans was insisted upon, and all those societies that falled to live up to the ideal of co-operation were sought to be eliminated. From this time onwards the share of non-officials in the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary. The Government of India Act of 1919 made co-operation a provincial transferred subject and the local Governments were left free to adapt the 1912 Act to their own requirements.

The steady growth of the Central Financing genetics relieved the Registrars partly of the need for attending to this very important matter perceived that non-official institutions should be established to take over this function from Accordingly official hands. Accordingly Co-operative Institutes were started in various provinces, in some cases as unitary societies reaching down to the village through their branches in the divisions and the district, in other cases as a federation or union more or less complete of the primary societies. The part these non-official bodies began to play henceforth became increasingly important, some adding to the primary function of propaganda, others such as co-opera tive education, supervision over societies and even audit.

The steady progress of the movement-sometimes even too rapid-for nearly 20 years, however, was found hardly to lessen the colossal burden of the indebtedness of the ryot, for cooperative credit necessarily confined itself to short-term loans. It was in the Punjab that the first Co-operative Land Mortgage Bank was started at Jhang in 1920. Soon after other provinces also followed suit.

While the movement was developing at a rapid pace it was found that financially the situation was worsening. Defaults in repayment were tive Committees of Enquiry were insti-tuted in various provinces. The Central Provinces thought it necessary to have such a committee in 1922, while Bihar and Orissa followed with a similar committee in 1923. A few years after the Oakden Committee made similar inquiries for the U. P., the Townsend Committee for Madras and the Calvert Committee for Burma. These Committees have carefully analysed the position in their respective provinces and have made recommendations for the consolidation and rectification of the co-operative credit organisation and the extension of the non-credit side of agricultural co-operation. The powers conferred upon the Local Government by the conterred upon the Local Government by the Act of 1919 to modify the Act of 1912 have been exercised so far in but few provinces such as Bombay, Burma, Madras, Bihar and Orlass. Bombay passed the Co-operative Societies' Act of 1925 incorporating the suggestions made from time to time for the amendment of the previous All-India Act. This new Act made the object of the movement still wider than that of its predecessor and its preamble refers to "better living, better business and better methods of production" as the aim of the move-The chief features of the Bombay Act of 1925 are the adoption of a scientific system of classification of societies, the improvement of the procedure for liquidation of cancelled societies, the extension of summary powers of recovery to the awards of arbitrators and the provision of penalties against specified offences. The Burma Act came into force in 1927 and the Madras Act in July 1982. Bihar and Orissa has also now passed a similar Co-operative Act of its own recently. The progress of the movement in forms other than credit has not been very remarkable and credit societies still predominate, especially the Agricultural Credit

The non-credit movement has had naturally more obstacles to overcome than the credit but in the development of co-operation; but propamore obstacles to overcome than the credit but gandaetill remained the function of the Registrar the former is slowly gathering force in the shape

of sale societies for cotton in Karnatak, Gujarat | benefit, unless the curse of illiteracy and and Khandesh, cattle insurance societies in ignorance is removed or mitigated by a strong Burms and irrigation societies in Bengal and the drive for adult education in rural areas. Southern Division of the Bombay Presidency. Perhaps the most remarkable instance of the non-credit movement in India is to be found in the Pujab where consolidation of holdings has been successfully attempted through cooperation. In the non-agricultural non-credit sphere, a still smaller headway has been made. There are a number of housing societies especially in Bombay, Madras and Mysore, and artisans' societies and unskilled labour societies in Madras. It may be noted that on the agricultural side, co-operative farming has hardly been touched and on the non-credit side the consumers' movement has made but meagre progress.

In 1926, the Royal Commission on Agriculture was appointed and co-operation formed only a part—though an important one-of its extensive enquiry. Recently, in consequence of the Indian Provinces, appointment of the provincial committees under the Indian Central Banking Enquiry Committee. the co-operative movement in the different provinces has been surveyed. But the provincial committees, for obvious reasons, confined their inquiries to banking in relation to agriculture, small industries and trade. Thus only those aspects of the co-operative movement which have an intimate bearing on the credit needs of the population and the development of banking facilities have been examined, while the need for separate enquiries into the whole movement in the different provinces of the lines of those undertaken in C. P., U. P. and Madras and emphasised by the Boyal Commission on Agriculture is still to be met. Bihar and Orissa recently got its movement examined by a committee; Travancer followed suit and Mysore too appointed a Committee which has published its report last year. The Government of Bombay convened in June operative banks; propaganda by non-officials; 1933 a Round Table Conference of official and non-official Co-operators to discuss the problems that confronted the Movement in Bombay. As a result of this Conference, three Committees were appointed, one to examine the system of supervision over Co-operative societies by the supervision over primary societies and rural Supervising Unions in the Presidency, another reconstruction. in these times of falling prices and trade at present the Provincial Governments, depression, and the third to examine the problem particularly in the Congress Provinces have been of extension of land mortgage banking on a Co-operative basis. These Committees have submitted their reports, their recommendations have led to a tightening up of supervision, an extension of land mortgage banking and efforts to meet the growth of overdue loans.

Recently the Government of Bombay appointed a small committee to inquire into the cooperative movement and to suggest how effective action could be taken to improve, extend and strengthen the movement. The report has been submitted and early Government action may be expected. The one welcome feature of the suggestions is the adoption of the multiple society as the primary unit in villages suggested by us for years and advocated strongly by the Agri-cultural Credit Department of the Reserve Bank The reconstruction of the primary

The growing difficulties of the Co-operative Movement throughout India in these times of unprecedented depression led the Government of India to hold an All-India Co-operative Conference at New Delhi on the 29th January 1934. In December 1936, another Conference of Registrars met at Delhi and discussed the situation further.

It may also be mentioned that the Indian States were not slow in introducing the co-operative movement within their limits, and the movement in some of the more important of the States, such as Hyderabad (Deccan), Mysore, Baroda, Gwallor and Indore has made considerable progress, more or less on the same lines as those followed in the neighbouring British

The landmarks in the history of the co-operative movement in India are: the Co-operative Credit Societies Act of 1904; the Co-operative Societies Act of 1912; the Maclagan Committee Report, 1915; the provincialisation of co-opera-tion, 1919; the establishment of institutes, unions and federations for propaganda; the Committees of Enquiry into the co-operative movement in several provinces; provincial legislation; the Report of the Boyal Commission on Agriculture, 1928; Reports of the Indian Central and Provincial Banking Enquiry Committees, 1981; and marketing surveys, debt conciliation schemes and land mortgage banking.

credit; central credit organisations; apex co-operative banks; propaganda by non-officials; non-credit agricultural co-operation; urban co-operative banking; long-term loans and debt redemption schemes; land mortgage banks; co-operative education; rectification and consolidation of the credit movement; organisation of

seriously undertaking programmes in the interests of the agriculturists. Money-lenders bills have been passed to restrict the evils of usury and debt legislation has been or is being passed in Madras, Central Provinces, Bombay and a few other provinces so as to reduce agricultural debt and to bring it within the repaying capacity of the debtor. The strengthening and reorientation of the co-operative movement has also been taken earnestly in hand, which would by the conversion of the credit premaries into multi-purpose societies, by or-ganising co-operative sale of agricultural produce and by promoting secondary occupations for the agriculturists on a co-operative basis, change the whole emphasis of the movement from merely credit to the entire needs of the rural population. Active mass-scale efforts at rural reconstruction and at increasing the earnings of agriculturists societies on these lines will be a great step in the represent the keynote of the present day trend right direction, but cannot yield the fullest of the Co-operative Movement.

Societies: Literary, Scientific and Social.

AGRICULTURAL AND HORTIQUITURAL SOCIETY (THE ROYAL) OF INDIA (Calcutta).—Founded 1820. A Class. Annual subscription Rs. 32. Entrance fee Rs. 8. B Class. Annual subscription Rs. 12. Secretary: S. Percy-Lancater, F.L.S., F.R.H.S., M.R.A.S. 1, Alipore Road, Alipore.

AGRI-HORTICULTURAL SOCIETY OF BURMA.—
Agri-Horticultural Gardens, Kandawglay,
P. O. Rangoon, Burma.

AGRI-HORTICULTURAL SOCIETY OF MADRAS.— Established 1835. Quarterly subscription for members in Class A Rs. 7, in Class B Rs. 3. President: H. E. The Governor of Madras; Chairman: The Hon. Mr. Justice S. Wadsworth, I.O.S. Hon. Secretary: Mr. B. S. Nirody, M.Sc. Hon. Treasurer: Mr. H. A. Buller, Teynampet, S. W. Madras.

ANTEROPOLOGICAL SOCIETY OF BOMBAY—Founded 1886, to promote the prosecution of Authropological research in India; to correspond with Anthropological Societies throughout the world; to hold monthly meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society, Annual subscription Rs. 10. President: H. T. Sorley, L.G.S.; Hon. Secretary: Dr. N. A. Thoothl, B.A., D.Phil. (Oxon.). Office Address: C/O K. R. Cama, Orlental Institute Bidg., 134-136, Apollo Street, Bombay.

BENARES MATHEMATICAL SOCIETY.—Founded in 1918 for the encouragement and promotion of ressarch in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It conducts a journal "The Proceedings of the Benares Mathematical Society" in which original papers on Mathematica are published and maintains a library. There are about 80 members from all parts of India. Admission fee Rs. 10. Annual subscription Rs. 12 (Resident members) and Rs. 5 (non-resident members). President: Dr. Gorskh Prasad, D.Sc.; Secretary: Prof. Chandi Prasad, M.A., B.Sc.; Editor: Dr. A. N. Singh, D.Sc.; Treasurer: Prof. Pashupati Prasad, M.A., B.Sc. 22, Senpura, Benares City.

BHANDARKAR ORIESTAL RESEARCH INSTITUTE, POONA.—The Institute was inaugurated on the 6th of July 1917, the 30th birthday of late 8ir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental antiquities, to provide an up-to-date Oriental library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G. Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Rail of the Institute. Since the 1st of April 1918 the Government of Bombay
